**Control and Cybernetics**

vol. **36** (2007) No. 4

Table of contents of volume 36 (2007)
AUTHOR, title, pages

---

**Issue 1:**
N. P. OSMOLOVSKII, H. MAURER: Equivalence of second order optimality conditions for bang–bang control problems. Part 2: Proofs, variational derivatives and representations, 5-45.
T. KACZOREK: Realization problem for singular positive continuous-time systems with delays, 47-57.
T.-L. CHIEN, CH.-CH. CHEN, CH.-J. WU, Y.-CH. HUANG, CH.-Y. CHEN: Tracking and disturbance rejection in a nonlinear control system with time delay, 59-74.
H. ROUHANI, A. SADEGHZADEH, C. LUCAS, B. N. ARAABI: Emotional learning based intelligent speed and position control applied to neurofuzzy model of switched reluctance motor, 75-95.
P. J. SUCHOMSKI: A reliable synthesis of discrete-time $\mathcal{H}_\infty$ control. Part I: basic theorems and $J$-lossless conjugators, 97-141.
A. AYBAR: Decentralized structural control approach for Petri nets, 143-159.
T. ANTCZAK: Second order convexity and a modified objective function method in mathematical programming, 161-182.
J. BŁAŻEWICZ, P. ŁUKASIK, S. WILK: New machine learning methods for prediction of protein secondary structures, 183-201.
M. BASU, S. SINHA: An inflationary inventory model with time dependent demand with Weibull distribution deterioration and partial backlogging under permissible delay in payments, 203-217.
E. KORCZAK: New formula for the failure/repair frequency of multi-state monotone systems and its applications, 219-239.
R. MOTYKA: Sudden death testing versus traditional censored life testing. A Monte-Carlo study, 241-250.
L. USTINOVICHIUS, E. K. ZAVADKAS, V. PODVEZKO: Application of a quantitative multiple criteria decision making (MCDM-1) approach to the analysis of investments in construction, 251-268.

*Book reviews*
K. Tchoń: "Current Trends in Nonlinear Systems and Control" by L. Menini, L. Zaccarian and Ch.T. Abdallah, eds., 269-273.

**Issue 2:**
**Special Section on Multiple Criteria Decision Making Refinements: Models and Methodologies, guest edited by Ignacy Kaliszewski**
I. KALISZEWSKI: Preface, 281-282.
J. HAKANEN, Y. KAWAJIRI, K. MIETTINEN, L.T. BIEGLER: Interactive multi-objective optimization for simulated moving bed processes, 283-302.
W. OGRYCZAK: Multicriteria models for fair resource allocation, 303-332.
V.A. EMELICHEV, E.E. GUREVSKY: On stability of some lexicographic multicriteria Boolean problem, 333-346.
D. PODKOPAEV: An approach to finding trade-off solutions by a linear transformation of objective functions, 347-355.
D. KUCHTA: On a bicriteria optimal production plan, 357-366.
I. KALISZEWSKI: A method of approximating Pareto sets for assessments of implicit Pareto set elements, 367-381.

**Standard Papers**
Ch.-Ch. CHEN, Y.-Ch. HUANG, W.-J. LIN, D.-Ch. SHEN, L.-A. HUANG: Feedback linearization of control for nonlinear systems with uncertainties, 385-403.
B.J. SHAH, N.H. SHAH, Y.K. SHAH: An EOQ model with time dependent deterioration under discounted cash flow approach when supplier credits are linked to order quantity, 405-423.
M. GÓRA: Stability of the convex combination of polynomials, 425-442.
L. KLUKOWSKI: Estimation of tolerance relation on the basis of multiple pairwise comparisons with random errors, 443-466.
L. KLUKOWSKI: Completion and clarification to the paper *Tests for relation type – equivalence or tolerance – in finite set of elements*, 467-468.

*Book reviews*
T. Kaczorek: "Linear Systems" by Panos J. Antsaklis and Anthony N. Michel, 469-472.
A. Myśliński: "Statistics and Analysis of Shape" by H. Krim, A. Yezzi, Jr., eds., 473-477.
J. Wytrębowicz: "Organizational Principles for Multi-Agent Architectures" by Chris van Aart, 479-482.

**Issue 3:**
**In Honour of Professor Stefan Rolewicz, guest edited by Ewa Bednarczuk, Zdzisław Naniewicz and Dariusz Zagrodny**

**Control and Optimization**
Sz. DOLECKI, G.H. GRECO: Towards historical roots of necessary conditions of optimality: Regula of Peano, 491-518.
L.Q. ANH, Ph.Q. KHANH: Existence conditions in symmetric multivalued vector quasiequilibrium problems, 519-530.

T.Q. BAO, B.S. MORDUKHOVICH: Variational principles for set-valued mappings with applications to multiobjective optimization, 531-562.
E. BEDNARCZUK: On weak sharp minima in vector optimization with applications to parametric problems, 563-570.
F.S. DE BLASI, V. LAKSHMIKANTHAM, T. GNANA BHASKAR: An existence theorem for set differential inclusions in a semilinear metric space, 571-582.
M. CASTELLANI, M. PAPPALARDO: Local cone approximations in optimization, 583-600.
A. CEGIELSKI: A generalization of the Opial's theorem, 601-610.
Z. DENKOWSKI, St. MIGÓRSKI, A. OCHAL: Optimal control for a class of mechanical thermoviscoelastic frictional contact problems, 611-632.
D. DENTCHEVA, A. RUSZCZYŃSKI: Composite semi-infinite optimization, 633-646.
Sz. DOLECKI: Adherence of minimizers for dual convergences, 647-658.
A. IOFFE: On regularity estimates for mappings between embedded manifolds, 659-668.
A. JOURANI: Radiality and semismoothness, 669-680.
I. LASIECKA, D. TOUNDYKOV: Stability of higher-level energy norms of strong solutions to a wave equation with localized nonlinear damping and a nonlinear source term, 681-710.
K. MALANOWSKI: A characterization of stability and sensitivity properties for state-constrained optimal control, 711-726.
Z. NANIEWICZ: Hemivariational inequalities governed by the p-Laplacian - Neumann problem, 727-754.
H.V. NGAI, M. THÉRA: $\varphi$-regular functions in Asplund spaces, 755-774.
SONG WEN: Error bounds for convex constrained systems in Banach spaces, 775-792.
D. ZAGRODNY: A weak* approximation of subgradient of convex function, 793-802.
L. ZAJÍČEK: A $C^1$ function which is nowhere strongly paraconvex and nowhere semiconcave, 803-810.
T. ZOLEZZI: Condition numbers and Ritz type methods in unconstrained optimization, 811-822.

**Functional Analysis**
L. GÓRNIEWICZ, M. ŚLOSARSKI: Fixed points of mapping in Klee admissible spaces, 825-832.
J. MUSIELAK: On spaces with mixed modulars and some spaces of temperate distributions, 833-839.
D. PRZEWORSKA-ROLEWICZ: Some summation formulae in commutative Leibniz algebras with logarithms, 841-857.
W. ŻELAZKO: Continuous characters and joint topological spectrum, 859-864.

**Professor Stefan Rolewicz**
Interview, 867-872.

Vita, 873-875.
List of publications, 875-884.

**Issue 4:**
Z. NANIEWICZ, M. NOCKOWSKA: Systems of variational inequalities related to economic equilibrium, 889-909.
J. GRZYBOWSKI, D. PALLASCHKE, R. URBAŃSKI: Generalized directional derivatives for locally Lipschitz functions which satisfy Leibniz rule, 911-924.
M. STUDNIARSKI: Weak sharp minima in multiobjective optimization, 925-937.
K. KUŹMIŃSKI, M. KRAWIECKI: Single stage algorithms for pole placement using static output feedback, 939-965.
J. CZECZOT: On possibilities of the practical implementation of balance-based adaptive control methodology, 967-984.
M. ROMANIUK: On some method for diagnosing convergence in MCMC setups via atoms and renewal sets, 985-1008.
J. STEFANOWSKI, D. WEISS: Extending k-means with the *description comes first* approach, 1009-1035.
M. KONTAK, J. SZMIDT: Nonlinearity of the round function, 1037-1044.

*Book reviews*
K. Malanowski: An Invitation to Variational Methods in Differential Equations by D. G. Costa, 1045-1046.
I. Pawłow Methods of nonlinear analysis. Applications to Differential Equations by P. Drábek, J. Milota, 1047-1048.
A. Myśliński: Linear Partial Differential Equations for Scientists and Engineers by Tyn Myint-U, Lokenath Debnath, 1049-1050.
J. Mańdziuk: Neural Networks and Sea Time Series. Reconstruction and extreme-event analysis by B. Tirozzi, S. Puca, S. Pittalis, A. Bruschi, S. Morucci, E. Ferraro and S. Corsini, 1051-1053.
J. Pomykała: Contemporary Cryptology by D. Catalano, R. Cramer, I. Damgard, G. Di Crescenzo, D. Pointcheval, T. Takagi, 1055-1058.
