Vaughan, R. C.

3. Homogeneous additive equations and Waring's problem, t. 33, p. 231-253.
4. An elementary method in prime number theory, t. 37, p. 111-115.

Vélez, W. Y.

1. Some remarks on a number theoretic problem of Graham, t. 32, p. 233-238.
2. On normal binomials, t. 36, p. 113-124.
3. (and M. J. Norris) Structure theorems for radical extensions of fields, t. 38, p. 111-115.

Vince, A.

1. Period of a linear recurrence, t. 39, p. 303-311.

Voorhoeve, M.

1. (and K. Györy, and R. Tijdeman) On the equation $1^k + 2^k + \dots + x^k = y^z$, t. 37, p. 233-240.

Waldschmidt, M.

2. (and W. D. Brownawell) The algebraic independence of certain numbers to algebraic powers, t. 32, p. 63-71.
3. A lower bound for linear forms in logarithms, t. 37, p. 267-283.

Waldspurger, J.-L.

1. Formes quadratiques à 4 variables et relèvement, t. 36, p. 377-405.

Walfisz, A. A.

3. Über die simultane Darstellung zweier ganzer Zahlen durch quadratische und lineare Formen, t. 35, p. 289-301.

Walter, C. D.

1. Brauer's class number relation, t. 35, p. 33-40.
2. Kuroda's class number relation, t. 35, p. 41-51.

Wasén, R.

2. (and A. Rotkiewicz) Lehmer's numbers, t. 36, p. 203-217.

Washington, L. C.

2. The derivative of p -adic L -functions, t. 40, p. 109-115.

Watson, G. L.

5. Existence of an indecomposable positive quadratic form in a given genus of rank at least 14, t. 35, p. 55-100.

Webb, W. A.

2. (and M. J. Knight) Uniform distribution of third order linear recurrence sequences, t. 36, p. 7-20.

Wepkhvadze, T. V. (Вепхвадзе, Т. В.)

1. К одной формуле Зигеля, t. 40, p. 125-142.

Wiertelak, K.

4. (and W. Staś) Further applications of Turán's methods to the distribution of prime ideals in ideal classes mod f , t. 31, p. 153-165.
5. On the density of some sets of primes, I, t. 34, p. 183-196.
6. On the density of some sets of primes, II, t. 34, p. 197-210.

Williams, H. C.

3. (and M. Newman, and D. Shanks) Simple groups of square order and an interesting sequence of primes, t. 38, p. 129-140.
4. The primality of certain integers of the form $2A7^n - 1$, t. 39, p. 7-17.

Williams, K. S.

3. (and P. A. Leonard) A rational sixteenth power reciprocity law, t. 33, p. 365-377.
4. On the class number of $\mathcal{O}(\sqrt{-p})$ modulo 16, for $p \equiv 1 \pmod{8}$ a prime, t. 39, p. 381-398.
5. (and P. Kaplan) On the class numbers of $\mathcal{O}(\sqrt{\pm 2p})$ modulo 16, for $p \equiv 1 \pmod{8}$ a prime, t. 40, p. 289-296.
6. (and P. Kaplan) Congruences modulo 16 for the class numbers of the quadratic fields $\mathcal{O}(\sqrt{\pm p})$ and $\mathcal{O}(\sqrt{\pm 2p})$ for p a prime congruent to 5 modulo 8, t. 40, p. 375-397.

Wirsing, E.

2. Additive functions with restricted growth on the numbers of the form $p+1$, t. 37, p. 345-357.

Wolfart, J.

1. Transzendente Zahlen als Fourierkoeffizienten von Heekes Modulformen, t. 39, p. 193-205.

Wójcik, J.

6. Contributions to the theory of Kummer extensions, t. 40, p. 155-174.

Yucas, J. L.

1. Quadratic forms and radicals of fields, t. 39, p. 313-322.
