

**Conspectus materiae tomorum
LXXXI–XC (1997–1999)**

Editor's note; 83 (1998), 199.

Adam, B.

- 1*. Généralisation d'une famille de Shanks; 84 (1998), 43–58.

Adhikari, S. D.

3. (and Y.-G. Chen) On a question regarding visibility of lattice points, II; 89 (1999), 279–282.

Ahlgren, S.

1. The set of solutions of a polynomial-exponential equation; 87 (1999), 189–207.

Aliev, I.

1. (and A. Zhigljavsky) Weyl sequences: Asymptotic distributions of the partition lengths; 88 (1999), 351–361.

Andersson, M. E.

1. Das Flaviussche Sieb; 85 (1998), 301–307.

Arno, S.

2. (and M. L. Robinson, F. S. Wheeler) Imaginary quadratic fields with small odd class number; 83 (1998), 295–330.

Arnoux, P.

2. (and S. Ferenczi, P. Hubert) Trajectories of rotations; 87 (1999), 209–217.

Baker, A.

1. A supersingular congruence for modular forms; 86 (1998), 91–100.

Baker, R. C.

11. (and G. Harman) Shifted primes without large prime factors; 83 (1998), 331–361.

Balakrishnan, U.

- 2a. (and Y.-F. S. Pétermann) Errata to “The Dirichlet series of $\zeta(s)\zeta^\alpha(s+1)f(s+1)$: On an error term associated with its coefficients” (Acta Arith. 75 (1996), 39–69); 87 (1999), 287–289.

Balanzario, E. P.

1. An example in Beurling's theory of primes; 87 (1998), 121–139.

Ballot, C.

1. Strong arithmetic properties of the integral solutions of $X^3 + DY^3 + D^2Z^3 - 3DXYZ = 1$, where $D = M^3 \pm 1$, $M \in \mathbb{Z}^*$; 89 (1999), 259–277.

* The number (say n) preceding each title indicates that the author has already published n papers in Acta Arithmetica.

Bauer, C.

1. On the sum of a prime and the k th power of a prime; 85 (1998), 99–118.

Baxa, C.

2. On the distribution of the sequence $(n\alpha)$ with transcendental α ; 81 (1997), 357–363.

Bell, J. P.

1. (and P. B. Borwein, L. B. Richmond) Growth of the product $\prod_{j=1}^n (1 - x^{a_j})$; 86 (1998), 155–170.

Bennett, M. A.

2. On consecutive integers of the form ax^2, by^2 and cz^2 ; 88 (1999), 363–370.

Berend, D.

5. (and J. E. Harmse) On some arithmetical properties of middle binomial coefficients; 84 (1998), 31–41.

Beresnevich, V.

2. On approximation of real numbers by real algebraic numbers; 90 (1999), 97–112.

Berndt, B. C.

6. (and H. H. Chan, L. C. Zhang) Radicals and units in Ramanujan's work; 87 (1998), 145–158.

Bernik, V.

5. (and H. Dickinson, J. Yuan) Inhomogeneous diophantine approximation on polynomials in \mathbb{Q}_p ; 90 (1999), 37–48.

Bhowmik, G.

- 1a. (and O. Ramaré) Errata to “Average orders of multiplicative arithmetical functions of integer matrices” (Acta Arith. 66 (1994), 45–62); 85 (1998), 97–98.

Bilu, Yu. (= Bilu, Yu. F.)

1. (and G. Hanrot) Thue equations with composite fields; 88 (1999), 311–326.
2. Quadratic factors of $f(x) - g(y)$; 90 (1999), 341–355.

Biró, A.

1. On a generalization of the Selberg trace formula; 87 (1999), 319–338.

Bombieri, E.

8. (and A. Perelli) Distinct zeros of L -functions; 83 (1998), 271–281.

Borisov, A.

1. On some polynomials allegedly related to the abc conjecture; 84 (1998), 109–128.
2. (and M. Filaseta, T. Y. Lam, O. Trifonov) Classes of polynomials having only one non-cyclotomic irreducible factor; 90 (1999), 121–153.

Borwein, P. B.

1. (and J. P. Bell, L. B. Richmond) Growth of the product $\prod_{j=1}^n (1 - x^{a_j})$; 86 (1998), 155–170.

Bremner, A.

3. On squares of squares; 88 (1999), 289–297.

de la Bretèche, R.

1. Sommes sans grand facteur premier; 88 (1999), 1–14.

Brindza, B.

8. (and Á. Pintér) On the irreducibility of some polynomials in two variables; 82 (1997), 303–307.

Bugeaud, Y.

4. On the greatest prime factor of $(ab + 1)(bc + 1)(ca + 1)$; 86 (1998), 45–49.
5. (et J.-P. Conze) Calcul de la dynamique de transformations linéaires contractantes mod 1 et arbre de Farey; 88 (1999), 201–218.

Byeon, D.

1. A note on basic Iwasawa λ -invariants of imaginary quadratic fields and congruence of modular forms; 89 (1999), 295–299.

Calkin, N. J.

1. Factors of sums of powers of binomial coefficients; 86 (1998), 17–26.

Cao, H. Q.

1. (and Z. W. Sun) On sums of distinct representatives; 87 (1998), 159–169.

Cao, X. D.

1. (and W. G. Zhai) On the average number of direct factors of finite abelian groups; 82 (1997), 45–55.
2. (and W. G. Zhai) On the average number of unitary factors of finite abelian groups; 85 (1998), 293–300.
3. (and W. G. Zhai) On the number of coprime integer pairs within a circle; 90 (1999), 1–16.

Car, M.

10. Distribution des polynômes irréductibles dans $\mathbb{F}_q[T]$; 88 (1999), 141–153.

Carletti, E.

- 2a. (and G. Monti Bragadin) Errata to the paper “On a functional equation satisfied by certain Dirichlet series” (*Acta Arith.* 71 (1995), 265–272); 82 (1997), 99–101.

Cassaigne, J.

1. (and S. Ferenczi, C. Mauduit, J. Rivat, A. Sárközy) On finite pseudorandom binary sequences III: The Liouville function, I; 87 (1999), 367–390.

Cassou-Noguès, P.

1. (et J.-M. Couveignes) Factorisations explicites de $g(y) - h(z)$; 87 (1999), 291–317.

Chakraborty, K.

1. (and M. V. Kulkarni) Solutions of cubic equations in quadratic fields; 89 (1999), 37–43.

Chamizo, F.

3. Lattice points in bodies of revolution; 85 (1998), 265–277.

Chan, H. H.

3. (and B. C. Berndt, L. C. Zhang) Radicals and units in Ramanujan’s work; 87 (1998), 145–158.

Chen, W. W. L.

1. (and V. F. Lev) Discrepancy of weighted matrix nets; 85 (1998), 141–156.

Chen, Y. G.

3. Sequences with bounded l.c.m. of each pair of terms; 84 (1998), 71–95.
4. (and S. D. Adhikari) On a question regarding visibility of lattice points, II; 89 (1999), 279–282.

Cheon, J.

1. (and S. Hahn) The orders of the reductions of a point in the Mordell–Weil group of an elliptic curve; 88 (1999), 219–222.

Choudhry, A.

2. On arithmetic progressions of equal lengths and equal products of terms; 82 (1997), 95–97.

Chu, W. C.

1. Hypergeometric series and the Riemann zeta function; 82 (1997), 103–118.

Cilleruelo, J.

4. (and J. Jiménez-Urroz) Divisors in a Dedekind domain; 85 (1998), 229–233.

Cobeli, C.

1. (and A. Zaharescu) On the distribution of primitive roots mod p ; 83 (1998), 143–153.

Cohen, S. D.

5. (and A. Movahhedi, A. Salinier) Double transitivity of Galois groups of trinomials; 82 (1997), 1–15.

Conze, J.-P.

1. (et Y. Bugeaud) Calcul de la dynamique de transformations linéaires contractantes mod 1 et arbre de Farey; 88 (1999), 201–218.

Cornacchia, P.

1. Fitting ideals of class groups in a \mathbb{Z}_p -extension; 87 (1998), 79–88.

Coulter, R. S.

1. Explicit evaluations of some Weil sums; 83 (1998), 241–251.
2. Further evaluations of Weil sums; 86 (1998), 217–226.

Couveignes, J.-M.

1. (et P. Cassou-Noguès) Factorisations explicites de $g(y) - h(z)$; 87 (1999), 291–317.

Crainic, M.

1. (and P. A. Østvær) On two-primary algebraic K-theory of quadratic number rings with focus on K_2 ; 87 (1999), 223–243.

Dèbes, P.

4. (and D. Haran) Almost hilbertian fields; 88 (1999), 269–287.

Deshouillers, J.-M.

6. (and F. Hennecart, B. Landreau) Sums of powers: an arithmetic refinement to the probabilistic model of Erdős and Rényi; 85 (1998), 13–33.

Dickinson, H.

2. (and V. Bernik, J. Yuan) Inhomogeneous diophantine approximation on polynomials in \mathbb{Q}_p ; 90 (1999), 37–48.

Didier, G.

1. Combinatoire des codages de rotations; 85 (1998), 157–177.

Dixon, J. D.

1. Polynomials with nontrivial relations between their roots; 82 (1997), 293–302.

Dohmae, K.

1. A note on Sinnott’s index formula; 82 (1997), 57–67.

Dubickas, A.

2. (and S. V. Konyagin) On the number of polynomials of bounded measure; 86 (1998), 325–342.

Dujella, A.

2. On Diophantine quintuples; 81 (1997), 69–79.

Dumont, J. M.

3. (and N. Sidorov, A. Thomas) Number of representations related to a linear recurrent basis; 88 (1999), 371–396.

Eichhorn, D.

1. A combinatorial approach to partitions with parts in the gaps; 85 (1998), 119–133.

Einsiedler, M.

1. A generalisation of Mahler measure and its application in algebraic dynamical systems; 88 (1999), 15–29.

Elekes, G.

1. On the number of sums and products; 81 (1997), 365–367.

Elliott, P. D. T. A.

14. Products of shifted primes: Multiplicative analogues of Goldbach’s problem; 88 (1999), 31–50.

Epkenhans, M.

2. On double covers of the generalized alternating group $\mathbb{Z}_d \wr \mathfrak{A}_m$ as Galois groups over algebraic number fields; 82 (1997), 129–145.

Erdős, P.

51. List of Paul Erdős’s publications in number theory; 81 (1997), 319–343.
52. (and I. Joó, V. Komornik) On the sequence of numbers of the form $\varepsilon_0 + \varepsilon_1 q + \dots + \varepsilon_n q^n$, $\varepsilon_i \in \{0, 1\}$; 83 (1998), 201–210.

Evans, R.

3. Nonexistence of twentieth power residue difference sets; 89 (1999), 397–402.

Evertse, J.-H.

7. The number of solutions of linear equations in roots of unity; 89 (1999), 45–51.

Faivre, C.

2. On decimal and continued fraction expansions of a real number; 82 (1997), 119–128.

Ferenczi, S.

2. (and P. Arnoux, P. Hubert) Trajectories of rotations; 87 (1999), 209–217.
3. (and J. Cassaigne, C. Mauduit, J. Rivat, A. Sárközy) On finite pseudorandom binary sequences III: The Liouville function, I; 87 (1999), 367–390.

Fermigier, S.

1. Une courbe elliptique définie sur \mathbb{Q} de rang ≥ 22 ; 82 (1997), 359–363.

Filaseta, M.

8. (and I. Solan) Norms of factors of polynomials; 82 (1997), 243–255.
9. (and A. Borisov, T. Y. Lam, O. Trifonov) Classes of polynomials having only one non-cyclotomic irreducible factor; 90 (1999), 121–153.

Friesen, C.

3. (and P. van Wamelen) Class numbers of real quadratic function fields; 81 (1997), 45–55.

Fukuhara, S.

1. The space of period polynomials; 82 (1997), 77–93.

Gaál, I.

2. (and K. Györy) Index form equations in quintic fields; 89 (1999), 379–396.

Gallardo, L.

1. (and G. Grekos, J. Pihko) On a variant of the Erdős–Ginzburg–Ziv problem; 89 (1999), 331–336.

Gao, W.

1. (and Y. O. Hamidoune) On additive bases; 88 (1999), 233–237.

Garcia, A.

1. (and H. Stichtenoth) On Chebyshev polynomials and maximal curves; 90 (1999), 301–311.

Garcia, M. V. P.

1. (and F. A. Tal) A note on the generalized $3n + 1$ problem; 90 (1999), 245–250.

Garth, D.

1. On limits of PV k -tuples; 90 (1999), 291–299.

Girstmair, K.

6. Some linear relations between values of trigonometric functions at $k\pi/n$; 81 (1997), 387–398.
7. Dedekind sums with predictable signs; 83 (1998), 283–294.
8. Linear relations between roots of polynomials; 89 (1999), 53–96.

Godinho, H.

1. (and C. Ripoll) Pairs of additive forms and Artin’s conjecture; 90 (1999), 203–216.

Goldston, D. A.

3. (and S. M. Gonek) Mean value theorems for long Dirichlet polynomials and tails of Dirichlet series; 84 (1998), 155–192.

Gonek, S. M.

1. (and D. A. Goldston) Mean value theorems for long Dirichlet polynomials and tails of Dirichlet series; 84 (1998), 155–192.

Grekos, G.

1. (and L. Gallardo, J. Pihko) On a variant of the Erdős–Ginzburg–Ziv problem; 89 (1999), 331–336.

Grisel, G.

2. Length of continued fractions in principal quadratic fields; 85 (1998), 35–49.

Guerzhoy, P.

1. On Ramanujan congruences between special values of Hecke and Dirichlet L -functions; 81 (1997), 11–23.

Gupta, S.

1. (and A. Tripathi) Density of M -sets in arithmetic progression; 89 (1999), 255–257.

Guthmann, A.

1. New integral representations for the square of the Riemann zeta-function; 82 (1997), 309–330.

Györy, K.

21. On the diophantine equation $n(n+1)\dots(n+k-1) = bx^l$; 83 (1998), 87–92.
22. (and M. Ru) Integer solutions of a sequence of decomposable form inequalities; 86 (1998), 227–237.
23. (and I. Gaál) Index form equations in quintic fields; 89 (1999), 379–396.

Hahn, S.

1. (and J. Cheon) The orders of the reductions of a point in the Mordell–Weil group of an elliptic curve; 88 (1999), 219–222.

Hamidoune, Y. O.

2. (and W. Gao) On additive bases; 88 (1999), 233–237.

Hanrot, G.

1. (and Yu. Bilu) Thue equations with composite fields; 88 (1999), 311–326.

Haran, D.

1. (and P. Dèbes) Almost hilbertian fields; 88 (1999), 269–287.

Harman, G.

5. (and R. C. Baker) Shifted primes without large prime factors; 83 (1998), 331–361.
6. On the Erdős–Turán inequality for balls; 85 (1998), 389–396.

Harmse, J. E.

1. (and D. Berend) On some arithmetical properties of middle binomial coefficients; 84 (1998), 31–41.

Hasegawa, Y.

2. Hyperelliptic modular curves $X_0^*(N)$; 81 (1997), 369–385.
3. (and M. Shimura) Trigonal modular curves; 88 (1999), 129–140.

Hennecart, F.

2. (and J.-M. Deshouillers, B. Landreau) Sums of powers: an arithmetic refinement to the probabilistic model of Erdős and Rényi; 85 (1998), 13–33.

Hibino, T.

1. (and N. Murabayashi) Modular equations of hyperelliptic $X_0(N)$ and an application; 82 (1997), 279–291.
2. (and A. Umegaki) A family of elliptic \mathbb{Q} -curves defined over biquadratic fields and their modularity; 88 (1999), 181–190.

Hirabayashi, M.

1. A generalization of Maillet and Demyanenko determinants; 83 (1998), 391–397.

Hooley, C.

4. On the Barban–Davenport–Halberstam theorem: IX; 83 (1998), 17–30.

Hsia, J. S.

5. (and M. I. Icaza) Effective version of Tartakowsky’s Theorem; 89 (1999), 235–253.

Hubert, P.

1. (and P. Arnoux, S. Ferenczi) Trajectories of rotations; 87 (1999), 209–217.

Hutchinson, K.

2. Conditions under which $K_2(\mathcal{O}_F)$ is not generated by Dennis–Stein symbols; 89 (1999), 189–199.

Hwang, H.-K.

- 1a. Corrections to “Asymptotic behaviour of some infinite products involving prime numbers” (Acta Arith. 75 (1996), 339–350); 87 (1999), 391.

Icaza, M. I.

2. (and J. S. Hsia) Effective version of Tartakowsky’s Theorem; 89 (1999), 235–253.

Ishibashi, M.

2. \mathbb{Q} -linear relations of special values of the Estermann zeta function; 86 (1998), 239–244.

Ishida, N.

1. Generators and equations for modular function fields of principal congruence subgroups; 85 (1998), 197–207.

Jakubec, S.

3. Note on the congruence of Ankeny–Artin–Chowla type modulo p^2 ; 85 (1998), 377–388.

Jenkner, W.

1. On divisors whose sum is a square; 90 (1999), 113–120.

Ji, S. J.

1. Analogs of $\Delta(z)$ for triangular Shimura curves; 84 (1998), 97–108.

Jiménez-Urroz, J.

1. (and J. Cilleruelo) Divisors in a Dedekind domain; 85 (1998), 229–233.

Johansson, S.

1. Genera of arithmetic Fuchsian groups; 86 (1998), 171–191.

Joó, I.

1. (and P. Erdős, V. Komornik) On the sequence of numbers of the form $\varepsilon_0 + \varepsilon_1 q + \dots + \varepsilon_n q^n$, $\varepsilon_i \in \{0, 1\}$; 83 (1998), 201–210.

Kagawa, T.

1. Determination of elliptic curves with everywhere good reduction over $\mathbb{Q}(\sqrt{37})$; 83 (1998), 253–269.

Kamae, T.

1. (and J. Tamura, Z. Y. Wen) Hankel determinants for the Fibonacci word and Padé approximation; 89 (1999), 123–161.

Kamiya, Y.

1. Zero density estimates of L -functions associated with cusp forms; 85 (1998), 209–227.

Kang, S.-Y.

1. Ramanujan’s formulas for the explicit evaluation of the Rogers–Ramanujan continued fraction and theta-functions; 90 (1999), 49–68.

Katsurada, M.

1. Rapidly convergent series representations for $\zeta(2n+1)$ and their χ -analogue; 90 (1999), 79–89.

Kawada, K.

1. (and T. D. Wooley) Sums of fifth powers and related topics; 87 (1998), 27–65.

Kim, C. H.

1. (and J. K. Koo) Arithmetic of the modular function $j_{1,4}$; 84 (1998), 129–143.

Kim, D. S.

3. (and Y. H. Park) Gauss sums for orthogonal groups over a finite field of characteristic two; 82 (1997), 331–357.
4. Exponential sums for symplectic groups and their applications; 88 (1999), 155–171.

Klassen, M.

2. (and P. Tzermias) Algebraic points of low degree on the Fermat quintic; 82 (1997), 393–401.

Koch, H.

1. (and S. Kukkuk, J. Labute) Nilpotent local class field theory; 83 (1998), 45–64.

Kojima, H.

2. On explicit construction of Hilbert–Siegel modular forms of degree two; 81 (1997), 265–274.

Komatsu, K.

2. On the Iwasawa λ -invariants of quaternion extensions; 87 (1999), 219–221.

Komatsu, T.

2. On inhomogeneous Diophantine approximation and the Nishioka–Shiokawa–Tamura algorithm; 86 (1998), 305–324.

Komeda, J.

1. Cyclic coverings of an elliptic curve with two branch points and the gap sequences at the ramification points; 81 (1997), 275–297.

Komornik, V.

1. (and P. Erdős, I. Joo) On the sequence of numbers of the form $\varepsilon_0 + \varepsilon_1 q + \dots + \varepsilon_n q^n$, $\varepsilon_i \in \{0, 1\}$; 83 (1998), 201–210.

Konyagin, S. V.

2. (and A. Dubickas) On the number of polynomials of bounded measure; 86 (1998), 325–342.
3. On the number of irreducible polynomials with 0,1 coefficients; 88 (1999), 333–350.

Koo, J. K.

1. (and C. H. Kim) Arithmetic of the modular function $j_{1,4}$; 84 (1998), 129–143.

Kramer, K.

2. Elliptic curves with non-trivial 2-adic Iwasawa μ -invariant; 90 (1999), 173–182.

Kühleitner, M.

1. (and W. G. Nowak, J. Schoißengeier, T. D. Wooley) On sums of two cubes: an Ω_+ -estimate for the error term; 85 (1998), 179–195.

Kukkuk, S.

1. (and H. Koch, J. Labute) Nilpotent local class field theory; 83 (1998), 45–64.

Kulas, M.

1. Refinement of an estimate for the Hurwitz zeta function in a neighbourhood of the line $\sigma = 1$; 89 (1999), 301–309.

Kulesz, L.

1. Courbes algébriques de genre ≥ 2 possédant de nombreux points rationnels; 87 (1998), 103–120.

Kulkarni, M. V.

1. (and K. Chakraborty) Solutions of cubic equations in quadratic fields; 89 (1999), 37–43.

Kumchev, A.

1. (and T. Nedeva) On an equation with prime numbers; 83 (1998), 117–126.
2. A diophantine inequality involving prime powers; 89 (1999), 311–330.

Kwon, S.-H.

2. (and Y.-H. Park) Determination of all imaginary abelian sextic number fields with class number ≤ 11 ; 82 (1997), 27–43.
3. (and Y.-H. Park) Determination of all non-quadratic imaginary cyclic number fields of 2-power degree with relative class number ≤ 20 ; 83 (1998), 211–223.

Labute, J.

1. (and H. Koch, S. Kukkuk) Nilpotent local class field theory; 83 (1998), 45–64.

Lacroix, Y.

2. On strong uniform distribution, II. The infinite-dimensional case; 84 (1998), 279–290.

Lagarias, J. C.

3. On a positivity property of the Riemann ξ -function; 89 (1999), 217–234.

Lalande, F.

1. Corps de nombres engendrés par un nombre de Salem; 88 (1999), 191–200.

Lam, T. Y.

1. (and A. Borisov, M. Filaseta, O. Trifonov) Classes of polynomials having only one non-cyclotomic irreducible factor; 90 (1999), 121–153.

5. (and H. Niederreiter) Drinfeld modules of rank 1 and algebraic curves with many rational points. II; 81 (1997), 81–100.
6. (and H. Niederreiter) Global function fields with many rational places over the ternary field; 83 (1998), 65–86.
7. (and H. Niederreiter) Global function fields with many rational places over the quinary field. II; 86 (1998), 277–288.

Xu, F.

3. (and Y. Ouyang) Riemann–Hurwitz formula in basic \mathbb{Z}_5 -extensions; 81 (1997), 1–10.

Xu, M. Z.

1. Cohomology groups of units in \mathbb{Z}_p^d -extensions; 86 (1998), 289–304.

Xuan, T. Z.

5. On smooth integers in short intervals under the Riemann Hypothesis; 88 (1999), 327–332.

Yamamura, K.

1. Determination of the imaginary normal octic number fields with class number one which are not CM-fields; 86 (1998), 133–147.

Yasutomi, S.-I.

1. The continued fraction expansion of α with $\mu(\alpha) = 3$; 84 (1998), 337–374.

Ye, Y.

1. Hyper-Kloosterman sums and estimation of exponential sums of polynomials of higher degrees; 86 (1998), 255–267.

Yu, H. B.

3. On two problems of Mordell about exponential sums; 86 (1998), 149–154.
4. On Waring’s problem with polynomial summands II; 86 (1998), 245–254.

Yu, K.

2. p -adic logarithmic forms and group varieties II; 89 (1999), 337–378.

Yuan, J.

1. (and V. Bernik, H. Dickinson) Inhomogeneous diophantine approximation on polynomials in \mathbb{Q}_p ; 90 (1999), 37–48.

Yuan, P. Z.

1. (and J. B. Wang) On the diophantine equation $x^2 + b^y = c^z$; 84 (1998), 145–147.

Zaccagnini, A.

1. Primes in almost all short intervals; 84 (1998), 225–244.

Zaharescu, A.

1. (and C. Cobeli) On the distribution of primitive roots mod p ; 83 (1998), 143–153.
2. Averages of short exponential sums; 88 (1999), 223–231.
3. (and Z. Rudnick) A metric result on the pair correlation of fractional parts of sequences; 89 (1999), 283–293.

Zaïmi, T.

2. Sur la fermeture de l'ensemble des K -nombres de Pisot; 83 (1998), 363–367.
3. Caractérisation d'un ensemble généralisant l'ensemble des nombres de Pisot; 87 (1998), 141–144.

Zhai, W. G.

2. (and X. D. Cao) On the average number of direct factors of finite abelian groups; 82 (1997), 45–55.
3. (and X. D. Cao) On the average number of unitary factors of finite abelian groups; 85 (1998), 293–300.
4. (and X. D. Cao) On the number of coprime integer pairs within a circle; 90 (1999), 1–16.
5. On the average number of direct factors of finite abelian groups (II); 90 (1999), 69–78.

Zhan, T.

3. (and J. Y. Liu) The ternary Goldbach problem in arithmetic progressions; 82 (1997), 197–227.

Zhang, L. C.

4. Ramanujan's class invariants, Kronecker's limit formula and modular equations (III); 82 (1997), 379–392.
5. (and B. C. Berndt, H. H. Chan) Radicals and units in Ramanujan's work; 87 (1998), 145–158.

Zhigljavsky, A.

1. (and I. Aliev) Weyl sequences: Asymptotic distributions of the partition lengths; 88 (1999), 351–361.
