
CONTENTS

M. EL BAGDOURI, B. CÉBRON, M. SECHILARIU, J. BURGER: Variational formalism applied to control of autonomous switching systems	535
Z. GE: Pole assignment by feedback control of the second order coupled singular distributed parameter systems	551
W. MITKOWSKI: Analysis of undamped second order systems with dynamic feed- back	563
P. KULCZYCKI, R. WISNIEWSKI, P. KOWALSKI, K. KRAWIEC: Hard and soft sub-time-optimal controllers for a mechanical sys- tem with uncertain mass	573
S. BIALAS: A necessary and sufficient condition for stability of the convex combination of polynomials	589
A. ŽILINSKAS: Hybrid search for optimum in a small implicitly defined region	599
M. KORDOS, W. DUCH: A survey of factors influencing MLP error surface	611
S.Y. LI, C.F. HU, C.J. TENG: A generalized varying-domain optimization method for fuzzy goal programming with priorities based on a genetic algorithm	633

I.M. ALIEV, Z. KARA: Fuzzy System Reliability Analysis	653
P. PORWIK: Efficient spectral method of identification of linear Boolean function	663
J. SOSNOWSKI, P. GAWKOWSKI, A. LESIAK: Fault injection stress strategies in dependability analysis	679
A.M. DONIGIEWICZ: Application of Markov chains to quality evaluation of information entering by a computer system user	701
Table of contents of volume 33 (2004)	717
