

Index alphabétique des tomes LXXI-LXXX
(1971-1973) (*)

Aarts, J. M.

3. (and T. Nishiura) Covering dimension modulo a class of spaces, t. LXXVIII, p. 75-97.

Addis, D. F.

1. Liftings of compact sets of mappings through a light proper mapping are compact, t. LXXVII, p. 109-114.

Aló, R. A.

1. (and L. I. Sennott) Collectionwise normality and the extension of functions on product spaces, t. LXXVI, p. 231-243.

Anderson, E. H.

1. Chains of simple closed curves and a dogbone space, t. LXXII, p. 131-144.

Anderson, L. W.

2. (and R. P. Hunter) On the infinite subsemigroups of a compact semigroup, t. LXXIV p. 1-19.

Armacost, D. L.

1. Mapping properties of characters of LCA groups, t. LXXVI, p. 1-7.

Armbrust, M. K.

1. An algebraic equivalent of a multiple choice axiom, t. LXXIV, p. 145-146.

Armentrout, S.

6. Concerning the unions of absolute neighborhood retracts having brick decompositions, t. LXXII, p. 69-78.

Atneosen, G. H.

1. One-dimensional n -leaved continua, t. LXXIV, p. 43-45.

Baker, J. W.

1. Compact spaces homeomorphic to a ray of ordinals, t. LXXVI, p. 19-27.

(*) L'index présent est la suite de celui des t. I-XV inséré au t. XV (1930), des t. XVI-XXV inséré au t. XXV (1935), des t. XXVI-XL inséré au t. XL (1953), des t. XLI-L inséré au t. L (1962), des t. LI-LX inséré au t. LX (1967) et des t. LXI-LXX inséré au t. LXX (1971).

Balbes, R.

3. On free pseudo-complemented and relatively pseudo-complemented semi-lattices, t. LXXVIII, p. 119-131.

Ball, B. J.

1. (and Jo Ford) Spaces of ANR's I, t. LXXVII, p. 33-49.
2. (and Jo Ford) Spaces of ANR's II, t. LXXVIII, p. 209-216.

Barton, E.

1. On some problems of Borsuk, t. LXXIII, p. 271-274.
2. Errata to the paper "On some problems of Borsuk", *Fundamenta Mathematicae* 73 (1972), pp. 271-274, t. LXXV, p. 199.

Baumgartner, J.

1. (and A. Hajnal) A proof (involving Martin's axiom) of a partition relation, t. LXXVIII, p. 193-203.
2. All \aleph_1 -dense sets of reals can be isomorphic, t. LXXIX, p. 101-106.

Bell, J. L.

1. (and D. H. Fremlin) A geometric form of the axiom of choice, t. LXXVII, p. 167-170.

Bennett, R.

1. Countable dense homogeneous spaces, t. LXXIV, p. 189-194.

Bentley, H. L.

1. Some Wallman compactifications of locally compact spaces, t. LXXV, p. 13-24.

Berard, A. D.

1. Characterizations of metric spaces by the use of their midsets: intervals, t. LXXIII, p. 1-7.

Berkowitz, H. W.

1. Non-alternating mappings, t. LXXV, p. 95-100.

Bielnov, W. K. (Бельнов, В. К.)

1. О метризации Абелевых групп, t. LXXX, p. 181-205.

Blass, A.

1. Degrees of indeterminacy of games, t. LXXVII, p. 151-166.

Boals, A. J.

2. Factors of E^{n+3} with infinitely many bad points, t. LXXIX, p. 95-99.

Boone, J. R.

1. Some characterizations of paracompactness in k -spaces, t. LXXII, p. 145-153.
2. A metrization theorem for developable spaces, t. LXXIII, p. 79-83.
3. Examples relating to mesocompact and sequentially mesocompact spaces, t. LXXVII, p. 91-93.

Borsuk, K.

60. On positions of sets in spaces, t. LXXIX, p. 141-158.

Brechner, B. L.

2. One dimensional locally setwise homogeneous continua, t. LXXIV, p. 171-180.

Brown, J. B.

1. Metric spaces in which a strengthened form of Blumberg's theorem holds, t. LXXI, p. 243-253.

Bruckner, A. M.

1. (and J. G. Ceder and T. L. Pearson) On the insertion of Darboux Baire-one functions, t. LXXX, p. 157-179.

Burris, S.

1. Scott sentences and a problem of Vaught for mono-uary algebras, t. LXXX, p. 111-115.

Cannon, J. W.

1. A positional characterization of the $(n-1)$ -dimensional Sierpiński curve in S^n ($n \neq 4$), t. LXXIX, p. 107-112.

Carreau, F.

1. Sous-catégories réflexives et la théorie générale des radicaux, t. LXXI, p. 223-242.

Ceder, J.

3. On decomposing the plane into \aleph_0 connected or one-to-one curves, t. LXXVIII, p. 265-273.

Chaber, J.

1. Remarks on open-closed mappings, t. LXXIV, p. 197-208.

Chapman, T. A.

1. On some applications of infinite-dimensional manifolds to the theory of shape, t. LXXVI, p. 181-193.
2. Shapes of finite-dimensional compacta, t. LXXVI, p. 261-276.

Charatonik, J. J.

10. On decompositions of continua, t. LXXIX, p. 113-130.

Charlton, H. J.

1. Dimension raising maps for which polyhedra are mapped to polyhedra, t. LXXIII, p. 9-10.

Chewning, W. C.

1. Connectivity retracts of unicoherent Peano continua in R^n , t. LXXV, p. 25-27.

Christian, U. J.

1. Concerning certain minimal cover refineable spaces, t. LXXVI, p. 213-222.

Chuaqui, R.

1. Cardinal algebras of functions and integration, t. LXXI, p. 77-84.
2. A representation theorem for linearly ordered cardinal algebras, t. LXXI, p. 85-91.

Čoban, M.

1. Note sur topologie exponentielle, t. LXXI, p. 27-41.

Comfort, W. W.

1. (and S. Negreponitis) On families of large oscillation, t. LXXXV, p. 275-290.

Cook, H.

7. (and A. Lelek) On the topology of curves IV, t. LXXVI, p. 167-179.

Cox, C.

1. Three questions of on Borsuk movability and fundamental retraction, t. LXXX, p. 181-205.

Croom, F. H.

2. Exact loop space sequences, t. LXXII, p. 1-6.

Crossley, S. G.

1. (and S. K. Hildebrand) Semi-topological properties, t. LXXIV, p. 233-254.

Curtis, D. W.

1. Some theorems and examples on local equiconnectedness and its specializations t. LXXII, p. 101-113.
2. Total and absolute paracompactness, t. LXXVII, p. 277-283.

Cutler, W. H.

1. Property Z and property F sets in F -manifolds, t. LXXVIII, p. 163-167.

Dahn, B.

1. κ_0 -kategorisch zyklenschränkte Graphen, t. LXXX, p. 117-131.

D'Aristotle, A. J.

1. Completely regular compactifications, t. LXXI, p. 139-145.

Darst, R. B.

5. On the connection between Hausdorff measures and generalized capacity, t. LXXX, p. 1-3.

Datko, R.

1. On the integration of set-valued mappings in a Banach space, t. LXXVIII, p. 205-208.

Daverman, R. J.

2. Elementary arcs in 3-space that can be realized by squeezing 3-cells, t. LXXII, p. 165-173.
3. On the scarcity of tame disks in certain wild cells, t. LXXIX, p. 63-77.

Deleanu, A.

2. (and P. Hilton) On Kan extensions of cohomology theories and Serre classes of groups, t. LXXIII, p. 143-165.

Devlin, K. J.

1. Note on a theorem of J. Baumgartner, t. LXXVI, p. 255-260.

Dickman, R. F., Jr.

1. Some mappings characterizations of unicoherence, t. LXXVIII, p. 27-35.

Dlab, V.

2. Tree-like matrix rings, t. LXXII, p. 155-163.

Duvall, P. F., Jr.

1. (and L. S. Husch) Analysis on topological manifolds, t. LXXVII, p. 75-90.

Eberhart, C. A.

4. (and J. B. Fugate) Approximating continua from within, t. LXXII, p. 223-231.

Ellentuck, E.

4. A minimal model for strong analysis, t. LXXIII, p. 125-131.

Elliott, E. O.

1. Extensions of measures and abstract stochastic processes, t. LXXIII, p. 105-111.

Emeryk, A.

1. An atomic map onto an arbitrary metric continuum, t. LXXVII, p. 145-149.

Enderton, H. B.

1. (and H. Friedman) Approximating the standard model of analysis t. LXXII, p. 175-188.

Felgner, U.

1. Comparison of the axioms of local and universal choice, t. LXXI, p. 43-62.
2. (and T. J. Jech) Variants of the axiom of choice in set theory with atoms, t. LXXIX, p. 79-85.

Fitzpatrick, B., Jr.

2. A note on countable dense homogeneity, t. LXXV, p. 33-34.

Fletcher, P.

2. (and R. A. McCoy) Galois spaces, representable spaces and strongly locally homogeneous spaces, t. LXIII, p. 85-91.

Foran, J.

1. On the product of derivatives, t. LXXX, p. 293-294.

Ford, Jo

2. (and B. J. Ball) Spaces of ANR's I, t. LXXVII, p. 33-49.
3. (and B. J. Ball) Spaces of ANR's II, t. LXXVIII, p. 209-216.

Fox, R. H.

2. On shape, t. LXXIV, p. 47-71.
3. Errata to the paper "On shape", *Fundamenta Mathematicae* 74 (1972), pp. 47-71, t. LXXV, p. 85.

Fox, G.

1. (and P. Morales) Strongly additive functions on lattices, t. LXXVIII, p. 99-106.

Freiwald, R. C.

1. Images of Borel sets and k -analytic sets, t. LXXV, p. 35-46.
2. Cardinalities of metric completions, t. LXXVIII, p. 275-280.

Fremlin, D. H.

1. (and J. L. Bell) A geometric form of the axiom of choice, t. LXXVII, p. 167-170.

Friedler, L.

1. Regular maps and products of p -quotient maps, t. LXXX, p. 295-303.

Friedman, H. M.

1. Determinateness in the low projective hierarchy, t. LXXII, p. 79-95.
2. (and H. B. Enderton) Approximating the standard model of analysis, t. LXXII, p. 175-188.

Fritsche, R.

1. Topologies for probabilistic metric spaces, t. LXXII, p. 7-16.

Fugate, J. B.

1. Retracting fans onto finite fans, t. LXXI, p. 113-125,
2. Small retractions of smooth dendroids onto trees, t. LXXI, p. 255-262.
3. (and C. A. Eberhart) Approximating continua from within, t. LXXII, p. 223-231.

Gagrat, M. S.

1. (and S. A. Naimpally) Proximity approach to extension problems, t. LXXI, p. 63-76.

Ganter, B.

1. (and J. Płonka and H. Werner) Homogeneous algebras are simple, t. LXXIX, p. 217-220.

Gentry, K. R.

2. (and H. B. Hoyle, III) c -continuous fundamental groups, t. LXXVI, p. 9-17.

Gilbert, W. J.

1. Menger's Theorem for topological spaces, t. LXXV, p. 291-295.

Godlewski, S.

3. Cohomotopy groups and shape in the sense of Fox, t. LXXV, p. 175-185.

Gonshor, H.

1. Remarks on a paper by Bernstein, t. LXXIV, p. 195-196.
2. The category of recursive functions, t. LXXV, p. 87-94.

Gordh, G. R., Jr.

1. On decompositions of smooth continua, t. LXXV, p. 51-60.
2. Concerning closed quasiorders on hereditarily unicoherent continua, t. LXXVIII, p. 61-73.

Grätzer, G.

3. A reduced free product of lattices, t. LXXIII, p. 21-27.

Grillet, M. P.

2. Semisimple A -semigroups and semirings, t. LXXXVI, p. 109-116.

Grzegorzczuk, A.

10. An infinitizability proof by means of restricted reduced power, t. LXXIII, p. 37-49.

Guthrie, J. A.

1. (and H. E. Stone) Spaces whose connected expansion preserve connected subsets, t. LXXX, p. 91-100.

Guzicki, W.

1. A remark on the independence of a basis hypothesis, t. LXXVIII, p. 189-191.

Hager, A. W.

2. (and G. D. Reynolds and M. D. Rice) Borel-complete topological spaces, t. LXXV, p. 135-143.
3. Measurable uniform spaces, t. LXXVII, p. 51-73.

Hájek, P.

1. (and M. Hájková) On interpretability in theories containing arithmetic, t. LXXVI, p. 131-137.

Hájková, M.

1. (and P. Hájek) on interpretability in theories containing arithmetic, t. LXXVI, p. 131-137.

Hajnal, A.

5. (and J. Baumgartner) A proof (involving Martin's axiom) of a partition relation, t. LXXVIII, p. 193-203.

Halpern, B.

1. Invariant metric properties of maps, t. LXXII, p. 203-221.

Harris, D.

1. Transfinite metrics, sequences and topological properties, t. LXXIII, p. 137-142.

Hauschild, K.

1. Nichtaxiomatisierbarkeit von Satzmengen durch Ausdrücke spezieller Gestalt, t. LXXII, p. 245-253.

Hausen, J.

1. Abelian torsion groups with artinian primary components and their automorphisms, t. LXXI, p. 273-283.

Heath, R. W.

2. (and R. E. Hodel) Characterizations of σ -spaces, t. LXXVII, p. 271-275.

Herrlich, H.

3. (and G. E. Strecker) Coreflective subcategories in general topology, t. LXXIII, p. 199-218.

Hildebrand, S. K.

3. (and S. G. Crossley) Semi-topological properties, t. LXXIV, p. 233-254.

Hilton, P.

7. (and A. Deleanu) On Kan extensions of cohomology theories and Serre classes of groups, t. LXXIII, p. 143-165.

Hinman, P. G.

1. The finite levels of the hierarchy of effective R -sets, t. LXXIX, p. 1-10.

Hodel, R. E.

2. (and R. W. Heath) Characterizations of σ -spaces, t. LXXVII, p. 271-275.

Hodges, H.

1. Models in which all long indiscernible sequences are indiscernible sets, t. LXXVIII, p. 1-6.

Holický, P.

1. A supplement to the paper "Differentiable roads for real functions" by J. G. Ceder, t. LXXVII, p. 227-234.

Holley, F. K.

2. The ideal and new interval topologies on l -groups, t. LXXIX, p. 187-197.

Howard, P. E.

1. (and H. Rubin and J. E. Rubin) The relationship between two weak forms of the axiom of choice, t. LXXX, p. 75-79.

Hoyle, H. B., III

1. (and K. R. Gentry) c -continuous fundamental groups, t. LXXVI, p. 9-17.

Hunt, J. H. V.

1. On semi-closed sets and semi-open sets and their applications, t. LXXVI, p. 29-41.
2. (and E. D. Tymchatyn) The theorem of Miss Mullikin-Mazurkiewicz-van Est for unicoherent Peano spaces, t. LXXVII, p. 285-287.

Hunter, R. P.

4. (and L. W. Anderson) On the infinite subsemigroups of a compact semigroup, t. LXXIV, p. 1-19.

Hug, S. A.

1. A note on monics and epics in varieties of categories, t. LXXVI, p. 117-119.

Husch, L. S.

1. (and P. F. Duvall, Jr.) Analysis on topological manifolds, t. LXXVII, p. 75-90.

Hyman, D. M.

3. A remark on Fox's paper on shape, t. LXXV, p. 205-208.

Ingram, W. T.

2. An atriodic tree-like continuum with positive span, t. LXXVII, p. 99-107.

Isbell, J. R.

4. A corrected correction, t. LXXI, p. 185.

Itzkowitz, G. L.

1. On the density character of compact topological groups, t. LXXV, p. 201-203.

Jaegerman, M.

1. (and J. Krempa) Rings in which ideals are their applications, t. LXXVI, p. 95-107.

Jakubík, J.

1. Cardinal properties of lattice ordered groups, t. LXXIV, p. 85-98.

Janowitz, M. F.

3. On the lattice of left annihilators of certain rings, t. LXXI, p. 199-205.
4. On a paper by Iqbalunnisa, t. LXXVIII, p. 177-182.

Jech, T. J.

1. (and V. Felgner) Variants of the axiom of choice in set theory with atoms, t. LXXIX, p. 79-85.

Jenkins, T. L.

1. (and D. M. Olson) A note on the Levitzki radical of a semiring t. LXXIX, p. 91-93.

Jeroslow, R. G.

1. Consistency statements in formal theories, t. LXXII, p. 17-40.

Johnson, J. A.

5. Noetherian lattice modules and semi-local completions, t. LXXIII, p. 93-103.

Joiner, C.

1. On Urysohn's universal separable metric space, t. LXXIII, p. 51-58.

Joshi, K. D.

1. A non-symmetric generalization of the Borsuk-Ulam theorem, t. LXXX, p. 13-33.

Józefiak, T.

1. Tate resolutions for commutative graded algebras over a local ring, t. LXXIV, p. 209-231.

Kalman, J. A.

1. Subdirect decomposition of distributive quasilattices, t. LXXI, p. 161-163.

Kannan, R.

1. Some results on fixed points — IV, t. LXXIV, p. 181-187.

Kelemen, C. F.

1. Recursions with uniquely determined topologies, t. LXXVII, p. 219-225.

Kellum, K. R.

1. Almost continuous functions on I^n , t. LXXIX, p. 213-215.

Ketonen, J.

1. Ultrafiltres over measurable cardinals, t. LXXVII, p. 257-269.

Kleinberg, E. M.

1. A characterization of determinacy for Turing degree games, t. LXXX, p. 287-291.

Knight, P. R. S.

1. Algebraic equivalence of ordinal numbers, t. LXXIII, p. 235-247.

Kocela, E.

1. Properties of some generalizations of the notion of continuity of a function, t. LXXVIII, p. 133-139.

Kok, H.

1. (and R. Telgársky) The space of rationals is not absolutely paracompact, t. LXXIII, p. 75-78.

Kominek, Z.

1. On the sum and difference of two sets in topological vector spaces, t. LXXI, p. 165-169.

Krakus, B.

1. Some properties of convex metric spaces, t. LXXIII, p. 193-198.
2. Errata to the paper "Some properties of convex metric spaces", *Fundamenta Mathematicae* 73 (1972), pp. 193-198, t. LXXIV, p. 255.

Krempa, J.

1. Logical connections between some open problems concerning nil rings, t. LXXVI, p. 121-130.
2. (and M. Jaegermann) Rings in which ideals are annihilators, t. LXXVI, p. 95-107.

Kulpa, W.

2. On the existence of maps having graphs connected and dense, t. LXXVI, p. 207-211.
3. Maps and invence systems of metric spaces, t. LXXX, p. 141-147.

Kuperberg, K.

1. An isomorphism theorem of the Hurewicz-type in Borsuk's theory of shape, t. LXXVII, p. 21-32.

Kuperberg, W.

3. Homotopically labile points of locally compact metric spaces, t. LXXIII, p. 133-136.

Kuykendall, D. P.

1. Irreducibility and indecomposability in inverse limits, t. LXXX, p. 265-270.

Lachlan, A. H.

1. A property of stable theories, t. LXXVII, p. 9-20.

Leclerc, B.

1. (et B. Monjardet) Ordres "C.A.C.", t. LXXIX, p. 11-22.

Lee, J. P.

1. Homeotopy groups of orientable 2-manifolds, t. LXXVII, p. 115-124.

Lelek, A.

17. (and L. Mohler) On the topology of curves III, t. LXXI, p. 147-160.
18. (and H. Cook) On the topology of curves IV, t. LXXVI, p. 167-179.

Lisica, J. (Лисица Ю.)

1. О пространствах связных и локально-связных во всех размерностях, t. LXXX, p. 35-45.

Ma, T. W.

1. Non-singular set-valued compact fields in locally convex spaces, t. LXXV, p. 249-259.

Macintyre, A.

2. On ω_1 -categorical theories of fields, t. LXXI, p. 1-25.

Maćkowiak, T.

1. Some characterizations of smooth continua, t. LXXIX, p. 183-186.
2. Semi-confluent mappings and their invariants, t. LXXIX, p. 251-264.

Magill, K. D., Jr.

1. On restrictive semigroups of continuous functions, t. LXXI, p. 131-137.

Makkai, M.

2. Svenonius sentences and Lindström's theory on preservation theorems, t. LXXIII, p. 219-233.

Mardešić, S.

2. (and J. Segal) Shapes of compacts and ANR-systems, t. LXXII, p. 41-59.
3. (and J. Segal) Equivalence of the Borsuk and the ANR-system approach to shapes, t. LXXII, p. 61-68.

Marin, F. L.

1. A note on E -compact spaces, t. LXXVI, p. 195-206.

Masih, S.

1. Fixed points of symmetric product mappings of polyhedra and metric absolute neighborhood retracts, t. LXXX, p. 183-188.

Mattson, D. A.

1. Real maximal round filters in proximity spaces, t. LXXVIII, p. 149-156.

Mauldin, R. D.

2. σ -ideals and related Baire systems, t. LXXI, p. 171-177.
3. Some examples of σ -ideals and related Baire systems, t. LXXI, p. 179-184.

McCord, M. C.

3. Non-standard analysis and homology, t. LXXIV, p. 21-28.

McCoy, R. A.

1. (and P. Fletcher) Galois spaces, representable spaces and strongly locally homogeneous spaces, t. LXXIII, p. 85-91.

Millett, K. C.

1. Homotopy sequences of fibrations, t. LXXIX, p. 49-62.

Mohler, L.

3. (and A. Lelek) On the topology of curves III, t. LXXI, p. 147-160.

Monjardet, B.

1. (et B. Leclerc) Ordres "C.A.C.", t. LXXIX, p. 11-22.

Monk, J. D.

1. (and F. M. Sioson) On the general theory of m -groups, t. LXXII, p. 233-244.

Monro, G. P.

1. Decomposable cardinals, t. LXXX, p. 101-104.
2. Models of ZF with the same sets of sets of ordinals, t. LXXX, p. 105-110.

Monteiro, L.

1. Algèbre du calcul propositionnel trivalent de Heyting, t. LXXIV, p. 99-109.

Morales, P.

1. (and G. Fox) Strongly additive functions on lattices, t. LXXVIII, p. 99-106.

Morris, S. A.

1. Locally compact groups and β -varieties of topological groups, t. LXXVIII, p. 23-25.

Mostowski, A.

23. Models of second order arithmetic with definable Skolem functions, t. LXXV, p. 223-234.

Moszyńska, M.

3. On shape and fundamental deformation retracts I, t. LXXV, p. 145-167.
4. Uniformly movable compact spaces and their algebraic properties, t. LXXVII, p. 125-144.
5. On shape and fundamental deformation retracts II, t. LXXVII, p. 235-240.
6. Various approaches to the fundamental groups, t. LXXVIII, p. 107-118.
7. The Whitehead Theorem in the theory of shapes, t. LXXX, p. 221-263.

Mukhopadhyay, S. N.

2. Some properties of real functions of two variables and some consequences, t. LXXIII, p. 249-259.
3. On essential cluster sets, t. LXXIX, p. 159-171.

Nadler, S. B., Jr.

1. Continua which a one-to-one continuous image of $[0, \infty)$, t. LXXV, p. 123-133.
2. (and J. Quinn) Embedding certain compactifications of a half-ray, t. LXXVIII, p. 217-225.
3. Locating cones and Hilbert cubes in hyperspaces, t. LXXIX, p. 233-250.

Nagami, K.

2. Countable paracompactness of inverse limits and products, t. LXXIII, p. 261-270.
3. Minimal class generated by open compact and perfect mappings, t. LXXVIII, p. 227-264.

Nainpally, S. A.

1. (and M. S. Gagrath) Proximity approach to extension problems, t. LXXI, p. 63-76.

Nakano, K.

1. Uniformity and classes of real valued function system, t. LXXV, p. 1-12.

Namioka, I.

1. Complements of sets of unstable point, t. LXXX, p. 81-89.

Negrepointis, S.

3. (and W. W. Comfort) On families of large oscillation, t. LXXV, p. 275-290.

Nel, L. D.

1. (and R. G. Wilson) Epireflections in the category of T_0 -spaces, t. LXXV, p. 69-74.

Nichols, J. C.

1. The realization of dimension function d_2 , t. LXXVII, p. 211-217.

Nienhuys, J. W.

1. A solenoidal and monothetic minimally almost periodic group, t. LXXIII, p. 167-169.
2. Construction of group topologies on abelian groups, t. LXXV, p. 101-116.

Nishiura, T.

3. (and J. M. Aarts) Covering dimension modulo a class of spaces, t. LXXVIII, p. 75-97.

Nitka, W.

2. On convex metric spaces II, t. LXXII, p. 115-129.
3. On convex metric spaces VI, t. LXXIV, p. 133-144.

Nowiński, K.

1. Closed mappings and the Freudenthal compactification, t. LXXVI, p. 71-83.

Nyikos, P.

1. The Sorgenfrey plane in dimension theory, t. LXXIX, p. 131-139.

Olin, P.

1. Direct multiples and powers of modules, t. LXXIII, p. 113-124.

Olson, D. M.

1. (and T. L. Jenkins) A note on the Levitzki radical of a semiring, t. LXXIX, p. 91-93.

O'Malley, R. J.

1. Strong essential cluster sets, t. LXXVIII, p. 37-42.

Overton, R. H.

1. Čech homology for movable compacta, t. LXXVII, p. 241-251.

Pacholski, L.

2. (and J. Waszkiewicz) On compact classes of models, t. LXXVI, p. 139-147.
3. On countably universal Boolean algebras compact classes of models, t. LXXVIII, p. 43-60.

Pears, A. R.

1. A note on transfinite dimension, t. LXXI, p. 215-221.

Pearson, T. L.

1. (and A. M. Bruckner and J. G. Ceder) On the insertion of Darboux, Baire-one functions, t. LXXX, p. 157-179.

Perticani, F. I.

1. Commutative rings in which every proper ideal is maximal, t. LXXI, p. 193-198.

Phillips, D.

1. Real functions having graphs connected and dense in the plane, t. LXXV, p. 47-49.

Pinter, C.

1. A simpler set of axioms for polyadic algebras, t. LXXIX, p. 223-232.

Płonka, J.

8. Addition and correction to the paper "Diagonal algebras", Fund. Math. 58 (1966), pp. 309-321, t. LXXIX, p. 221-222.
9. (and B. Ganter and H. Werner) Homogeneous algebras are simple, t. LXXIX, p. 217-220.

Pol, R.

1. On the position of the set of monotone mappings in function spaces, t. LXXV, p. 75-84.
2. There is no universal totally disconnected spaces, t. LXXIX, p. 265-267.

Potoczny, H.

1. On a problem of Tamano, t. LXXV, p. 29-31.

Powers, M. J.

2. Fixed point theorems for non-compact approximative ANR's, t. LXXV, p. 61-68.

Proffitt, M. H.

1. On composants of Hausdorff continua, t. LXXI, p. 207-213.

Przymusiński T.

1. A Lindelöf spaces X such that X^2 is normal but not paracompact, t. LXXVIII, p. 291-296.

Puzio, E.

1. Limit mappings and projections of inverse systems, t. LXXX, p. 57-73.

Quershi, M. A. R.

1. S -torsion free modules, t. LXXIX, p. 87-90.

Quigley, J. B.

1. An exact sequence from the n th to the $(n-1)$ -st fundamental group, t. LXXVII, p. 195-210.

Quinn, J.

1. (and S. B. Nadler) Embedding certain compactifications of a half-ray, t. LXXVIII, p. 217-225.

Reed, G. M.

1. Concerning first countable spaces, t. LXXIV, p. 161-169.

Reese, R. H.

1. The local contractibility of the homeomorphism space of a 2-polyhedron, t. LXXV, p. 261-273.

Reynolds, G. D.

1. (and A. W. Hager and H. D. Rice) Borel-complete topological spaces, t. LXXV, p. 135-143.

Rice, M. D.

1. (and A. W. Hager and G. D. Reynolds) Borel-complete topological spaces, t. LXXV, p. 135-143.

Rodabaugh, S. E.

1. Retracts of Tychonoff and normal spaces, t. LXXIX, p. 23-31.

Rogers, J. T., Jr.

2. (and J. L. Tollefson) Involutions on solenoid spaces, t. LXXIII, p. 11-19.

Rogers, J. W., Jr.

3. Inducting approximations homotopic to maps between inverse limits, t. LXXVIII, p. 281-289.

Rotman, B.

1. Boolean algebras with ordered bases, t. LXXV, p. 187-197.

Rubin, H.

1. (and P. E. Howard and J. E. Rubin) The relationship between two weak forms of the axiom of choice, t. LXXX, p. 75-79.

Rubin, J. E.

3. (and P. L. Howard and H. Rubin) The relationship between two weak forms of the axiom of choice, t. LXXX, p. 75-79.

Rudd, D.

1. An example of a \mathcal{O} -algebra whose uniform closure is a ring of continuous functions, t. LXXVII, p. 1-4.

Rudin, M. E.

1. A normal space X for which $X \times I$ is not normal, t. LXXIII, p. 179-186.

Rudolf, L.

1. θ -continuous extensions of maps on τX , t. LXXIV, p. 111-131.
2. Extending maps from dense subspaces, t. LXXVII, p. 171-190.

Rushing, T. B.

1. Geometrical arguments concerning two-sided submanifolds, flat submanifolds and pinched bicollars, t. LXXIV, p. 73-84.

Russel, M. J.

1. Monotone decompositions of continua irreducible about a finite subset, t. LXXII, p. 255-264.

Šalát, T.

1. Generalization of the notion of the Banach indicatrix, t. LXXIII, p. 29-36.
2. On transfinite sequences of B -measurable functions, t. LXXVIII, p. 157-162.

Schirmer, H.

2. Fixed point sets of homeomorphisms on dendrites, t. LXXV, p. 117-122.
3. Homotopy for small multifunctions, t. LXXVIII, p. 169-176.

Schmid, J.

3. On the compactification of closure algebras, t. LXXIX, p. 33-48.

Schurle, A. W.

1. Strongly cellular subsets of E^3 , t. LXXX, p. 207-212.

Segal, J.

3. (and S. Mardešić) Shapes of compacts and ANR-systems, t. LXXII, p. 41-59.
4. (and S. Mardešić) Equivalence of the Borsuk and the ANR-system approach to shapes, t. LXXII, p. 61-68.

Sennott, L. I.

1. (and R. A. Aló) Collectionwise normality and the extension of functions on product spaces, t. LXXVI, p. 231-243.

Sieradski, A. J.

1. Non-uniqueness of homotopy factorizations into irreducible polyhedra, t. LXXII, p. 97-99.

Sioson, F. M.

2. (and J. D. Monk) On the general theory of m -groups, t. LXXII, p. 233-244.

Skala, H. L.

2. Grouplike Menger algebras, t. LXXIX, p. 199-207.

Smítal, J.

1. On boundedness and discontinuity of additive functions, t. LXXVI, p. 245-253

Snipes, R. F.

1. T -sequential topological spaces, t. LXXVII, p. 95-98.

Solomon, R. C.

1. A type of βN with \ast_0 relative types, t. LXXIX, p. 209-212.

Sołtan, P. S. (П. С. Солтан)

1. О покрытии выпуклых тел гомотетичными, t. LXXVI, p. 85-93.

Soniát, L. E.

1. Characterizations of uniformity-dependent dimension functions, t. LXXVI, p. 63-70.

Spież, S.

1. On a plane compactum with the maximal shape, t. LXXVIII, p. 145-156.

Steiner, A. K.

4. (and E. F. Steiner) Binding spaces: A unified completion and extension theory, t. LXXVI, p. 43-61.

Steiner, E. F.

5. (and A. K. Steiner) Binding spaces: A unified completion and extension theory, t. LXXVI, p. 43-61.

Stevenson, F. W.

2. ω_μ -metric spaces and ω_μ -proximities, t. LXXIII, p. 171-178.
3. Product proximities, t. LXXVI, p. 157-166.

Stevenson, N. E.

1. Concerning indecomposable continua and upper semi-continuous collections of non-degenerate continua, t. LXXIV, p. 35-42.

Stone, H. E.

1. (and J. A. Guthrie) Spaces whose connected expansion preserve connected subsets, t. LXXX, p. 91-100.

Strecker, G. E.

1. (and H. Herrlich) Coreflective subcategories in general topology, t. LXXIII, p. 199-218.

Szczerba, L. W.

1. The notion of an elementary subsystem for a Boolean-valued relational system, t. LXXX, p. 5-12.

Tamano, H.

1. A characterization of paracompactness, t. LXXII, p. 189-201.

Taylor, W.

3. Atomic compactness and elementary equivalence, t. LXXI, p. 103-112.

Telgársky, R.

1. C -scattered and paracompact spaces, t. LXXIII, p. 59-74.
2. (and H. Kok) The space of rationals is not absolutely paracompact, t. LXXIII, p. 75-78.
3. Concerning product of paracompact spaces, t. LXXIV, p. 153-159.

Thomas, J. W.

1. On the Liapounov type fixed point theorem, t. LXXVIII, p. 141-143.

Todd, C.

1. The product of certain measurable spaces, t. LXXIV, p. 29-33.

Tollefson, J. L.

1. (and J. T. Rogers, Jr.) Involutions on solenoidal spaces, t. LXXIII, p. 11-19.

Toruńczyk, H.

1. A simple proof of Hausdorff's theorem on extending metrics, t. LXXVII, p. 191-193.

Trnková, V.

1. X^m is homeomorphic to X^n iff $m \sim n$ where \sim is a congruence on natural numbers, t. LXXX, p. 51-56.

Truss, J.

1. On successors in cardinal arithmetic, t. LXXVIII, p. 7-21.

Tymchatyn, E. D.

1. Partial order and collapsibility of 2-complexes, t. LXXVII, p. 5-7.
2. (and J. H. V. Hunt) The theorem of Miss Mullihin-Mazurkiewicz-van Est for uncoherent Peano spaces, t. LXXVII, p. 285-287.

Valenti, S.

1. Sur la dérivation k -pseudo-symétrique des fonctions numériques, t. LXXIV, p. 147-152.

Valentine, E. J.

1. On criteria of Blumenthal for inner-product spaces, t. LXXII, p. 265-269.

Van Doren, R. D.

1. Closed continuous images of complete metric spaces, t. LXXX, p. 47-50.

Vought, E. J.

1. Monotone decompositions of continua into generalized arcs and simple closed curves, t. LXXX, p. 213-220.

Waszkiewicz, J.

1. (and L. Pacholski) On compact classes of models, t. LXXVI, p. 139-147.

Wells, J. F.

1. The restricted cancellation law in a Noether lattice, t. LXXV, p. 235-247.

Wenner, B. R.

1. A universal separable metric locally finite-dimensional space, t. LXXX, p. 283-286.

Werner, H.

1. (and B. Ganter and J. Płonka) Homogeneous algebras are simple, t. LXXIX, p. 217-220.

Węglorz, B.

3. Some remarks on selectors (I), t. LXXVII, p. 295-304.

White, W.

2. A fixed-point theorem for homeomorphisms of R^{2^n} , t. LXXVII, p. 253-255.

Wicke, H. H.

1. (and J. M. Worrell, Jr.) Topological completeness of first countable Hausdorff spaces I, t. LXXV, p. 209-222.

Wieliczko, N. W. (Н. В. Величко)

1. О мощностях открытых покрытий топологических пространств, t. LXXX, p. 271-282.

Wilczyński, W.

1. On the family of sets of approximate limit numbers, t. LXXV, p. 169-174.

Wilson, R. G.

1. (and L. D. Nel) Epireflections in the category of T_0 -spaces, t. LXXV, p. 69-74.

Więśław, W.

1. A characterization of locally compact fields of zero characteristic, t. LXXXVI, p. 149-155.

Wilker, J. B.

1. Lipschitz pairs of metric subspaces, t. LXXI, p. 127-130.

Willard, S.

2. Some examples in the theory of Borel sets, t. LXXI, p. 187-191.

Willmott, R. C.

1. Some relations between k -analytic sets and generalized Borel sets, t. LXXI, p. 263-271.

Wilmer, G.

1. Internally standard set theories, t. LXXI, p. 93-102.

Wiśniewski, K.

1. On axiom of choice for families of finite sets, t. LXXIII, p. 187-192.

Wojciechowska, A.

1. On Helling cardinals, t. LXXXVI, p. 223-230.

Wong, R. Y. T.

1. Periodications on (I-D) normal linear spaces, t. LXXX, p. 133-139.

Worrell, J. M., Jr.

1. (and H. H. Wicke) Topological completeness of first countable Hausdorff spaces I, t. LXXV, p. 209-222.

Zuckerman, M. M.

3. Natural sums of ordinals, t. LXXVII, p. 289-294.
