Reçu par la Rédaction le 20. 9. 1966

INDEX ALPHABÉTIQUE DES TOMES LI-LX (1962—1967)*

Abian, A.

1. (and D. Deever) A short proof of a stronger version of Popruženko's Theorem, t. LIX, p. 71-72.

Aczél, J.

1. Remarques sur les relations d'équivalence, t. LI, p. 267-269.

Alfsen, E. M.

1. (and O. Njåstad) Proximity and generalized uniformity, t. LII, p. 235-252.
2. (and O. Njåstad) Totality of uniform structures with linearly ordered base, t. LII, p. 253-256.

Andalafte, E. Z.

1. (and L. M. Blumenthal) Metric characterizations of Banach and Euclidean spaces, t. LIV, p. 23-55.
2. (and R. W. Freese) Existence of 2-segments in 2-metric spaces, t. LX, p. 201-208.

Anderson, L. W.

1. (et R. P. Hunter) Sur les demi-groupes compacts et connexes, t. LVI, p. 183-187.

Anderson, R. D.

1. Quasi-universal flows and semi-flows, t. LVII, p. 1-8.

Andrews, P.

1. A reduction of the axioms for the theory of propositional types, t. LII, p. 345-350.

Archangelskii, A. (Архангельский, А.)

1. О рангах систем множеств и размерности множеств, t. LII, p. 257-275.

Armentrout, S.

1. (and R. H. Bing) A toroidal decomposition of E^n , t. LX, p. 81-87.

Auslander, J.

1. (and T. Hahn) Point transitive flows, algebras of functions and the Bebutov system, t. LIX, p. 117-131.

Bacon, P.

1. Coincidences of real-valued maps from the n -torus, t. LVII, p. 63-89.

Bagemihl, F.

6. (and J. E. McMillan) Characterization of the sets of angular and global convergence, and of the sets of angular and global limits, of functions in a half-plane, t. LIX, p. 177-187.

* L'index présent est la suite de celui des t. I-XV inséré au t. XV (1930), des t. XVI-XXV inséré au t. XXV (1935), des t. XXVI-XL inséré au t. XL (1953) et des t. XLI-L inséré au t. L (1962).

Balcerzyk, S.

6. On classes of abelian groups, t. LI, p. 149-178.
7. The global dimension of the group rings of abelian groups, t. LV, p. 293-301.
8. Correction to "On classes of abelian groups", t. LVI, p. 199-202.
9. The global dimension of the group rings of abelian groups II, t. LVIII, p. 67-73.

Banaschewski, B.

4. On lattice-ordered groups, t. LV, p. 113-122.

Bednarek, A. R.

1. On the Mickle-Rado covering theorems, t. LIII, p. 93-97.

Berri, M. P.

1. The complement of a topology for some topological groups, t. LVIII, p. 159-162.

Bessaga, C.

1. On topological classification of complete linear metric spaces, t. LVI, p. 251-288.

Bialynicki-Birula, A.

3. On Vietoris mapping theorem and its inverse, t. LIII, p. 135-145.

Bing, R. H.

4. (and K. Borsuk) A 3-dimensional absolute retract which does not contain any disk, t. LIV, p. 159-175.
5. (and A. Kirkor) An arc is tame in 3-space if and only if it is strongly cellular, t. LV, p. 175-180.
6. (and S. Armentrout) A toroidal decomposition of E^3 , t. IX, p. 81-87.

Bleicher, M. N.

1. Complementation of independent subsets and subspaces of generalized vector spaces, t. LI, p. 1-7.
2. Some theorems on vector spaces and the axiom of choice, t. LIV, p. 95-107.
3. Multiple choice axioms and axioms of choice for finite sets, t. LVII, p. 247-252.

Blumenthal, L. M.

1. (and E. Z. Andralafte) Metric characterizations of Banach and Euclidean spaces, t. LV, p. 23-55.

Boland, J. Ch.

1. (and C. G. Lekkerkerker) Representation of a finite graph by a set of intervals on the real line, t. LI, p. 45-64.
2. Embedding of graphs in the projective plane, t. LVII, p. 195-203.

Borsuk, K.

50. On a family of 2-dimensional AR-sets, t. LI, p. 283-297.
51. (and R. H. Bing) A 3-dimensional absolute retract which does not contain any disk, t. LIV, p. 159-175.
52. On embedding curves in surfaces, t. LIX, p. 73-89.

Bothe, H. G.

1. Eine Einbettung m -dimensionaler Mengen in einen $(m+1)$ -dimensionalen absoluten Retrakt, t. LII, p. 209-224.
2. Ein eindimensionales Kompaktum im E^3 , das sich nicht lagetreu in die Mengersche Universalkurve einbetten läßt, t. LIV, p. 251-258.
3. Universalmengen bezüglich der Lage im E^n , t. LVI, p. 203-212.
4. Zur Lage null- und eindimensionaler Punktmengen im E^3 , t. LVIII, p. 1-30.
5. Ein homogen wilder Knoten, t. LX, p. 271-283.

Brooks, R. M.

1. On Wallman compactifications, t. LX, p. 157-173.

Bushaw, D.

1. On boundedness in uniform spaces, t. LVI, p. 295-300.

Ceder, J. G.

1. On maximally resolvable spaces, t. LV, p. 87-93.

Chang C. C.

2. (and A. Ehrenfeucht) A characterization of abelian groups of automorphisms of a simply ordering relation, t. LI, p. 141-147.
3. (and A. Horn) On the representation of α -complete lattices, t. LI, p. 253-258.
4. (and B. Jónsson and A. Tarski) Refinement properties for relational structures, t. LV, p. 249-281.
5. Cardinal factorization of finite relational structures, t. LX, p. 251-269.

Charatonik, J. J.

2. On ramification points in the classical sense, t. LI, p. 229-252.
3. Two invariants under continuity and the incomparability of fans, t. LIII, p. 187-204.
4. Confluent mappings and unicoherence of continua, t. LVI, p. 213-220.

Choczewski, B.

1. (and M. Kuczma) On the "indeterminate case" in the theory of a linear functional equation, t. LVIII, p. 163-175.

Chu, S. C.

1. (and R. D. Moyer) On continuous functions, commuting functions, and fixed points, t. LIX, p. 91-95.

Comfort, W. W.

1. (and K. A. Ross) Topologies induced by groups of characters, t. LV, p. 283-291.
2. (and S. Negrepointis) Extending continuous functions on $X \times Y$ to subsets of $\beta X \times \beta Y$, t. LIX, p. 1-12.

Cook, H.

1. Concerning connected and dense subsets of indecomposable continua, t. LIII, p. 21-23.
2. On the most general plane closed point set through which it is possible to pass a pseudo-arc, t. LV, p. 11-22.
3. Upper semi-continuous continuum-valued mappings onto circle-like continua, t. LX, p. 233-239.
4. Continua which admit only the identity mapping onto non-degenerate subcontinua, t. LX, p. 241-249.

Cornette, J. L.

1. Connectivity functions and images on Peano continua, t. LVIII, p. 183-192.

Daigneault, A.

1. (and D. Monk) Representation theory for polyadic algebras, t. LII, p. 151-176.

Davies, R. O.

1. The power of the continuum and some propositions of plane geometry, t. LII, p. 277-281.

Day, J. M.

1. Monotone relations which preserve arcs and acyclicity, t. LVIII, p. 59-65.

Deever, D.

1. (and A. Abian) A short proof of a stronger version of Popruženko's Theorem, t. LIX, p. 71-72.

Deleanu, A.

1. On a certain result of Leray, t. LV, p. 1-9.

Denny, J. L.

1. A continuous real-valued function on E^n almost everywhere 1-1, t. LV, p. 95-99.

Devidé, V.

1. On monotonous mappings of complete lattices, t. LIII, p. 147-154.

Dickman, R. F.

1. (and R. L. Kelley, L. R. Rubin and P. M. Swingle) Semigroups and clusters of indecomposability, t. LVI, p. 21-33.

Doyle, P. H.

1. (and J. G. Hocking and R. P. Osborne) Local invertibility, t. LIV, p. 15-25.

Duda, E.

1. Mappings on spheres, t. LV, p. 195-197.

Duda, R.

3. On convex metric spaces III, t. LI, p. 23-33.
4. On a singular plane continuum, t. LVII, p. 25-61.

Dugundji, J.

1. Locally equiconnected spaces and absolute neighborhood retracts, t. LVII, p. 187-193.
2. A duality property of nerves, t. LIX, p. 213-219.

Duke, R. A.

1. Open mappings on graphs and manifolds, t. LX, p. 149-155.

Ehrenfeucht, A.

4. (and C. C. Chang) A characterization of abelian groups of automorphisms of a simply ordering relation, t. LI, p. 141-147.

Ehresmann, Ch.

1. Sous-structures et catégories ordonnées, t. LIV, p. 211-228.

Eisenberg, M.

1. Expansive automorphisms of finite-dimensional vector spaces, t. LIX, p. 307-312.
2. Expansive transformation semigroups of endomorphisms, t. LIX, p. 313-321.

Ellentuck, E.

1. Generalized idempotence in cardinal arithmetic, t. LVIII, p. 241-258.

Engelking, R.

3. (and E. G. Sklyarenko) On compactifications allowing extensions of mappings, t. LIII, p. 65-79.
4. Remarks on real-compact spaces, t. LV, p. 303-308.
5. (and M. Karłowicz) Some theorems on set theory and their topological consequences, t. LVII, p. 275-285.
6. Cartesian products and dyadic spaces, t. LVII, p. 287-304.
7. On functions defined on Cartesian products, t. LIX, p. 221-231.

Erdős, P.

2. (and A. Hajnal) On a classification of denumerable order types and an application to the partition calculus, t. LI, p. 117-129.

Ferferman, S.

3. Some applications of the notions of forcing and generic sets, t. LVI, p. 325-345.

Filipczak, F. M.

1. Sur les fonctions continues relativement monotones, t. LVIII, p. 75-87.
2. Sur la structure de l'ensemble des points de discontinuité des fonctions qui admettent une dérivée aux points de continuité, t. LX, p. 59-79.

Fine, A.

1. Abstract covering theorems, t. LII, p. 205-207.

Ford, Jo

1. Imbedding collections of compact 0-dimensional subsets of E^2 in continuous collections of mutually exclusive arcs, t. LVIII, p. 45-57.

Fort, M. K., Jr. †

3. (and M. C. McCord) Approximation of maps of inverse limit spaces by induced maps, t. LIX, p. 323-329.

Franklin, S. P.

1. Spaces in which sequences suffice, t. LVII, p. 107-115.

Frayne, T.

1. (and A. C. Morel and D. S. Scott) Reduced direct products, t. LI, p. 195-228.
2. (and A. C. Morel and D. S. Scott) Correction to the paper "Reduced direct products", t. LIII, p. 117.

Freese, R. W.

1. (and E. Z. Andaloite) Existence of 2-segments in 2-metric spaces, t. LX, p. 201-208.

Fuchs, L.

2. (and I. Halperin) On the imbedding of a regular ring in a regular ring with identity, t. LIV, p. 285-290.

Fuhrken, G.

1. Skolem-type normal forms for first-order languages with a generalized quantifier, t. LIV, p. 291-302.

Gaifman, H.

1. Infinite Boolean polynomials I, t. LIV, p. 229-250.
2. Errata to the paper "Infinite Boolean polynomials I", t. LVII, p. 117.

Garg, K. M.

1. On level sets of a continuous nowhere monotone function, t. LII, p. 59-68.

Gemignani, M.

1. On topologies for F^t , t. LIX, p. 153-157.

Gęba, K.

1. Algebraic topology methods in the theory of compact fields in Banach spaces, t. LIV, p. 177-209.

Glaser, L. C.

1. Dimension lowering monotone non-compact mappings of E^n , t. LVIII, p. 177-181.

Goetz, A.

4. On induced connections, t. LV, p. 149-174.

Golema, K.

1. (and A. Hulanicki) The structure of the factor group of the unrestricted sum by the restricted sum of Abelian groups II, t. LIII, p. 177-185.

Gosselin, R. P.

1. On the approximation of L^p functions by trigonometric polynomials, t. LIII, p. 121-134.

Granirer, E.

1. On Baire measures on D -topological spaces, t. LX, p. 1-22.

Grätzer, G.

1. A theorem on doubly transitive permutation groups with applications to universal algebras, t. LIII, p. 25-41.

de Groot, J.

4. (and T. Nishiura) Inductive compactness as a generalization of semicompactness, t. LVIII, p. 201-218.

Grzegorzczak, A.

7. A note on the theory of propositional types, t. LIV, p. 27-29.
8. Recursive objects in all finite types, t. LIV, p. 73-93.
9. Some relational systems and the associated topological spaces, t. LX, p. 223-231.

Haddock, A. G.

1. Rotation groups under monotone transformations, t. LIII, p. 173-175.

Hahn, F.

1. (and J. Auslander) Point transitive flows, algebras of functions and the Bebutov system, t. LX, p. 117-139.

Hajnal, A.

2. (and P. Erdős) On a classification of denumerable order types and an application to the partition calculus, t. LI, p. 117-129.
3. Remarks on the theorem of W. P. Hanf, t. LIV, p. 109-113.

Hales, A. W.

1. On the non-existence of free complete Boolean algebras, t. LIV, p. 45-66.

Halperin, I.

1. (and L. Fuchs) On the imbedding of a regular ring in a regular ring with identity, t. LIV, p. 285-290.

Halpern, J. D.

1. The independence of the axiom of choice from the Boolean prime ideal theorem, t. LV, p. 57-66.

Hanf, W.

1. Incompactness in languages with infinitely long expressions, t. LIII, p. 309-324.
2. On a problem of Erdős and Tarski, t. LIII, p. 325-334.

Harary, F.

1. (and Y. Kodama) On the genus of an n -connected graph, t. LIV, p. 7-13.

Harzheim, E.

1. Dualzerlegungen in totalgeordneten Mengen, t. LIII, p. 81-91.
2. Mehrfach wohlgeordnete Mengen und eine Verschärfung eines Satzes von Lindenbaum, t. LIII, p. 155-172.

Hayes, A.

1. Sequentially pointwise continuous linear functionals, t. LV, p. 67-75.

Heath, R. W.

1. On open mappings and certain spaces satisfying the first countability axiom, t. LVII, p. 91-96.

Henkin, L.

3. A theory of propositional types, t. LII, p. 323-344.
4. Errata to the paper "A theory of propositional types", t. LIII, p. 119.

Herrlich, H.

1. Ordnungsfähigkeit zusammenhängender Räume, t. LVII, p. 305-311.

Hewitt, E.

3. A remark on characters of locally compact Abelian groups, t. LIII, p. 55-64.

Hildebrand, S. K.

1. (and D. E. Sanderson) Connectivity functions and retracts, t. LVII, p. 237-245.

Hintikka, J.

1. A closure and complement result for nested topologies, t. LVII, p. 97-106.

Hocking, J. G.

1. (and P. H. Doyle and R. P. Osborne) Local invertibility, t. LIV, p. 15-25.

Hofmann, K. H.

1. (and F. B. Wright) Pointwise periodic groups, t. LII, p. 103-122.

Holme, A.

1. A general theory of structure spaces, t. LVIII, p. 335-347.

Horn, A.

1. (and C. C. Chang) On the representation of α -complete lattices, t. LI, p. 253-258.
2. On α -homomorphic images of α -rings of sets, t. LI, p. 259-266.

Hulanicki, A.

5. Invariant extensions of the Lebesgue measure, t. LI, p. 111-115.
6. (and K. Golema) The structure of the factor group of the unrestricted sum by the restricted sum of Abelian groups II, t. LIII, p. 177-185.

Hunter, R. P.

2. On the structure of homogroups with applications to the theory of compact connected semigroups, t. LII, p. 69-102
3. (and L. W. Anderson) Sur les demi-groupes compacts et connexes, t. LVI, p. 183-187.

Iqbalunnisa

2. On some problems of G. Grätzer and E. T. Schmidt, t. LVII, p. 181-185.
3. On types of lattices, t. LIX, p. 97-102.
4. On a Galois correspondence between the lattice of ideals and the lattice of congruences on a lattice L , t. LIX, p. 103-108.
5. Characterizations of weakly modular lattices, t. LIX, p. 301-305.

Isbell, J. R.

2. Two set-theoretical theorems in categories, t. LIII, p. 43-49.

Jónsson, B.

1. (and C. C. Chang and A. Tarski) Refinement properties for relational structures, t. LV, p. 249-281.

Jung, H. A.

1. Zum Bernsteinschen Äquivalenzsatz, t. LVI, p. 105-106.

Karłowicz, M.

1. (and R. Engelking) Some theorems of set theory and their topological consequences, t. LVII, p. 275-285.

2. (and K. Kuratowski) On relations between some algebraic and topological properties of lattices, t. LVIII, p. 219-228.

Keisler, H. J.

1. A complete first-order logic with infinitary predicates, t. LII, p. 177-203.
2. (and A. Tarski) From accessible to inaccessible cardinals (Results holding for all accessible cardinal numbers and the problem of their extension to inaccessible ones), t. LIII, p. 225-308.
3. (and A. Tarski) Corrections to the paper "From accessible to inaccessible cardinals", t. LVII, p. 119.

Kelley, R. L.

1. (and R. F. Dickman, L. R. Rubin and P. M. Swingle) Semigroups and clusters of indecomposability, t. LVI, p. 21-33.

Kemperman, J. H. B.

1. On products of sets in a locally compact group, t. LVI, p. 51-68.

Kent, D.

1. Convergence functions and their related topologies, t. LIV, p. 125-133.
2. On convergence groups and convergence uniformities, t. LX, p. 213-222.

King, L. R.

1. (and J. H. Roberts and G. M. Rosenstein, Jr.) Concerning some problems raised by A. Lelek, t. LIV, p. 325-334.

Kinoshita, S.

2. On quasi-translations in 3-space, t. LVI, p. 69-79.

Kirkor, A.

2. (and R. H. Bing) An arc is tame in 3-space if and only if it is strongly cellular, t. LV, p. 175-180.

Knight, C. J.

1. Weak products of spaces and complexes, t. LIII, p. 1-12.

Knill, R. J.

1. Cones, products and fixed points, t. LX, p. 35-46.

Koch, R. J.

2. (and L. F. McAuley) Semigroups on continua ruled by arcs, t. LVI, p. 1-8.
3. Connected chains in quasi-ordered spaces, t. LVI, p. 245-249.

Kodama, Y.

3. (and F. Harary) On the genus of an n -connected graph, t. LIV, p. 7-13.

Konstantinov, N. N. (Константинов, Н. Н.)

1. Дополнение самонакручивающейся плоской кривой, t. LVII, p. 147-171.

Kuczma, M.

2. A characterization of the exponential and logarithmic functions by functional equations, t. LII, p. 283-288.
3. Sur une équation aux différences finies et une caractérisation fonctionnelle des polynômes, t. LV, p. 77-86.
4. (and B. Choczewski) On the "indeterminate case" in the theory of a linear functional equation, t. LVIII, p. 163-175.

Kuperberg, W.

1. Stable points of a polyhedron, t. LIX, p. 43-48.
2. On compact metric space sequences, monotonic by r -domination, t. LX, p. 95-104.

Kuratowski, K.

88. (and M. Karłowicz) On relations between some algebraic and topological properties of lattices, t. LVIII, p. 219-228.

Läuchli, K.

1. The independence of the ordering principle from a restricted axiom of choice, t. LIV, p. 31-43.
2. (and J. Leonard) On the elementary theory of linear order, t. LIX, p. 109-116.

Leader, S.

3. Spectral structures and uniform continuity, t. LX, p. 105-115.

Lekkerkerker, C. G.

1. (and J. Ch. Boland) Representation of a finite graph by a set of intervals on the real line, t. LI, p. 45-64.

Leland, K. O.

1. Topological analysis of analytic functions, t. LVI, p. 157-182.

Lelek, A.

8. (and D. Zaremba) Dimensions of irreducible continua and fixations of components in compact spaces, t. LI, p. 81-86.
9. Fixations of sets in Euclidean spaces, t. LI, p. 87-109.
10. On weakly chainable continua, t. LI, p. 271-282.
11. Some mappings of ANR-sets, t. LII, p. 225-233.
12. Disjoint mappings and the span of spaces, t. LV, p. 199-214.

Leonard, J.

1. (and K. Läuchli) On the elementary theory of linear order, t. LIX, p. 109-116.

Lévy, A.

4. The interdependence of certain consequences of the axiom of choice, t. LIV, p. 135-157.

Lipiński, J. S.

5. О множествах точек сходимости последовательности непрерывных функций к бесконечности, t. LI, p. 35-43.

Lopez-Escobar, E. G. K.

1. An interpolation theorem for denumerably long formulas, t. LVII, p. 253-272.
2. On defining well-orderings, t. LIX, p. 13-21.
3. An addition to "On defining well-orderings", t. LIX, p. 299-300.

Luxemburg, W. A. J.

1. A remark on Sikorski's extension theorem for homomorphisms in the theory of Boolean algebras, t. LV, p. 239-247.

Maharam, D.

1. Incompressible transformations, t. LVI, p. 35-50.

Mahavier, W. S.

2. Upper semi-continuous decompositions of irreducible continua, t. LX, p. 53-57.

Makkai, M.

1. A compactness result concerning direct products of models, t. LVII, p. 313-325.

Marczewski, E.

33. Homogeneous operations and homogeneous algebras, t. LVI, p. 81-103.

Martin, J.

1. A rigid sphere, t. LIX, p. 117-121.

McAuley, L. F.

2. (and R. J. Koch) Semigroups on continua ruled by arcs, t. LVI, p. 1-8.

McCord, M. C.

1. (and M. K. Fort, Jr. †) Approximation of maps of inverse limit spaces by induced maps, t. LIX, p. 323-329.
2. Singular homology of n -cell-like continua, t. LIX, p. 331-341.

McMillan, J. E.

1. (and F. Bagemihl) Characterization of the sets of angular and global convergence, and of the sets of angular and global limits, of functions in a half-plane, t. LIX, p. 177-187.

Menger, K.

6. (and H. I. Whitlock) Two theorems on the generation of systems of functions, t. LVIII, p. 229-240.

Milnor, J.

1. Most knots are wild, t. LIV, p. 335-338.

Mioduszewski, J.

3. A functional conception of snake-like continua, t. LI, p. 179-189.
4. Everywhere oscillating functions, extension of the uniformization and homogeneity of the pseudo-arc, t. LVI, p. 131-155.

Mišchenko, A. (Мищенко, А.)

1. Несколько теорем о произведении топологических пространств, t. LVIII, p. 259-284.
2. О равномерно замкнутых отображениях, t. LVIII, p. 285-308.

Molski, R.

3. On an irreducible absolute retract, t. LVII, p. 121-133.
4. On a family of AR-sets, t. LVII, p. 135-145.

Monk, D.

1. (and A. Daigneault) Representation theory for polyadic algebras, t. LII, p. 151-176.
2. (and D. Scott) Additions to some results of Erdős and Tarski, t. LIII, p. 335-343.
3. (and F. M. Sioson) m -Semigroups, semigroups and function representations, t. LIX, p. 233.

Morel, A. C.

1. (and T. Frayne and D. S. Scott) Reduced direct products, t. LI, p. 105-228.
2. (and T. Frayne and D. S. Scott) Correction to the paper "Reduced direct products", t. LIII, p. 117.
3. Ordering relations admitting automorphisms, t. LIV, p. 279-284.

Moschovakis, Y. N.

1. Recursive metric spaces, t. LV, p. 215-238.

Mostert, P. S.

1. Continua meeting an orbit at a point, t. LII, p. 319-321.
2. A correction to my paper "Continua meeting an orbit at a point", t. LVI, p. 221-222.

Mostowski, A. Włodzimierz

3. On the decidability of some problems in special classes of groups, t. LIX, p. 123-135.

4. Computational algorithms for deciding some problems for nilpotent groups, t. LIX, p. 137-152.

Moyer, R. D.

1. (and S. C. Chu) On continuous functions, commuting functions, and fixed points, t. LIX, p. 91-95.

Mycielski, Jan

11. On the axiom of determinateness, t. LIII, p. 205-224.
12. (and S. Świerczkowski) On the Lebesgue measurability and the axiom of determinateness, t. LIV, p. 67-71.
13. Independent sets in topological algebras, t. LV, p. 139-147.
14. (et W. Sierpiński) Sur une propriété des ensembles linéaires, t. LVIII, p. 143-147.
15. On the axiom of determinateness II, t. LIX, p. 203-212.

Nagata, J.

3. On a special metric and dimension, t. LV, p. 181-194.

Narkiewicz, W.

2. A note on v^* -algebras, t. LII, p. 289-290.
3. On a certain class of abstract algebras, t. LIV, p. 115-124.
4. Corrections to my paper "On a certain class of abstract algebras", t. LVIII, p. 111.

Negreponis, S.

1. (and W. W. Comfort) Extending continuous functions on $X \times Y$ to subsets of $\beta X \times \beta Y$, t. LIX, p. 1-12.

Nerode, A.

1. Combinatorial series and recursive equivalence types, t. LVIII, p. 113-141.

Neubrunn, T.

1. On the equivalence of an exhaustion principle and the axiom of choice, t. LX, p. 209-211.

Nishiura, T.

1. (and J. de Groot) Inductive compactness as a generalization of semicompactness, t. LVIII, p. 201-218.
2. Inductive invariants and dimension theory, t. LIX, p. 243-262.

Njåstad, O.

1. (and E. M. Alfsen) Proximity and generalized uniformity, t. LII, p. 235-252.
2. (and E. M. Alfsen) Totality of uniform structures with linearly ordered base t. LII, p. 253-256.

Novák, V.

1. On the lexicographic dimension of linearly ordered sets, t. LVI, p. 9-20.

Novotný, M.

1. (and L. Skula) Über gewisse Topologien auf geordneten Mengen, t. LVI, p. 313-324.

Osborne, R. P.

1. (and P. H. Doyle and J. G. Hoeking) Local invertibility, t. LIV, p. 15-25.

Pasynkov, B. A. (Пасынков, Б. А.)

1. Об универсальных бикompактных и метрических пространствах данной размерности, t. LX, p. 285-309.

Patkowska, H.

1. On the decomposition of 2-dimensional ANR-s into a Cartesian product, t. LI, p. 13-23.
2. On the uniqueness of the decomposition of finite-dimensional ANR-s into Cartesian products of at most 1-dimensional spaces, t. LVIII, p. 89-110.

Pickett, H. E.

1. Subdirect representations of relational systems, t. LVI, p. 223-240.

Pfonka, J.

1. Diagonal algebras, t. LVIII, p. 309-321.
2. On distributive quasi-lattices, t. LX, p. 191-200.

Ponomarev, W. (Пономарев, В.)

2. О диадических пространствах, t. LII, p. 351-354.

Poppe, H.

1. Einige Bemerkungen über den Raum der abeghlossenen Mengen, t. LIX, p. 159-169.

Popruzenko, J.

15. Sur une propriété des ensembles partiellement ordonnés, t. LIII, p. 13-19.
16. Sur un théorème de W. Sierpiński, t. LIII, p. 51-53.

Purves, R.

1. Bimeasurable functions, t. LVIII, p. 149-157.

Rema, P. S.

1. Linear-compact congruence topologies in $*$ -lattices, t. LVII, p. 9-24.

Roberts, J. H.

1. (and L. R. King and G. M. Rosenstein, Jr.) Concerning some problems raised by A. Lelek, t. LIV, p. 325-334.
2. Zero-dimensional sets blocking connectivity functions, t. LVII, p. 173-179.

Robinson, R. M.

1. Packing closed sets, t. LVI, p. 189-198.

Rosenstein, G. M., Jr.

1. (and L. R. King and J. H. Roberts) Concerning some problems raised by A. Lelek, t. LIV, p. 325-334.

Ross, K. A.

1. (and W. W. Comfort) Topologies induced by groups of characters, t. LV, p. 283-291.
2. Closed subgroups of locally compact Abelian groups, t. LVI, p. 241-244.

Rousseau, G.

1. Sequents in many valued logic I, t. LX, p. 23-33.

Rozycki, E. P.

1. On Egoroff's theorem, t. LVI, p. 289-293.

Rubin, L. R.

1. (and R. F. Dickman, R. L. Kelley and P. M. Swingle) Semigroups and clusters of indecomposability, t. LVI, p. 21-33.

Ryll-Nardzewski, C.

8. On Borel measurability of orbits, t. LVI, p. 129-130.
9. On a Freedman's problem, t. LVII, p. 273-274.

Sanderson, D. E.
