**Tatuzawa, T.**

1. On Waring's problem in algebraic number fields, t. 24, p. 37-60.
2. Fourier analysis used in analytic number theory, t. 28, p. 263-272.

**Tausky, Olga**

2. The factorization of an integral matrix into a product of two integral symmetric matrices I, t. 24, p. 151-158.

**Terras, A.**

1. Some formulas for the Riemann zeta function at odd integer argument resulting from Fourier expansions of the Epstein zeta function, t. 29, p. 181-189.
2. The Fourier expansion of Epstein's zeta function for totally real algebraic number fields and some consequences for Dedekind's zeta function, t. 30, p. 187-197.

**Terras, R.**

1. A stopping time problem on the positive integers, t. 30, p. 241-252.

**Thomas, A.**

1. (et Y. Dupain) Sous-suites équiréparties d'une suite donnée, t. 26, p. 285-292.

**Tietäväinen, A.**

1. (and M. M. Dodson) A note on Waring's problem in  $GF(p)$ , t. 30, p. 159-167.

**Tijdeman, R.**

1. (and P. L. Cijssouw) On the transcendence of certain power series of algebraic numbers, t. 23, p. 301-305.
2. On the equation of Catalan, t. 29, p. 197-209.

**Timofeev, N. M.**

1. (and B. V. Levin) On the distribution of values of additive functions, t. 26, p. 333-364.

**Tonkov, T.**

1. On the average length of finite continued fractions, t. 26, p. 47-57.

**Trost, E.**

1. On a diophantine equation, t. 21, p. 55-57.

**Turán, P.**

13. (and P. Erdős) On some general problems in the theory of partitions, I, t. 18, p. 53-62.
14. (and S. Knapowski) Further developments in the comparative prime number theory, VII, t. 21, p. 193-201.

15. Über die Siegel-Nullstelle der Dirichletschen Funktionen, t. 24, p. 135-141.
16. (and S. Dancs) Investigations in powersum theory II, t. 25, p. 105-113.

**Uchiyama, S.**

2. A remark on a previous paper by Bredihin and Linnik, t. 21, p. 411-412.
3. On the difference between consecutive prime numbers, t. 27, p. 153-157.

**Vaughan, R. C.**

1. On Goldbach's problem, t. 22, p. 21-48.
2. (and H. L. Montgomery) The exceptional set of Goldbach's problem, t. 27, p. 353-370.

**Vaughan, Theresa**

1. (and J. V. Brawley, L. Carlitz) Linear permutation polynomials with coefficient in a subfield, t. 24, p. 193-199.

**Viola, C.**

1. On the diophantine equations  $\prod_0^k x_i - \sum_0^k x_i = n$  and  $\sum_0^k \frac{1}{x_i} = \frac{a}{n}$ , t. 22, p. 339-352
2. (and M. Forti) Density estimates for the zeros of  $L$ -functions, t. 23, p. 379-391

**Voronetsky, A. B.**

1. (and A. V. Malyshev) The proof of Minkowski's conjecture concerning the critical determinant of the region  $|x|^p + |y|^p < 1$  for  $p > 6$ , t. 27, p. 447-458.

**Voronin, S. M. (Воронин, С. М.)**

1. О функциональной независимости  $L$ -функций Дирихле, t. 27, p. 493-503.

**Wagner, C. G.**

1. Interpolation series for continuous functions on  $\pi$ -adic completions of  $\text{GF}(q, x)$ , t. 17, p. 389-406.

**Waldschmidt, M.**

1. Propriétés arithmétiques des valeurs de fonctions méromorphes algébriquement indépendantes, t. 23, p. 19-88.

**Wallisser, R.**

1. Über die arithmetische Natur der Werte der Lösungen einer Funktionalgleichung von H. Poincaré, t. 25, p. 81-92.

**Wasén, R.**

1. Remark on a problem of Schinzel, t. 29, p. 425-426.

**Washington L.**

1. Class numbers of elliptic function fields and the distribution of prime numbers, t. 28, p. 111-114.

**Waterman, M. S.**

1. A Kuzmin theorem for a class of number theoretic endomorphisms, t. 19, p. 31-41.

**Watson, G. L.**

1. The least common denominator of the coefficients of a perfect quadratic form, t. 18, p. 29-36.

2. One-class genera of positive quaternary quadratic forms, t. 24, p. 461-475.
3. One-class genera of positive quadratic forms in at least five variables, t. 26, p. 309-327.
4. Transformations of a quadratic form which do not increase the class number (II), t. 27, p. 171-189.

**Webb, W. A.**

1. Waring's problem in  $\text{GF}[q, x]$ , t. 22, p. 207-220.

**Weinberger, P. J.**

1. (and D. Shanks) A quadratic field of prime discriminant requiring three generators for its class group and related theory, t. 21, p. 71-87.
2. Exponents of the class groups of complex quadratic fields, t. 22, p. 117-124.
3. (and H. L. Montgomery) Notes on small class numbers, t. 24, p. 529-542.

**Whiteman, A. L.**

2. (and J. B. Muskat) The cyclotomic numbers of order twenty, t. 17, p. 185-216.

**Wiertelak, K.**

1. On the application of Turán's method to the theory of Dirichlet  $L$ -functions, t. 19, p. 249-259.
2. (and W. Staś) Some estimates in the theory of Dedekind Zeta-functions, t. 23, p. 127-135.
3. (and W. Staś) On some estimates in the theory of  $\zeta(s, \chi)$ -functions, t. 26, p. 293-301.

**Williams, H. C.**

1. On a generalization of the Lucas functions, t. 20, p. 33-51.
2. A generalization of Lehmer's functions, t. 29, p. 315-341.

**Williams, K. S.**

1. (and P. A. Leonard) Forms representable by integral binary quadratic forms, t. 26, p. 1-9.
2. (and P. A. Leonard) The cyclotomic numbers of order eleven, t. 26, p. 365-383.

**Willis, J. M.**

1. (und R. Schark) Asymptotisches Verhalten einer diophantischen Approximation-Funktion, t. 22, p. 129-136.

**Wirsing, E.**

1. On the theorem of Gauss-Kusmin-Lévy and a Frobenius type theorem for function spaces, t. 24, p. 507-528.

**Wolke, D.**

1. A note on the least prime quadratic residue  $(\text{mod } p)$ , t. 16, p. 85-87.
2. Polynomial values with small prime divisors, t. 19, p. 327-333.

**Woods, A. C.**

1. (and R. P. Bambah) The thinnest double lattice covering of three-spheres, t. 18, p. 321-336.

**Wójcik, J.**

4. (and A. Schinzel) A note on the paper "Reducibility of lacunary polynomials I", t. 19, p. 195-201.
5. A purely algebraic proof of special cases of Tchebotarev's theorem, t. 28, p. 137-145.

Wunderlich, M. C.

1. A general class of sieve generated sequences, t. 16, p. 41–56.
2. A probabilistic setting for prime number theory, t. 26, p. 59–81.

Yakovleva, N. A. (Яковлева, Н. А.)

1. (и Б. М. Бредихин) Применения дисперсного метода в проблеме Гольдбаха, t. 27, p. 253–263.

Yap, H. P.

1. Structure of maximal sum-free sets in  $C_p$ , t. 17, p. 29–35.

Yudin, A. A. (Юдин, А. А.)

2. (и Б. В. Левин) Локальные предельные теоремы для аддитивных арифметических функций, t. 22, p. 233–247.

Zame, A.

1. On normal sets of numbers, t. 20, p. 147–154.

Znam, Š.

1. On properties of systems of arithmetic sequences, t. 26, p. 279–283.
