Index of Volumes 111–120

- Allan, G. R.**
 Fréchet algebras and formal power series; 119 (1996), 271–288.
- Alvarez, T.**
 (with R. W. Cross, A. I. Gouveia) Adjoint characterisations of unbounded weakly compact, weakly completely continuous and unconditionally converging operators; 113 (1995), 283–298.
- Antonevich, A. B.**
 (with J. Appell, P. P. Zabreiko) Some remarks on the asymptotic behaviour of the iterates of a bounded linear operator; 112 (1994), 1–11.
- Appell, J.**
 (with A. B. Antonevich, P. P. Zabreiko) Some remarks on the asymptotic behaviour of the iterates of a bounded linear operator; 112 (1994), 1–11.
- Aristov, O. Yu.**
 Characterization of strict C^* -algebras; 112 (1994), 51–58.
- Balder, E. J.**
 (with M. Girardi, V. Jalyby) From weak to strong types of \mathcal{L}_E^1 -convergence by the Bocce criterion; 111 (1994), 241–262.
- Banakh, T.**
 Sur la caractérisation topologique des compacts à l'aide des demi-treillis des pseudométriques continues; 116 (1995), 303–310.
- Barnes, B. A.**
 Convergence in the generalized sense relative to Banach algebras of operators and in LMC-algebras; 115 (1995), 87–103.
- Beckhoff, F.**
 Topologies on the space of ideals of a Banach algebra; 115 (1995), 189–205.
 Topologies of compact families on the ideal space of a Banach algebra; 118 (1996), 63–75.
- Behrends, E.**
 (with K. Nikodem) A selection theorem of Helly type and its applications; 116 (1995), 43–48.
- Békollé, D.**
 (with A. Temgoua Kagou) Reproducing properties and L^p -estimates for Bergman projections in Siegel domains of type II; 115 (1995), 219–239.
- Berkani, M.**
 Idempotents dans les algèbres de Banach; 120 (1996), 155–158.

Berkson, E.

(with T. A. Gillespie) Spectral decompositions and harmonic analysis on UMD spaces; 112 (1994), 13–49.

Berntzen, R.

Accretive approximation in C^* -algebras; 117 (1996), 115–121.

Betancor, J. J.

(with B. J. González) A convolution operation for a distributional Hankel transformation; 117 (1995), 57–72.

Bhatia, R.

(with T. Bhattacharyya) On the joint spectral radius of commuting matrices; 114 (1995), 29–38.

Bhattacharyya, T.

(with R. Bhatia) On the joint spectral radius of commuting matrices; 114 (1995), 29–38.

Biler, P.

The Cauchy problem and self-similar solutions for a nonlinear parabolic equation; 114 (1995), 181–205.

Biström, P.

(with J. A. Jaramillo, M. Lindström) Algebras of real analytic functions: Homomorphisms and bounding sets; 115 (1995), 23–37.

Blanchard, F.

(with B. Kamiński) Relatively perfect σ -algebras for flows; 114 (1995), 71–85.

Blower, G.

Abel means of operator-valued processes; 115 (1995), 261–276.

Bogenschütz, T.

(with Z. S. Kowalski) Exactness of skew products with expanding fibre maps; 120 (1996), 159–168.

Bonet, J.

(with A. Defant, A. Peris, M. S. Ramanujan) Coincidence of topologies on tensor products of Köthe echelon spaces; 111 (1994), 263–281.

Boufoussi, B.

Régularité du temps local brownien dans les espaces de Besov–Orlicz; 118 (1996), 145–156.

Brešar, M.

(with P. Šemrl) On local automorphisms and mappings that preserve idempotents; 113 (1995), 101–108.

(with P. Šemrl) Spectral characterizations of central elements in Banach algebras; 120 (1996), 47–52.

Bui, H.-Q.

(with M. Paluszynski, M. H. Taibleson) A maximal function characterization of weighted Besov–Lipschitz and Triebel–Lizorkin spaces; 119 (1996), 219–246.

Cabrera García, M.

(with A. Moreno Galindo, A. Rodríguez Palacios) On the behaviour of Jordan-algebra norms on associative algebras; 113 (1995), 81–100.

(with A. Moreno Galindo, A. Rodríguez Palacios, E. I. Zel'manov) Jordan polynomials can be analytically recognized; 117 (1996), 137–147.

Cambanis, S.

(with K. Podgórski, A. Weron) Chaotic behavior of infinitely divisible processes; 115 (1995), 109–127.

Chang, X.-Q.

Some Sawyer type inequalities for martingales; 111 (1994), 187–194.

Chaumat, J.

(with A.-M. Chollet) Sur le théorème de division de Weierstrass; 116 (1995), 59–84.

Chen, C.-P.

(with G.-B. Chen) Uniform convergence of double trigonometric series; 118 (1996), 245–259.

Chen, G.-B.

(with C.-P. Chen) Uniform convergence of double trigonometric series; 118 (1996), 245–259.

Chen, L.-K.

(with D. Fan) Oscillatory kernels in certain Hardy-type spaces; 111 (1994), 195–206.

Choi, Q. H.

(with S. Chun, T. Jung) The multiplicity of solutions and geometry of a nonlinear elliptic equation; 120 (1996), 259–270.

Chollet, A.-M.

(with J. Chaumat) Sur le théorème de division de Weierstrass; 116 (1995), 59–84.

Chu, C.-H.

(with H. B. Cohen) Topological conditions for bound-2 isomorphisms of $C(X)$; 113 (1995), 1–24.

(with K. S. Lau, J. Wang) Vector-valued Choquet–Deny theorem, renewal equation and self-similar measures; 117 (1995), 1–28.

Chun, S.

(with Q. H. Choi, T. Jung) The multiplicity of solutions and geometry of a nonlinear elliptic equation; 120 (1996), 259–270.

Cima, J.

(with R. Mortini) The Bourgain algebra of the disk algebra $A(\mathbb{D})$ and the algebra QA ; 113 (1995), 211–221.

Cohen, H. B.

(with C.-H. Chu) Topological conditions for bound-2 isomorphisms of $C(X)$; 113 (1995), 1–24.

Cowling, M.

(with S. Giulini, A. Hulanicki, G. Mauceri) Spectral multipliers for a distinguished Laplacian on certain groups of exponential growth; 111 (1994), 103–121.

Cross, R. W.

(with T. Alvarez, A. I. Gouveia) Adjoint characterisations of unbounded weakly compact, weakly completely continuous and unconditionally converging operators; 113 (1995), 283–298.

Cruz-Uribe, D.

(with C. J. Neugebauer, V. Olesen) The one-sided minimal operator and the one-sided reverse Hölder inequality; 116 (1995), 255–270.

Cupała, W.

The upper bound of the number of eigenvalues for a class of perturbed Dirichlet forms; 113 (1995), 109–125.

De Blasi, F. S.

(with J. Myjak) Ambiguous loci of the farthest distance mapping from compact convex sets; 112 (1995), 99–107.

Defant, A.

(with J. Bonet, A. Peris, M. S. Ramanujan) Coincidence of topologies on tensor products of Köthe echelon spaces; 111 (1994), 263–281.

Deville, R.

(with V. Fonf, P. Hájek) Analytic and C^k approximations of norms in separable Banach spaces; 120 (1996), 61–74.

Dilworth, S. J.

(with M. Girardi, D. Kutzarova) Banach spaces which admit a norm with the uniform Kadec–Klee property; 112 (1995), 267–277.

Dineen, S.

Holomorphic functions and Banach-nuclear decompositions of Fréchet spaces; 113 (1995), 43–54.

Djakov, P. B.

(with V. P. Zahariuta) On Dragilev type power Köthe spaces; 120 (1996), 219–234.

Dobrowolski, T.

(with J. Grabowski, K. Kawamura) Topological type of weakly closed subgroups in Banach spaces; 118 (1996), 49–62.

Doušt, I.

(with B. L. Walden) Compact AC-operators; 117 (1996), 275–287.

Downarowicz, T.

(with Y. Lacroix) A non-regular Toeplitz flow with preset pure point spectrum; 120 (1996), 235–246.

Edmunds, D. E.

(with P. Gurka, B. Opic) Double exponential integrability, Bessel potentials and embedding theorems; 115 (1995), 151–181.

Epperson, J.

Triebel–Lizorkin spaces for Hermite expansions; 114 (1995), 87–103.

Esterle, J.

Closed ideals in certain Beurling algebras, and synthesis of hyperdistributions; 120 (1996), 113–153.

Faber, R. G.

A lifting theorem for locally convex subspaces of L_0 ; 115 (1995), 73–85.

Fabian, M.

On an extension of norms from a subspace to the whole Banach space keeping their rotundity; 112 (1995), 203–211.

Fan, A. H.

Sur les dimensions de mesures; 111 (1994), 1–17.

On uniqueness of G -measures and g -measures; 119 (1996), 255–269.

Fan, D.

(with L.-K. Chen) Oscillatory kernels in certain Hardy-type spaces; 111 (1994), 195–206.
(with Y. Pan) Boundedness of certain oscillatory singular integrals; 114 (1995), 105–116.

Fan, M.

Complex interpolation functors with a family of quasi-power function parameters; 111 (1994), 283–305.

Fan, Q.

Symbol calculus on the affine group “ $ax + b$ ”; 115 (1995), 207–217.

Ferrando, S.

(with R. L. Jones, K. Reinhold) On approach regions for the conjugate Poisson integral and singular integrals; 120 (1996), 169–182.

Fonf, V.

(with R. Deville, P. Hájek) Analytic and C^k approximations of norms in separable Banach spaces; 120 (1996), 61–74.

Fong, C. K.

(with G. Lumer, E. Nordgren, H. Radjavi, P. Rosenthal) Local polynomials are polynomials; 115 (1995), 105–107.

Franchi, B.

(with F. Serra Cassano) Gehring's lemma for metrics and higher integrability of the gradient for minimizers of noncoercive variational functionals; 120 (1996), 1–22.

Frankiewicz, R.

(with G. Plebanek) An example of a non-topologizable algebra; 116 (1995), 85–87.
(with G. Plebanek) On asymptotic density and uniformly distributed sequences; 119 (1996), 17–26.

Friedrich, J.

(with L. Klotz, M. Riedel) On reduction of two-parameter prediction problems; 114 (1995), 147–158.

Fuhrman, M.

Analyticity of transition semigroups and closability of bilinear forms in Hilbert spaces; 115 (1995), 53–71.

Gątarek, D.

(with B. Goldys) Existence, uniqueness and ergodicity for the stochastic quantization equation; 119 (1996), 179–193.

Gillespie, T. A.

(with E. Berkson) Spectral decompositions and harmonic analysis on UMD spaces; 112 (1994), 13–49.

Girardi, M.

(with E. J. Balder, V. Jalby) From weak to strong types of \mathcal{L}_E^1 -convergence by the Bocce criterion; 111 (1994), 241–262.

(with S. J. Dilworth, D. Kutzarova) Banach spaces which admit a norm with the uniform Kadec–Klee property; 112 (1995), 267–277.

Giulini, S.

(with M. Cowling, A. Hulanicki, G. Mauceri) Spectral multipliers for a distinguished Laplacian on certain groups of exponential growth; 111 (1994), 103–121.

Gluskin, E. D.

(with S. Kwapień) Tail and moment estimates for sums of independent random variables with logarithmically concave tails; 114 (1995), 303–309.

Godunov, B. A.

(with P. P. Zabreiko) Geometric characteristics for convergence and asymptotics of successive approximations of equations with smooth operators; 116 (1995), 225–238.

Gołdyns, B.

(with D. Gątarek) Existence, uniqueness and ergodicity for the stochastic quantization equation; 119 (1996), 179–193.

Goncharov, A.

A compact set without Markov's property but with an extension operator for C^∞ -functions; 119 (1996), 27–35.

González, B. J.

(with J. J. Betancor) A convolution operation for a distributional Hankel transformation; 117 (1995), 57–72.

González, M.

(with E. Saksman, H.-O. Tylli) Representing non-weakly compact operators; 113 (1995), 265–282.

(with A. Martinón) Operational quantities characterizing semi-Fredholm operators; 114 (1995), 13–27.

(with J. M. Gutiérrez) Factorization of weakly continuous holomorphic mappings; 118 (1996), 117–133.

Gordon, Y.

(with M. Meyer, S. Reisner) Volume approximation of convex bodies by polytopes—a constructive method; 111 (1994), 81–95.

Gouveia, A. I.

(with T. Alvarez, R. W. Cross) Adjoint characterisations of unbounded weakly compact, weakly completely continuous and unconditionally converging operators; 113 (1995), 283–298.

Grabowski, J.

(with T. Dobrowolski, K. Kawamura) Topological type of weakly closed subgroups in Banach spaces; 118 (1996), 49–62.

Greiner, G.

(with W. J. Ricker) Commutativity of compact selfadjoint operators; 112 (1995), 109–125.

Grillo, G.

On Dirichlet–Schrödinger operators with strong potentials; 116 (1995), 239–254.

Gripenberg, G.

A necessary and sufficient condition for the existence of a father wavelet; 114 (1995), 207–226.

Gross, A.

(with A. Weron) On measure-preserving transformations and doubly stationary symmetric stable processes; 114 (1995), 275–287.

Gurka, P.

(with D. E. Edmunds, B. Opic) Double exponential integrability, Bessel potentials and embedding theorems; 115 (1995), 151–181.

**Gutev, V. G.**

Trivial bundles of spaces of probability measures and countable-dimensionality; 114 (1995), 1–11.

Gutiérrez, J. M.

(with M. González) Factorization of weakly continuous holomorphic mappings; 118 (1996), 117–133.

Hájek, P.

(with R. Deville, V. Fonf) Analytic and C^k approximations of norms in separable Banach spaces; 120 (1996), 61–74.

Hajłasz, P.

(with A. Kałamajska) Polynomial asymptotics and approximation of Sobolev functions; 113 (1995), 55–64.

Harte, R.

(with W. Y. Lee) An index formula for chains; 116 (1995), 283–294. Correction, 118 (1996), 305.

On rank one elements; 117 (1995), 73–77.

(with M. Mbekhta) Almost exactness in normed spaces II; 117 (1996), 101–105.

On Kato non-singularity; 117 (1996), 107–114.

Heinig, H.

(with L. Maligranda) Weighted inequalities for monotone and concave functions; 116 (1995), 133–165.

Hensz, E.

(with R. Jajte, A. Paszkiewicz) The bundle convergence in von Neumann algebras and their L_2 -spaces; 120 (1996), 23–46.

Hernández, F. L.

(with S. L. Troyanski) On Gateaux differentiable bump functions; 118 (1996), 135–143.

Hinrichs, A.

On the type constants with respect to systems of characters of a compact abelian group; 118 (1996), 231–243.

Holland, F.

(with D. Walsh) Moser's Inequality for a class of integral operators; 113 (1995), 141–168.

Huang, S.

Characterizing spectra of closed operators through existence of slowly growing solutions of their Cauchy problems; 116 (1995), 23–41.

Hulanicki, A.

(with M. Cowling, S. Giulini, G. Mauceri) Spectral multipliers for a distinguished Laplacian on certain groups of exponential growth; 111 (1994), 103–121.

Iwanik, A.

Generic smooth cocycles of degree zero over irrational rotations; 115 (1995), 241–250.

Toeplitz flows with pure point spectrum; 118 (1996), 27–35.

Jajte, R.

(with E. Hensz, A. Paszkiewicz) The bundle convergence in von Neumann algebras and their L_2 -spaces; 120 (1996), 23–46.

- Jakubczyk, B.**
 (with M. Ya. Zhitomirski) Singularities and normal forms of generic 2-distributions on 3-manifolds; 113 (1995), 223–248.
- Jalby, V.**
 (with E. J. Balder, M. Girardi) From weak to strong types of \mathcal{L}_E^1 -convergence by the Bocce criterion; 111 (1994), 241–262.
- Janas, J.**
 On unbounded hyponormal operators III; 112 (1994), 75–82.
- Jaramillo, J. A.**
 (with P. Biström, M. Lindström) Algebras of real analytic functions: Homomorphisms and bounding sets; 115 (1995), 23–37.
- Jarosz, K.**
 Multiplicative functionals and entire functions; 119 (1996), 289–297.
- Jayne, J. E.**
 (with I. Namioka, C. A. Rogers) σ -fragmented Banach spaces II; 111 (1994), 69–80.
- Johnson, W. B.**
 (with M. Zippin) Extension of operators from weak*-closed subspaces of ℓ_1 into $C(K)$ spaces; 117 (1995), 43–55.
- Jones, R. L.**
 (with S. Ferrando, K. Reinhold) On approach regions for the conjugate Poisson integral and singular integrals; 120 (1996), 169–182.
- Jonsson, A.**
 (with H. Wallin) The dual of Besov spaces on fractals; 112 (1995), 285–300.
- Jourani, A.**
 Open mapping theorem and inversion theorem for γ -paraconvex multivalued mappings and applications; 117 (1996), 123–136.
- del Junco, A.**
 (with M. Lemańczyk, M. K. Mentzen) Semisimplicity, joinings and group extensions; 112 (1995), 141–164.
- Jung, T.**
 (with Q. H. Choi, S. Chun) The multiplicity of solutions and geometry of a nonlinear elliptic equation; 120 (1996), 259–270.
- Junge, M.**
 Comparing gaussian and Rademacher cotype for operators on the space of continuous functions; 118 (1996), 101–115.
- Kałamajska, A.**
 (with P. Hajłasz) Polynomial asymptotics and approximation of Sobolev functions; 113 (1995), 55–64.
- Kalton, N. J.**
 The basic sequence problem; 116 (1995), 167–187.
- Kamiński, B.**
 (with F. Blanchard) Relatively perfect σ -algebras for flows; 114 (1995), 71–85.
- Kartsatos, A. G.**
 Sets in the ranges of nonlinear accretive operators in Banach spaces; 114 (1995), 261–273.

- Kawamura, K.**
 (with T. Dobrowolski, J. Grabowski) Topological type of weakly closed subgroups in Banach spaces; 118 (1996), 49–62.
- Kepert, A. G.**
 Complemented ideals of group algebras; 111 (1994), 123–152.
- Khatskevich, V.**
 (with V. Shul'man) Operator fractional-linear transformations: convexity and compactness of image; applications; 116 (1995), 189–195.
- Kirk, W. A.**
 Compactness and countable compactness in weak topologies; 112 (1995), 243–250.
- Kisliakov, S. V.**
 A sharp correction theorem; 113 (1995), 177–196.
- Kita, H.**
 On a converse inequality for maximal functions in Orlicz spaces; 118 (1996), 1–10.

 (with M. Lemańczyk) On the multiplicity function of ergodic group extensions. II; 116 (1995), 207–215.

Labuda, I.

(with P. Szeptycki) Domains of integral operators; 111 (1994), 53–68.

Lacroix, Y.

(with T. Downarowicz) A non-regular Toeplitz flow with preset pure point spectrum; 120 (1996), 235–246.

Lai, Q.

Two-weight mixed Φ -inequalities for the one-sided maximal function; 115 (1995), 1–22.

Latała, R.

A note on the Ehrhard inequality; 118 (1996), 169–174.

Tail and moment estimates for sums of independent random vectors with logarithmically concave tails; 118 (1996), 301–304.

Lau, A. T.-M.

(with R. J. Loy, G. A. Willis) Amenability of Banach and C^* -algebras on locally compact groups; 119 (1996), 161–178.

Lau, K. S.

(with J. Wang, C. H. Chu) Vector-valued Choquet–Deny theorem, renewal equation and self-similar measures; 117 (1995), 1–28.

deLaubenfels, R.

Automatic extensions of functional calculi; 114 (1995), 237–259.

(with Vũ Quốc Phóng) Decomposable embeddings, complete trajectories, and invariant subspaces; 119 (1996), 65–76.

Lee, W. Y.

(with R. Harte) An index formula for chains; 116 (1995), 283–294. Correction, 118 (1996), 305.

Lemańczyk, M.

(with A. del Junco, M. K. Mentzen) Semisimplicity, joinings and group extensions; 112 (1995), 141–164.

(with J. Kwiatkowski) On the multiplicity function of ergodic group extensions. II; 116 (1995), 207–215.

Lima, Å.

Property (wM^*) and the unconditional metric compact approximation property; 113 (1995), 249–263.

Lin, C.-C.

Convolution operators on Hardy spaces; 120 (1996), 53–59.

Lin, M.

(with R. Wittmann) Averages of unitary representations and weak mixing of random walks; 114 (1995), 127–145.

Lindström, M.

(with P. Biström, J. A. Jaramillo) Algebras of real analytic functions: Homomorphisms and bounding sets; 115 (1995), 23–37.

López, G.

(with J. F. Mena) RNP and KMP are equivalent for some Banach spaces with shrinking basis; 118 (1996), 11–17.

Lorang, G.

Régularité Besov des trajectoires du processus intégral de Skorokhod; 117 (1996), 205–223.

Loy, R. J.
