CONTENTS

PART 2

G. M. LIEBERMAN, On the natural generalization of the natural conditions of Ladyzhenskaya and Ural'tseva	295–308
A. LOPATNIKOV, Asymptotic expansion of the heat kernel for a class of hypoelliptic operators	309–316
A. A. LYASHENKO, The first boundary value problem for the vibrating string equation in domains with piecewise smooth boundary	317–321
H. M. MAIRE, Hypoelliptic systems of complex vector fields	323–326
A. MILANI, Exponential attractors for semilinear wave equations with damping	327–335
T. ÔAKU, Boundary value problem for Fuchsian partial differential equations and reflection of singularities	337–348
R. PICARD, Static electromagnetic fields in monotone media	349–360
P. R. POPIVANOV, Wave fronts of solutions of some classes of non-linear partial differential equations	361–366
G. PROUSE, On a Navier–Stokes type equation and inequality	367–371
S. G. PYATKOV, Some properties of eigenfunctions of linear pencils and applications to mixed type operator-differential equations	373–382
O. REY, Elliptic equations with limiting Sobolev exponent: the impact of the Green's function	383–397
J. ROSSMANN, On two classes of weighted Sobolev–Slobodetskii spaces in a dihedral angle	399–424
T. N. ROZHKOVSAYA, Unilateral problems for elliptic systems with gradient constraints	425–445
P. SECCHI, On the motion of nonviscous compressible fluids in domains with boundary	447–455
Y. SHIBATA, Neumann problem for one-dimensional nonlinear thermoelasticity	457–480
W. SICKEL, Superposition of functions in Sobolev spaces of fractional order. A survey	481–497
L. VÉRON, A geometric and analytic approach to some problems associated with Emden equations	499–509
W. M. ZAJĄCZKOWSKI, On local motion of a compressible barotropic viscous fluid bounded by a free surface	511–553
B. ZIEMIAN, Elliptic corner operators in spaces with continuous radial asymptotics II	555–580
