INDEX ALPHABÉTIQUE
DES TOMES (LXI-LXX) (1967–1971) *

Aarts, J. M.

1. Completeness degree (A generalization of dimension), t. LXIII, p. 27–41.
2. A characterization of strong inductive dimension, t. LXX, p. 147–155.

Altman, M.

1. Dilating mappings, implicit functions and fixed point theorems in finite-dimensional spaces, t. LXVIII, p. 129–141.

Amstislawski, W. И. (Амстиславский, В. О.)

1. Эффективные R -множества и трансфинитные продолжения рекурсивных иерархий, t. LXVIII, p. 61–86.

Andenæs, P. R.

1. Note on metrization, t. LXII, p. 287–292.

Anderson, B. A.

1. A class of topologies with T_1 -complements, t. LXIX, p. 267–277.

Antonowski, M. J. (Антоновский, М. Я.)

1. Гомоморфизмы тихоновских полуполей и обобщенные полуметрики, t. LXIX, p. 109–124.

Armentrout, S.

2. On embedding decomposition spaces of E^n in E^{n+1} , t. LXI, p. 1–21.
3. A three-dimensional spheroidal space which is not a sphere, t. LXVIII, p. 183–186.
4. On the strong local simple connectivity of the decomposition spaces of toroidal decompositions, t. LXIX, p. 15–37.
5. On the singularity of Mazurkiewicz in absolute neighborhood retracts, t. LXIX, p. 131–145.

Bacon, Ph.

2. An acyclic continuum that admits no mean, t. LXVII, p. 11–13.

Baer, R.

1. (und A. Schlette) Berandung Gruppentheoretischer Eigenschaften, t. LXV, p. 1–22.

* L'index présent est la suite de celui des t. I–XV inséré au t. XV (1930), des t. XVI–XXV inséré au t. XXV (1935), des t. XXVI–XL inséré au t. XL (1953), des t. XLI–L inséré au t. L (1962) et des t. LI–LX inséré au t. LX (1967).

Bagemihl, F.

7. The hypothesis $2^{\aleph_0} \leq \aleph_n$ and ambiguous points of planar functions, t. LXI, p. 73-77.

Balbes, R.

1. A note on distributive sublattices of a modular lattice, t. LXV, p. 219-222.
2. A representation theorem for distributive quasi-lattices, t. LXVIII, p. 207-214.

Balcerzyk, S.

10. The global dimension of the group rings of abelian groups III, t. LXVII, p. 241-250.

Bank, S. B.

1. (and G. H. Orland) A note on Rouché's theorem, t. LXIII, p. 137-141.

Barbut, E.

1. On nil semirings with ascending chain conditions, t. LXVIII, p. 261-264.

Bean, R. J.

1. Decompositions of E^3 which satisfy a uniform Lipschitz condition are factors of E^4 , t. LXX, p. 109-115.

Behzad, M.

1. (and G. Chartrand and C. E. Wall) On minimal regular digraphs with given girth, t. LXIX, p. 227-231.

Bell, H.

1. Fixed points, index, and degree for some set valued functions, t. LXIX, p. 213-217.

Bernstein, A. R.

1. A new kind of compactness for topological spaces, t. LXVI, p. 185-193.

Bessaga, C.

2. (and A. Pełczyński) Estimated extension theorem, homogeneous collections and skeletons and their applications to topological classification of linear metric spaces and convex sets, t. LXIX, p. 153-190.

Boals, A. J.

1. Non-manifold factors Euclidean spaces, t. LXVIII, p. 159-177.

Boffa, M.

1. Induction et récursion en théorie des ensembles sans axiome de fondement, t. LXVI, p. 241-253.
2. Une application de la méthode de Fraenkel-Mostowski, t. LXVII, p. 179-182.

Borsuk, K.

53. Concerning homotopy properties of compacta, t. LXII, p. 223-254.
54. Fundamental retracts and extensions of fundamental sequences, t. LXIV, p. 55-85.
55. Errata to the paper "Fundamental retracts and extensions of fundamental sequences", t. LXIV, p. 375.
56. On movable compacta, t. LXVI, p. 137-146.
57. Some remarks concerning the shape of pointed compacta, t. LXVII, p. 221-240.
58. A note on the theory of shape of compacta, t. LXVII, p. 265-278.
59. (and W. Holsztyński) Concerning the ordering of shapes of compacta, t. LXVIII, p. 107-115.

Bosbach, B.

1. Komplementäre Halbgruppen. Axiomatik und Arithmetik, t. LXIV, p. 257-287.
2. Komplementäre Halbgruppen. Kongruenzen und Quotienten, t. LXIX, p. 1-14.

Brechner, B. L.

1. Periodic homeomorphisms on chainable continua, t. LXIV, p. 197-202.

Bruckner, A. M.

1. On the differentiation of integrals in euclidean spaces, t. LXVI, p. 129-135.

Bryant, J. L.

1. Euclidean space modulo a cell, t. LXIII, p. 43-51.

Bumby, R.

1. (and E. Ellentuck) Finitely additive measures and the first digit problem, t. LXV, p. 33-42.

Burmeister, P.

1. Über die Mächtigkeiten und Unabhängigkeitsgrade der Basen freier Algebren, I, t. LXII, p. 165-189.
2. Über die Mächtigkeiten und Unabhängigkeitsgrade der Basen freier Algebren, II, t. LXVII, p. 323-336.

Carruth, J. H.

1. Lifting trees under light open maps, t. LXVI, p. 215-217.

Ceder, J. G.

2. Differentiable roads for real functions, t. LXV, p. 351-358.

Chakrabarty, M. C.

1. Some results on $AC-\omega$ functions, t. LXIV, p. 219-230.
2. On functions of generalized bounded ω -variation, t. LXVI, p. 293-300.
3. On the space of BV- ω functions, t. LXX, p. 13-23.

Chandler, R.

1. A generalized contraction principle, t. LXV, p. 193-195.

Charatonik, J. J.

5. On decomposition of λ -dendroids, t. LXVII, p. 15-30.
6. An example of a monostratiform λ -dendroids, t. LXVII, p. 75-87.
7. Remarks on some class of continuous mappings of λ -dendroids, t. LXVII, p. 337-344.
8. (and C. Eberhart) On smooth dendroids, t. LXVII, p. 297-322.
9. Concerning the fixed point property for λ -dendroids, t. LXIX, p. 55-62.

Chartrand, G.

1. (and H. V. Kronk and D. R. Lick) Randomly Hamiltonian disgraphs, t. LXV, p. 223-226.
2. (and M. Behzad and C. E. Wall) On minimal regular digraphs with given girth, t. LXIX, p. 227-231.

Clapp, M. H.

1. On a generalization of absolute neighborhood retracts, t. LXX, p. 117-130.

Clay, R. E.

1. Note on M. C. Gemignani's topological geometries, t. LXIII, p. 213-214.

Comfort, W. W.

3. A theorem of Stone-Čech type, and a theorem of Tychonoff type, without the axiom of choice, and their realcompact analogues, t. LXIII, p. 97-110.
4. (and S. Negrepontis) Some topological properties associated with measurable cardinals, t. LXIX, p. 191-205.

Cook, H.

5. Tree-likeness of dendroids and λ -dendroids, t. LXVIII, p. 19-22.
6. Tree-likeness of hereditarily equivalent continua, t. LXVIII, p. 203-205.

Cornette, J. L.

2. (and J. E. Girolo) Connectivity retracts of finitely coherent Peano continua t. LXI, p. 177-182.

Craggs, R.

1. Small ambient isotopies of a 3-manifold which transform one embedding of a polyhedron into another, t. LXVIII, p. 225-256.

Croom, F. H.

1. Fiber homotopy type of associated loop spaces, t. LXVIII, p. 257-260.

Curtis, M. L.

2. (and J. Dugundji) A proof of deRham's theorem, t. LXVIII, p. 265-268.

Daigneault, A.

2. Lawvere's elementary theories and polyadic and cylindric algebras, t. LXVI p. 307-328.

Darst, R. B.

1. A universal null set which is not concentrated, t. LXII, p. 47-48.
2. Some remarks on Hausdorff measure, t. LXIV, p. 325-328.
3. On bimeasurable images of universally measurable sets, t. LXVI, p. 381-382.
4. A CBV image of a universal null set need not be a universal null set, t. LXVII, p. 219-220.

Daverman, R. J.

1. (and W. T. Eaton) A dense set of sewings of two crumpled cube yields S^2 , t. LXV, p. 51-60.

Day, G. W.

1. Maximal chains in atomic Boolean algebras, t. LXVII, p. 293-296.

Dierker, P. F.

1. Two complexes that are spines of the three ball, t. LXVI, p. 283-286.

Dickman, R. F., Jr.

1. Unified spaces and singular sets for mappings of locally compact spaces, t. LXII, p. 103-123.

Dlab, V.

1. Rank theory of modules, t. LXIV, p. 313-324.

Doets, H. C.

1. Novak's result by Henkin's method, t. LXIV, p. 329-333.

Doner, J.

1. (and A. Tarski) An extended arithmetic of ordinal numbers, t. LXV, p. 95-127.

Drake, F. R.

1. On weak cardinal powers in generic extensions, t. LXVI, p. 219-222.

Duda, R.

5. On the hyperspace of subcontinua of a finite graph, I, t. LXII, p. 265-286.
6. On the hyperspace of subcontinua of a finite graph, II, t. LXIII, p. 225-255.
7. On ordered topological spaces, t. LXIII, p. 295-309.
8. On convex metric spaces V, t. LXVIII, p. 87-106.
9. Correction to the paper "On the hyperspace of subcontinua of a finite graph, I, t. LXIX, p. 207-211.

Dugundji, J.

3. Modified Vietoris theorems for homotopy, t. LXVI, p. 223-235.
4. (and M. L. Curtis) A proof of deRham's theorem, t. LXVIII, p. 265-268.

Dyson, V. H.

1. On the decision problem for extensions of a decidable theory, t. LXIV, p. 7-40.

Eaton, W. T.

1. (and R. J. Daverman) A dense set of sewings of two crumpled cubes yields S^2 , t. LXV, p. 51-60.

Eberhart, C.

1. A unique factorization theorem for countable products of circles, t. LXI, p. 305-308.
2. Metrizability of trees, t. LXV, p. 43-50.
3. (and J. J. Charatonik) On smooth dendroids, t. LXVII, p. 297-322.

Ellentuck, E.

2. The first order properties of Dedekind finite integers, t. LXIII, p. 7-25.
3. (and R. Bumby) Finitely additive measures and the first digit problem, t. LXV, p. 33-42.

Engelking, R.

8. Closed mappings on complete metric spaces, t. LXX, p. 103-107.

Ferrier, J.

1. Paracompacité et espaces uniformes, t. LXII, p. 7-30.

Finkelstein, L.

1. (and S. Leader) Regulated semilattices and locally compact spaces, t. LXX, p. 49-58.

FitzGerald, R. W.

1. (and P. M. Swingle) Core decompositions of continua, t. LXI, p. 33-50.

Fitzpatrick, B., Jr.

1. On dense subspaces of Moore spaces II, t. LXI, p. 91-92.

Fleischman, W. M.

1. A new extension of countable compactness, t. LXVII, p. 1-9.

Fletcher, P.

1. (and R. L. Sniter) Topological Galois spaces, t. LXVIII, p. 143-148.

Fodor, G.

1. (and A. Máté) Disjoint systems over set ideals (On a generalization of the usual conception of almost disjoint set systems), t. LXII, p. 211-222.

Franklin, S. P.

2. Spaces in which sequences suffice II, t. LXI, p. 51-56.

Fraser, R. B., Jr.

1. Axiom system for Lipschitz structures, t. LXVI, p. 15-24.

Gandy, R. O.

1. (and G. E. Sacks) A minimal hyperdegree, t. LXI, p. 215-223.

Gantner, T. E.

1. Extensions of uniform structures, t. LXVI, p. 263-281.

Gentry, K. R.

1. Some properties of the induced map, t. LXVI, p. 55-59.

Ger, R.

1. Some remarks on convex functions, t. LXVI, p. 255-262.

Gęba, K.

2. Fredholm σ -proper maps of Banach spaces, t. LXIV, p. 341-373.

Girolo, J. E.

1. (and J. L. Cornette) Connectivity retracts of finitely coherent Peano continua, t. LXI, p. 177-182.

Godlewski, S.

1. Some remarks concerning the mappings of the inverse limit into an absolute neighbourhood retract and its applications to cohomotopy groups, t. LXIII, p. 89-96.
2. Homotopy dependence of fundamental sequences, relative fundamental equivalence of sets and a generalization of cohomotopy groups, t. LXIX, p. 63-91.

Gray, N. R.

1. Note on a paper of Wojdysławski, t. LXIII, p. 215-216.
2. On the conjecture $2^X \approx I^{\omega}$, t. LXVI, p. 45-52.

Grätzer, G.

2. (and H. Lakser and C. R. Platt) Free products of lattices, t. LXIX, p. 233-240.

Gresser, J.

1. The range of a planar function with ambiguous points, t. LXV, p. 129-132.

Griffit, H. C.

1. (and L. R. Howell, Jr.) Strongly cellular cells in E^3 are tame, t. LXV, p. 23-32.

Grillet, M. O. Poinsignon.

1. Subdivision rings of a semiring, t. LXVII, p. 67-74.

Grillet, P. A.

1. Maximal chains and antichains, t. LXV, p. 157-167.

Gulden, S.

1. (and M. Świerczewski and C. Sloyer) Continuation in metric spaces, t. LXVI, p. 199-201.

Hager, A. W.

1. Isomorphism with a $C(Y)$ of the maximal ring of quotient of $C(X)$, t. LXVI, p. 7-13.

Hajnal, A.

4. On some combinatorial problems involving large cardinals, t. LXIX, p. 39-53.

Harris, M. E.

1. Generalized group homology, t. LXV, p. 269-288.
2. Cup products, duality and periodicity for generalized group cohomology, t. LXVI, p. 99-121.

Harzheim, E.

3. Ein Satz der kombinatorischen Mengenlehre, t. LXI, p. 283-294.

Hemingsen, E.

1. (and W. Reddy) Expansive homeomorphisms on homogeneous spaces, t. LXIV, p. 203-207.

Hempel, J. P.

1. (and D. R. McMillan, Jr.) Covering three-manifold with open cells, t. LXIV, p. 99-104.

Henderson, D. W.

1. A lower bound for transfinite dimension, t. LXIII, p. 167-173.

Hensel, G.

1. (and H. Putnam) Normal models and the field Σ_1^* , t. LXIV, p. 231-240.

Herrlich, H.

2. Quotienten geordneter Räume und Folgenkonvergenz, t. LXI, p. 79-81.

Hildebrand, S. K.

2. A connected topology for the unit interval, t. LXI, p. 133-140.

Hilton, P. J.

4. On the homotopy type of compact polyhedra, t. LXI, p. 105-109.
5. On systems of interlocking exact sequences, t. LXI, p. 111-119.
6. On the Grothendieck group of compact polyhedra, t. LXI, p. 199-214.

Himmelberg, C. J.

1. Pseudo-metrizability of quotient spaces, t. LXIII, p. 1-6.

Hodel, R. E.

1. Note on metric-dependent dimension functions, t. LXI, p. 83-89.

Hoehnke, H. J.

1. Das Brown-McCoysche 0-Radical für Algebren und seine Anwendung in der Theorie der Halbgruppen, t. LXVI, p. 155-175.

Hofmann, K. H.

2. A general invariant metrization theorem for compact spaces, t. LXVIII, p. 281-296.

Holley, F. K.

1. The new interval topology on lattice products, t. LXVI, p. 329-336.

Holsztyński, W.

1. Universality of the product mappings onto products of I^n and snake-like spaces, t. LXIV, p. 147-155.
2. On the composition and products of universal mappings, t. LXIV, p. 181-188.
3. Fixed points of arcwise connected spaces, t. LXIV, p. 289-312.
4. (and K. Borsuk) Concerning the ordering of shapes of compacta, t. LXVIII, p. 107-115.
5. An extension and axiomatic characterization of Borsuk's theory of shape, t. LXX, p. 157-168.

Howell, L. R., Jr.

1. (and H. C. Griffith) Strongly cellular cells in E^3 are tame, t. LXV, p. 23-32.

Hrycay, R.

1. Generalized connected functions, t. LXVIII, p. 13-17.

Hyman, D. M.

1. ANR divisors and absolute neighborhood contractibility, t. LXII, p. 61-73.
2. On decreasing sequence of compact absolute retracts, t. LXIV, p. 91-97.

Ingram, W. T.

1. Decomposable circle-like continua, t. LXIII, p. 193-198.

Iqbalunnisa

6. On lattice whose lattices of congruences are Stone lattice, t. LXX, p. 315-318.

Isbell, J. R.

3. (and J. T. Morse) Structure spaces of lattices, t. LXVI, p. 301-306.

Janowitz, M. F.

1. On the modular relation in atomistic lattices, t. LXVI, p. 337-346.
2. Correction to the paper "On the modular relation in atomistic lattices", t. LXIX, p. 101.

Jaworowski, J. W.

8. (and M. J. Powers) Δ spaces and fixed point theorems, t. LXIV, p. 157-162.

Johnson, E. W.

1. (and J. A. Johnson) Lattice modules over semi-local Noether lattices, t. LXVIII, p. 187-201.
2. (and J. A. Johnson and J. P. Lediaev) Structure and embedding theorems for unique normal decomposition lattices, t. LXX, p. 245-251.

Johnson, J. A.

1. a -adic completions of Noetherian lattice modules, t. LXVI, p. 347-373.

2. Subspaces and altitudes in Noetherian lattice modules, t. LXVI, p. 375-379.

3. (and E. W. Johnson) Lattice modules over semi-local Noether lattices, t. LXVIII, p. 187-201.

4. (and E. W. Johnson and J. P. Lediaev) Structure and embedding theorems for unique normal decomposition lattices, t. LXX, p. 245-251.

Jolly, R. F.

1. (and J. T. Rogers, Jr.) Inverse limit spaces defined by only finitely many distinct bonding maps, t. LXVIII, p. 117-120.

Jones, F. B.

1. One-to-one continuous images of a line, t. LXVII, p. 285-292.

Joung, S. W.

1. Finitely generated semigroups of continuous on $[0, 1]$, t. LXVIII, p. 297-305.

Jung, H. A.

2. Zu einem Satz E. S. Wolk über die Vergleichbarkeitsgraphen von ordnungstheoretischen Bäumen, t. LXIII, p. 217-219.

Kannan, R.

1. Some results on fixed points—III, t. LXX, p. 169-177.

Keesling, J.

1. Open and closed mappings and compactification, t. LXV, p. 73-81.
2. Compactification and the continuum hypothesis, t. LXVI, p. 53-54.

Kent, D. C.

3. A note on pretopologies, t. LXII, p. 95-100.
4. Convergence quotient maps, t. LXV, p. 197-205.

Kirin, V. G.

1. Post algebras as semantic bases of some many-valued logics, t. LXIII, p. 279-294.
2. Errata to the paper "Post algebras as semantic bases of some many-valued logics", t. LXIV, p. 121.

Kisyński, J.

1. Remark on strongly additive set functions, t. LXIII, p. 327-332.

Kofner, J. A. (Кофнер, Я. А.)

1. О псевдокружневных пространствах, t. LXX, p. 25-47.

Kripke, S. A.

1. An extension of a theorem of Gaifman-Hales-Solovay, t. LXI, p. 29-32.
2. (and M. B. Pour-El) Deduction-preserving "Recursive Isomorphisms" between theories, t. LXI, p. 141-163.

Kronk, H. V.

1. (and G. Chartrand and D. R. Lick) Randomly Hamiltonian disgraphs, t. LXV, p. 223-226.

Kuczma, M. E.

5. On discontinuous additive functions, t. LXVI, p. 383-392.

Kulpa, W.

1. On uniform universal spaces, t. LXIX, p. 243-251.

Lacher, R. C.

1. Some wild spheres and group actions, t. LXVII, p. 195-202.

Lakser, H.

1. (and G. Grätzer and C. R. Platt) Free products of lattices, t. LXIX, p. 233-240.

Lambert, H. W.

1. Toroidal decompositions of E^n which yield E^p , t. LXI, p. 121-132.

Lawson, J.

1. (and B. Madison) Peripheral and inner point, t. LXIX, p. 253-266.

Lawson, J. D.

1. A generalized version of the Vietoris-Begle Theorem, t. LXV, p. 65-72.

Leader, S.

4. Regulated bases and completions of regular spaces, t. LXVII, p. 279-287.
5. (and L. Finkelstein) Regulated semilattices and locally compact spaces, t. LXX, p. 49-58.

Leblanc, H.

1. (and R. H. Thomason) Completeness theorems for some presupposition-free logics, t. LXII, p. 125-164.

Lediaev, J. P.

1. (and E. W. Johnson and J. A. Johnson) Structure and embedding theorems for unique normal decomposition lattices, t. LXX, p. 245-251.

Lelek, A.

13. (and J. Mycielski) On convex metric spaces IV, t. LXI, p. 171-176.
14. Some cover properties of spaces, t. LXIV, p. 209-218.
15. On the topology of curves I, t. LXVII, p. 359-367.
16. On the topology of curves II, t. LXX, p. 131-138.

Lewszenko, B. T. (Левшенко, Б. Т.)

1. Размерность метрических пространств и ретракция, t. LXVI, p. 1-5.

Lick, D. R.

1. (and G. Chartrand and H. V. Kronk) Randomly Hamiltonian digraphs, t. LXV, p. 223-226.

Lininger, L.

1. Decompositions of a 3-cell, t. LXVIII, p. 1-6.

Lopez-Escobar, E. G. K.

4. A complete, infinitary axiomatization of weak second-order logic, t. LXI, p. 93-103.

Macintyre, A.

1. On ω_1 categorical theories of abelian groups, t. LXX, p. 253-270.

Madison, B.

1. A note on local homogeneity and stability, t. LXVI, p. 123-127.
2. (and J. Lawson) Peripheral and inner points, t. LXIX, p. 253-266.

Mahavier, W. S.

3. Atomic mappings on irreducible Hausdorff continua, t. LXIX, p. 147-151.

Maitra, A.

1. Coanalytic sets that are not Blackwell spaces, t. LXVII, p. 251-254.
2. On game-theoretic methods in the theory of Suslin sets, t. LXX, p. 179-185.

Mandelker, M.

1. Prime z -ideal structure of $C(\mathbb{R})$, t. LXIII, p. 145-166.

Martin, D. A.

1. Measurable cardinals and analytic games, t. LXVI, p. 287-291.

Máté, A.

1. (and G. Fodor) Disjoint systems over set ideals (On a generalization of the usual conception of almost disjoint set systems), t. LXII, s. 211-222.

Mauldin, R. D.

1. On the Baire system generated by a linear lattice of functions, t. LXVIII, p. 51-59.

McAllister, B. L.

1. A note on irreducible separation, t. LXIII, p. 143-144.

McIntosh, W. D.

1. Adjunction of locally equiconnected spaces, t. LXIII, p. 175-192.

McKenzie, R.

1. Cardinal multiplication of structures with a reflexive relation, t. LXX, p. 59-101.

McMillan, D. R., Jr.

2. (and J. P. Hempel) Covering three-manifolds with open cells, t. LXIV, p. 99-104.

Meyer, D. V.

1. More decompositions of E^n which are factors of E^{n+1} , t. LXVII, p. 49-65.

Michaels, J. G.

1. Bimeasurable maps, t. LXVIII, p. 149-158.

Mohler, L.

1. A fixed point theorem for continua which are hereditarily divisible by points, t. LXVII, p. 345-358.
2. A characterization of smoothness in dendroids, t. LXVII, p. 369-376.

Morse, J. T.

1. (and J. R. Isbell) Structure spaces of lattices, t. LXVI, p. 301-306.

Mostowski, A.

22. (and Y. Suzuki) On ω -models which are not β -models, t. LXV, p. 83-93.

Moszyńska, M.

1. On the homotopy classification of spaces, t. LXVI, p. 65-83.
2. ANR-spaces which are deformation retracts of some polyhedra, t. LXVI, p. 203-214.

Muenzenberger, T. B.

1. (and R. E. Smithson) Fixed points and proximate fixed points, t. LXIII, p. 321-326.

Mukhopadhyay, S. N.

1. On a certain property of the derivative, t. LXVII, p. 279-284.

Mycielski, J.

16. Algebraic independence and measure, t. LXI, p. 165-169.
17. (and A. Lelek) On convex metric spaces IV, t. LXI, p. 171-176.
18. (and C. Ryll-Nardzewski) Equationally compact algebras II, t. LXI, p. 271-281.
19. (and C. Ryll-Nardzewski) Errata to the paper "Equationally compact algebras II", t. LXII, p. 309.

Nachman, L. J.

1. On a conjecture of Leader, t. LXV, p. 153-155.

Nagami, Keiô

1. Σ -spaces, t. LXV, p. 169-192.

Nanzetta, Ph.

1. Maximal lattice-ordered algebras of continuous functions, t. LXIII, p. 53-75.

Negrepontis, S.

2. (and W. W. Comfort) Some topological properties associated with measurable cardinals, t. LXIX, p. 191-205.

Németh, A. B.

1. About an imbedding conjecture for k -independent sets, t. LXVII, p. 203-207.

Nishiura, E.

1. Constructive methods in probabilistic metric spaces, t. LXVII, p. 115-124.

Orland, G. H.

1. (and S. B. Bank) A note on Rouché's theorem, t. LXIII, p. 137-141.

Osborne, R. P.

2. Embedding Cantor sets in a manifold, II. An extension theorem for homeomorphisms on Cantor sets, t. LXV, p. 147-151.

Pacholski, L.

1. (and C. Ryll-Nardzewski) On countably compact reduced product I, t. LXVII, p. 155-161.

Padmanabhan, R.

1. A note on inverse binary operation in abelian groups, t. LXV, p. 61-63.

Pak, J.

1. The fixed point theorems of circle and toroid groups on lens spaces, t. LXVI, p. 195-197.

Patkowska, H.

3. A homotopy extension theorem for fundamental sequences, t. LXIV, p. 87-89.
4. Some theorems on the embeddability of ANR-spaces into Euclidean spaces, t. LXV, p. 289-308.
5. A characterization of locally connected continua which are quasi-embeddable into E^n , t. LXX, p. 307-314.
6. Some theorems about the embeddability of ANR-sets into decomposition spaces of E^n , t. LXX, p. 271-306.

Patnaik, S. N.

1. Fixed point of multiple-valued transformations, t. LXV, p. 345-349.

Pełczyński, A.

1. (and C. Bessaga) Estimated extension theorem, homogeneous collections and skeletons and their applications to topological classification of linear metric spaces and convex sets, t. LXIX, p. 153-190.

Petty, D. H.

1. One-to-one mappings into the plane, t. LXVII, p. 209-218.

Pickett, H. E.

2. Errata for the paper "Subdirect representations of relational systems", t. LXII, p. 101.

Plank, D.

1. On a class of subalgebras of $C(X)$ with applications to $\beta X \setminus X$, t. LXIV, p. 41-54.

Platt, C. R.

1. (and G. Grätzer and H. Lakser) Free products of lattices, t. LXIX, p. 233-240.

Plonka, J.

3. On a method of construction of abstract algebras, t. LXI, p. 183-189.
4. A representation theorem for idempotent medial algebras, t. LXI, p. 191-198.
5. On distributive n -lattices and n -quasilattices, t. LXII, p. 293-300.
6. Some remarks on sums of direct systems of algebras, t. LXII, p. 301-308.
7. On equational classes of abstract algebras defined by regular equations, t. LXIV, p. 241-247.

Pollard, J.

1. On extending homeomorphisms on zero-dimensional spaces, t. LXVII, p. 39-48.

Pour-El, M. B.

1. (and S. A. Kripke) Deduction-preserving "Recursive Isomorphisms" between theories, t. LXI, p. 141-163.

Powers, M. J.

1. (and J. W. Jaworowski) Δ spaces and fixed point theorems, t. LXIV, p. 157-162.

Proctor, C. W.

1. Metrizable subsets of Moore spaces, t. LXVI, p. 85-93.

Putnam, H.

1. (and G. Hensel) Normal models and the field Σ_1^* , t. LXIV, p. 231-240.

Raimi, R. A.

1. Translation properties of finite partitions of the positive integers, t. LXI, p. 253-256.

Rajagopalan, M.

1. (and T. Soundararajan) Structure of self-dual torsion free metric LCA groups, t. LXV, p. 309-316.

Rangan, G.

1. Non-archimedean metrizable of topological groups, t. LXVIII, p. 179-182.

Rao, B. V.

1. Remarks on analytic sets, t. LXVI, p. 237-239.
2. Remarks on generalized analytic sets and the axiom of determinateness, t. LXIX, p. 125-129.
3. Non-existence of certain Borel structures, t. LXIX, p. 241-242

Rautenberg, W.

1. Euklidische und Minkowskische Orthogonalitätsrelationen, t. LXIV, p. 189-196,

Reed, C. S.

1. Pointwise limits of sequences of functions, t. LXVII, p. 183-193.

Reddy, W.

1. (and E. Hemingsen) Expansive homeomorphisms on homogeneous spaces, t. LXIV, p. 203-207.

Ribenboim, P.

1. Boolean powers, t. LXV, p. 243-268.

Roberts, J. H.

3. (and F. G. Slaughter, Jr.) Metric dimension and equivalent metrics, t. LXII, p. 1-5.

Robinson, S. M.

1. Some properties of $\beta X - X$ for complete space, t. LXIV, p. 335-340.

Rogers, J. T., Jr.

1. (and R. F. Jolly) Inverse limit spaces defined by only finitely many distinct bonding maps, t. LXVIII, p. 117-120.

Rogers, J. W., Jr.

1. Decomposable inverse limits with a single bonding map on $[0, 1]$ below the identity. t. LXVI, p. 177-183.
2. On compactifications with continua as remainders, t. LXX, p. 7-11.

Rolfen, D.

1. Characterizing the 3-cell by its metric, t. LXVIII, p. 215-223.

Rosenstein, J. G.

1. \aleph_0 -categoricity of linear orderings, t. LXIV, p. 1-5.

Rousseau, G.

2. Correction to the paper "Sequents in many valued logic I", t. LXI, p. 313.
3. Post algebras and pseudo-Post algebras, t. LXVII, p. 125-131.
4. Sequents in many valued logic II, t. LXVII, p. 133-145.

Rubin, A. L.

1. (and J. E. Rubin) Extended operations and relations on the class of ordinal numbers, t. LXV, p. 227-242.
2. (and J. E. Rubin) Accumulation functions on the ordinals, t. LXX, p. 205-220.

Rubin, J. E.

1. (and A. L. Rubin) Extended operations and relations on the class of ordinal numbers, t. LXV, p. 227-242.
2. (and A. L. Rubin) Accumulation functions on the ordinals, t. LXX, p. 205-220.

Ryll-Nardzewski, C.

10. Remark on Raimi's theorem on translations, t. LXI, p. 257-258.
11. (and J. Mycielski) Equationally compact algebras II, t. LXI, p. 271-281.
12. (and J. Mycielski) Errata to the paper "Equationally compact algebras II", t. LXII, p. 309.
13. (and L. Pacholski) On countably compact reduced product I, t. LXVII, p. 155-161.

Sacks, G. E.

1. (and R. O. Gandy) A minimal hyperdegree, t. LXI, p. 215-223.

Sayeki, H.

1. Some consequences of the normality of the space of models, t. LXI, p. 243-251.

Schein, B. M.

1. Ordered sets, semilattices, distributive lattices and Boolean algebras with homomorphic endomorphism semigroups, t. LXVIII, p. 31-50.

Schirmer, H.

1. A Kakutani type coincidence theorem, t. LXIX, p. 219-226.

Schlette, A.

1. (und R. Baer) Berandung Gruppentheoretischer Eigenschaften, t. LXV, p. 1-22.

Schnare, P. S.

1. Multiple complementation in the lattice of topologies, t. LXII, p. 53-59.
2. Infinite complementation in the lattice of topologies, t. LXIV, p. 249-255.

Schori, R. M.

1. Hyperspaces and symmetric products of topological spaces, t. LXIII, p. 77-88.

Schupp, P. E.

1. A note on recursively enumerable predicates in groups, t. LXVI, p. 61-63.

Seidman, S. B.

1. Completely regular mappings with compact ANR fiber, t. LXX, p. 139-146.

Seifert, R., Jr.

1. On prime relational structures, t. LXX, p. 187-203.

Sekanina, M.

1. Embedding of the category of partially ordered sets into the category of topological spaces, t. LXVI, p. 95-98.
2. On orderings of the system of subsets of ordered sets, t. LXX, p. 231-243.

Sher, R. B.

1. Toroidal decompositions of E^8 , t. LXI, p. 225-241.

Sieklucki, K.

4. On a class of plane acyclic continua with the fixed point property, t. LXIII, p. 257-278.
5. Realization of mappings, t. LXV, p. 325-343.

Sigmon, K.

1. On the existence of a mean on certain continua, t. LXIII, p. 311-319.

Silver, J. H.

1. A large cardinal in the constructible universe, t. LXIX, p. 93-100.

Skala, H.

1. Irreducibly generated algebras, t. LXVII, p. 31-37.

Slaughter, F. G., Jr.

1. (and J. H. Roberts) Metric dimension and equivalent metrics, t. LXII, p. 1-5.

van der Slot, J.

1. A general realcompactification method, t. LXVII, p. 255-263.

Sloyer, C.

1. (and M. Świerczewski and S. Gulden) Continuation in metric spaces, t. LXVI, p. 199-201.

Smirnow, J. M. (Смирнов, Ю. М.)

2. Уплотнения на бикомпакты и связь с бикомпактными расширениями и с ретракцией, t. LXIII, p. 199-211.

Smith, F. J.

1. Approximations of one-one measurable transformations, t. LXVII, p. 171-178.

Smith, J. C., Jr.

1. Refinements of Lebesgue covers, t. LXX, p. 1-6.

Smithson, R. E.

1. (and T. B. Muenzenberger) Fixed points and proximate fixed points, t. LXIII, p. 321-326.

Sniter, R. L.

1. (and P. Fletcher) Topological Galois spaces, t. LXVIII, p. 143-148.

Soundararajan, T.

1. (and M. Rajagopalan) Structure of self dual torsion free metric LCA groups, t. LXV, p. 309-316.

Steiner, A. K.

1. (and E. F. Steiner) Topologies with T_1 -complements, t. LXI, p. 23-28.
2. (and E. F. Steiner) Compactifications as closures of graphs, t. LXIII, p. 221-223.
3. (and E. F. Steiner) On countable multiple point compactifications, t. LXV, p. 133-137.

Steiner, E. F.

1. (and A. K. Steiner) Topologies with T_1 -complements, t. LXI, p. 23-28.
2. Wallman spaces and compactifications, t. LXI, p. 295-304.
3. (and A. K. Steiner) Compactifications as closures of graphs, t. LXIII, p. 221-223.
4. (and A. K. Steiner) On countable multiple point compactifications, t. LXV, p. 133-137.

Stevens, R.

1. Metrically generated probabilistic metric spaces, t. LXI, p. 259-269.

Stevenson, F. W.

1. (and W. J. Thron) Result on ω_μ -metric spaces, t. LXV, p. 317-324.

Stratton, H. H.

1. On continua which resemble simple closed curves, t. LXVIII, p. 121-128.

Suzuki, Y.

1. (and A. Mostowski) On ω -models which are not β -models, t. LXV, p. 83-93.
