ACTA ARITHMETICA
L (1988)

Conspectus materiae tomorum XLI–L (1982–1988)

Abbott, H. L.
4. On sum-free sequences, t. 48, p. 93–96.

Agou, S.
3. Sur l'irréductibilité des trinômes $X^{p^r+1}-aX-b$ sur les corps finis F_{p^s}, t. 44, p. 343–355.

Agrawal, M. K.
1. (and J. C. Parnami and A. R. Rajwade) Jacobi sums and cyclotomic numbers for a finite field, t. 41, p. 1–13.
2. (and J. C. Parnami, S. Pall and A. R. Rajwade) Criterion for 2 to be an lth power, t. 43, p. 361–365.

Alemu, Y.
1. On zeros of forms over local fields, t. 45, p. 163–171.
2. On zeros of diagonal forms over p-adic fields, t. 48, p. 261–273.

Alladi, K.
1. An Erdős–Kac theorem for integers without large prime factors, t. 49, p. 81–105.

Allouche J.-P.
1. (et H. Cohen, M. Mendès France et J. O. Shallit) De nouveaux curieux produits infinis, t. 49, p. 141–153.

Antoniadis, J. A.
1. Über die Berechnung von Multiplikatorgleichungen, t. 43, p. 253–272.

Azuhata, T.
1. On Fermat's last theorem, t. 45, p. 19–27.

Baker, R. C.
4. (and J. Pintz) The distribution of square-free numbers, t. 46, p. 73–79.
5. The greatest prime factor of the integers in an interval, t. 47, p. 198–231.
6. Square-free points on ellipsoids, t. 50, p. 215–219.

Balakrishnan, U.
1. Extreme values of the Dedekind zeta function, t. 46, p. 199–209.

Balasubramanian, R.
2. (and C. J. Mozzochi) An improved upper bound for $G(k)$ in Waring's problem for relatively small k, t. 43, p. 283–285.
3. (and K. Ramachandra) Progress towards a conjecture on the mean value of Titchmarsh series, III, t. 45, p. 309–318.
4. A note on a result of Erdős, Sárközy and Sós, t. 49, p. 45–53.
5. (and K. Ramachandra) On the number of integers n such that $nd(n) \leqslant x$, t. 49, p. 313–322.

6. (and K. Ramachandra and M. V. Subbarao) On the error function in the asymptotic formula for the counting function of k-full numbers, t. 50, p. 107–118.

Balog, A.

1. (and A. Sárközy) On sums of sequences of integers, I, t. 44, p. 73–86.

Bambah, R. P.

3. (and N. J. A. Sloane) On a problem of Ryškov concerning lattice covergings, t. 42, p. 107–109.

Bantle, G.

1. Untere Abschätzung für die Anzahl der B-Zwillinge auf kurzen Intervallen, t. 46, p. 313–329.
2. An asymptotic formula for B-twins, t. 47, p. 297–312.

Barrucand, P.

1. (et F. Laubie) Sur les symboles des restes quadratiques des discriminants, t. 48, p. 81–88.

Bartz, K. M.

2. An effective order of Hecke–Landau zeta functions near the line $\sigma = 1$, t. 50, p. 183–193.

Bazylewicz, A.

2. Traces of monomials in algebraic numbers, t. 41, p. 101–116.
3. An extension of a result of C. J. Smyth to polynomials in several variables, t. 50, p. 211–214.

Beard, J. T. B., Jr.

3. (and R. M. McConnel) Matrix field extensions, t. 41, p. 213–221.

Beck, J.

1. Some upper bounds in the theory of irregularities of distribution, t. 43, p. 115–130.
2. (and J. Spencer) Well-distributed 2-colorings of integers relative to long arithmetic progressions, t. 43, p. 287–294.

Becker-Landeck, P.-G.

1. Maße für algebraische Unabhängigkeit nach einer Methode von Mahler, t. 50, p. 279–293.

Béjian, R.

1. Minoration de la discrépance d'une suite quelconque sur T, t. 41, p. 185–202.

Berend, D.

1. Actions of sets of integers on irrationals, t. 48, p. 275–306.

Berger, M. A.

1. (and A. Felzenbaum and A. Fraenkel) Necessary condition for the existence of an incongruent covering system with odd moduli, t. 45, p. 375–379.
2. (and A. Felzenbaum and A. S. Fraenkel) Necessary condition for the existence of an incongruent covering system with odd moduli II, t. 48, p. 73–79.
3. (and A. Felzenbaum and A. S. Fraenkel) Improvements to the Newman–Znám result for disjoint covering systems, t. 50, p. 1–13.
4. (and A. Felzenbaum and A. S. Fraenkel) Disjoint covering systems with precisely one multiple modulus, t. 50, p. 171–182.

Berndt, B. C.

2. (and R. J. Evans) Chapter 15 of the Ramanujan Second Notebook: Part II, Modular forms, t. 47, p. 123–142.

Bernik, V. I. (Берник, В. И.)

1. Применение размерности Хаусдорфа в теории диофантовых приближений t. 42, p. 219–253.

Beukers, F.

1. (and T. Matala-aho and K. Väänänen) Remarks on the arithmetic properties of the values of hypergeometric functions, t. 42, p. 281–289.

Borel, J.-P.

2. Sur le prolongement des fonctions ζ associées a un système de nombres premiers généralisés de Beurling, t. 43, p. 273–282.

Bouhamza, M.

1. Algorithme de Jacobi–Perron dans les corps de nombres de degré 4, t. 44, p. 141–145.

Bourgain, J.

1. Sur le minimum d'une somme de cosinus, t. 45, p. 381–389.

Bovey, J. D.

6. (and M. M. Dodson) The Hausdorff dimension of systems of linear forms, t. 45, p. 337–358.

Boyd, D. W.

3. On linear recurrence relations satisfied by Pisot sequences, t. 47, p. 13–27.
4. Pisot sequences which satisfy no linear recurrence II, t. 48, p. 191–195.

Brindza, B.

1. On some generalizations of the diophantine equation $1^k+2^k+\ldots+x^k=y^z$, t. 44, p. 99–107.
2. On a diophantine equation connected with the Fermat equation, t. 44, p. 357–363.
3. (and R. C. Mason) LeVeque's superelliptic equation over function fields, t. 47, p. 167–173.
4. On S-integral solutions of the Catalan equation, t. 48, p. 397–412.

Brown, Ezra

2. (and D. B. Shapiro and R. K. Markanda) Some euclidean properties for real quadratic fields, t. 47, p. 143–152.

Bump, D.

1. (and S. Friedberg and D. Goldfeld) Poincaré series and Kloosterman sums for SL(3, Z), t. 50, p. 31–89.

Burke, J. R.

1. A notion of density and essential components in GF$[p, x]$, t. 44, p. 299–306.
2. (and W. A. Webb) Sequences of integers whose iterated sums are disjoint, t. 44, p. 1–6.

Cantor, D. G.

2. (and E. G. Straus) On a conjecture of D. H. Lehmer, t. 42, p. 97–100.

2a. (and E. G. Straus) Correction to the paper "On a conjecture of D. H. Lehmer", t. 42, p. 325.

Car, M.

1. Polynômes de $F_q[X]$ ayant un diviseur de degré donné, t. 43, p. 131–154.
2. Sommes de puissances et d'irréductibles dans $F_q[X]$, t. 44, p. 7–34.
3. Sommes de carrés de polynômes irréductibles dans $F_q[X]$, t. 44, p. 307–321.
4. Ensembles de polynômes irréductibles et théorèmes de densité, t. 44, p. 323–342.
5. Théorèmes de densité dans $F_q[X]$, t. 48, p. 145–165.
6. Un problème de diviseurs dans $F_q[X]$, t. 50, p. 339–350.

Cayford, A. H.

1. (and E. G. Straus) Singularities of analytic functions in a differential ring, t. 50, p. 147–154.

Chaimovich, M.

1. (and G. Freiman and J. Schönheim) On exceptions to Szegedy's theorem, t. 49, p. 107–112.

Childress, N.

1. (and R. Gold) Zeros of p-adic L-functions, t. 48, p. 63–71.

Cohen, H.

3. (et J.-P. Allouche, M. Mendès France et. J. O. Shallit) De nouveaux curieux produits infinis, t. 49, p. 141–153.

Colliot-Thélène, J.-L.

1. (et. J.-J. Sansuc) Sur le principe de Hasse et l'approximation faible, et sur une hypothèse de Schinzel, t. 41, p. 33–53.

Cook, R. J.

4. Pairs of additive equations IV. Sextic equations, t. 43, p. 227–243.
5. (and S. Raghavan) On positive definite quadratic polynomials, t. 45, p. 319–328.

Cordes, C. M.

2. Quadratic forms over fields with four quaternion algebras, t. 41, p. 55–70.

Cugiani, M.

1. Giovanni Ricci 1904–1973, t. 46, p. 303–306.

Debes, P.

1. G-functions et théorème d'irréductibilite de Hilbert, t. 47, p. 371–403.

Decomps-Guilloux, A.

2. (et M. Grandet-Hugot) Nouvelles caractérisations des nombres de Pisot et de Salem, t. 50, p. 155–170.

Deinert, E.

1. (und E. Härtter und J. Zöllner) Verzichtbare und unverzichtbare Elemente bei der Darstellung als Summe und als Differenz von Quadraten, t. 45, p. 153–161.

De Koninck, J.-M.

2. (and R. Sitaramachandrarao) Sums involving the largest prime divisor of an integer, t. 48, p. 1–8.

Delange, H.

9. Sur les fonctions arithmétiques multiplicatives de module $\leqslant 1$, t. 42, p. 121–151.
10. Sur les fonctions multiplicatives à valeurs entières, t. 46, p. 165–195.
11. Sur les moments des fonctions additives, t. 49, p. 213–236.

Deshouillers, J.-M.

4. (and H. Iwaniec) Power mean-values for Dirichlet's polynomials and the Riemann zeta-function, II, t. 43, p. 305–312.
5. (et F. Dress) Sommes de diviseurs et structure multiplicative des entiers, t. 49, p. 341–375.

Deuring, M.

1. Carl Ludwig Siegel, 31.12.1896–4.4.1981, t. 45, p. 93–107.

2. Liste der Publikationen von Max Deuring, t. 47, p. 191–192.

Dietz, B.

1. On the gaps of the Lagrange spectrum, t. 45, p. 59–64.

Dodson, M. M.

6. A note on the Hausdorff–Besicovitch dimension of systems of linear forms, t. 44, p. 87–98.
7. (and J. D. Bovey) The Hausdorff dimension of systems of linear forms, t. 45, p. 337–358.

Douai, J. C.

1. (et C. Touibi) Courbes définies sur les corps de séries formelles et loi de réciprocité, t. 42, p. 101–106.

1a. (et C. Touibi) Courbes définies sur les corps de séries formelles et loi de réciprocité, Errata, t. 46, p. 197.

Dress, F.

6. (et J.-M. Deshouillers) Sommes de diviseurs et structure multiplicative des entiers, t. 49, p. 341–375.

Dvornicich, R.

2. (and U. Zannier) On polynomials taking small values at integral arguments, t. 42, p. 189–196.

Effinger, G.

1. A Goldbach theorem for polynomials of low degree over odd finite fields, t. 42, p. 329–365.

Eichler, M.

7. Das wissenschaftliche Werk von Max Deuring, t. 47, p. 187–190.
8. New formulas for the class number of imaginary quadratic fields, t. 49, p. 35–43.

Elliot, P. D. T. A.

13. A local Turán–Kubilius inequality, t. 49, p. 127–139.

Erdős, P.

37. (and A. Sárkőzy) Some asymptotic formulas on generalized divisor functions, III, t. 41, p. 395–411.
38. (and J. Turk) Products of integers in short intervals, t. 44, p. 147–174.
39. (and C. B. Lacampagne and J. L. Selfridge) Prime factors of binomial coefficients and related problems, t. 49, p. 507–523.

Evans, J. H.

3. (and B. C. Berndt) Chapter 15 of the Ramanujan Second Notebook: Part II, Modular forms, t. 47, p. 123–142.

Evertse, J.-H.

1. On equations in the S-units over function fields of characteristic 0, t. 47, p. 233–253.
2. (and K. Győry, T. N. Shorey and R. Tijdeman) Equal values of binary forms at integral points, t. 48, p. 379–396.
3. (and K. Győry) Finiteness criteria for decomposable form equations, t. 50, p. 357–379.

Fabrykowski, J.

1. Multidimensional covering systems of congruences, t. 43, p. 191–208.

Faure, H.

1. Discrépance de suites associées à un système de numération (en dimension s), t. 41, p. 337–351.

Fejes Tóth, L.

1. Note to a paper of Bambah, Rogers and Zassenhaus, t. 50, p. 119–122.

Felzenbaum, A.

1. (and M. A. Berger and A. Fraenkel) Necessary condition for the existence of an incongruent covering system with odd moduli, t. 45, p. 375–379.
2. (and M. A. Berger and A. S. Fraenkel) Necessary condition for the existence of an incongruent covering system with odd moduli II, t. 48, p. 73–79.
3. (and M. A. Berger and A. S. Fraenkel) Improvements to the Newman-Znám result for disjoint covering systems, t. 50, p. 1–13.
4. (and M. A. Berger and A. S. Fraenkel) Disjoint covering systems with precisely one multiple modulus, t. 50, p. 171–182.

Filaseta, M.

1. Prime values of irreducible polynomials, t. 50, p. 133–145.

Fouvry, E.

1. Répartition des suites dans les progressions arithmétiques, t. 41, p. 359–382.
2. (and H. Iwaniec) Primes in arithmetic progressions, t. 42, p. 197–218.
3. Sur le théorème de Brun–Titchmarsh, t. 43, p. 417–424.

Fraenkel, A. S.

1. (and M. A. Berger and A. Felzenbaum) Necessary condition for the existence of an incongruent covering system with odd moduli, t. 45, p. 375–379.
2. (and M. A. Berger and A. Felzenbaum) Necessary condition for the existence of an incongruent covering system with odd moduli II, t. 48, p. 73–79.
3. (and M. A. Berger and A. Felzenbaum) Improvements to the Newman-Znám result for the disjoint covering systems, t. 50, p. 1–13.
4. (and M. A. Berger and A. Felzenbaum) Disjoint covering systems with precisely one multiple modulus, t. 50, p. 171–182.

Freimann, G. A. (Freiman, G.)

1. (and M. Chaimovich and J. Schönheim) On exceptions to Szegedy's theorem, t. 49, p. 107–112.
2. (and H. Halberstam) On a product of sines, t. 49, p. 377–385.

Fried, M.

6. (and J. Smith) Irreducible discriminant components of coefficient spaces, t. 44, p. 59–72.

Friedberg, S.

1. (and D. Bump and D. Goldfeld) Poincaré series and Kloosterman sums for SL(3, Z), t. 50, p. 31–89.

Friedlander, J. B.

5. (and H. Iwaniec) The divisor problem for arithmetic progressions, t. 45, p. 273–277.

Friesen, Ch.

1. (and K. S. Williams and H. Hardy) On the evaluation of the Legendre symbol $\left(\frac{A+B\sqrt{m}}{p}\right)$, t. 45, p. 255–272.

Furstenberg, H.

1. (and B. Weiss) Simulatenous diophantine approximation and *IP*-sets, t. 49, p. 413–426.

Galambos, J.

6. (and P. Szüsz) On the distribution of multiplicative arithmetical functions, t. 47, p. 57–62.

Gerth III, F.

2. Densities for 3-class ranks of pure cubic fields, t. 46, p. 227–242.
2a. Correction to the paper "Densities for 3-class ranks of pure cubic fields", t. 50, p. 405.

Gold, R.

3. (and M. Madan) Galois representations of Iwasawa modules, t. 46, p. 243–255.
4. (and N. Childress) Zeros of *p*-adic *L*-functions, t. 48, p. 63–71.

Goldfeld, D.

2. (and D. Bump and S. Friedberg) Poincaré series and Kloosterman sums for SL(3, Z), t. 50, p. 31–89.

Goldston, D. A.

2. On a result of Littlewood concerning prime numbers II, t. 43, p. 49–51.

Graham, S. W.

2. (and G. Kolesnik) On the difference between consecutive squarefree integers, t. 49, p. 435–447.

Gramain, F.
