Preface to the Special Issue	447
W. ALT:	451
Approximation of optimal control problems with bound constraints by control parameterization	
G. AVALOS, I. LASIECKA:	473
Mechanical and thermal null controllability of thermoelastic plates and singularity of the associated minimal energy function	
E. M. BEDNARCZUK:	491
Order-Lipschitzian properties of multifunctions with applications to stability of efficient points	
M. DAMBRINE, J. SOKOŁOWSKI, A. ŻOCHOWSKI:	503
On stability analysis in shape optimisation	
A. L. DONTCHEV:	529
Robinson's implicit function theorem	
A. D. IOFFE:	543
On robustness of the regularity property of maps	
H. MAURER, N. P. OSMOLOVSKII:	555
Second order conditions	
B. S. MORDUKHOVICH, L. WANG:	585
Optimal control of constrained delay-differential inclusions with multivalued initial conditions	
A. MYŚLIŃSKI:	611
Shape optimization of thermoviscoelastic contact problems	

---

I. PAWŁOW, W. M. ZAJĄCZKOWSKI:	629
On diffused-interface models of shape memory alloys	
M. PREIB, J. STOER:	659
Methods for solving semidefinite linear complementarity problems	
S. ROLEWICZ:	671
On $\sigma$ -porous and $\Phi$ -angle-small sets in metric spaces	
T. ROUBIČEK, F. TRÖLTZSCH:	683
Lipschitz stability of optimal controls for the steady-state Navier-Stokes equations
