

**Conspectus materiae tomorum
LXI–LXX (1992–1995)**

Editor's note; 65 (1993), 195.

Abercrombie, A. G.

- 1*. Beatty sequences and multiplicative number theory; 70 (1995), 195–207.

Ably, M.

1. Une version quantitative du théorème de Lindemann–Weierstrass; 67 (1994), 29–45.

Acharya, V. V.

1. (and S. A. Katre) Cyclotomic numbers of order $2l$, l an odd prime; 69 (1995), 51–74.

Adelberg, A.

1. On the degrees of irreducible factors of higher order Bernoulli polynomials; 62 (1992), 329–342.

Agoh, T.

2. Some variations and consequences of the Kummer–Mirimanoff congruences; 62 (1992), 73–96.

Ahlsvede, R.

1. (and L. H. Khachatryan) On extremal sets without coprimes; 66 (1994), 89–99.

Almkvist, G.

1. On the differences of the partition function; 61 (1992), 173–181.

Amoroso, F.

3. Values of polynomials with integer coefficients and distance to their common zeros; 68 (1994), 101–112.

Bachoc, C.

1. (et S.-H. Kwon) Sur les extensions de groupe de Galois \tilde{A}_4 ; 62 (1992), 1–10.

Badea, C.

1. A theorem on irrationality of infinite series and applications; 63 (1993), 313–323.

Baker, R. C.

8. (and S. Schäffer) Pairs of additive quadratic forms modulo one; 62 (1992), 45–59.
9. (and J. Brüdern, G. Harman) Simultaneous diophantine approximation with square-free numbers; 63 (1993), 51–60.

* The number (say n) preceding each title indicates that the author has already published n papers in Acta Arithmetica.

Balasubramanian, R.

9. (and K. Ramachandra) On the zeros of $\zeta'(s) - a$; 63 (1993), 183–191.
10. (and K. Ramachandra) On the zeros of $\zeta(s) - a$; 63 (1993), 359–366.
11. (and A. Ivić, K. Ramachandra) An application of the Hooley–Huxley contour; 65 (1993), 45–51.
12. (and T. N. Shorey) Squares in products from a block of consecutive integers; 65 (1993), 213–220.

Bateman, P. T.

3. (and A. J. Hildebrand, G. B. Purdy) Sums of distinct squares; 67 (1994), 349–380.

Baxa, C.

1. (and J. Schoißengeier) Minimum and maximum order of magnitude of the discrepancy of $(n\alpha)$; 68 (1994), 281–290.

Bennett, M. A.

1. An ideal Waring problem with restricted summands; 66 (1994), 125–132.

Berend, D.

3. (and M. D. Boshernitzan) On a result of Mahler on the decimal expansions of $(n\alpha)$; 66 (1994), 315–322.
4. On the roots of certain sequences of congruences; 67 (1994), 97–104.

Berndt, B. C.

3. Hans Rademacher (1892–1969); 61 (1992), 209–225.

Berry, T. G.

1. Points at rational distance from the vertices of a triangle; 62 (1992), 391–398.

Berthé, V.

1. Automates et valeurs de transcendance du logarithme de Carlitz; 66 (1994), 369–390.

Bertin, M. J.

5. K -nombres de Pisot et de Salem; 68 (1994), 113–131.

Bézivin, J.-P.

2. Itération de polynômes et fonctions entières arithmétiques; 68 (1994), 11–25.

Bhowmik, G.

1. (and O. Ramaré) Average orders of multiplicative arithmetical functions of integer matrices; 66 (1994), 45–62.

Blass, J.

- 2a. (and A. M. W. Glass, D. K. Manski, D. B. Meronk, R. P. Steiner) Corrigendum to the paper “Constants for lower bounds for linear forms in the logarithms of algebraic numbers II. The homogeneous rational case” (*Acta Arith.* 55 (1990), 15–22); 65 (1993), 383.

Blecksmith, R.

1. (and M. Filaseta, C. Nicol) A result on the digits of a^n ; 64 (1993), 331–339.

Bleher, P. M.

1. (and F. J. Dyson) Mean square value of exponential sums related to representation of integers as sum of two squares; 68 (1994), 71–84.
2. (and F. J. Dyson) Mean square limit for lattice points in a sphere; 68 (1994), 383–393.

Boklan, K. D.

1. A reduction technique in Waring’s problem, I; 65 (1993), 147–161.

Bollobás, B.

1. (and P. Erdős, G. Jin) Ramsey problems in additive number theory; 64 (1993), 341–355.

Bombieri, E.

5. On the Thue–Mahler equation II; 67 (1994), 69–96.
6. (and S. Sperber) On the estimation of certain exponential sums; 69 (1995), 329–358.

Boshernitzan, M. D.

1. (and D. Berend) On a result of Mahler on the decimal expansions of $(n\alpha)$; 66 (1994), 315–322.

Boyd, D. W.

5. Irreducible polynomials with many roots of maximal modulus; 68 (1994), 85–88.

Brillhart, J.

2. Derrick Henry Lehmer; 62 (1992), 207–213.

Brinkhuis, J.

1. Normal integral bases and the Spiegelungssatz of Scholz; 69 (1995), 1–9.

Brüdern, J.

2. (and R. J. Cook) On simultaneous diagonal equations and inequalities; 62 (1992), 125–149.
3. (and R. C. Baker, G. Harman) Simultaneous diophantine approximation with square-free numbers; 63 (1993), 51–60.

Burke, J. R.

3. A remark on B_2 -sequences in $\text{GF}[p, x]$; 70 (1995), 93–96.

Cai, T. X.

1. On an additive function on the set of ideals of an arbitrary number field; 70 (1995), 97–102.

Cantor, D. G.

3. On the continued fractions of quadratic surds; 68 (1994), 295–305.

Car, M.

7. Sommes d'exponentielles dans $\mathbb{F}_{2^h}((X^{-1}))$; 62 (1992), 303–328.
8. (et J. Cherly) Sommes de cubes dans l'anneau $\mathbb{F}_{2^h}[X]$; 65 (1993), 227–241.
9. Répartition modulo 1 dans un corps de séries formelles sur un corps fini; 69 (1995), 229–242.

Carletti, E.

1. (and G. Monti Bragadin, A. Perelli) On general L -functions; 66 (1994), 147–179.

Chabert, J.-L.

1. Dérivées et différences divisées à valeurs entières; 63 (1993), 143–156.

Chace, C. E.

1. The divisor problem for arithmetic progressions with small modulus; 61 (1992), 35–50.

Chaix, H.

1. (et H. Faure) Discrépance et diaphonie en dimension un; 63 (1993), 103–141.

Chen, S.

1. On Sidon sequences of even orders; 64 (1993), 325–330.

Cherly, J.

1. (et M. Car) Sommes de cubes dans l'anneau $\mathbb{F}_{2^h}[X]$; 65 (1993), 227–241.

Chou, W.-S.

1. (and G. L. Mullen) Generating linear spans over finite fields; 61 (1992), 183–191.

Cilleruelo, J.

3. (and A. Córdoba) $B_2[\infty]$ -sequences of square numbers; 61 (1992), 265–270.

Cochrane, T.

1. On representing the multiple of a number by a quadratic form; 63 (1993), 211–222.

Cohen, S. D.

- 4a. Corrigendum: “Galois groups of trinomials” (Acta Arith. 54 (1989), 43–49); 70 (1995), 193.

Cohn, J. H. E.

6. The diophantine equation $x^2 + 19 = y^n$; 61 (1992), 193–197.
7. The diophantine equation $x^2 + C = y^n$; 65 (1993), 367–381.

Coleman, M. D.

1. The Rosser–Iwaniec sieve in number fields, with an application; 65 (1993), 53–83.

Cook, R. J.

7. (and J. Brüdern) On simultaneous diagonal equations and inequalities; 62 (1992), 125–149.

Córdoba, A.

1. (and J. Cilleruelo) $B_2[\infty]$ -sequences of square numbers; 61 (1992), 265–270.

Costa, A.

1. Modular forms and class number congruences; 61 (1992), 101–118.

Coulangeon, R.

1. Réseaux unimodulaires quaternioniens en dimension ≤ 32 ; 70 (1995), 9–24.

Crespo, T.

1. Central extensions of the alternating group as Galois groups; 66 (1994), 229–236.
2. Galois realization of central extensions of the symmetric group with kernel a cyclic 2-group; 70 (1995), 183–192.

Denis, L.

1. Indépendance algébrique et exponentielle de Carlitz; 69 (1995), 75–89.

Destempes, F.

1. Generalization of a result of Shankar Sen: Integral representations associated with local field extensions; 63 (1993), 267–286.

Diaz, G.

2. Une nouvelle minoration de $|\log \alpha - \beta|$, $|\alpha - \exp \beta|$, α et β algébriques; 64 (1993), 43–57.

Dickinson, H.

1. The Hausdorff dimension of sets arising in metric Diophantine approximation; 68 (1994), 133–140.

Dodd, L.

1. An upper bound for the number of solutions of a system of congruences; 66 (1994), 323–350.

Dodson, M. M.

9. (and S. Hasan) Systems of linear forms and covers for star bodies; 61 (1992), 119–127.

Dofs, E.

1. On extensions of 1 chains; 65 (1993), 249–258.

Douai, J. C.

3. Sur les mauvais facteurs locaux des fonctions L attachées aux surfaces abéliennes et surfaces K-3; 69 (1995), 99–105.

Dubickas, A.

1. On a conjecture of A. Schinzel and H. Zassenhaus; 63 (1993), 15–20.

Dujella, A.

1. Generalization of a problem of Diophantus; 65 (1993), 15–27.

Dumont, J. M.

1. (and A. Thomas) Digital sum moments and substitutions; 64 (1993), 205–225.
2. (et A. Thomas) Modifications de nombres normaux par des transducteurs; 68 (1994), 153–170.

Duverney, D.

1. Propriétés arithmétiques d’une série liée aux fonctions thêta; 64 (1993), 175–188.

Dyson, F. J.

1. (and P. M. Bleher) Mean square value of exponential sums related to representation of integers as sum of two squares; 68 (1994), 71–84.
2. (and P. M. Bleher) Mean square limit for lattice points in a sphere; 68 (1994), 383–393.

Egami, S.

1. A χ -analogue of a formula of Ramanujan for $\zeta(1/2)$; 69 (1995), 189–191.

Eichenauer-Herrmann, J.

1. (and H. Niederreiter) Kloosterman-type sums and the discrepancy of nonoverlapping pairs of inversive congruential pseudorandom numbers; 65 (1993), 185–194.
2. (and H. Niederreiter) Bounds for exponential sums and their applications to pseudorandom numbers; 67 (1994), 269–281.
3. (and H. Niederreiter) An improved upper bound for the discrepancy of quadratic congruential pseudorandom numbers; 69 (1995), 193–198.

Eichler, M.

10. Liste der Publikationen von Martin Eichler; 65 (1993), 297–300.

El Baghdadi, S.

1. Sur un problème de L. Carlitz; 69 (1995), 39–50.

Elkadi, M.

1. Une version effective du théorème de Briançon–Skoda dans le cas algébrique discret; 66 (1994), 201–220.

Epkenhans, M.

1. On the ramification set of a positive quadratic form over an algebraic number field; 66 (1994), 133–145.

Erdős, P.

44. (and B. Bollobás, G. Jin) Ramsey problems in additive number theory; 64 (1993), 341–355.
45. (and A. Sárközy) On isolated, respectively consecutive large values of arithmetic functions; 66 (1994), 269–295.
46. (and M. B. Nathanson, P. Tetali) Independence of solution sets and minimal asymptotic bases; 69 (1995), 243–258.

Everest, G. R.

1. p -primary parts of unit traces and the p -adic regulator; 62 (1992), 11–23.

Fabre, S.

1. Une généralisation du théorème de Cobham; 67 (1994), 197–208.

Fabrykowski, J.

2. Squares in difference sets; 61 (1992), 199–208.

Faivre, C.

1. Distribution of Lévy constants for quadratic numbers; 61 (1992), 13–34.

Farhane, A.

1. Minoration de la période du développement de $\sqrt{a^2n^2 + bn + c}$ en fraction continue; 67 (1994), 63–67.

Faure, H.

3. (et H. Chaix) Discrédance et diaphonie en dimension un; 63 (1993), 103–141.

Ferenczi, S.

1. Bounded remainder sets; 61 (1992), 319–326.

Filaseta, M.

4. Short interval results for k -free values of irreducible polynomials; 64 (1993), 249–270.
5. (and R. Blecksmith, C. Nicol) A result on the digits of a^n ; 64 (1993), 331–339.
6. (and O. Trifonov) The distribution of squarefull numbers in short intervals; 67 (1994), 323–333.

Flatto, L.

1. (and J. C. Lagarias, A. D. Pollington) On the range of fractional parts $\{\xi(p/q)^n\}$; 70 (1995), 125–147.

Flynn, E. V.

1. Descent via isogeny in dimension 2; 66 (1994), 23–43.

Fouvry, E.

4. (and H. Iwaniec) The divisor function over arithmetic progressions (with an appendix by N. Katz), 61 (1992), 271–287.

Fukuda, T.

1. (and H. Taya) The Iwasawa λ -invariants of \mathbb{Z}_p -extensions of real quadratic fields; 69 (1995), 277–292.

Gebel, J.

1. (and A. Pethő, H. G. Zimmer) Computing integral points on elliptic curves; 68 (1994), 171–192.

Girstmair, K.

1. The Galois module of a twisted element in the p^m -th cyclotomic field; 61 (1992), 399–403.
2. On the branch order of the ring of integers of an abelian number field; 62 (1992), 297–301.
3. On the trace of the ring of integers of an abelian number field; 62 (1992), 383–389.
4. On the l -divisibility of the relative class number of certain cyclic number fields; 64 (1993), 189–204.
5. The digits of $1/p$ in connection with class number factors; 67 (1994), 381–386.

Glass, A. M. W.

- 2a. (and J. Blass, D. K. Manski, D. B. Meronk, R. P. Steiner) Corrigendum to the paper “Constants for lower bounds for linear forms in the logarithms of algebraic numbers II. The homogeneous rational case” (*Acta Arith.* 55 (1990), 15–22); 65 (1993), 383.

Gove, D.

1. Modular forms of weight $1/2$ over class number 1 imaginary quadratic number fields; 64 (1993), 101–123.

Grabner, P. J.

1. Completely q -multiplicative functions: the Mellin transform approach; 65 (1993), 85–96.
2. (and P. Liardet, R. F. Tichy) Odometers and systems of numeration; 70 (1995), 103–123.

Gras, G.

2. Sur la norme du groupe des unités d’extensions quadratiques relatives; 61 (1992), 307–317.

Gritsenko, V. A.

1. (and R. Schulze-Pillot) Eisenstein series on four-dimensional hyperbolic space; 67 (1994), 241–268.

Györy, K.

11. On the irreducibility of a class of polynomials, IV; 62 (1992), 399–405.
12. Upper bounds for the degrees of decomposable forms of given discriminant; 66 (1994), 261–268.
13. On the irreducibility of neighbouring polynomials; 67 (1994), 283–294.

Hajir, F.

1. Elliptic units of cyclic unramified extensions of complex quadratic fields; 64 (1993), 69–85.

Håland, I. J.

1. Uniform distribution of generalized polynomials of the product type; 67 (1994), 13–27.

Hall, R. R.

16. (and M. N. Huxley) Dedekind sums and continued fractions; 63 (1993), 79–90.
17. On consecutive Farey arcs II; 66 (1994), 1–9.

Halter-Koch, F.

6. Chebotarev formations and quantitative aspects of non-unique factorizations; 62 (1992), 173–206.

Hanine, E. M.

1. Polynômes singuliers à plusieurs variables sur un corps fini et congruences modulo p^2 ; 68 (1994), 1–10.

Hardy, K.

5. (and K. S. Williams) Determination of $\sum_{k=1}^{p-1} g^{ak^2}$ modulo p ; 61 (1992), 161–172.

Harman, G.

3. (and R. C. Baker, J. Brüdern) Simultaneous diophantine approximation with square-free numbers; 63 (1993), 51–60.

Hasan, S.

1. (and M. M. Dodson) Systems of linear forms and covers for star bodies; 61 (1992), 119–127.

Hata, M.

2. Rational approximations to π and some other numbers; 63 (1993), 335–349.
3. Farey fractions and sums over coprime pairs; 70 (1995), 149–159.

Hegyhári, N.

1. Note on a problem of Ruzsa; 69 (1995), 113–119.

Hellekalek, P.

1. General discrepancy estimates: the Walsh function system; 67 (1994), 209–218.
2. General discrepancy estimates II: the Haar function system; 67 (1994), 313–322.

Helm, M.

1. On B_{2k} -sequences; 63 (1993), 367–371.
2. Some remarks on the Erdős–Turán conjecture; 63 (1993), 373–378.

Hennecart, F.

1. Propriétés additives des suites et de leurs carrés; 66 (1994), 101–123.

Hildebrand, A. J.

3. (and P. T. Bateman, G. B. Purdy) Sums of distinct squares; 67 (1994), 349–380.

Hooley, C.

2. On an almost pure sieve; 66 (1994), 359–368.

Horie, K.

2. On CM-fields with the same maximal real subfield; 67 (1994), 219–227.

Hutchinson, K.

1. On relative integral bases for unramified extensions; 70 (1995), 279–286.

Huxley, M. N.

9. (and R. R. Hall) Dedekind sums and continued fractions; 63 (1993), 79–90.
10. (et P. Sargos) Points entiers au voisinage d'une courbe plane de classe C^m ; 69 (1995), 359–366.

Ivić, A.

4. (and R. Balasubramanian, K. Ramachandra) An application of the Hooley–Huxley contour; 65 (1993), 45–51.
5. Power moments of the error term in the approximate functional equation for $\zeta^2(s)$; 65 (1993), 137–145.
6. (and T. Meurman) Sums of coefficients of Hecke series; 68 (1994), 341–368.

Iwaniec, H.

14. (and E. Fouvry) The divisor function over arithmetic progressions (with an appendix by N. Katz), 61 (1992), 271–287.

Jaquet-Chiffelle, D.-O.

1. (et F. Sigrist) Classification des formes quadratiques réelles : un contre-exemple à la finitude; 68 (1994), 291–294.

Jaulent, J.-F.

2. Sur le noyau sauvage des corps de nombres; 67 (1994), 335–348.

Jaworski, P.

1. Quadratic field extensions and residue homomorphisms of Witt rings; 64 (1993), 303–323.

Jehanne, A.

1. Sur les extensions de \mathbb{Q} à groupe de Galois S_4 et \tilde{S}_4 ; 69 (1995), 259–276.

Jin, G.

1. (and B. Bollobás, P. Erdős) Ramsey problems in additive number theory; 64 (1993), 341–355.

Kaplansky, I.

1. Ternary positive quadratic forms that represent all odd positive integers; 70 (1995), 209–214.

Katre, S. A.

2. (and V. V. Acharya) Cyclotomic numbers of order $2l$, l an odd prime; 69 (1995), 51–74.

Khachatryan, L. H.

1. (and R. Ahlswede) On extremal sets without coprimes; 66 (1994), 89–99.

Kim, M.-H.

1. Arithmetic of half integral weight theta-series; 63 (1993), 157–181.

Kiuchi, I.

1. (and K. Matsumoto) Mean value results for the approximate functional equation of the square of the Riemann zeta-function; 61 (1992), 337–345.

Kneser, M.

2. Martin Eichler (1912–1992); 65 (1993), 293–296.

Knopfmacher, A.

2. (and J. Knopfmacher, R. Warlimont) “Factorisatio numerorum” in arithmetical semigroups; 61 (1992), 327–336.

Knopfmacher, J.

2. (and A. Knopfmacher, R. Warlimont) “Factorisatio numerorum” in arithmetical semigroups; 61 (1992), 327–336.

Kojima, H.

1. Shimura correspondence of Maass wave forms of half integral weight; 69 (1995), 367–385.

Kolitsch, L. W.

1. Generalized Frobenius partitions, k -cores, k -quotients, and cranks; 62 (1992), 97–102.

Krätzel, E.

5. (and W. G. Nowak) Lattice points in large convex bodies, II; 62 (1992), 285–295.

Krieg, A.

2. Primitive minima of positive definite quadratic forms; 63 (1993), 91–96.

Kučera, R.

1. Different groups of circular units of a compositum of real quadratic fields; 67 (1994), 123–140.

Kwon, S.-H.

1. (et C. Bachoc) Sur les extensions de groupe de Galois \tilde{A}_4 ; 62 (1992), 1–10.

Lacroix, Y.

1. Metric properties of generalized Cantor products; 63 (1993), 61–77.

Lagarias, J. C.

2. (and L. Flatto, A. D. Pollington) On the range of fractional parts $\{\xi(p/q)^n\}$; 70 (1995), 125–147.

Larcher, G.

3. Nets obtained from rational functions over finite fields; 63 (1993), 1–13.
4. (and H. Niederreiter) Kronecker-type sequences and nonarchimedean diophantine approximations; 63 (1993), 379–396.

Laubie, F.

2. La ramification des extensions galoisiennes est déterminée par les discriminants de certaines sous-extensions; 65 (1993), 283–291.

Laurent, M.

1. Linear forms in two logarithms and interpolation determinants; 66 (1994), 181–199.

Lazarus, A. J. S.

1. Lehmer's semi-symmetric cyclotomic sums; 62 (1992), 221–227.

Le, M.-H.

4. A note on the diophantine equation $\frac{x^m-1}{x-1} = y^n$; 64 (1993), 19–28.
5. On the diophantine equation $D_1x^2 + D_2 = 2^{n+2}$; 64 (1993), 29–41.
6. Upper bounds for class numbers of real quadratic fields; 68 (1994), 141–144.
7. A note on perfect powers of the form $x^{m-1} + \dots + x + 1$; 69 (1995), 91–98.

Lee, D. V.

1. On the power-series expansion of a rational function; 62 (1992), 229–255.
2. The asymptotic distribution of the number of summands in unrestricted A -partitions; 65 (1993), 29–43.

Lehmer, D. H.
