Errata to the paper
"On shape"

by

Ralph H. Fox (Princeton, N.J.)

It has been pointed out to me by Julian Eisner that my proof of Lemma 5.5 is incorrect. A correct proof under the slightly stronger hypothesis that P is metrizable can be found on p. 240 of the paper of J. Dugundji, *Absolute Neighborhood Retracts and Local Connectedness in Arbitrary Metric Spaces*, Compositio Mathematicae 13 (1958), pp. 229–246.
