
CONTENTS

J.-P. PENOT:	711
Rotundity, smoothness and duality	
Y.-J. SUN:	735
The eigenvalue derivatives of linear damped systems	
S.-T. PAN:	743
The order reduction and robust D-stability analysis of discrete uncertain time-delay systems by time-scale separation	
P. SUCHOMSKI:	761
Numerically robust synthesis of discrete-time H_∞ estimators based on dual J -lossless factorisations	
T. TERLIKOWSKI:	803
Reachable sets concept - a general abstract analysis	
Z. NOWAK, A. STACHURSKI:	819
Modelling and identification of voids nucleation and growth effects in porous media plastic flow	
G. BRZYKCY, J. MARTINEK, A. MEISSNER, P. SKRZYPCZYŃSKI:	851
Control aspects of the blackboard agent architecture for a mobile robot	
T. BANEK, R. KULIKOWSKI:	867
Information pricing for portfolio optimization	
M. KALUSZKA:	883
Mean-variance optimal local reinsurance contracts
