

Errata to the paper
“Relations on lines as primitive notions
for Euclidean geometry”
Fundamenta Mathematicae 82 (1975), pp. 347–355

by

W. Schwabhäuser (Stuttgart) and L. W. Szczerba (Warszawa)

An equivalence on page 353 (lines 8-7 from the bottom) is misprinted.
It should be read

$$p(KLM) \leftrightarrow K = L = M \vee (K = L \wedge L \dot{\times} M) \vee (K = M \wedge M \dot{\times} L) \vee \\ \vee (L = M \wedge M \dot{\times} K) \vee \{ \dot{\times}(KLM) \wedge [P(KLM) \rightarrow \exists N(KLM \perp N)] \}.$$
