XC (1976)

Index alphabétique des tomes LXXXI-XC (1973-1976) (*)

Alster, K.

1. Subparacompactness in Cartesian products of generalized ordered topological spaces, t. LXXXVII, p. 7–28.

Baildon, J. D.

1. Euler characteristics of 2-manifolds and light open maps, t. XC, p. 261–268.

Baldwin, J. T.

1. The number of automorphisms of models of $\aleph_1$-categorical theories, t. LXXXIII, p. 1–6.
2. Atomic compactness in $\aleph_1$-categorical Horn theories, t. LXXXIII, p. 263–268.
3. Conservative extensions and the two cardinal theorem for stable theories, t. LXXXVIII, p. 7–9.

Ball, B. J.

3. (and R. B. Sher) A theory of proper shape for locally compact metric spaces, t. LXXXVI, p. 163–192.
4. Proper shape retracts, t. LXXXIX, p. 177–189.

Bandy, C.

1. A characterization of Hurewicz spaces, t. LXXXIV, p. 169–171.

Barendregt, H.

1. Combinatory logic and the ω-rule, t. LXXXII, p. 199–215.

Barwise, K. J.

1. Mostowski's collapsing function and the closed unbounded filter, t. LXXXII, p. 95–103.

Baudisch, A.

1. Theories abelscher Gruppen mit einem einstelligen Prädikat, t. LXXXIII, p. 121–127.

(*) L'index présent est la suite de celui des t. I–XV inséré au t. XV (1930), des t. XVI–XXV inséré au t. XXV (1935), des t. XXVI–XL inséré au t. XL (1953), des t. XLI–L inséré au t. L (1962), des t. LI–LX inséré au t. LX (1967), des t. LXI–LXX inséré au t. LXX (1971) et des t. LXXI–LXXX inséré au t. LXXX (1973).

Benda, M.

1. Remarks on countable models, t. LXXXI, p. 107–119.

Bennett, D. E.

1. A characterization of locally connectedness by means of the set function T, t. LXXXVI, p. 137–141.

van Benthem, J. F. A. K.

1. A set-theoretical equivalent of the prime ideal theorem for Boolean algebras, t. LXXXIX, p. 151–153.

Berard, A. D., Jr.

1. (and W. Nitka), A new definition of the circle by the use of bisectors, t. LXXXV, p. 49–55.

Bílý, J.

1. (and L. Bukovský), On expansions of β-models, t. LXXXII, p. 239–244.

Blair, R. L.

1. Filter characterizations of z-, C^*-, and C-embeddings, t. XC, p. 285–300.

Bogatyj, S. (Богатый, С.)

1. О теореме Виеториса в категории гомотопий и одной проблеме Борсука, t. LXXXIV, p. 209–228.
2. (и Ю. М. Смирнов), Аппроксимация полиедрами и факторизационные теоремы для ANR-бикомпактов. t. LXXXVII, p. 195–205.

Booth, D.

1. A Boolean view of sequential compactness, t. LXXXV, p. 99–102.

Borsuk, K.

61. Some remarks on shape properties of compacta, t. LXXXV, p. 185–195.
62. Concerning the shape of n-dimensional spheres, t. LXXXV, p. 197–202.
63. On fundamental deformation retracts and on some related notions, t. LXXXVI, p. 261–270.

Bowen, K. A.

1. Forcing in a general setting, t. LXXXI, p. 315–329.

Boyte, J. M.

1. (and E. P. Lane), An insertion theorem for real functions, t. LXXXVII, p. 29–30.

Brown, J. B.

2. Lusin density and Ceder's differentiable restrictions of arbitrary real functions, t. LXXXIV, p. 35–45.
3. Almost continuous Darboux functions and Reed's pointwise convergence criteria, t. LXXXVI, p. 1–7.

Bryszewski, J.

1. (and L. Górniewicz), Multi-valued maps of subsets of Euclidean spaces, t. XC, p. 233–251.

Bukovský, L.

1. (and J. Bílý), On expansions of β-models, t. LXXXII, p. 239–244.
2. Characterization of generic extensions of models of set theory, t. LXXXIII, p. 35–46.

Bullen, P. S.

1. (and S. N. Mukhopadhyay), Relations between some general nth-order derivatives, t. LXXXV, p. 257–276.

Burgess, J.

1. (and D. Miller), Remarks on invariant descriptive set theory, t. XC, p. 53–75.

Burris, S.

2. Weights of denumerable topological spaces, t. LXXXV, p. 25–27.

Carstens, H. G.

1. Reducing hyperarithmetic sequences, t. LXXXIX, p. 5–11.

Cenzer, D.

1. The boundedness principle in ordinal recursion, t. LXXXI, p. 203–212.

Chaber, J.

2. (and M. M. Čoban and K. Nagami), On monotonic generalizations of Moore spaces, Čech complete spaces and p-spaces, t. LXXXIV, p. 107–119.

Chapman, T. A.

3. Locally flat embeddings of Hilbert cubes are flat, t. LXXXVII, p. 183–193.

Cherlin, G. L.

1. Second order forcing, algebraically closed structures, and large cardinals, t. LXXXVI, p. 141–160.

Ćirić, Lj. B.

1. Fixed point theorems in topological spaces, t. LXXXVII, p. 1–5.

Čoban, M. M.

2. (and J. Chaber and K. Nagami), On monotonic generalizations of Moore spaces, Čech complete spaces and p-spaces, t. LXXXIV, p. 107–119.

Cook, H.

8. Clumps of continua, t. LXXXVI, p. 91–100.

Cusin, R.

1. The number of countable generic models for finite forcing, t. LXXXIV, p. 265–270.

van Dalen, D.

1. A model for *HAS*. A topological interpretation of the theory of species of natural numbers, t. LXXXII, p. 167–174.

Davies, R. O.

2. Representation of functions of two variables as sums of rectangular functions, I, t. LXXXV, p. 177–183.

Daykin, D. E.

1. (and J. K. Dugdale), Triangle contractive self maps of a Hilbert space, t. LXXXIII, p. 187–195.

DeGryse, D. G.

1. (and R. P. Osborne), A wild Cantor set in E^n with simply connected complement, t. LXXXVI, p. 9–27.

Demers, L.

1. On spaces which have the shape of C. W. complexes, t. XC, p. 1–9.

Detlefsen, M.

1. (and E. W. Johnson), Prime sequences and distributivity in local Noether lattices, t. LXXXVI, p. 149–156.

Devlin, K. J.

2. On hereditarily separable Hausdorff spaces in the constructible universe, t. LXXXII, p. 1–10.
3. Kurepa's hypothesis and the continuum, t. LXXXIX, p. 23–31.

Dickman, R. F., Jr.

2. (and L. R. Rubin), C-separated sets and unicoherence, t. LXXXIII, p. 25–33.

Dietrich, W., Jr.

1. Ideals in subalgebras of $C(X)$, t. LXXXVI, p. 207–219.

Dishant, H.

1. Weak decibility of some modal extension of trigonometry, t. LXXXI, p. 255–260.

van Douwen, E. K.

1. The box product of countably many metrizable spaces need not be normal, t. LXXXVIII, p. 127–132.

Doyle, P.H.

A topological collapse number for all spaces, t. LXXXIX, p. 261–263.

Drake, F. R.

2. A fine hierarchy of partition cardinals, t. LXXXI, p. 271–277.

Dugdale, J. K.

1. (and D. E. Daykin), Triangle contractive self maps of a Hilbert space, t. LXXXIII, p. 187–195.

Dugundji, J.

5. Positive definite functions and coincidences, t. XC, p. 131–142.

Dutta, D. K.

1. Upper and lower Lebesgue–Stieltjes integrals, t. LXXXVII, p. 121–140.

Dydak, J.

1. A generalization of cohomotopy groups, t. XC, p. 77–98.

Eaton, W. T.

2. Applications of a mismatch theorem to decomposition spaces, t. LXXXIX, p. 199–224.

Edwards, D. A.

1. Two theorems of functional analysis effectively equivalent to choice axioms, t. LXXXVIII, p. 95–101.
2. (and R. Geoghegan), Compacta weak shape equivalent to ANR's, t. XC, p. 115–124.

Eklof, P. C.

1. Infinitary equivalence of abelian groups, t. LXXXI, p. 305–314.

Ellentuck, E.

5. Partition topologies for large cardinals, t. LXXXVIII, p. 157–161.

Erdös, P.

3. (and A. Hajnal), Some remarks on set theory XI, t. LXXXI, p. 261–265.

Feferman, S.

4. Two notes on abstract model theory. I. Properties invariant on the range of definable relations between structures, t. LXXXII, p. 153–165.
5. Two notes on abstract model theory. II. Languages for which the set of valid sentences is semi-invariantly implicitly definable, t. LXXXIX, p. 111–130.

Felgner, V.

3. $\aleph_1$-Kategorische Theorien nicht-kommutativer Ringe, t. LXXXII, p. 331–346.

Fenstad, J. E.

1. (and D. Normann), On absolutely measurable sets, t. LXXXI, p. 91–98.

Ferry, S.

1. When ϵ-boundaries are manifolds, t. XC, p. 199–210.

Fiedorczuk, W. W. (Федорчук, В. В.)

1. Задача А. Н. Тихонова о классификации H-замкнутых расширений, t. LXXXVI, p. 69–90.

Fleischer, I.

2. On extending congruences from partial algebras, t. LXXXVIII, p. 11–16.

Fleischman, W.

2. (and S. Williams), The G_δ-topology on compact spaces, t. LXXXIII, p. 143–149.

Fleissner, R. J.

1. On the product of derivatives, t. LXXXVIII, p. 173–178.

Foran, J.

2. A note on Lusin's condition (N), t. XC, p. 181–186.

Fraïssé, R.

1. Multirelation et âge 1-extensifs, t. LXXXII, p. 323–330.

Friedman, H.

3. Minimality in the Δ^1_2-degrees, t. LXXXI, p. 183–192.

Galvin, F.

1. (and J. Larson), Pinning countable ordinals, t. LXXXII, p. 357–361.

Gardiner, G.

1. The equivalence of Boolean prime ideal theorem and a theorem of functional analysis, t. LXXXIV, p. 81–86.

Garg, G. D. (Гарг, Г. Д.)

1. Аналог теоремы Куратовского-Дугунджи, t. LXXXIII, p. 85–96.

Geller, D.

1. (and H. Kronk), Further results on the achromatic number, t. LXXXV, p. 285–290.

Geoghegan, R.

1. (and D. A. Edwards), Compacta weak shape equivalent to ANR's, t. XC, p. 115–124.

Ger, R.

2. On some functional equations with a restricted domain, t. LXXXIX, p. 131–149.

Godlewski, S.

4. Mutational retracts and extensions of mutations, t. LXXXIV, p. 47–65.
5. On the shape of MAR and MANR-spaces, t. LXXXVIII, p. 87–94.
6. A characterization of MAR and MANR-spaces by extendability of mutations, t. LXXXIX, p. 229–232.

Gogol, D.

1. Low cardinality models for a type of infinitary theory, t. LXXXI, p. 29–34.

Gorton, R.

1. λ-complete near-rings, t. LXXXVII, p. 73–78.

Górniewicz, L.

1. A Lefschetz-type fixed point theorem, t. LXXXVIII, p. 103–115.
2. (and J. Bryszewski), Multi-valued maps of subsets of Euclidean spaces, t. XC, p. 233–251.

Grande, Z.

1. Quelques remarques sur les familles de fonctions de Baire de première classe, t. LXXXIV, p. 87–91.

Guintchev, I.

1. Concerning unicoherence of continua, t. XC, p. 23–33.

Guzicki, W.

2. Uncountable β-models with countable height, t. LXXXII, p. 143–152.

Hájek, P.

2. Degrees of dependence in the theory of semisets, t. LXXXII, p. 11–24.

Hajnal, A.

6. (and I. Juhász), On hereditarily α-Lindelöf and α-separable spaces, II, t. LXXXI, p. 147–158.
7. (and P. Erdös), Some remarks on set theory XI, t. LXXXI, p. 261–265.

Harris, D.

2. Completely regular proximities and RC-proximities, t. LXXXV, p. 103–111.

Hartvigson, Z. R.

1. A non-Desarguesian space geometry, t. LXXXVI, p. 143–147.

Hauschild, K.

2. (und W. Rautenberg), Entscheidungsprobleme der Theorie zweier Äquivalenzrelationen mit beschränkter Zahl von Elementen in den Klassen, t. LXXXI, p. 35–41.
3. Rekursive Unentscheidbarkeit der Theorie der pythagoräischen Körper, t. LXXXII, p. 191–197.

Henkin, L.

5. (and D. Resek), Relativization of cylindric algebras, t. LXXXII, p. 363–383.

Heuer, G. A.

1. Discrete ordered rings, t. LXXXV, p. 121–138.

Hickman, J. L.

1. A problem on series of ordinals, t. LXXXI, p. 49–56.

Himmelberg, C. J.

2. Measurable relations, t. LXXXVII, p. 53–72.

Hodel, R. E.

3. Extensions of metrization theorems to higher cardinality, t. LXXXVII, p. 219–229.

Hoyle, S. L.

1. (and S. Leader), Contractive fixed points, t. LXXXVII, p. 93–108.

Höft, H.

1. A normal form for some semigroups generated by idempotents, t. LXXXIV, p. 75–78.

Iliadis, S. D. (Илиадис, С. Д.)

1. О нерастягивающих отображениях компактов, t. XC, p. 125–129.

Ingram, W. T.

2. An uncountable collection of mutually exclusive planar atriodic tree-like continua with positive span, t. LXXXV, p. 73–78.

Isiwata, T.

1. Some properties of the remainder of Stone–Čech compactifications, t. LXXXIII, p. 129–142.

Iwanik, A.

1. A remark on a paper of H. Höft, t. LXXXIV, p. 79–80.

Jaegermann, H.

2. Normal radicals of endomorphism rings of free and projective modules, t. LXXXVI, p. 237–250.

Janowitz, M. F.

5. Examples of statisch and finite-statisch AC-lattices, t. LXXXIX, p. 225–227.

Jech, T. J.

2. Properties of the gimel function and a classification of singular cardinals, t. LXXXI, p. 57–64.

Jensen, F. V.

1. Souslin–Kleene does not imply Beth, t. XC, p. 269–273.

Jensen, R. B.

1. (and H. Johnsbråten), A new construction of non-constructible Δ^1_3 subset of ω, t. LXXXI, p. 279–290.

Jędrzejewski, J. M.

1. On limit numbers of real functions, t. LXXXIII, p. 269–281.

Jobe, J.

1. Wide tree-like spaces have a fixed point, t. LXXXIX, p. 51–60.

Jockusch, C. G., Jr.

1. Recursiveness of initial segments of Kleene's O, t. LXXXVII, p. 161–167.

Johnsbråten, H.

1. (and R. B. Jensen), A new construction of constructible Δ^1_3 subset of ω, t. LXXXI, p. 279–290.

Johnson, J. A.

6. Finite dimensional completions in Noether lattices, t. LXXXVII, p. 169–182.
7. Semi-local lattices, t. XC, p. 11–15.

Johnson, E. W.

3. (and M. Detlefsen), Prime sequences and distributivity in local Noether lattices, t. LXXXVI, p. 149–156.

Joshi, K. D.

2. Infinite dimensional non-symmetric Borsuk–Ulam theorem, t. LXXXIX, p. 45–50.
3. Non-symmetric generalizations of theorems of Dyson and Livesay, t. XC, p. 35–43.

Juhász, I.

1. (and A. Hajnal), On hereditarily α-Lindelöf and α-separable spaces, II, t. LXXXI, p. 147–158.

Katuta, Y.

1. Expandability and its generalizations, t. LXXXVII, p. 231–250.

Kellum, K. R.

2. On a question of Borsuk concerning non-continuous retracts, t. LXXXVII, p. 89–92

Kenderov, P.

1. Semi-continuity of set-valued monotone mappings, t. LXXXVII, p. 61–69.

Ketonen, J.

2. Banach spaces and large cardinals, t. LXXXI, p. 291–303.

Kirkor, A.

3. About neighborhoods of surfaces integrally unknotted in S^3, t. LXXXIV, p. 157–168.

Knoebel, R. A.

1. A comment on Bables' representation theorem for distributive lattices, t. XC, p. 187–188.

Kodama, Y.

4. On Δ-spaces and fundamental dimension in the sense of Borsuk, t. LXXXIX, p. 13–22.

Kogałowskij, S. R. (Когаловский, С. Р.)

1. Некоторые простые следствия аксиомы конструктивности, t. LXXXII, p. 245–267.

Korec, I.

1. (and M. G. Peretiatkin and W. Rautenberg), Definability in structures of finite valency, t. LXXXI, p. 173–181.
2. On a generalization of Mycielski's and Znám's conjectures about coset decompositions of Abelian groups, t. LXXXV, p. 41–48.

Kozlowski, G.

1. (and J. Segal), On the shape of 0-dimensional paracompacta, t. LXXXIII, p. 151–154.
2. (and J. Segal), n-movable compacta and ANR-systems, t. LXXXV, p. 235–243.

Krasinkiewicz, J.

1. On the hyperspaces of snake-like and circle-like continua, t. LXXXIII. p. 155–164.
2. On the hyperspaces of hereditarily indecomposable continua, t. LXXXIV, p. 175–186.
3. On internal composants of indecomposable plane continua, t. LXXXIV, p. 255–263.
4. Curves which are continuous images of tree-like continua are movable, t. LXXXIX, p. 233–260.

Krempa, J.

3. Radicals of semi-group rings, t. LXXXV, p. 57–71.

Krivine, J. L.

1. Langages à valeurs réelles et applications, t. LXXXI, p. 213–253.

Kronk, H.

1. (and D. Geller), Further results on the achromatic number, t. LXXXV, p. 285–290.

Kueker, D. W.

1. Core structures for theories, t. LXXXIX, p. 155–171.

Kulpa, W.

4. Proximity classes of uniformities, t. LXXXVI, p. 201–206.
5. Homeomorphisms of inverse limits of metric spaces, t. LXXXVI, p. 233–235.

Kuperberg, K.

2. A note on the Hurewicz isomorphism theorem in Borsuk's theory of shape, t. XC, p. 173–175.

Kuperberg, W.

4. On certain homological properties of finite-dimensional compacta. Carriers, minimal carriers and bubbles, t. LXXXIII, p. 7–23.

Kuratowski K.

89. Applications of the Baire-category method to the problem of independent sets, t. LXXXI, p. 65–72.

Kuusalo, T.

1. On the Beurling–Ahlfors functional inequality, t. XC, p. 17–22.

Lachlan, A. H.

2. Two conjectures regarding the stability of ω-categorical theories, t. LXXXI, p. 133–145.

Lane, E. P.

1. (and J. M. Boyte), An insertion theorem for real functions, t. LXXXVII, p. 29–30.

Larson, J.

1. (and F. Galwin), Pinning countable ordinals, t. LXXXII, p. 357–361.

Leader, S.

6. (and S. L. Hoyle), Contractive fixed points, t. LXXXVII, p. 93–108.

Leclerc, B.

2. (et B. Monjardet), Corrections à l'article "Ordres C.A.C.", Fundamenta Mathematicae 79 (1973), pp. 11–22, t. LXXXV, p. 97.

Lee, V.

1. (and M. Nadel), On the number of generic models, t. XC, p. 105–114.

Leeds, S.

1. (and H. Putnam), Solution to a problem of Gandy's, t. LXXXI, p. 99–106.

Lenaburg, J. P.

1. Absolute Z-sets, t. LXXXV, p. 29–39.

Lesniak, L.

1. On longest paths in connected graphs, t. LXXXVI, p. 283–286.

Lipiński, J. S.

6. On level sets of Darboux functions, t. LXXXVI, p. 193–199.

López–Escobar, E. G. K.

5. Elementary interpretations of negationless arithmetic, t. LXXXII, p. 25–38.
6. On an extremely restricted ω-rule, t. XC, p. 159–172.

Lum, L.

1. Weakly smooth dendroids, t. LXXXIII, p. 111–120.

Macintyre, A.

3. Model-completeness for sheaves of structures, t. LXXXI, p. 73–89.

Maćkowiak, T.

3. On smooth continua, t. LXXXV, p. 79–95.
4. On some examples of monostratic λ-dendroids, t. LXXXVII, p. 79–88.
5. Locally weakly confluent mappings on hereditarily locally connected continua, t. LXXXVIII, p. 225–240.

Magill, K. D., Jr.

2. Semigroups which admit few embeddings, t. LXXXV, p. 147–163.

Makkai, M.

3. Generalizing Vaught sentences from ω to strong cofinality ω, t. LXXXII, p. 105–119.
4. Errata to the paper "Generalizing Vaught sentences from ω to strong cofinality ω", Fundamenta Mathematicae 82 (1974), pp. 105–119, t. LXXXII, p. 385.

Makowsky, J. A.

1. On some conjectures connected with complete sentences, t. LXXXI, p. 193–202.

Mansfield, R.

1. The non-existence of Σ^1_2 well-orderings of the Cantor set, t. LXXXVI, p. 279–282.

Marek, W.

1. Stable sets, a characterization of β_2-models of full second order arithmetic and some related facts, t. LXXXII, p. 175–189.

McAloon, K.

1. On the sequence of models HOD_n, t. LXXXII, p. 85–93.

McCoy, R. A.

2. Function spaces with intervals as domain spaces, t. XC, p. 189–198.

McLaughlin, T. G.

1. Degrees of unsolvability within a regressive isol, t. LXXXVI, p. 29–40.

McMillan, D. R., Jr.

3. Non-planar embeddings of planar sets in E^3, t. LXXXIV, p. 245–254.

Miller, D.

1. (and J. Burgess), Remarks on invariant descriptive set theory, t. XC, p. 53–75.

Millman, R. S.

1. Groups in the category of f-manifolds, t. LXXXIX, p. 1–4.

Monjardet, B.

2. (et B. Leclerc), Corrections à l'article "Ordres C.A.C.", Fundamenta Mathematicae 79 (1973), pp. 11–22, t. LXXXV, p. 97.

Morita, K.

1. On shapes of topological spaces, t. LXXXVI, p. 251–259.
2. Čech cohomology and covering dimension for topological spaces, t. LXXXVII, p. 31–52.
3. On generalization of Borsuk's homotopy extension theorem, t. LXXXVIII, p. 1–6.

Morley, M. D.

1. (and R. I. Soare), Boolean algebras, splitting theorems, and Δ^0_2 sets, t. XC, p. 45–52.

Morris, S. A.

2. Maximally almost periodic groups and varieties of topological groups, t. LXXXIV, p. 1–4.

Morse, M.

2. Topologically nondegenerate functions, t. LXXXVIII, p. 17–52.

Moschovakis, Y. N.

2. On nonmonotone inductive definability, t. LXXXII, p. 39–83.

Mostowski, A.

24. Errata to the paper "Models of second order arithmetic with definable Skolem functions", Fundamenta Mathematicae 75 (1972), pp. 223–234, t. LXXXIV, p. 173.

Muenzenberger, T. B.

2. (and R. E. Smithson), On the equivalence of certain coincidence theorems and fixed point theorems, t. LXXXIV, p. 93–100.

Mukhopadhyay, S. N.

4. (and P. S. Bullen), Relations between some general nth-order derivatives, t. LXXXV, p. 257–276.
5. On the approximate Peano derivatives, t. LXXXVIII, p. 133–143.

Mycielski, J.

20. Almost every function is independent, t. LXXXI, p. 43–48.

Nadel, M.

1. (and V. Lee), On the number of generic models, t. XC, p. 105–114.

Nadler, S. B., Jr.

4. (and J. Quinn and H. Reiter), Results and problems concerning compactifications, compact subtopologies, and mappings, t. LXXXIX, p. 33–44.

Nagami, K.

4. (and J. Chaber and M. M. Čoban), On monotonic generalizations of Moore spaces, Čech complete spaces and p-spaces, t. LXXXIV, p. 107–119.

Naimpally, S. A.

2. Reflective functors via nearness, t. LXXXV, p. 245–255.

Nienhuys, J. W.

3. Some examples of monothetic groups, t. LXXXVIII, p. 163–171.

Nitka, W.

4. (and A. D. Berard, Jr.), A new definition of the circle by the use of bisectors, t. LXXXV, p. 49–55.

Normann, D.

1. (and J. E. Fenstad), On absolutely measurable sets, t. LXXXI, p. 91–98.

Nowak, S.

1. Some properties of fundamental dimension, t. LXXXV, p. 211–227.
2. On the fundamental dimension of approximatively 1-connected compacta, t. LXXXIX, p. 61–79.

Nowiński, K.

1. Closed retractions of Euclidean spaces, t. LXXXV, p. 1–7.
2. Extension of closed mappings, t. LXXXV, p. 9–17.

Olędzki, J.

1. On movability and other similar shape properties, t. LXXXVIII, p. 179–191.

Osborne, R. P.

3. (and D. G. De Gryse), A wild Cantor set in E^n with simply connected complement, t. LXXXVI, p. 9–27.
4. Embedding Cantor sets in a manifold. III. Approximating spheres, t. XC, p. 253–259.

Ostaszewski, A. J.

1. On the descriptive set theory of the lexicographic square, t. LXXXVII, p. 261–281.

Oxtoby, J. C.

3. The kernel operation on subsets of a T_1-space, t. XC, p. 275–284.

Pepe, W. D.

1. Measures on bundles and bundles of measures, t. LXXXIII, p. 165–185.

Peretiatkin, M. G.

1. (and I. Korec and W. Rautenberg), Definability in structures of finite valency, t. LXXXI, p. 173–181.

Phadke, B. B.

1. Nonsymmetric weakly complete G-spaces, t. LXXXIII, p. 99–100.

Płonka, J.

10. On connections between the decomposition of an algebra into sums of direct systems of subalgebras, t. LXXXIV, p. 237–244.

Pol, R.

3. Normality in function spaces, t. LXXXIV, p. 145–155.
4. (and E. Puzio), An open-perfect mapping on a hereditarily disconnected space onto a connected space, t. LXXXVI, p. 271–278.

Połkow, W. Z. (Полков, В. З.)

1. Метризация пространств близости над Тихоновскими полуполями, t. LXXXV, p. 113–120.

Potoczny, H. B.

2. Closure-preserving families of finite sets, t. LXXXIX, p. 173–176.

Powell, W. C.

1. Variations of Keisler's theorem for complete embeddings, t. LXXXI, p. 121–132.

Priestley, H. A.

1. Stone lattices: A topological approach, t. LXXXIV, p. 127–143.

Przymusiński, T.

2. A note on dimension theory of metric spaces, t. LXXXV, p. 277–284.
3. (and F. D. Tall), The undecidability of the existence of a non-separable normal Moore space satisfying the countable chain condition, t. LXXXV, p. 291–297.

Pupier, R.

1. Précompactologies et structures uniformes, t. LXXXIII, p. 251–262.

Putnam, H.

2. (and S. Leeds), Solution to a problem Gandy's, t. LXXXI, p. 99–106.

Puzio, E.

2. (and R. Pol), An open-perfect mapping on a hereditarily disconnected space onto a connected space, t. LXXXVI, p. 271–278.

Quinn, J.

2. (and S. B. Nadler, Jr. and H. Reiter), Results and problems concerning compactifications, compact subtopologies, and mappings, t. LXXXIX, p. 33–44.

Rauszer, C.

1. Semi-Boolean algebras and their applications to intuitionistic logic with dual operations, t. LXXXIII, p. 219–249.

Rautenberg, W.

2. (und K. Hauschild), Entscheidungsprobleme der Theorie zweier Äquivalenzrelationen mit beschränkter Zahl von Elementen in den Klassen, t. LXXXI, p. 35–41.
3. (and I. Korec and M. G. Peretiatkin), Definability in structures of finite valency, t. LXXXI, p. 173–181.

Reinhardt, W. N.

1. Set existence principles of Shoenfield, Ackermann, and Powell, t. LXXXIV, p. 5–34.

Reiter, H.

1. (and S. B. Nadler, Jr., and J. Quinn), Results and problems concerning compactifications, compact subtopologies, and mappings, t. LXXXIX, p. 33–44.

Resek, D.

1. (and L. Henkin), Relativization of cylindric algebras, t. LXXXII, p. 363–383.

Robinson, A.

4. A note on topological model theory, t. LXXXI, p. 159–171.

Rosen, H.

1. Connectivity points and Darboux points of real functions, t. LXXXIX, p. 265–269.

Roseman, D.

1. Projections of knots, t. LXXXIX, p. 99–110.

Rubin, L. R.

2. (and R. F. Dickman, Jr.), C-separated sets and unicoherence, t. LXXXIII, p. 25–33.

Rudd, D.

2. P-ideals and F-ideals in rings of continuous functions, t. LXXXVIII, p. 53–59.

Sanders, T. J.

1. On the inequivalence of the Borsuk and the H-shape theories for arbitrary metric spaces, t. LXXXIV, p. 67–73.

Schein, B. M.

2. Representation of involuted semigroups by binary relations, t. LXXXII, p. 121–141.

Schirmer, H.

4. Simplicial approximation of small multifunctions, t. LXXXIV, p. 121–126.
5. A Nielsen number for fixed points and near points of small multifunctions, t. LXXXVIII, p. 145–156.

Schwabhäuser, W.

1. (and L. W. Szczerba), Relations on lines primitive notions for Euclidean geometry, t. LXXXII, p. 347–355.
2. (and L. W. Szczerba), Errata to the paper "Relation on lines as primitive notions for Euclidean geometry", Fundamenta Mathematicae 82 (1975), pp. 347–355, t. LXXXVII, p. 283.

Segal, J.

5. (and G. Kozlowski), On the shape of 0-dimensional paracompacta, t. LXXXIII, p. 151–154.
6. (and G. Kozlowski), n-movable compacta and ANR-systems, t. LXXXV, p. 235–243.

Segerberg, K.

1. Proof of a conjecture of McKay, t. LXXXI, p. 267–270.

Shafaat, A.

1. Boolean groupoids, t. LXXXVIII, p. 117–120.

Sher, R. B.

2. (and B. J. Ball), A theory of proper shape for locally compact metric spaces, t. LXXXVI, p. 163–192.
3. A theory of absolute proper retracts, t. LXXXVIII, p. 241–247.

Shiau, Chyi

1. (and Kok-Keong Tan and Chi Song Wong), Quasi-nonexpansive multi-valued maps and selections, t. LXXXVII, p. 109–119.

Shore, R. A.

1. Square bracket partition relations in L, t. LXXXIV, p. 101–106.

Sikorski, R.

25. Quasi-inverses of morphisms, t. LXXXI, p. 343–358.

Singh, S.

1. A 3-dimensional irreducible compact absolute retract which contains no disc, t. LXXXIV, p. 229–235.

Smajdor, A.

2. On some special iteration groups t. LXXXIII, p. 67–74.
3. Note on the existence of iteration groups, t. LXXXVII, p. 213–218.

Smirnow, J. M. (Смирнов, Ю. М.)

3. (и С. Богатый), Аппроксимация полиэдрами и факторизационные теоремы для ANR-бикомпактов, t. LXXXVII, p. 195–205.

Smithson, R. E.

2. (and T. B. Muenzenberger), On the equivalence of certain coincidence theorems and fixed point theorems, t. LXXXIV, p. 93–100.

Soare, R. I.

1. (and M. D. Morley), Boolean algebras, splitting theorems, and Δ^0_2-sets, t. XC, p. 45–52,

Sprows, D. J.

1. Homeotopy groups of compact 2-manifolds, t. XC, p. 99–103.

Starbird, M.

1. The Borsuk homotopy extension theorem without the binormality condition. t. LXXXVII, p. 207–211.

Steiner, A. K.

5. (and E. F. Steiner), On semi-uniformities, t. LXXXIII, p. 47–58.

Steiner, E. F.

6. (and A. K. Steiner), On semi-uniformities, t. LXXXIII, p. 47–58.

Strok, M.

1. (and A. Szymański), Compact metric spaces have binary bases, t. LXXXIX, p. 81–91.

Subbiah, S.

1. Some finitely generated subsemigroups of $S(X)$, t. LXXXVII, p. 221–231.

Szczerba, L. W.

2. (and W. Schwabhäuser), Relations on lines as primitive notions for Euclidean geometry, t. LXXXII, p. 347–355.
3. (and W. Schwabhäuser), Errata to the paper "Relation on lines as primitive notions for Euclidean geometry", Fundamenta Mathematicae 82 (1975), pp. 347–355, t. LXXXVII, p. 283.

Szymański, A.

1. Remarks on the absolute suspension, t. LXXXVI, p. 157–161.
2. (and M. Strok), Compact metric spaces have binary bases, t. LXXXIX, p. 81–91.

Tajmanow, A. D. (Тайманов, А. Д.)

1. К элементарной теории топологических алгебр, t. LXXXI, p. 331–342.

Tall, F. D.

1. (and T. Przymusiński), The undecidability of the existence of a non-separable normal Moore space satysfying the countable chain condition, t. LXXXV, p. 291–297.

Tan, Kok-Keong

1. (and Chyi Shiau and Chi Song Wong), Quasi-nonexpansive multi-valued maps and selections, t. LXXXVII, p. 109–119.

Telgársky, R.

4. Closure-preservings covers, t. LXXXV, p. 165–175.
5. Spaces defined by topological games, t. LXXXVIII, p. 193–223.

Toruńczyk, H.

2. Compact absolute retracts as factors of the Hilbert space, t. LXXXIII, p. 75–84.
3. Absolute retracts as factors of normed linear spaces, t. LXXXVI, p. 53–67.
4. On Cartesian factors and the topological classification of linear metric spaces, t. LXXXVIII, p. 71–86.

Troelstra, A. S.

2. Non-extensional equality, t. LXXXII, p. 307–322.

Truss, J.

2. Classes of Dedeking finite cardinals, t. LXXXIV, p. 187–208.

Tyc, A.

1. On h-regular graded algebras, t. LXXXVI, p. 41–52.

Tymchatyn, E. D.

3. On the rim-types of hereditarily locally connected continua, t. LXXXIX, p. 93–97.

Vaughan, A. J.

1. Some properties related to (a, b)-compactness, t. LXXXVII, p. 251–260.

Vaught, R.

5. Invariant sets on topology and logic, t. LXXXII, p. 269–294.

Vora, Ch.

1. Fixed points of certain symmetric product mappings of a metric manifold, t. LXXXV, p. 19–24.

Walker, J. R.

1. A simplicial monotone-light factorization theorem, t. LXXXV, p. 229–233.

Wang, H.

3. Notes on a class of tiling problems, t. LXXXII, p. 295–305.

Węglorz, B.

4. Boolean-valued selectors for families of sets, t. LXXXVI, p. 101–116.
5. Substructures of reduced powers, t. LXXXIX, p. 191–197.

Więsław, W.

2. Errata to the paper "A characterization of locally compact fields of zero characteristic", Fundamenta Mathematicae 76 (1972), pp. 149–155, t. LXXXIII, p. 97–98.
3. A characterization of locally compact fields II, t. LXXXVIII, p. 121–125.

Wilczyński, W.

2. Superpositions of transformations of bounded variation, t. XC, p. 211–231.

Williams, J.

1. Regarding arc-wise accessibility in the plane, t. LXXXV, p. 139–146.

Williams, N. H.

1. Tightly packed families of sets, t. XC, p. 177–180.

Williams, S.

1. (and W. Fleischman), The G_δ-topology on compact spaces, t. LXXXIII, p. 143–149.

Wong, Chi Song

1. (and Chyi Shiau and Kok-Keong Tan), Quasi-nonexpansive multi-valued maps and selections, t. LXXXVII, p. 109–119.

Wong, R. Y. T.

2. Periodic actions on the Hilbert cube, t. LXXXV, p. 203–210.

Woodruff, E. P.

1. Examples of disks in E^3/G which cannot be approximated by P-liftable disks, t. LXXXVI, p. 117–136.

Wooten, D. F.

1. On the extension of continuous functions, t. LXXXIII, p. 59–65.

Yates, C. E. M.

1. Priorie games and minimal degrees below $\mathbf{O}^{(1)}$, t. LXXXII, p. 217–237.

Zajiček, L.

1. On cluster sets of arbitrary functions, t. LXXXIII, p. 197–217.

Zarach, A.

1. Forcing with proper classes, t. LXXXI, p. 1–27.

Zenor, P.

1. Some continuous separation axioms, t. XC, p. 143–158.
