STUDIA MATHEMATICA 100 (3) (1991)

Index of Volumes 91–100

Władysław Orlicz (24 May 1903—9 August 1990); 97 (1991), (2), III–IV.
Editorial notes; 97 (1991), 266.

Allan, G. R.
(and T. J. Ransford) Power-dominated elements in a Banach algebra; 94 (1989), 63–79.

Alvarez, J.
Functional calculi for pseudodifferential operators, III; 95 (1989), 155–173.

Aniszczyk, B.
(and R. Frankiewicz, C. Ryll-Nardzewski) An example of a nonseparable Banach algebra without nonseparable commutative subalgebras; 93 (1989), 287–289.
(and R. Frankiewicz, C. Ryll-Nardzewski) Continuity of a homomorphism on commutative subalgebras is not sufficient for continuity; 98 (1991), 247–248.

Artstein, Z.
(and T. Rzeżuchowski) A note on Olech's Lemma; 98 (1991), 91–94.

Assani, I.
(and J. Woś) An equivalent measure for some nonsingular transformations and application; 97 (1991), 1–12.

Bade, W. G.
(and H. G. Dales) Continuity of derivations from radical convolution algebras; 95 (1989), 59–91.

Bagby, R. J.
Weak bounds for the maximal function in weighted Orlicz spaces; 95 (1990), 195–204.

Baribeau, L.
Multifonctions analytiques polygonales; 96 (1990), 167–173.

Barraa, M.
Sur les opérateurs nilpotents d'ordre deux; 97 (1991), 137–138.

Bartoszek, W.
Asymptotic periodicity of the iterates of positive contractions on Banach lattices; 91 (1988), 179–188.

Bastero, J.
(and Y. Raynaud) Quotients and interpolation spaces of stable Banach spaces; 93 (1989), 223–239.

Beatrous, F.
Boundary estimates for derivatives of harmonic functions; 98 (1991), 53–71.

Beauzamy, B.
An operator on a separable Hilbert space with all polynomials hypercyclic; 96 (1990), 83–90.

Beckhoff, F.
Korovkin theory in normed algebras; 100 (1991), 219–228.

Beddaa, A.
(and M. Oudadess) On a question of A. Wilansky in normed algebras; 95 (1989), 175–177.

Behrends, E.
On the principle of local reflexivity; 100 (1991), 109–128.

Bellenot, S. F.
The maximum path theorem and extreme points of James' space; 94 (1989), 1–15.

Benkirane, A.
(and J.-P. Gossez) An approximation theorem in higher order Orlicz–Sobolev spaces and applications; 92 (1989), 231–255.

Berkson, E.
(and T. A. Gillespie, P. S. Muhly) L^p-Multiplier transference induced by representations in Hilbert space; 94 (1989), 51–61.

Bernau, S. J.
(and C. B. Huijsmans) On the positivity of the unit element in a normed lattice ordered algebra; 97 (1991), 143–149.

Berteloot, F.
Hölder continuity of proper holomorphic mappings; 100 (1991), 229–235.

Blasco, O.
Interpolation between $H^1_{B_0}$ and $L^p_{B_1}$; 92 (1989), 205–210.

Bloom, S.
Sharp weights and BMO-preserving homeomorphisms; 96 (1990), 1–10.
An interpolation theorem with A_p-weighted L^p spaces; 96 (1990), 11–15.

Blower, G.
A multiplier characterization of analytic UMD spaces ; 96 (1990), 117–124.

Bonet, J.
(and R. Meise, B. A. Taylor) Whitney's extension theorem for nonquasianalytic classes of ultradifferentiable functions; 99 (1991), 155–184.

Boos, J.
(and T. Leiger) General theorems of Mazur–Orlicz type; 92 (1989), 1–19.

Bożejko, M.
Positive-definite kernels, length functions on groups and a noncommutative von Neumann inequality; 95 (1989), 107–118.

Bru, B.
(et H. Heinich) Applications de dualité dans les espaces de Köthe; 93 (1989), 41–69.

Burkholder, D. L.
A proof of Pełczyński's conjecture for the Haar system; 91 (1988), 79–83.

Burzyk, J.
A Paley–Wiener type theorem for regular operators of bounded support; 93 (1989), 187–200.

Byczkowski, T.
On the density of log concave seminorms on vector spaces; 99 (1991), 101–108.

Capri, O. N.
(and C. Segovia) Behaviour of L^r-Dini singular integrals in weighted L^1 spaces; 92 (1989), 21–36.

Carro, M. J.
(and J. Cerdà) Complex interpolation and L^p spaces; 99 (1991), 57–67.

Cassier, G.
Algèbres duales uniformes d'opérateurs sur l'espace de Hilbert; 95 (1989), 17–32.

Cerdà, J.
(and M. J. Carro) Complex interpolation and L^p spaces; 99 (1991), 57–67.

Chan-Porn
Les systèmes de représentation absolue dans les espaces des fonctions holomorphes; 94 (1989), 193–212.
Ensembles suffisants pour quelques espaces de fonctions; 94 (1989), 213–226.

Chu, C.-H.
(and B. Iochum) The Dunford–Pettis property in C^*-algebras; 97 (1991), 59–64.

Cobos, F.
Interpolation of compact operators by Goulaouic procedure; 97 (1991), 65–69.
(and J. Peetre) A multidimensional Wolff theorem; 94 (1989), 273–290.

Cohen, J.
BMO estimates for biharmonic multiple layer potentials; 91 (1988), 109–123.

Cupała, W.
On the essential spectrum and eigenvalue asymptotics of certain Schrödinger operators; 96 (1990), 195–202.

Dales, H. G.
(and W. G. Bade) Continuity of derivations from radical convolution algebras; 95 (1989), 59–91.

Dalla, L.
(and S. Giotopoulos, N. Katseli) The socle and finite-dimensionality of a semiprime Banach algebra; 92 (1989), 201–204.

Defant, A.
Absolutely p-summing operators and Banach spaces containing all l_p^n uniformly complemented; 95 (1990), 237–247.

Defant, M.
(and M. Junge) On weak $(r, 2)$-summing operators and weak Hilbert spaces; 96 (1990), 203–217.

Denker, M.
(and G. Keller, M. Urbański) On the uniqueness of equilibrium states for piecewise monotone mappings; 97 (1991), 27–36.

Detre, P. A.
Multipliers of weighted l^p spaces ; 98 (1991), 131–145.

Dineen, S.
(and R. M. Timoney) Absolute bases, tensor products and a theorem of Bohr; 94 (1989), 227–234.

Domański, P.
(and L. Drewnowski) Uncomplementability of the spaces of norm continuous functions in some spaces of "weakly" continuous functions; 97 (1991), 245–251.

Domínguez, M.
Weighted inequalities for the Hilbert transform and the adjoint operator in the continuous case; 95 (1990), 229–236.

Drewnowski, L.
(and P. Domański) Uncomplementability of the spaces of norm continuous functions in some spaces of "weakly" continuous functions; 97 (1991), 245–251.

Dubinsky, E.
(and D. Vogt) Complemented subspaces in tame power series spaces; 93 (1989), 71–85.

Duran, A. J.
A bound on the Laguerre polynomials; 100 (1991), 169–181.

Dziubański, J.
(and A. Hulanicki) On semigroups generated by left-invariant positive differential operators on nilpotent Lie groups; 94 (1989), 81–95.

Edgington, A.
Some more weak Hilbert spaces; 100 (1991), 1–11.

van Eijndhoven, S. J. L.
(and P. Kruszyński) Spectral trajectories, duality and inductive-projective limits of Hilbert spaces; 91 (1988), 45–60.

Fabian, M.
(and G. Godefroy) The dual of every Asplund space admits a projectional resolution of the identity; 91 (1988), 141–151.

Fan, A. H.
Equivalence et orthogonalité des mesures aléatoires engendrées par martingales positives homogènes; 98 (1991), 249–266.

Feinstein, J. F.
Point derivations and prime ideals in $R(X)$; 98 (1991), 235–246.

Ferenczi, S.
(and M. Lemańczyk) Rank is not a spectral invariant; 98 (1991), 227–230.

Fernandez, D. L.
(and J. B. Garcia) Interpolation of Orlicz-valued function spaces and U.M.D. property; 99 (1991), 23–40.

Fernández, A.
(and V. Müller) Renormalizations of Banach and locally convex algebras; 96 (1990), 237–242.

Ferrer, J.
(et F. Puerta) Déformations $\boldsymbol{C}^*$-équivariantes de germes de faisceaux cohérents; 91 (1988), 205–230.

Ferreyra, E. V.
Weighted Lorentz norm inequalities for integral operators; 96 (1990), 125–134.

Finet, C.
(and W. Schachermayer) Equivalent norms on separable Asplund spaces; 92 (1989), 275–283.

Fong, C.-K.
(and A. Sołtysiak) On the left and right joint spectra in Banach algebras; 97 (1991), 151–156.

Franciosi, M.
Weighted rearrangements and higher integrability results; 92 (1989), 131–139.

Frankiewicz, R.
(and B. Aniszczyk, C. Ryll-Nardzewski) An example of a nonseparable Banach algebra without nonseparable commutative subalgebras; 93 (1989), 287–289.
(and B. Aniszczyk, C. Ryll-Nardzewski) Continuity of a homomorphism on commutative subalgebras is not sufficient for continuity; 98 (1991), 247–248.

Fujii, N.
A condition for a two-weight norm inequality for singular integral operators; 98 (1991), 175–190.

Gajda, Z.
(and Z. Kominek) On separation theorems for subadditive and superadditive functionals; 100 (1991), 25–38.

Gallardo, D.
Weighted integral inequalities for the ergodic maximal operator and other sublinear operators. Convergence of the averages and the ergodic Hilbert transform; 94 (1989), 121–147.

Gao, J.
(and K. S. Lau) On two classes of Banach spaces with uniform normal structure; 99 (1991), 41–56.

Garay, B. M.
Cross-sections of solution funnels in Banach spaces; 97 (1991), 13–26.

Garcia, J. B.
(and D. L. Fernandez) Interpolation of Orlicz-valued function spaces and U.M.D. property; 99 (1991), 23–40.

Gillespie, T. A.
(and E. Berkson, P. S. Muhly) L^p-Multiplier transference induced by representations in Hilbert space; 94 (1989), 51–61.

Giotopoulos, S.
(and L. Dalla, N. Katseli) The socle and finite-dimensionality of a semiprime Banach algebra; 92 (1989), 201–204.

Girardi, M.
Weak vs. norm compactness in L_1: the Bocce criterion; 98 (1991), 95–97.

Głowacki, P.
The Rockland condition for nondifferential convolution operators II; 98 (1991), 99–114.

Godefroy, G.
Metric characterization of first Baire class linear forms and octahedral norms; 95 (1989), 1–15.
(and M. Fabian) The dual of every Asplund space admits a projectional resolution of the identity; 91 (1988), 141–151.

Goldmann, H.
A remark on functional continuity of certain Fréchet algebras; 93 (1989), 249–257.

Goodson, G. R.
(and M. Lemańczyk) On the rank of a class of bijective substitutions; 96 (1990), 219–230.

Gordon, R. A.
The Denjoy extension of the Bochner, Pettis, and Dunford integrals; 92 (1989), 73–91.

Gossez, J.-P.
(and A. Benkirane) An approximation theorem in higher order Orlicz–Sobolev spaces and applications; 92 (1989), 231–255.

Graczyk, P.
Malliavin calculus for stable processes on homogeneous groups; 100 (1991), 183–205.

Groenbaek, N.
A characterization of weakly amenable Banach algebras; 94 (1989), 149–162.

Haase, H.
Packing measures on ultrametric spaces; 91 (1988), 189–203.

Hajduk-Chmielewska, G.
The Wold–Cramér concordance problem for Banach-space-valued stationary processes; 91 (1988), 31–43.

Hebisch, W.
Sharp pointwise estimate for the kernels of the semi-group generated by sums of even powers of vector fields on homogeneous groups; 95 (1989), 93–106.
Almost everywhere summability of eigenfunction expansions associated to elliptic operators; 96 (1990), 263–275.
(and A. Sikora) A smooth subadditive homogeneous norm on a homogeneous group; 96 (1990), 231–236.

Heinich, H.
(et B. Bru) Applications de dualité dans les espaces de Köthe; 93 (1989), 41–69.

Hernández, E.
Factorization and extrapolation of pairs of weights; 95 (1989), 179–193.

Huijsmans, C. B.
(and S. J. Bernau) On the positivity of the unit element in a normed lattice ordered algebra; 97 (1991), 143–149.

Hulanicki, A.
(and J. Dziubański) On semigroups generated by left-invariant positive differential operators on nilpotent Lie groups; 94 (1989), 81–95.

Iochum, B.
(and C.-H. Chu) The Dunford–Pettis property in C^*-algebras; 97 (1991), 59–64.

James, R. C.
Unconditional bases and the Radon–Nikodým property; 95 (1990), 255–262.

Janas, J.
Unbounded Toeplitz operators in the Bargmann–Segal space; 99 (1991), 87–99.

Janson, S.
(and J. Peetre, R. Wallstén) A new look on Hankel forms over Fock space; 95 (1989), 33–41.

Jarosz, K.
Nonlinear generalizations of the Banach–Stone theorem; 93 (1989), 97–107.

Jenkins, J. W.
A characterization of bi-invariant Schwartz space multipliers on nilpotent Lie groups; 92 (1989), 101–129.

Jiang, H.
Weighted-BMO and the Hilbert transform; 100 (1991), 75–80.

Junge, M.
(and M. Defant) On weak $(r, 2)$-summing operators and weak Hilbert spaces; 96 (1990), 203–217.

Kamiński, B.
An axiomatic definition of the entropy of a $\mathbf{Z}^d$-action on a Lebesgue space; 96 (1990), 135–144.
Generators of perfect σ-algebras of $\mathbf{Z}^d$-actions; 99 (1991), 1–10.

Kamowitz, H.
(and S. Scheinberg) Some properties of endomorphisms of Lipschitz algebras; 96 (1990), 255–261.

Kang, H.
On the Fourier transform of $e^{-\psi(x)}$; 98 (1991), 231–234.

Katseli, N.
(and S. Giotopoulos, S. Dalla) The socle and finite-dimensionality of a semiprime Banach algebra; 92 (1989), 201–204.

Kazamaki, N.
(and M. Kikuchi) Some remarks on ratio inequalities for continuous martingales; 94 (1989), 97–102.

Keller, G.
(and M. Denker, M. Urbański) On the uniqueness of equilibrium states for piecewise monotone mappings; 97 (1991), 27–36.

Khue, N. V.
(and B. D. Tac) Extending holomorphic maps from compact sets in infinite dimensions; 95 (1990), 263–272.

Kikuchi, M.
Improved ratio inequalities for martingales; 99 (1991), 109–113.
(and N. Kazamaki) Some remarks on ratio inequalities for continuous martingales; 94 (1989), 97–102.

Klotz, L.
Some approximation problems in L^p-spaces of matrix-valued functions; 99 (1991), 129–147.

Kominek, Z.
(and Z. Gajda) On separation theorems for subadditive and superadditive functionals; 100 (1991), 25–38.

Kowalski, J. K.
A method of approximation of Besov spaces; 96 (1990), 183–193.

Kowalski, Z. S.
Minimal generators for ergodic endomorphisms; 91 (1988), 85–88.
Stationary perturbations based on Bernoulli processes; 97 (1991), 53–57.

Krone, J.
Existence of bases and the dual splitting relation for Fréchet spaces; 92 (1989), 37–48.

Kruszyński, P.
(and S. J. L. van Eijndhoven) Spectral trajectories, duality and inductive-projective limits of Hilbert spaces; 91 (1988), 45–60.

Kürsten, K.-D.
Bounded sets in projective tensor products of hilbertizable locally convex spaces; 99 (1991), 185–198.

Kwapień, S.
(and C. Schütt) Some combinatorial and probabilistic inequalities and their application to Banach space theory II; 95 (1989), 141–154.

Kwiatkowski, J.
(and T. Rojek) A method of solving a cocycle functional equation and applications; 99 (1991), 69–86.

Lau, K. S.
(and J. Gao) On two classes of Banach spaces with uniform normal structure; 99 (1991), 41–56.

Lau, K.-S.
(and W.-B. Zeng) The convolution equation of Choquet and Deny on semigroups; 97 (1991), 115–135.

deLaubenfels, R.
C^0-Scalar operators on cyclic spaces; 92 (1989), 49–58.

Leiger, T.
(and J. Boos) General theorems of Mazur–Orlicz type; 92 (1989), 1–19.

Lemańczyk, M.
(and S. Ferenczi) Rank is not a spectral invariant; 98 (1991), 227–230.
(and G. R. Goodson) On the rank of a class of bijective substitutions; 96 (1990), 219–230.

Lennard, C.
A new convexity property that implies a fixed point property for L_1; 100 (1991), 95–108.

Li, D.
Quantitative unconditionality of Banach spaces E for which $\mathcal{K}(E)$ is an M-ideal in $\mathcal{L}(E)$; 96 (1990), 39–50.

Ligocka, E.
On the Forelli–Rudin construction and weighted Bergman projections; 94 (1989), 257–272.

Lust-Piquard, F.
(and W. Schachermayer), Functions in $L^\infty(G)$ and associated convolution operators; 93 (1989), 109–136.

Lyons, R.
Topologies on measure spaces and the Radon–Nikodym theorem; 91 (1988), 125–129.

Łysik, G.
Generalized Taylor expansions of singular functions; 99 (1991), 235–262.

Maligranda, L.
Some remarks on Orlicz's interpolation theorem; 95 (1989), 43–58.

Mankiewicz, P.
Factoring the identity operator on a subspace of l_n^∞; 95 (1989), 133–139.

Mantlik, F.
Isomorphic classification and lifting theorems for spaces of differentiable functions with Lipschitz conditions; 98 (1991), 19–39.
Differentiable bundles of subspaces and operators in Banach spaces; 98 (1991), 41–51.

Martín-Reyes, F. J.
(and P. Ortega Salvador) Ergodic power functions for mean bounded, invertible, positive operators; 91 (1988), 131–139.

Mascioni, V.
Some remarks on the uniform approximation property in Banach spaces; 96 (1990), 243–253.

Mastyło, M.
The Mackey completions of some interpolation F-spaces; 98 (1991), 115–129.

McPhail, J. D.
A weighted interpolation problem for analytic functions; 96 (1990), 105–116.

Meise, R.
Sequence space representations for zero-solutions of convolution equations on ultradifferentiable functions of Roumieu type; 92 (1989), 211–230.
(and J. Bonet, B. A. Taylor) Whitney's extension theorem for nonquasianalytic classes of ultradifferentiable functions; 99 (1991), 155–184.

Mentzen, M. K.
Invariant sub-σ-algebras for substitutions of constant length; 92 (1989), 257–273.
Automorphisms with finite exact uniform rank; 100 (1991), 13–24.

Miyachi, A.
H^p spaces over open subsets of $\boldsymbol{R}^n$; 95 (1990), 205–228.

Momm, S.
Partial differential operators of infinite order with constant coefficients on the space of analytic functions on the polydisc; 96 (1990), 51–71.

Móricz, F.
On the integrability and L^1-convergence of sine series; 92 (1989), 187–200.
On the integrability and L^1-convergence of double trigonometric series; 98 (1991), 203–225.

Mormul, P.
Singularities of triples of vector fields on $\boldsymbol{R}^4$: the focusing stratum; 91 (1988), 241–273.

Moscatelli, V. B.
Strongly nonnorming subspaces and prequojections; 95 (1990), 249–254.

Muhly, P. S.
(and E. Berkson, T. A. Gillespie) L^p-Multiplier transference induced by representations in Hilbert space; 94 (1989), 51–61.

Müller, V.
Adjoining inverses to noncommutative Banach algebras and extensions of operators; 91 (1988), 73–77.
On topologizable algebras; 99 (1991), 149–153.
(and A. Fernández) Renormalizations of Banach and locally convex algebras; 96 (1990), 237–242.
(and A. Sołtysiak) Spectrum of generators of a noncommutative Banach algebra; 93 (1989), 87–95.

Narayanaswami, P. P.
(and S. A. Saxon) Metrizable [normable] (LF)-spaces and two classical problems in Fréchet [Banach] spaces; 93 (1989), 1–16.

Nawrocki, M.
The Fréchet envelopes of vector-valued Smirnov classes; 94 (1989), 163–177.

Ngo, V.
The structure of module derivations of $C^n[0,1]$ into $L_p(0,1)$; 98 (1991), 191–202.

Noll, D.
(and W. Stadler) Abstract sliding hump technique and characterization of barrelled spaces; 94 (1989), 103–120.

Onneweer, C. W.
(and S. Weiyi) Homogeneous Besov spaces on locally compact Vilenkin groups; 93 (1989), 17–39.

Orihuela, J.
(and W. Schachermayer, M. Valdivia) Every Radon–Nikodym Corson compact space is Eberlein compact; 98 (1991), 157–174.

Ortega Salvador, P.
(and F. J. Martín-Reyes) Ergodic power functions for mean bounded, invertible, positive operators; 91 (1988), 131–139.

Oudadess, M.
(and A. Beddaa) On a question of A. Wilansky in normed algebras; 95 (1989), 175–177.

Papadakis, M.
On hyperreflexivity and rank one density for non-CSL algebras; 98 (1991), 11–17.

Papageorgiou, N. S.
On transition multimeasures with values in a Banach space; 97 (1991), 37–51, [see also Editorial notes, 97 (1991), 266].

Parusiński, A.
Gradient homotopies of gradient vector fields; 96 (1990), 73–80.

Peetre, J.
(and F. Cobos) A multidimensional Wolff theorem; 94 (1989), 273–290.
(and S. Janson, R. Wallstén) A new look on Hankel forms over Fock space; 95 (1989), 33–41.

Pick, L.
Two-weight weak type maximal inequalities in Orlicz classes; 100 (1991), 207–218.

Pietsch, A.
Type and cotype numbers of operators on Banach spaces; 96 (1990), 21–37.

Pini, R.
A multiplier theorem for H-type groups; 100 (1991), 39–49.

Pliś, M. E.
The Mellin analytic functionals and the Laplace–Beltrami operator on the Minkowski half-plane; 99 (1991), 263–276.

Pryde, A. J.
Inequalities for exponentials in Banach algebras; 100 (1991), 87–94.

Przytycki, F.
On the law of iterated logarithm for Bloch functions; 93 (1989), 145–154.
(and M. Urbański) On the Hausdorff dimension of some fractal sets; 93 (1989), 155–186.
(and M. Urbański, A. Zdunik) Harmonic, Gibbs and Hausdorff measures on repellers for holomorphic maps, II; 97 (1991), 189–225.

Puerta, F.
(et J. Ferrer) Déformations $\boldsymbol{C}^*$-équivariantes de germes de faisceaux cohérents; 91 (1988), 205–230.

Pych-Taberska, P.
Approximation properties of the partial sums of Fourier series of some almost periodic functions; 96 (1990), 91–103.

Pytlik, T.
Spherical functions and uniformly bounded representations of free groups; 100 (1991), 237–250.

Raith, P.
Hausdorff dimension for piecewise monotonic maps; 94 (1989), 17–33.

Rakočević, V.
(and J. Zemánek) Lower s-numbers and their asymptotic behaviour; 91 (1988), 231–239.

Ransford, T. J.
(and G. R. Allan) Power-dominated elements in a Banach algebra; 94 (1989), 63–79.

Rauch, P.
Pseudocomplémentation dans les espaces de Banach; 100 (1991), 251–282.

Raynaud, Y.
(and J. Bastero) Quotients and interpolation spaces of stable Banach spaces; 93 (1989), 223–239.

Render, H.
An order-theoretic approach to involutive algebras; 92 (1989), 177–186.

Rojek, T.
(and J. Kwiatkowski) A method of solving a cocycle functional equation and applications; 99 (1991), 69–86.

Rolewicz, S.
On projections on subspaces of codimension one; 96 (1990), 17–19.

Ron, A.
A characterization of the approximation order for multivariate spline spaces; 98 (1991), 73–90.

Rudol, K.
A model for some analytic Toeplitz operators; 100 (1991), 81–86.

Rupp, R.
Stable rank of holomorphic function algebras; 97 (1991), 85–90.

Rusinek, J.
On generalized canonical commutation relations; 96 (1990), 175–181.

Ryll-Nardzewski, C.
(and B. Aniszczyk, R. Frankiewicz) An example of a nonseparable Banach algebra without nonseparable commutative subalgebras; 93 (1989), 287–289.
(and B. Aniszczyk, R. Frankiewicz) Continuity of a homomorphism on commutative subalgebras is not sufficient for continuity; 98 (1991), 247–248.

Ryznar, M.
Geometrical properties of Banach spaces and the distribution of the norm for a stable measure; 91 (1988), 61–71.

Rzeżuchowski, T.
(and Z. Artstein) A note on Olech's Lemma; 98 (1991), 91–94.

Salinas, O.
Two-weight norm inequalities for the Hardy–Littlewood maximal function for one-parameter rectangles; 98 (1991), 1–9.

Sato, R.
On pointwise ergodic theorems for positive operators; 97 (1991), 71–84.

Sato, S.
Weighted inequalities on product domains; 92 (1989), 59–72.

Sawyer, E.
Boundedness of classical operators on classical Lorentz spaces; 96 (1990), 145–158.

Saxon, S. A.
(and P. P. Narayanaswami) Metrizable [normable] (LF)-spaces and two classical problems in Fréchet [Banach] spaces; 93 (1989), 1–16.

Schachermayer, W.
(and C. Finet) Equivalent norms on separable Asplund spaces; 92 (1989), 275–283.
(and F. Lust-Piquard), Functions in $L^\infty(G)$ and associated convolution operators; 93 (1989), 109–136.
(and J. Orihuela, M. Valdivia) Every Radon–Nikodym Corson compact space is Eberlein compact; 98 (1991), 157–174.

Scheinberg, S.
(and H. Kamowitz) Some properties of endomorphisms of Lipschitz algebras; 96 (1990), 255–261.

Schütt, C.
(and S. Kwapień) Some combinatorial and probabilistic inequalities and their application to Banach space theory II; 95 (1989), 141–154.

Seddighi, K.
Analytic Toeplitz algebras and intertwining operators; 93 (1989), 241–247.

Seeger, A.
Remarks on singular convolution operators; 97 (1991), 91–114.

Segovia, C.
(and O. N. Capri) Behaviour of L^r-Dini singular integrals in weighted L^1 spaces; 92 (1989), 21–36.

Segura de León, S.
Bukhvalov type characterizations of Urysohn operators; 99 (1991), 199–220.

Šemrl, P.
On algebraic generation of $B(X)$ by two subalgebras with square zero; 97 (1991), 139–142.
Quadratic functionals and Jordan $*$-derivations; 97 (1991), 157–165.

Sharpley, R.
(and Y.-S. Shim) Singular integrals on C_p^α; 92 (1989), 285–293.

Shim, Y.-S.
(and R. Sharpley) Singular integrals on C_p^α; 92 (1989), 285–293.

Sikora, A.
(and W. Hebisch) A smooth subadditive homogeneous norm on a homogeneous group; 96 (1990), 231–236.

Sjödin, T.
Weighted norm inequalities for Riesz potentials and fractional maximal functions in mixed norm Lebesgue spaces; 97 (1991), 239–244.

Sołtysiak, A.
(and C.-K. Fong) On the left and right joint spectra in Banach algebras; 97 (1991), 151–156.
(and V. Müller) Spectrum of generators of a noncommutative Banach algebra; 93 (1989), 87–95.

Soria, F.
On an extrapolation theorem of Carleson–Sjölin type with applications to a.e. convergence of Fourier series; 94 (1989), 235–244.

Stadler, W.
(and D. Noll) Abstract sliding hump technique and characterization of barrelled spaces; 94 (1989), 103–120.

Stempak, K.
Almost everywhere summability of Laguerre series; 100 (1991), 129–147.

Stochel, J.
Characterizations of subnormal operators; 97 (1991), 227–238.

Stokolos, A. M.
On the differentiation of integrals of functions from Orlicz classes; 94 (1989), 35–50.

Świȷch, A.
Spectral characterization of operators with precompact orbit; 96 (1990), 277–282.

Szalay, I.
On the strong Cesàro summability of double orthogonal series; 91 (1988), 89–107.

Szarek, S. J.
Computing summing norms and type constants on few vectors; 98 (1991), 147–156.

Szwarc, R.
Matrix coefficients of irreducible representations of free products of groups; 94 (1989), 179–185.

Tac, B. D.
(and N. V. Khue) Extending holomorphic maps from compact sets in infinite dimensions; 95 (1990), 263–272.

Tardivel, V.
Fermés d'unicité dans les groupes abéliens localement compacts; 91 (1988), 1–15.

Taskinen, J.
The projective tensor product of Fréchet–Montel spaces; 91 (1988), 17–30.

Taylor, B. A.
(and J. Bonet, R. Meise) Whitney's extension theorem for nonquasianalytic classes of ultradifferentiable functions; 99 (1991), 155–184.

Terreni, B.
Nonhomogeneous initial-boundary value problems for linear parabolic systems; 92 (1989), 141–175.

Thangavelu, S.
Some restriction theorems for the Heisenberg group; 99 (1991), 11–21.

Timoney, R. M.
(and S. Dineen) Absolute bases, tensor products and a theorem of Bohr; 94 (1989), 227–234.

Tomiuk, B. J.
(and B. Yood) Incomplete normed algebra norms on Banach algebras; 95 (1989), 119–132.

Torres, R. H.
Spaces of sequences, sampling theorem, and functions of exponential type; 100 (1991), 51–74.

Urbanik, K.
Generalized convolutions V; 91 (1988), 153–178.
Analytic stochastic processes II; 97 (1991), 253–265.

Urbański, M.
On the Hausdorff dimension of a Julia set with a rationally indifferent periodic point; 97 (1991), 167–188.
(and M. Denker, G. Keller) On the uniqueness of equilibrium states for piecewise monotone mappings; 97 (1991), 27–36.
(and F. Przytycki) On the Hausdorff dimension of some fractal sets; 93 (1989), 155–186.
(and F. Przytycki, A. Zdunik) Harmonic, Gibbs and Hausdorff measures on repellers for holomorphic maps, II; 97 (1991), 189–225.

Valdivia, M.
Some properties of weakly countably determined Banach spaces; 93 (1989), 137–144.
(and J. Orihuela, W. Schachermayer) Every Radon–Nikodym Corson compact space is Eberlein compact; 98 (1991), 157–174.

Vogt, D.
(and E. Dubinsky) Complemented subspaces in tame power series spaces; 93 (1989), 71–85.

Volkmann, P.
(et H.-D. Wacker) Certaines propriétés des opérateurs de Riesz; 92 (1989), 93–99.

Wacker, H.-D.
(et P. Volkmann) Certaines propriétés des opérateurs de Riesz; 92 (1989), 93–99.

Wallstén, R.
(and S. Janson, J. Peetre) A new look on Hankel forms over Fock space; 95 (1989), 33–41.

Wang, J.-H.
(and P. Y. Wu) Sums of square-zero operators; 99 (1991), 115–127.

Weisz, F.
Inequalities relative to two-parameter Vilenkin–Fourier coefficients; 99 (1991), 221–223.

Weiyi, S.
(and C. W. Onneweer) Homogeneous Besov spaces on locally compact Vilenkin groups; 93 (1989), 17–39.

Wik, I.
On Muckenhoupt's classes of weight functions; 94 (1989), 245–255.

Wojciechowski, M.
Translation invariant projections in Sobolev spaces on tori in the L^1 and uniform norms; 100 (1991), 149–167.

Woś, J.
(and I. Assani) An equivalent measure for some nonsingular transformations and application; 97 (1991), 1–12.

Wu, P. Y.
(and J.-H. Wang) Sums of square-zero operators; 99 (1991), 115–127.

Xu, Q.
Applications du théorème de factorisation pour des fonctions à valeurs opérateurs; 95 (1990), 273–292.

Yood, B.
(and B. J. Tomiuk) Incomplete normed algebra norms on Banach algebras; 95 (1989), 119–132.

Zalduendo, I.
A geometric condition equivalent to commutativity in Banach algebras; 94 (1989), 187–192.

Zdunik, Z.
(and F. Przytycki, M. Urbański) Harmonic, Gibbs and Hausdorff measures on repellers for holomorphic maps, II; 97 (1991), 189–225.

Żelazko, W.
A density theorem for F-spaces; 96 (1990), 159–166.

Zemánek, J.
(and V. Rakočević) Lower s-numbers and their asymptotic behaviour; 91 (1988), 231–239.
Zeng, W.-B.
(and K.-S. Lau) The convolution equation of Choquet and Deny on semigroups; 97 (1991), 115–135.
Ziemian, K.
Rate of convergence of conditional entropies for some maps of an interval; 93 (1989), 259–269.
Refinement of the Shannon–McMillan–Breiman theorem for some maps of an interval; 93 (1989), 271–285.
Zimmermann, F.
On vector-valued Fourier multiplier theorems; 93 (1989), 201–222.
