

Alphabetic index of Volumes 121—130 (1984—1988)

J. M. Aarts

1. The structure of orbits in dynamical systems, Vol. 129, 39–58.

U. Abraham

1. (and S. Shelah, R. M. Solovay), Squares with diamonds and Souslin trees with special squares, Vol. 127, 133–162.

Z. Adamowicz

3. A generalization of the Schoenfield theorem on Σ_1^1 sets, Vol. 123, 81–90.
4. Continuous relations and generalized G_δ sets, Vol. 123, 91–107.
5. A recursion theoretic characterization of $B\Sigma$ provable in $\Sigma_{n+1}N$, Vol. 129, 231–236.

V. N. Akis

1. Fixed point theorems and almost continuity, Vol. 121, 133–142.

R. J. Allen

4. Errata to the paper “Equivariant embeddings of finite abelian group actions in euclidean spaces”, Vol. 125, 185–185.

K. Alster

6. On Michael’s problem concerning the Lindelöf property in the Cartesian products, Vol. 121, 149–167.
7. On the product of a perfect paracompact space and a countable product of scattered spaces, Vol. 127, 241–246.
8. On the class of all spaces of weight not greater than ω_1 whose Cartesian product with every Lindelöf space is Lindelöf, Vol. 129, 133–140.

B. Aniszczyk

1. (and R. Frankiewicz), On minimal generators of σ -fields, Vol. 124, 131–134.

S. A. Antonian

1. (and S. Mardešić), Equivariant shape, Vol. 127, 213–224.

A. W. Apter

2. A generalized version of the singular cardinals problem, Vol. 121, 99–116.

G. Bachman

1. (and M. Szeto), On strongly measure replete lattices and the general Wallman remainder, Vol. 122, 199–217.

* This index is a continuation of indexes of Vols. 1–15 contained in Vol. 15 (1930), Vols. 16–25 contained in Vol. 25 (1935), Vols. 26–40 contained in Vol. 40 (1953), Vols. 41–50 contained in Vol. 50 (1962), Vols. 51–60 contained in Vol. 60 (1967), Vols. 61–70 contained in Vol. 70 (1971), Vols. 71–80 contained in Vol. 80 (1973), Vols. 80–90 contained in Vol. 90 (1976), Vols. 91–100 contained in Vol. 100 (1978), Vols. 101–110 contained in Vol. 110 (1980), Vols. 111–120 contained in Vol. 120 (1984).

J. B. Barbanel

1. An ordering of normal ultrafilters, Vol. 125, 155-165.

T. Bartoszyński

1. Combinatorial aspects of measure and category, Vol. 127, 225-239.

H. Becker

3. Pointwise limits of subsequences and Σ^1_2 sets, Vol. 128, 159-170.

M. G. Bell

3. Generalized dyadic space, Vol. 125, 47-58.
4. Some propositions equivalent to the Sikorski extension theorem for Boolean algebras, Vol. 130, 51-55.

B. Benninghofen

1. (and M. M. Richter), A general theory of superinfinitesimal, Vol. 128, 199-215.

M. A. Berger

1. (and A. Felzenbaum, A. Fraenkel), Remark on the multiplicity of a partition of a group into cosets, Vol. 128, 139-144.

C. Bernardi

1. (and F. Montagna), Equivalence relations induced by extensional formula: classification by means of a new fixed point property, Vol. 124, 221-233.

A. Bešliagić

1. (and K. Chiba), Normality of product spaces, Vol. 128, 99-112.

K. P. S. Bhaskara Rao

1. (and R. M. Shortt), Generalized Lusin sets with the Blackwell property, Vol. 127, 9-39.

A. Blass

3. Prime ideals yield almost maximal ideals, Vol. 127, 57-66.

P. Borst

1. (and J. J. Dijkstra), Essential mappings and transfinite dimension, Vol. 125, 41-45.
2. Classification of weakly infinite-dimensional spaces. Part I: A transfinite extension of the covering dimension, Vol. 130, 1-25.
3. Classification of weakly infinite-dimensional spaces. Part II: Essential mappings, Vol. 130, 73-99.

K. Borsuk

68. (and S. Nowak, S. Spież), Remarks on the n -dimensional geometric measure of compacta, Vol. 121, 59-71.

C. Bowszyc

3. On the homotopy classification of pairs of linked maps of manifolds into a linear space, Vol. 124, 135-142.

J. B. Brown

1. (and G. V. Cox), Baire category in spaces of probability measures, II, Vol. 121, 143-148.

W. Buła

1. On metrizable continuous images of compact ordered spaces, Vol. 123, 21-27.
2. Paracompactness in the class of closed images of GO-spaces, Vol. 126, 245-251.

D. Burns

1. (and S. F. Kapoor, P. A. Ostrand), On line-symmetric graphs, Vol. 122, 1-21.
2. (and S. F. Kapoor, P. A. Ostrand), Uniquely edge extendible graphs, Vol. 125, 125-131.

R. D. Byrd

1. (and J. T. Lloyd, F. D. Pedersen, J. W. Stepp), The automorphism group of some semigroups, Vol. 124, 187-195.

D. M. Carr

1. P_κ^λ partition relations, Vol. 128, 181-195.
2. A note on the λ -Shelah property, Vol. 128, 197-198.

A. Calka

2. On locally nonexpensive mappings on local isometries, Vol. 127, 77-99.

J. Chaber

6. A universal metacompact developable T_1 -space of weight m , Vol. 121, 81-88.
7. On d -paracompactness and related properties, Vol. 122, 175-186.
8. Another universal metacompact developable T_1 -space of weight m , Vol. 122, 247-253.

W. J. Charatonik

1. Smooth dendroids without ordinary points, Vol. 122, 61-70.
2. Smooth dendroids as inverse limits of dendrites, Vol. 124, 163-168.

G. L. Cherlin

1. (and M. A. Dickmann), Real closed rings, I. Residue rings of rings of continuous functions, Vol. 126, 147-183.

K. Chiba

1. (and A. Bešliagić), Normality of product spaces, Vol. 128, 99-112.

K. Ciesielski

2. (and A. Pelc), Extensions of invariant measures on Euclidean spaces, Vol. 125, 1-10.
3. L -spaces without any uncountable 0-dimensional subspace, Vol. 125, 231-235.
4. (and F. Galvin), Cylinder problem, Vol. 127, 171-176.

P. Clote

1. A note on the Mac-Dowell-Specker theorem, Vol. 127, 163-170.

G. V. Cox

4. (and J. B. Brown), Baire category in spaces of probability measures, II, Vol. 121, 143-148.

D. W. Curtis

6. (and S. Miklos), Nonexistence of local expansions on certain continua, Vol. 129, 207-210.

B. I. Dahn

1. The limit behaviour of exponential terms, Vol. 124, 169-186.
2. (and P. Göring), Notes on exponential-logarithmic terms, Vol. 127, 45-50.

A. Dawidowicz

1. Spherical maps, Vol. 127, 187-196.

G. Debs

1. Stratégies gagnantes dans certains jeux topologiques, Vol. 126, 93-105.
2. Espaces héréditairement de Baire, Vol. 129, 199-206.

G. Denk

1. (and W. Metzler), Nielsen reduction in free groups with operators, Vol. 129, 181-197.

M. Dembiński

1. (and P. Dowbor, A. Skowroński), On indecomposable representations of quivers with zero-relations, Vol. 130, 169-180.

M. A. Dickmann

1. (and G. L. Cherlin), Real closed rings, I. Residue rings of rings of continuous functions, Vol. 126, 147–183.

J. J. Dijkstra

1. (and P. Borst), Essential mappings and transfinite dimension, Vol. 125, 41–45.
2. (and J. van Mill), Fake topological Hilbert spaces and characterizations of dimension in terms of negligibility, Vol. 125, 143–153.

Ch. Dorsett

1. Connectivity properties in hyperspaces and product spaces, Vol. 121, 189–197.

A. Dow

1. Remote points in spaces with π -weight ω_1 , Vol. 124, 197–205.

P. Dowbor

1. (and M. Dembiński, A. Skowroński), On indecomposable representations of quivers with zero-relations, Vol. 130, 169–180.

D. W. Dubois

1. (and T. Recio), A note on Robinson's non-negativity criterion, Vol. 122, 71–76.

E. Dyer

1. (and S. Eilenberg), Globalizing fibrations by schedules, Vol. 130, 125–136.

F. van Engelen

1. (and J. van Mill), Borel sets in compact spaces: some Hurewicz-type theorems, Vol. 124, 271–286.

S. Eilenberg

1. (and E. Dyer), Globalizing fibrations by schedules, Vol. 130, 125–136.

V. Farmaki

1. The structure of Eberlein, uniformly Eberlein and Talagrand compact spaces in $\Sigma(R^I)$, Vol. 128, 15–28.

A. Felzenbaum

1. (and M. A. Berger, A. Fraenkel), Remark on the multiplicity of a partition of a group into cosets, Vol. 128, 139–144.

A. Fraenkel

1. (and M. A. Berger, A. Felzenbaum), Remark on the multiplicity of a partition of a group into cosets, Vol. 128, 139–144.

R. Frankiewicz

2. (and B. Aniszczczyk), On minimal generators of σ -fields, Vol. 124, 131–134.
3. Some remarks on embeddings of Boolean algebras and topological spaces, Vol. 126, 63–68.
4. (and K. Kunen), Solution of Kuratowski's problem on function having the Baire property, I, Vol. 128, 171–180.
5. (and K. Kunen, P. Zbierski), On inhomogeneity of products of compact F -spaces, Vol. 129, 35–38.
6. (and P. Zbierski), Strongly discrete subsets in ω^* , Vol. 129, 173–180.

D. H. Fremlin

1. (and A. W. Miller), On some properties of Hurewicz, Menger and Rothberger, Vol. 129, 17–33.

F. Galvin

1. (and K. Ciesielski), Cylinder problem, Vol. 127, 171–176.

D. George

1. Homology with models, Vol. 122, 33–45.

R. Göbel

2. (and S. Shelah), Modules over arbitrary domains, II, Vol. 126, 217–243.

J. T. Goodykoontz, Jr.

1. (and S. B. Nadler Jr.), Fixed point sets of continuum-valued mappings, Vol. 122, 85–103.

G. R. Gordh, Jr.

1. (and E. Vought), Monotone decompositions of hereditarily unicoherent continua via set functions and quasi-orders, Vol. 121, 231–238.

P. Göring

1. (and B. I. Dahn), Notes on exponential-logarithmic terms, Vol. 127, 45–50.

E. Grande

1. (and Z. Grande), Quelques remarques sur la superposition $F(x, f(x))$, Vol. 121, 189–197.

Z. Grande

8. (and E. Grande), Quelques remarques sur la superposition $F(x, f(x))$, Vol. 121, 189–197.
9. Sur la maximum approximatif, Vol. 123, 109–115.
10. Quelques remarques sur la semi-continuité supérieure, Vol. 126, 1–13.
11. Sur la quasi-continuité et la quasi-continuité approximative, Vol. 129, 167–172.

E. R. Griffor

1. (and D. Normann), Effective cofinalities and admissibility in E -recursion, Vol. 123, 151–161.

G. Gruenhage

2. On a Corson space of Todorčević, Vol. 126, 261–268.

A. Gutiérrez

1. (and S. Romaguera), A note on a paper of J. A. Guthrie and M. Henry, Vol. 127, 247–248.

V. Harnik

1. (and M. E. Nadel, J. Stavi), The structure of ω_1 -like orderings, Vol. 126, 185–199.

K. P. Hart

1. Almost- n -fully normal spaces, Vol. 123, 187–196.

Y. Hattori

1. On special metrics characterizing topological properties, Vol. 126, 133–145.
2. On characterizations of classes of metrizable spaces that have transfinite dimension, Vol. 128, 37–46.

L. Heindorf

1. Strongly retractive Boolean algebras, Vol. 126, 253–259.

A. Hohti

1. (and J. Pelant), On complexity of metric spaces, Vol. 125, 133–142.

T. Hoshina

3. Products of normal spaces with Lašnev spaces, Vol. 124, 143–153.

P. E. Howard

1. Binary consistent choice on pairs and a generalization of König's infinity lemma, Vol. 121, 17–23.

G. Huck

1. (and W. Metzler), Über den Homotopietyp von Linsenräumprodukten, Vol. 125, 11–22.
1. Homotopieäquivalenzen zwischen Produkten aus dreidimensionalen Linsenräumen, Vol. 128, 67–90.

R. P. Hunter

1. On infinite words and dimension raising homomorphisms, Vol. 129, 211-214.

A. Illanes M.

1. Cells and cubes in hyperspaces, Vol. 130, 57-65.

P. Isaza

1. Representability of V_h as intersection of \mathcal{A} -bounded variation classes, Vol. 130, 229-236.

W. Jakobsche

5. Approximating homotopy equivalence of 3-manifolds by homeomorphisms, Vol. 130, 157-168.

C. A. Johnson

1. More on distributive ideals, Vol. 128, 113-130.
2. On saturated ideals and P_λ , Vol. 129, 215-221.

P. T. Johnstone

2. Almost maximal ideals, Vol. 123, 197-209.

I. Juhász

1. (and Z. Szentmiklóssy), Increasing strengthenings of cardinal function inequalities, Vol. 126, 209-216.

R. R. Kallman

1. Uniqueness results for $ax+b$ group and related algebraic objects, Vol. 124, 255-262.

S. F. Kapoor

1. (and D. Burns, P. A. Ostrand), On line-symmetric graphs, Vol. 122, 1-21.
2. (and D. Burns, P. A. Ostrand) Uniquely edge extendible graphs, Vol. 125, 125-131.

Z. Karno

1. On indecomposable subcontinua of surfaces, Vol. 123, 117-122.

H. Kato

2. Whitney continua of graphs admit all homotopy types of compact connected ANRs, Vol. 129, 161-166.

M. Kaufmann

1. Mutually generic classes and incompatible expansions, Vol. 121, 213-218.
2. On expandability of models of arithmetic and set theory to models of weak second-order theories, Vol. 122, 57-60.

S. K. Kaul

1. Continuous and discrete flows and the property of ch_0^\pm , Vol. 127, 1-7.

J. Kennedy Phelps

1. A condition under which 2-homogeneity and representability are the same in continua, Vol. 121, 89-98.

V. Klee

1. (and E. Maluta, C. Zanco), Tiling with smooth and rotund tiles, Vol. 126, 269-290.

J. Klimek

1. A resolution of the square of a determinantal ideal associated to a symmetric matrix, Vol. 130, 101-111.

R. Kossak

1. $L_{\infty\omega_1}$ -elementary equivalence of ω_1 -like models of PA, Vol. 123, 123-131.
2. (and H. Kotlarski), Results on automorphisms of recursively saturated models of PA, Vol. 129, 9-15.

H. Kotlarski

4. (and R. Kossak), Results on automorphisms of recursively saturated models of PA, Vol. 129, 9-15.

G. Koumoullis

1. Cantor sets in Prohorov spaces, Vol. 124, 155-161.

W. Kryszewski

1. (and B. Przeradzki), The topological degree and fixed points of DC-mappings, Vol. 126, 15-26.

G. Krzykowski

1. On the transformers of the Zahorski classes of functions, Vol. 125, 59-70.

M. Kula

1. (and L. Szczepanik, K. Szymiczek), Quadratic form schemes and quaternionic schemes, Vol. 130, 181-190.

K. Kunen

5. (and R. Frankiewicz), Solution of Kuratowski's problem on function having the Baire property, I, Vol. 128, 171-180.
6. (and R. Frankiewicz, P. Zbierski), On inhomogeneity of products of compact F -spaces, Vol. 129, 35-38.

D. Lascar

1. Relation entre le rang U et le poids, Vol. 121, 117-123.

M. Lassak

3. Errata to the paper "Families of convex sets closed under intersections, homotheties and uniting increasing sequences of sets", (Fund. Math. 120 (1984), 15-40), Vol. 124, 287-287.

J. T. Lloyd

1. (and R. D. Byrd, F. D. Pedersen, J. W. Stepp), The automorphism group of some semigroups, Vol. 124, 187-195.

L. A. Luxemburg

1. On universal infinite-dimensional spaces, Vol. 122, 129-147.

T. Maćkowiak

10. Extension theorem for a pseudo-arc, Vol. 123, 71-79.
11. Terminal continua and the homogeneity, Vol. 127, 177-186.

E. Maluta

1. (and V. Klee, C. Zanco), Tiling with smooth and rotund tiles, Vol. 126, 269-290.

R. Mañka

1. On irreducibility and indecomposability of continua, Vol. 129, 121-131.

S. Mardešić

7. (and S. A. Antonian), Equivariant shape, Vol. 127, 213-224.

D. Marker

1. An analytic equivalence relation not arising from a Polish group actions, Vol. 130, 225-228.

J. C. Martínez

1. On a class of topological spaces with a Scott sentence, Vol. 129, 69-81.

J. F. Mc Clendon

1. Subopen multifunctions and selections, Vol. 121, 25-30.

T. A. Mc Kee

2. Relative expressiveness of the edge/adjacency language for graph theory, Vol. 123, 163-167.

3. Dual properties within graph theory, Vol. 128, 91–97.
4. Dualizing cubic graph theory, Vol. 130, 67–72.

W. Metzler

1. (and G. Huck), Über den Homotopietyp von Linsenraumprodukten, Vol. 125, 11–22.
2. (and G. Denk), Nielsen reduction in free groups with operators, Vol. 129, 181–197.

J. Michalski

1. On the category of n -groups, Vol. 122, 187–197.
2. Free products of n -groups, Vol. 123, 11–20.

S. Miklos

2. (and D. W. Curtis), Nonexistence of local expansions on certain continua, Vol. 129, 207–210.

J. van Mill

7. (and E. Wattel), Orderability from selections: Another solution to the orderability problem, Vol. 121, 219–229.
8. A uniquely homogeneous space need be a topological group, Vol. 122, 255–264.
9. (and F. van Engelen), Borel sets in compact spaces: some Hurewicz-type theorems, Vol. 124, 271–286.
10. (and J. Dijkstra), Fake topological Hilbert spaces and characterization of dimension in terms of negligibility, Vol. 125, 143–153.

A. W. Miller

2. (and D. H. Fremlin), On some properties of Hurewicz, Menger, and Rothberger, Vol. 129, 17–33.

K. C. Millet

1. Generic properties of proper foliations, Vol. 128, 131–138.

P. Minc

7. Countable subsets of Suslinian continua, Vol. 124, 123–129.

M. Misiurewicz

1. Embedding inverse limits interval maps as attractors, Vol. 125, 23–24.

I. Moerdijk

1. (and N. van Quê, G. E. Reyes), Forcing smooth square roots and integration, Vol. 128, 145–158.

L. Mohler

1. (and L. G. Oversteegen), A hereditarily indecomposable, hereditarily non-chainable planar tree-like continuum, Vol. 122, 237–246.
2. (and L. G. Oversteegen), Reduction and irreducibility for words and tree-words, Vol. 126, 107–121.

F. Montagna

1. (and C. Bernardi), Equivalence relations induced by extensional formula: classification by means of a new fixed point property, Vol. 124, 221–233.

P. Morales

4. Correction to my paper "Topological contraction principle" (Fund. Math. 110, 1980, pp. 135–144), Vol. 121, 177–178.

K. Morita

1. Resolutions of spaces and proper inverse systems in shape theory, Vol. 124, 263–270.

P. Mrozik

1. Chapman's category isomorphism for arbitrary ARs, Vol. 125, 195–208.

D. Mundici

2. A generalization of abstract model theory, Vol. 124, 1–25.
3. Embeddings, amalgamation and elementary equivalence: the representation of compact logics, Vol. 124, 109–122.

M. E. Nadel

1. (and V. Harnik, J. Stavi), The structure of ω_1 -like orderings, Vol. 126, 185–199.

S. B. Nadler, Jr.

11. (and J. T. Goodykoontz, Jr.), Fixed point sets of continuum valued mappings, Vol. 122, 85–103.

Nguyen To Nhu

1. Remarks on characterization on dimension of separable metrizable spaces, Vol. 123, 61–69.
2. Investigating the ANR-property of metric spaces, Vol. 124, 243–254.

J. Nikiel

1. On dendroids and their ramification points in the classical sense, Vol. 123, 39–46.
2. On dendroids and their end-points and ramification points in the classical sense, Vol. 124, 99–108.
3. Images of arcs — a nonseparable version of the Hahn–Mazurkiewicz theorem, Vol. 129, 91–120.

D. Noll

1. Topological spaces with a linear basis, Vol. 130, 113–123.

D. Normann

1. (and E. R. Griffor), Effective cofinalities and admissibility in E -recursion, Vol. 123, 151–161.

S. Nowak

4. (and K. Borsuk, S. Spież), Remarks on the n -dimensional geometric measure of compacta, Vol. 121, 59–71.
5. (and S. Spież), Remarks on deformability, Vol. 125, 95–103.
6. Some extension and classification theorem for maps of movable spaces, Vol. 125, 105–113.
7. On the relationships between shape properties of subcompacta of S^n and homotopy properties of their complements, Vol. 128, 47–59.

T. Nowicki

1. On some dynamical properties of S -unimodal maps on an interval, Vol. 126, 27–43.

J. M. O'Farrel

2. Construction of a Hurewicz metric space whose square is not a Hurewicz space, Vol. 127, 41–43.

J. Ołędzki

3. (and S. Spież), On embedding curves in two-dimensional polyhedra, Vol. 122, 47–55.

R. J. O'Malley

1. The multiple intersection property for path derivatives, Vol. 128, 1–6.

P. A. Ostrand

1. (and D. Burns, S. F. Kapoor), On line-symmetric graphs, Vol. 122, 1–21.
2. (and D. Burns, S. F. Kapoor), Uniquely edge extendible graphs, Vol. 125, 125–131.

L. G. Oversteegen

2. (and E. D. Tymchatyn), On span and weakly chainable continua, Vol. 122, 159–174.
3. (and L. Mohler), A hereditarily indecomposable, hereditarily non-chainable planar tree-like continuum, Vol. 122, 237–246.
4. (and E. D. Tymchatyn), On span and chainable continua, Vol. 123, 137–149.
5. (and L. Mohler), Reduction and irreducibility for words and tree-words, Vol. 126, 107–121,

J. Paris

3. (and A. Wilkie), Counting Δ_0 sets, Vol. 127, 67-76.

M. M. Parmenter

1. Exact covering systems for groups, Vol. 123, 133-136.

F. D. Pedersen

1. (and R. D. Byrd, J. T. Lloyd, J. W. Stepp), The automorphism group of some semigroups, Vol. 124, 187-195.

J. Pelant

1. (and A. Hohti), On complexity of metric spaces, Vol. 125, 133-142.

A. Pelc

4. Combinatorics on σ -algebras and a problem of Banach, Vol. 123, 1-9.
5. (and K. Ciesielski), Extensions of invariant measures on Euclidean spaces, Vol. 125, 1-10.
6. (and K. Prikry), On the existence of measures on σ -algebras, Vol. 125, 115-123.

G. Picavet

1. R v tements  tales, Vol. 128, 61-65.

A. Pillay

1. Countable modules, Vol. 121, 125-132.

A. Piolunowicz

1. On the \diamond principle, Vol. 122, 149-157.

Sz. Plewik

1. On completely Ramsey sets, Vol. 127, 127-132.

E. Pol

8. Residuality of the set of embeddings into Nagata's n -dimensional universal spaces, Vol. 129, 59-66.

R. Pol

16. On Borel-measurable collections of countable-dimensional sets, Vol. 121, 251-261.

W. Poreda

1. (and E. Wagner-Bojakowska, W. Wilczyński), A category analogue of the density topology, Vol. 125, 167-173.

K. Prikry

1. (and A. Pelc), On the existence of measures on σ -algebras, Vol. 125, 115-123.

A. Pr szyński

4. Forms and mappings. I: Generalities, Vol. 122, 219-235.

B. Przeradzki

2. (and W. Kryszewski), The topological degree and fixed points of DC-mappings, Vol. 126, 15-26.

N. van Qu 

1. (and I. Moerdijk, G. E. Reyes), Forcing smooth square roots and integration, Vol. 128, 145-158.

Z. Ratajczyk

2. A combinatorial analysis of functions provably recursive in IZ_n , Vol. 130, 191-213.

T. Recio

1. (and D. W. Dubois), A note on Robinson's non-negativity criterion, Vol. 122, 71-76.

G. E. Reyes

2. (and N. van Qu , I. Moerdijk), Forcing smooth square roots and integration, Vol. 128, 145-158.

M. M. Richter

1. (and B. Benninghofen), A general theory of superinfinitesimals, Vol. 128, 199-215.

J. Roitman

1. Correction to: Adding a random or a Cohen real: topological consequences and the effect of Martin's axiom, Vol. 129, 141-141.

S. Romaguera

1. (and A. Guti rrez), A note on a paper of J. A. Guthrie and M. Henry, Vol. 127, 247-248.

W. Rosicki

1. On a problem of S. Ulam concerning Cartesian squares of 2-dimensional polyhedra, Vol. 127, 101-125.

D. Ross

1. Automorphisms of the Loeb algebra, Vol. 128, 29-36.

L. Rybiński

1. On Carath odory type selections, Vol. 125, 187-193.

W. Sander

1. Applications of certain \mathfrak{R} -families, Vol. 122, 77-84.

K. Schilling

1. On absolutely Δ_0^1 operations, Vol. 121, 239-250.

A. Schinzel

1. The number of zeros of polynomials in valuation rings of complete discretely valued fields, Vol. 124, 41-97.

H. Schirmer

1. Fix-finite approximation of n -valued multifunctions, Vol. 121, 73-80.
2. An index and a Nielsen number for n -valued multifunctions, Vol. 124, 207-219.
3. A minimum theorem for n -valued multifunctions, Vol. 126, 83-92.
4. Fix-finite and fixed point free approximations of symmetric product maps, Vol. 128, 7-13.

S. Shelah

1. (and R. G bel), Modules over arbitrary domains, II, Vol. 126, 217-243.
2. (and U. Abraham, R. M. Solovay), Squares with diamonds and Souslin trees with special squares, Vol. 127, 133-162.

R. M. Shortt

1. Universally measurable spaces: an invariance theorem and diverse characterizations, Vol. 121, 169-176.
2. Minimal complementation and maximal conjugation for partitions, with an application to Blackwell sets, Vol. 123, 211-223.
3. (and K. P. S. Bhaskara Rao), Generalized Lusin sets with the Blackwell property, Vol. 127, 9-39.

S. Singh

8. Exotic ANR's via null decomposition of Hilbert cube manifolds, Vol. 125, 175-183.

G. S. Skordev

4. Fixed point index for open sets in euclidean spaces, Vol. 121, 41-58.

A. Skowroński

1. (and M. Dembiński, P. Dowbor), On indecomposable representations of quivers with zero-relations, Vol. 130, 169-180.

M. Sobolewski

1. Chainable continua and homeomorphisms of the plane onto itself, Vol. 122, 105–106.

R. M. Solovay

1. (and U. Abraham, S. Shelah), Squares with diamonds and Souslin trees with special squares, Vol. 127, 133–162.

S. Spież

6. (and K. Borsuk, S. Nowak), Remarks on the n -dimensional geometric measure of compacta, Vol. 121, 59–71.
7. (and J. Ołędzki), On embedding curves in two-dimensional polyhedra, Vol. 122, 47–55.
8. (and S. Nowak), Remarks on deformability, Vol. 125, 95–103.
9. The Hurewicz and Whitehead theorems with compact carriers, Vol. 127, 197–212.

V. V. Srivatsa

1. Existence of measurable selectors and parametrizations for G_δ -valued multifunctions, Vol. 122, 23–32.

R. Srzednicki

1. On rest points of dynamical systems, Vol. 126, 68–81.

J. R. Stavi

1. (and V. Harnik, M. E. Nadel), The structure of ω_1 -like orderings, Vol. 126, 185–199.

S. Stefanov

1. Mapping theorems for compacta with an arbitrary involution, Vol. 123, 169–185.

J. W. Stepp

1. (and R. D. Byrd, J. T. Lloyd, F. D. Pedersen), The automorphism group of some semigroups, Vol. 124, 187–195.

J. Steprans

1. (and S. Watson), Destroying precaliber \aleph_1 : an application of a Δ -system lemma for closed sets, Vol. 129, 223–229.

L. Szczepanik

1. (and M. Kula, K. Szymiczek), Quadratic form schemes and quaternionic schemes, Vol. 130, 181–190.

Z. Szentmiklóssy

1. (and I. Juhász), Increasing strengthenings of cardinal function inequalities, Vol. 126, 209–216.

M. Szeto

1. (and G. Bachman), On strongly measure replete lattices and the general Wallman remainder, Vol. 122, 199–217.

A. Szűcs

1. Multiple points of singular maps, Vol. 130, 215–224.

K. Szymiczek

1. (and M. Kula, L. Szczepanik), Quadratic form schemes and quaternionic schemes, Vol. 130, 181–190.

Takeshi Ohno

1. On the Baire order problem for a linear lattice of functions, Vol. 125, 209–216.

H. Tanaka

2. Normality and hereditary countable paracompactness of Pixley-Roy hyperspaces, Vol. 126, 201–208.

H. Toruńczyk

8. A correction of two papers concerning Hilbert manifolds, Vol. 125, 89–93.
9. Finite-to-one restrictions of continuous functions, Vol. 125, 237–249.

V. Trnková

1. Homeomorphisms of products of Boolean separable spaces, Vol. 126, 45–61.

J. K. Truss

1. Connections between different amoeba algebras, Vol. 130, 131–155.

E. D. Tymchatyn

8. (and L. G. Oversteegen), On span and weakly chainable continua, Vol. 122, 159–174.
9. (and L. G. Oversteegen), On span and chainable continua, Vol. 123, 137–149.

M. Valdivia

1. Products of Baire topological vector spaces, Vol. 125, 71–80.

M. van de Vel

3. Dimension of convex hyperspaces, Vol. 122, 107–127.

G. A. Venema

2. (and Vo Thanh Liem), Stable shape concordance implies homeomorphic complements, Vol. 126, 123–131.

Z. Vetulani

1. Ramified analysis and the minimal β -models of higher order arithmetics, Vol. 121, 1–15.

J. Vilimovský

1. Uniform quotients of metrizable spaces, Vol. 127, 51–55.

E. Vought

1. (and G. R. Gordh, Jr.), Monotone decompositions of hereditarily unicoherent continua via set functions and quasi-orders, Vol. 121, 231–238.

Vo Thanh Liem

1. Polyhedral-shape concordance implying homeomorphic complements, Vol. 125, 217–230.
2. (and G. A. Venema), Stable shape concordance implies homeomorphic complements, Vol. 126, 123–131.

E. Wagner-Bojakowska

3. (and W. Poreda, W. Wilczyński), A category analogue of the density topology, Vol. 125, 167–173.

J. T. Walsh

2. Marczewski sets, measure and the Baire property, Vol. 129, 83–89.

A. Waško

1. Extensions of functions defined on product spaces, Vol. 124, 27–39.
2. Extensions of functions from products with compact or metric factors, Vol. 125, 81–88.

S. Watson

1. (and J. Steprans), Destroying precaliber \aleph_1 : an application of a Δ -system lemma for closed sets, Vol. 129, 223–229.

E. Wattel

1. (and J. van Mill), Orderability from selections: Another solution to the orderability problem, Vol. 121, 219–229.

P. D. Welch

1. Coding that preserves Ramseyness, Vol. 129, 1–7.

D. Wilczyński

1. Fixed point free equivariant homotopy classes, Vol. 123, 47–60.

W. Wilczyński

1. (and W. Poreda, E. Wagner-Bojakowska), A category analogue of the density topology, Vol. 125, 167–173.

A. Wilkie

1. (and J. Paris), Counting Δ_0 sets, Vol. 127, 67–76.

M. D. Wochele

1. The equicontinuous structure relation of a unicoherent point-transitive points, Vol. 121, 179–188.

Y. Yajima

6. Notes on topological games, Vol. 121, 31–40.
7. On Σ -products of Σ -spaces, Vol. 123, 29–37.

C. Zanco

1. (and V. Klee, E. Maluta), Tiling with smooth and rotund tiles, Vol. 126, 269–290.

P. Zbierski

1. (and R. Frankiewicz, K. Kunen), On inhomogeneity of products of compact F -spaces, Vol. 129, 35–38.
2. (and R. Frankiewicz), Strongly discrete subsets in ω^* , Vol. 129, 173–180.

A. Zdunik

1. Entropy of transformations of the unit interval, Vol. 124, 235–241.
