## CONTENTS

---

Preface	509
M. SNIEDOVICH, A. LEW: Dynamic Programming: an overview	513
J. HARTMAN, T.C. PERRY: Approximating the solution of a dynamic, stochastic multiple knapsack problem	535
M. SNIEDOVICH, S. VOSS: The corridor method: a dynamic programming inspired metaheuristic	551
Ch. WILBAUT, S. HANAFI, A. FRÉVILLE, S. BALEV: Tabu search: global intensification using dynamic programming	579
M. SNIEDOVICH: Dijkstra's algorithm revisited: the dynamic programming connexion	599
A. LEW: Canonical greedy algorithms and dynamic programming	621
A.B. PIUNOVSKIY: Dynamic programming in constrained Markov decision processes	645
A.P. TERESO, J.R.M. MOTA, R.J.T. LAMEIRO: Adaptive resource allocation to stochastic multimodal projects: a distributed plat- form implementation in Java	661
H. MAUCH: DP2PN2Solver: A flexible dynamic programming solver software tool	687

---

M. WERNER:	703
A timed Petri net framework to find optimal IRIS schedules	
L. POPOVA-ZEUGMANN:	721
Time Petri nets state space reduction using dynamic programming	
<i>Book reviews</i>	
L. Klukowski:	749
"Advances in Ranking and Selection, Multiple Comparisons, and reliability: Methodology and Applications" by N. Balakrishnan, N. Kannan, and H. N. Nagaraja, eds.	
P. Nowak:	757
"Statistical Data Analysis Based on the L1-Norm and Related Methods" by Y. Dodge, ed.	
I. Pawłow:	761
"Nonlinear Partial Differential Equations with Applications" by Tomáš Roubíček
