Index of Volumes 91–100

Władysław Orlicz (24 May 1903—9 August 1990); 97 (1991), (2), III–IV.
Editorial notes; 97 (1991), 266.

Allan, G. R.

Alvarez, J.

Aniszczyk, B.

Artstein, Z.

Assani, I.
(and J. Woś) An equivalent measure for some nonsingular transformations and application; 97 (1991), 1–12.

Bade, W. G.

Bagby, R. J.
Weak bounds for the maximal function in weighted Orlicz spaces; 95 (1990), 195–204.

Baribeau, L.
Multifonctions analytiques polygonales; 96 (1990), 167–173.

Barraa, M.

Bartoszek, W.
Asymptotic periodicity of the iterates of positive contractions on Banach lattices; 91 (1988), 179–188.

Bastero, J.

Beatrous, F.

Beauzamy, B.
An operator on a separable Hilbert space with all polynomials hypercyclic; 96 (1990), 83–90.
Beckhoff, F.
Korovkin theory in normed algebras; 100 (1991), 219–228.

Beddaa, A.
(and M. Oudadess) On a question of A. Wilansky in normed algebras; 95 (1989), 175–177.

Behrends, E.

Bellenot, S. F.
The maximum path theorem and extreme points of James’ space; 94 (1989), 1–15.

Benkirane, A.

Berkson, E.

Bernau, S. J.
(and C. B. Huijsmans) On the positivity of the unit element in a normed lattice ordered algebra; 97 (1991), 143–149.

Berteloot, F.
Hölder continuity of proper holomorphic mappings; 100 (1991), 229–235.

Blasco, O.
Interpolation between $H^1_{b_0}$ and $L^p_{b_1}$; 92 (1989), 205–210.

Bloom, S.
Sharp weights and BMO-preserving homeomorphisms; 96 (1990), 1–10.
An interpolation theorem with $A_p$-weighted $L^p$ spaces; 96 (1990), 11–15.

Blower, G.
A multiplier characterization of analytic UMD spaces; 96 (1990), 117–124.

Bonet, J.

Boos, J.

Bożejko, M.
Positive-definite kernels, length functions on groups and a noncommutative von Neumann inequality; 95 (1989), 107–118.

Bru, B.

Burkholder, D. L.
A proof of Pełczyński’s conjecture for the Haar system; 91 (1988), 79–83.

Burzyk, J.

Byczkowski, T.
Capri, O. N.

Carro, M. J.

Cassier, G.
Algèbres dûes uniformes d’opérateurs sur l’espace de Hilbert; 95 (1989), 17–32.

Cerdà, J.

Chan-Porn

Chu, C.-H.

Cobos, F.

Cohen, J.
BMO estimates for biharmonic multiple layer potentials; 91 (1988), 109–123.

Cupi, W.
On the essential spectrum and eigenvalue asymptotics of certain Schrödinger operators; 96 (1990), 195–202.

Dales, H. G.

Dalla, L.
(and S. Giotopoulos, N. Katseli) The socle and finite-dimensionality of a semiprime Banach algebra; 92 (1989), 201–204.

Defant, A.
Absolutely $p$-summing operators and Banach spaces containing all $l^n_p$ uniformly complemented; 95 (1990), 237–247.

Defant, M.
(and M. Junge) On weak $(r, 2)$-summing operators and weak Hilbert spaces; 96 (1990), 203–217.

Denker, M.

Detre, P. A.

Dineen, S.

Domanšski, P.
Domínguez, M.
Weighted inequalities for the Hilbert transform and the adjoint operator in the continuous case; 95 (1990), 229–236.

Drewnowski, L.

Dubinsky, E.

Duran, A. J.

Dziubański, J.
(and A. Hulanicki) On semigroups generated by left-invariant positive differential operators on nilpotent Lie groups; 94 (1989), 81–95.

Edgington, A.
Some more weak Hilbert spaces; 100 (1991), 1–11.

van Eijndhoven, S. J. L.

Fabian, M.
(and G. Godefroy) The dual of every Asplund space admits a projectional resolution of the identity; 91 (1988), 141–151.

Fan, A. H.
Equivalence et orthogonalité des mesures aléatoires engendrées par martingales positives homogènes; 98 (1991), 249–266.

Feinstein, J. F.

Ferenczi, S.

Fernández, D. L.

Fernández, A.

Ferrero, J.

Ferreira, E. V.
Weighted Lorentz norm inequalities for integral operators; 96 (1990), 125–134.

Finet, C.

Fong, C.-K.
(and A. Sołyński) On the left and right joint spectra in Banach algebras; 97 (1991), 151–156.

Franciosi, M.
Weighted rearrangements and higher integrability results; 92 (1989), 131–139.
Frankiewicz, R.

Fujii, N.

Gajda, Z.
(and Z. Kominek) On separation theorems for subadditive and superadditive functionals; 100 (1991), 25–38.

Gallardo, D.
Weighted integral inequalities for the ergodic maximal operator and other sublinear operators. Convergence of the averages and the ergodic Hilbert transform; 94 (1989), 121–147.

Gao, J.

Garay, B. M.

Garcia, J. B.

Gillespie, T. A.

Giotopoulos, S.

Girardi, M.

Głowacki, P.

Godefroy, G.
Metric characterization of first Baire class linear forms and octahedral norms; 95 (1989), 1–15.
(and M. Fabian) The dual of every Asplund space admits a projectional resolution of the identity; 91 (1988), 141–151.

Goldmann, H.
A remark on functional continuity of certain Fréchet algebras; 93 (1989), 249–257.

Goodson, G. R.
(and M. Lemańczyk) On the rank of a class of bijective substitutions; 96 (1990), 219–230.

Gordon, R. A.
The Denjoy extension of the Bochner, Pettis, and Dunford integrals; 92 (1989), 73–91.

Gossez, J.-P.
(and A. Benkirane) An approximation theorem in higher order Orlicz–Sobolev spaces and applications; 92 (1989), 231–255.
Graczyk, P.
Malliavin calculus for stable processes on homogeneous groups; 100 (1991), 183–205.

Groenbaek, N.

Haase, H.
Packing measures on ultrametric spaces; 91 (1988), 189–203.

Hajduk-Chmielewska, G.

Hebisch, W.
Sharp pointwise estimate for the kernels of the semi-group generated by sums of even powers of vector fields on homogeneous groups; 95 (1989), 93–106.
Almost everywhere summability of eigenfunction expansions associated to elliptic operators; 96 (1990), 263–275.
(and A. Sikora) A smooth subadditive homogeneous norm on a homogeneous group; 96 (1990), 231–236.

Heinich, H.
(et B. Bru) Applications de dualité dans les espaces de Kôthe; 93 (1989), 41–69.

Hernández, E.
Factorization and extrapolation of pairs of weights; 95 (1989), 179–193.

Huijsmans, C. B.
(and S. J. Bernau) On the positivity of the unit element in a normed lattice ordered algebra; 97 (1991), 143–149.

Hulanicki, A.
(and J. Dziubański) On semigroups generated by left-invariant positive differential operators on nilpotent Lie groups; 94 (1989), 81–95.

Iochum, B.

James, R. C.
Unconditional bases and the Radon–Nikodým property; 95 (1990), 255–262.

Janas, J.

Janson, S.

Jarosz, K.

Jenkins, J. W.
A characterization of bi-invariant Schwartz space multipliers on nilpotent Lie groups; 92 (1989), 101–129.

Jiang, H.
Weighted-BMO and the Hilbert transform; 100 (1991), 75–80.

Junge, M.
(and M. Defant) On weak $(r,2)$-summing operators and weak Hilbert spaces; 96 (1990), 203–217.
Kamiński, B.
An axiomatic definition of the entropy of a $\mathbb{Z}^d$-action on a Lebesgue space; 96 (1990), 135–144.
Generators of perfect $\sigma$-algebras of $\mathbb{Z}^d$-actions; 99 (1991), 1–10.

Kamowitz, H.

Kang, H.
On the Fourier transform of $e^{-\psi(x)}$; 98 (1991), 231–234.

Katselī, N.

Kazamaki, N.

Keller, G.

Khue, N. V.
(and B. D. Tac) Extending holomorphic maps from compact sets in infinite dimensions; 95 (1990), 263–272.

Kikuchi, M.

Klotz, L.

Kominek, Z.
(and Z. Gajda) On separation theorems for subadditive and superadditive functionals; 100 (1991), 25–38.

Kowalski, J. K.

Kowalski, Z. S.
Stationary perturbations based on Bernoulli processes; 97 (1991), 53–57.

Krone, J.

Kruszyński, P.

Küsters, K.-D.

Kwapień, S.
Kwiatkowski, J.

Lau, K. S.

Lau, K.-S.

delaubenfels, R.
$C^0$-Scalar operators on cyclic spaces; 92 (1989), 49–58.

Leiger, T.

Lemańczyk, M.

Lennard, C.
A new convexity property that implies a fixed point property for $L_1$; 100 (1991), 95–108.

Li, D.
Quantitative unconditionality of Banach spaces $E$ for which $\mathcal{K}(E)$ is an $M$-ideal in $\mathcal{L}(E)$; 96 (1990), 39–50.

Ligocka, E.

Lust-Piquard, F.
(and W. Schachermayer), Functions in $L^\infty(G)$ and associated convolution operators; 93 (1989), 109–136.

Lyons, R.

Aysik, G.

Maligranda, L.
Some remarks on Orlicz’s interpolation theorem; 95 (1989), 43–58.

Mankiewicz, P.
Factoring the identity operator on a subspace of $l^\infty_n$; 95 (1989), 133–139.

Mantlik, F.
Differentiable bundles of subspaces and operators in Banach spaces; 98 (1991), 41–51.

Martín-Reyes, F. J.
(and P. Ortega Salvador) Ergodic power functions for mean bounded, invertible, positive operators; 91 (1988), 131–139.

Mascioni, V.

Mastyło, M.
McPhail, J. D.

Meise, R.
Sequence space representations for zero-solutions of convolution equations on ultradifferentiable functions of Roumieu type; 92 (1989), 211–230.

Mentzen, M. K.
Invariant sub-$\sigma$-algebras for substitutions of constant length; 92 (1989), 257–273.
 Automorphisms with finite exact uniform rank; 100 (1991), 13–24.

Miyachi, A.
$H^p$ spaces over open subsets of $\mathbb{R}^n$; 95 (1990), 205–228.

Momm, S.
Partial differential operators of infinite order with constant coefficients on the space of analytic functions on the polydisc; 96 (1990), 51–71.

Móricz, F.

Mormul, P.

Moscatelli, V. B.
Strongly nonnorming subspaces and prequotients; 95 (1990), 249–254.

Muhly, P. S.

Müller, V.
Adjoining inverses to noncommutative Banach algebras and extensions of operators; 91 (1988), 73–77.

Narayanaswami, P. P.

Nawrocki, M.

Ngo, V.
The structure of module derivations of $C^\infty[0,1]$ into $L_p(0,1)$; 98 (1991), 191–202.

Noll, D.
(and W. Stadler) Abstract sliding hump technique and characterization of barrelled spaces; 94 (1989), 103–120.

Onneweer, C. W.
Orihuela, J.

Ortega Salvador, P.
(and F. J. Martín-Reyes) Ergodic power functions for mean bounded, invertible, positive operators; 91 (1988), 131–139.

Oudadess, M.
(and A. Beddaa) On a question of A. Wilansky in normed algebras; 95 (1989), 175–177.

Papadakis, M.
On hyperreflexivity and rank one density for non-CSL algebras; 98 (1991), 11–17.

Papageorgiou, N. S.
On transition multimeasures with values in a Banach space; 97 (1991), 37–51, [see also Editorial notes, 97 (1991), 266].

Parusiński, A.
Gradient homotopies of gradient vector fields; 96 (1990), 73–80.

Peetre, J.

Pick, L.
Two-weight weak type maximal inequalities in Orlicz classes; 100 (1991), 207–218.

Pietra, A.
Type and cotype numbers of operators on Banach spaces; 96 (1990), 21–37.

Pini, R.
A multiplier theorem for $H$-type groups; 100 (1991), 39–49.

Pliś, M. E.

Pryde, A. J.
Inequalities for exponentials in Banach algebras; 100 (1991), 87–94.

Przytycki, F.

Puerta, F.

Pych-Taberska, P.
Approximation properties of the partial sums of Fourier series of some almost periodic functions; 96 (1990), 91–103.

Pytlik, T.
Spherical functions and uniformly bounded representations of free groups; 100 (1991), 237–250.

Raith, P.
Hausdorff dimension for piecewise monotonic maps; 94 (1989), 17–33.
Rakočević, V.

Ransford, T. J.

Rauch, P.
Pseudocomplémentation dans les espaces de Banach; 100 (1991), 251–282.

Raynaud, Y.

Render, H.

Rojek, T.

Różelewicz, S.
On projections on subspaces of codimension one; 96 (1990), 17–19.

Ron, A.
A characterization of the approximation order for multivariate spline spaces; 98 (1991), 73–90.

Rudol, K.
A model for some analytic Toeplitz operators; 100 (1991), 81–86.

Rupp, R.
Stable rank of holomorphic function algebras; 97 (1991), 85–90.

Rusinek, J.
On generalized canonical commutation relations; 96 (1990), 175–181.

Ryll-Nardzewski, C.

Ryznar, M.

Rzeźuchowski, T.

Salinas, O.

Sato, R.
On pointwise ergodic theorems for positive operators; 97 (1991), 71–84.

Sato, S.

Sawyer, E.
Boundedness of classical operators on classical Lorentz spaces; 96 (1990), 145–158.

Saxon, S. A.
Schachermayer, W.
(and F. Lust-Piquard), Functions in $L^\infty(G)$ and associated convolution operators; 93
(and J. Orihuela, M. Valdivia) Every Radon–Nikodym Corson compact space is Eber-

Scheinberg, S.
(and H. Kamowitz) Some properties of endomorphisms of Lipschitz algebras; 96 (1990),
255–261.

Schütt, C.
(and S. Kwapieñ) Some combinatorial and probabilistic inequalities and their application
to Banach space theory II; 95 (1989), 141–154.

Seddighi, K.

Seeger, A.

Segovia, C.
(and O. N. Capri) Behaviour of $L^\prime$-Dini singular integrals in weighted $L^1$ spaces; 92

Segura de León, S.
Bukhvalov type characterizations of Urysohn operators; 99 (1991), 199–220.

Šemrl, P.
On algebraic generation of $B(X)$ by two subalgebras with square zero; 97 (1991), 139–142.
Quadratic functionals and Jordan $*$-derivations; 97 (1991), 157–165.

Sharpley, R.

Shim, Y.-S.

Sikora, A.
(and W. Hebisch) A smooth subadditive homogeneous norm on a homogeneous group;
96 (1990), 231–236.

Sjödin, T.
Weighted norm inequalities for Riesz potentials and fractional maximal functions in mixed
norm Lebesgue spaces; 97 (1991), 239–244.

Sołtysiak, A.
(and C.-K. Fong) On the left and right joint spectra in Banach algebras; 97 (1991),
151–156.
(and V. Müller) Spectrum of generators of a noncommutative Banach algebra; 93 (1989),
87–95.

Soria, F.
On an extrapolation theorem of Carleson–Sjölin type with applications to a.e. convergence
of Fourier series; 94 (1989), 235–244.

Stadler, W.
(and D. Noll) Abstract sliding hump technique and characterization of barrelled spaces;
94 (1989), 103–120.

Stempak, K.
Almost everywhere summability of Laguerre series; 100 (1991), 129–147.
Stochel, J.

Stokolos, A. M.
On the differentiation of integrals of functions from Orlicz classes; 94 (1989), 35–50.

Świech, A.
Spectral characterization of operators with precompact orbit; 96 (1990), 277–282.

Szalay, I.

Szarek, S. J.
Computing summing norms and type constants on few vectors; 98 (1991), 147–156.

Szwarc, R.

Tac, B. D.
(and N. V. Khuê) Extending holomorphic maps from compact sets in infinite dimensions; 95 (1990), 263–272.

Tardivel, V.

Taskinen, J.

Taylor, B. A.

Terreni, B.
Nonhomogeneous initial-boundary value problems for linear parabolic systems; 92 (1989), 141–175.

Thangavelu, S.
Some restriction theorems for the Heisenberg group; 99 (1991), 11–21.

Timoney, R. M.

Tomiyuk, B. J.

Torres, R. H.
Spaces of sequences, sampling theorem, and functions of exponential type; 100 (1991), 51–74.

Urbanik, K.

Urbaniński, M.
Valdivia, M.
Some properties of weakly countably determined Banach spaces; 93 (1989), 137–144.
(And J. Orihuela, W. Schachermayer) Every Radon-Nikodym Corson compact space

Vogt, D.
(and E. Dubinsky) Complemented subspaces in tame power series spaces; 93 (1989),
71–83.

Volkmann, P.

Wacker, H.-D.

Wallstén, R.
(and S. Janson, J. Peetre) A new look on Hankel forms over Fock space; 95 (1989),
33–41.

Wang, J.-H.

Weisz, F.
Inequalities relative to two-parameter Vilenkin–Fourier coefficients; 99 (1991), 221–223.

Weiyi, S.
et C. W. Onneweer) Homogeneous Besov spaces on locally compact Vilenkin groups;

Wik, I.
On Muckenhoupt’s classes of weight functions; 94 (1989), 245–255.

Wojciechowski, M.
Translation invariant projections in Sobolev spaces on tori in the $L^1$ and uniform norms;

Woś, J.
et I. Assani) An equivalent measure for some nonsingular transformations and appli-
cation; 97 (1991), 1–12.

Wu, P. Y.

Xu, Q.
Applications du théorème de factorisation pour des fonctions à valeurs opérateurs; 95
(1990), 273–292.

Yood, B.
et B. J. Tomiuk) Incomplete normed algebra norms on Banach algebras; 95 (1989),
119–132.

Zalduedo, I.
A geometric condition equivalent to commutativity in Banach algebras; 94 (1989), 187–
192.

Zdunik, Z.
et F. Przytycki, M. Urbański) Harmonic, Gibbs and Hausdorff measures on repellers

Żelazko, W.
A density theorem for $F$-spaces; 96 (1990), 159–166.
Zemánek, J.

Zeng, W.-B.

Ziemian, K.
Rate of convergence of conditional entropies for some maps of an interval; 93 (1989), 259–269.

Zimmermann, F.
On vector-valued Fourier multiplier theorems; 93 (1989), 201–222.
