Contents of volumes XXX–XL

	Volume	Pages
Agaev, Г. Н.		
1. О задаче Коши для нелинейных параболических операторных уравнений	32	153–179
Albinus, G.		
1. Remarks on theorem of S. N. Bernstein	38	227–234
Albrycht, J.		
1. (and J. Musielak) Countably modulated spaces	31	331–337
Allan, G. R.		
1. (and H. C. Dales and J. P. McClure) Pseudo Banach-algebras	40	55–69
Altman, M.		
1. A general maximum principle for optimization problems	31	319–329
2. A general separation theorem for mappings saddle-points, duality and conjugate functions	36	131–167
Anderson, B. C.		
1. (and H. Nakano) Semi-continuous linear lattices	37	191–195
Ando, T.		
1. Invariante Masse positiver Kontraktionen in $C(X)$.	31	173–187
Arens, R.		
1. Ideals in Banach algebra extensions	31	29–34
Aronszajn, N.		
1. (and R. D. Brown) Finite-dimensional perturbation of spectral problems and variational approximation methods for eigenvalue problems. Part I. Finite-dimensional perturbations	36	1–76
2. On finite-dimensional perturbations (short summary)	38	459

- Bagby, R. J.**
1. A difference quotient norm for spaces of quasi-homogeneous Bessel potentials 40 41-48
- Baker, J. W.**
1. Some uncomplemented subspaces of $C(X)$ of the type $C(Y)$ 36 85-103
- Barber, F.**
1. (and T. Ito, J. Ratti and D. Waterman) Reflexivity and summability: the Nakano $l(p_i)$ spaces 33 141-146
- Baric, L. W.**
1. The chi function in generalised summability 39 165-180
- Barnes, B. A.**
1. (and A. K. Roy) Boundedness in certain topological linear spaces 33 147-156
- Bennet, G.**
1. Distinguished subsets and summability invariants 40 225-234
- Bessaga, C.**
1. Some remarks on Dragilev's theorem 31 307-318
 2. A theorem on complemented subspaces of nuclear spaces (short summary) 38 441-442
- Berg, L.**
1. Zum Problem der Operatorfunktionen mit verschwindender Ableitung 33 173-174
- Bergman, J. G.**
1. (and N. J. Rothman) An L^1 -algebra for algebraically irreducible semigroups 33 257-272
- Bernard, A.**
1. (et N. Th. Varopoulos) Groupes de fonctions continues sur un compact. Applications à l'étude des ensembles de Kronecker 35 199-206
- Bochnak, J.**
1. Analytic functions in Banach spaces 35 273-292
 2. (and J. Siciak) Analytic function in topological vector spaces 39 77-112
 3. (and J. Siciak) Polynomials and multilinear mappings in topological vector spaces 39 59-76

- Boehme, T. K.**
1. On Mikusiński operators 33 127-140
- Bojdecki, T.**
1. Analytic approach to semiclassical logarithmic potential theory 35 181-198
- Bourgin, D. G.**
1. Homeomorphisms of the open disk 31 433-438
- Brooks, J. K.**
1. Transforming bilinear vector integrals 33 165-171
- Brooks, R. M.**
1. A ring of analytic functions, II 39 199-208
- Briem, E.**
1. (and K. B. Laursen and N. W. Pedersen) Mergelyan's theorem for vector-valued functions with an application to slice algebras 35 221-226
- Browder, F. E.**
1. Topology and non-linear functional equations 31 189-204
- Brown, R. D.**
1. (and N. Aronszajn) Finite-dimensional perturbation of spectral problems and variational approximation methods for eigenvalue problems. Part I. Finite-dimensional perturbations 36 1-76
- Bùi-Trong-Liêu.**
1. (and M. Mouline) On the asymptotic behaviour of some Markov processes 34 271-290
- Buraczewski, A.**
1. Determinant system for composite of generalized Fredholm operators 34 197-207
 2. Formulae of Fredholm type for solutions of linear equations with generalized Fredholm operator 32 1-8
- Busko, E.**
1. Fonctions continues et fonctions bornées non adhérentes dans $L^\infty(T)$ à la suite de leurs sommes partielles de Fourier 34 319-337
- Butts, R. R.**
1. (and P. Porcelli), Multiplicity theory 38 391-405

Cáč, N. P.	
1. On symmetric Schauder bases in a Fréchet space	32 95-98
Calderón, C. P.	
1. Some remarks on the multiple Weierstrass transform and Abel summability of multiple Fourier-Hermite series	32 119-148
2. On Abel summability of multiple Laguerre series	33 273-294
3. Conjugate kernels and convergence of harmonic singular integrals	39 39-58
van Casteren, J. A. W.	
1. (and S. Goldberg) The conjugate of the product of operators	38 125-130
Chabrowski, J.	
1. (et G. Łubczonok) Sur les semi-groupes à n paramètres des opérateurs linéaires	33 13-18
Chevalier, L.	
1. Algèbres de fonctions à orthogonal purement atomique	40 81-84
Chevet, S.	
1. p -ellipsoids de l^2 . Mesures cylindriques gaussiennes (short summary)	38 439-441
Cholewiński, F. M.	
1. (and D. T. Haimo and A. E. Nussbaum) A necessary and sufficient condition for the representation of a function as a Hankel-Stieltjes transform	36 269-274
Giesielski, Z.	
1. A bounded orthonormal system of polygons	31 339-346
2. A construction of basis in $C^{(1)}(I^2)$	33 243-247
Cohen, J. S.	
1. A characterization of inner product spaces using absolutely 2-summing operators	38 271-276
Coifman, R. R.	
1. (and G. Weiss) On subharmonicity inequalities involving solutions of generalized Cauchy-Riemann equations	36 77-83
Collins, H. S.	
1. (and Porcelli) Ideals in group algebras	33 223-226

Cooper, J. B.	
1. Bases and complete systems for analytic functions	33 157-164
Crownover, R. M.	
1. One-dimensional point derivation spaces in Banach algebras	35 249-259
2. Principal ideals which are maximal ideals in Banach algebras	33 299-304
Daleckiĭ, Yu. L.	
1. Integration in function spaces and differential equations with functional derivatives	38 333-340
Dales, H. G.	
1. (and G. R. Allan and J. P. McClure) Pseudo Banach-algebras	40 55-69
Daly, J. T.	
1. On Liouville F -algebras	40 1-16
Day, M. M.	
1. Amenability and equicontinuity	31 481-494
Dean, D. W.	
1. (and I. Singer and L. Sternbach) On shrinking basic sequences in Banach spaces	40 23-33
Dennler, G.	
1. Streng unabhängige Distributionen (short summary)	38 460
2. Unbeschränkt teilbare zufällige Elemente in L^p -Räumen (short summary)	38 459
DeVito, C. L.	
1. (and R. Welland) On a theorem of H. Goldstine	34 265-269
Diestel, J.	
1. Some remarks on subspaces of Orlicz spaces of vector-valued finitely additive functions	39 161-164
Dineen, S.	
1. Holomorphy types on a Banach spaces	39 241-288
Dobrakov, I.	
1. A representation theorem for unconditionally converging linear operators on $C_0(T, X)$ (short summary)	38 460-461

Dragilev, M. M.	
1. On certain topological invariants of Köthe spaces (short summary)	38 463
Drobot, V.	
1. A note on rearrangements of series	35 177-179
Drury, S. W.	
1. On non-triangular sets in tensor algebras	34 253-263
Dubinsky, E.	
1. Equivalent nuclear systems	38 373-379
2. Every separable Fréchet space contains a non-stable dense subspace	40 77-79
Dubuc, S.	
1. La fonction de Green d'un processus de Galton-Watson	34 69-87
Duchoň, M.	
1. Biprojective tensor products and convolutions of vector-valued measures on a compact group	38 187-192
Dudley, R. M.	
1. Small operators between Banach and Hilbert spaces	38 35-41
van Dulst, D.	
1. Perturbation theory and strictly singular operators in locally convex spaces	38 341-372
Eisenberg, S.	
1. (and B. Wood) Approximating unbounded functions with linear operators generated by moment sequences	35 299-304
Edwards, D. A.	
1. An extension of Choquet boundary theory to certain partially ordered compact convex sets	36 177-193
Edwards, R. E.	
1. Unbounded integrally positive definite functions . . .	33 185-191
Fenske, C.	
1. (and E. Schock) Nuclearity and local convexity of sequence spaces (short summary)	38 450-451
Fisher, B.	
1. Products of generalized functions	33 227-230

Fisher, M.	
1. Tame singular integrals	32 113-118
Floret, K.	
1. Bases in sequentially retractive limit spaces	38 221-225
Foiaş, C.	
1. (et B. Sz.-Nagy) Vecteurs cycliques et quasi-affinités	31 35-42
Fraser, R. B.	
1. Banach spaces of functions satisfying a modulus of continuity condition	32 277-283
Garling, D. J. H.	
1. Absolutely p -summing operators in Hilbert space . . .	38 319-331
Gawędzki, K.	
1. Functional theory of geodesic fields and its applications to the calculus of variations of multiple integrals . . .	40 245-264
Gelbaum, B. R.	
1. On a class of operators in Hilbert space	38 279-284
Gesztesy, E.	
1. Limit and infinite integral of Mikusiński operator	39 119-136
Тохберг, И. Ц.	
1. (и Н. Я. Крупник) О спектре сингулярных интегральных операторов в пространствах L_p	31 347-362
Goldberg, S.	
1. (and J. A. W. van Casteren) The conjugate of the product of operators	38 125-130
Gramsch, B.	
1. Über analytische Operatorfunktionen und Indexberechnung	38 313-317
Gross, L.	
1. Nuclear operators and potential theory on Hilbert space (short summary)	38 451-452
Gundy, R. F.	
1. On the class $L \log L$, martingales, and singular integrals	33 109-118
de Guzmán, M.	
1. A covering lemma with applications to differentiability of measures and singular integral operators	34 299-317

Haimo, D. T.

1. (and F. M. Cholewiński and A. E. Nussbaum) A necessary and sufficient condition for the representation of a function as a Hankel-Stieltjes transform 36 269–274

Харазов, Д. Ф.

1. Симметризуемые операторы, не удовлетворяющие условиям положительной определенности и их приложения 34 241–252

Hayden, T. L.

1. (and L. Williams and J. H. Wells) On the extension of Lipschitz-Hölder maps on L^p spaces 39 29–38

Helson, H.

1. The differential equation of an inner function 35 311–321

Henkin, G. M.

1. On non-isomorphism of Banach spaces of holomorphic functions 38 267–270

Hewitt, E.

1. (and K. A. Ross) Integrally positive-definite functions on groups 31 145–151

Holub, J. R.

1. Hilbertian, Besselian, and semi-shrinking bases 37 205–213
2. (and J. R. Retherford) Some curious bases for c_0 and $C[0, 1]$ 34 227–240

Howard, J.

1. The comparison of an unconditionally converging operator 33 295–298

Hulanicki, A.

1. On the spectral radius in group algebras 34 209–214
2. On symmetry of group algebras of discrete nilpotent groups 35 207–219
3. On positive functionals on a group algebra multiplicative on a subalgebra 37 163–171

Ito, T.

1. (and F. Barber, J. Ratti and D. Waterman) Reflexivity and summability: the Nakano $l(p_i)$ spaces 33 141–146

Jeyamma, S.

1. Generalized operational functions 33 1–11

Jodeit, M. Jr.

1. Restrictions and extensions of Fourier multipliers 34 215–226
2. (and A. Torchinsky) Inequalities for Fourier transforms 37 245–276

Johnson, J. A.

1. Extreme points in tensor products and a theorem of de Leeuw 37 159–162

Jonac, M. L.

1. (et C. Samuel) Sur les espaces complémentés de $C(S)$ (short summary) 38 461–462

Jones, O. T.

1. Continuity of seminorms and linear mappings on a space with Schauder basis 34 121–126

Кадец, М. И.

1. Метод эквивалентных норм в теории абстрактных почти периодических функций 31 89–94
2. On complementably universal Banach spaces 40

Kahane, J.-P.

1. Sur les réarrangements de fonctions de la classe A 31 287–293

Kalton, N. J.

1. Unconditional and normalised bases 38 243–253
2. Schauder bases reflexivity 38 255–266
3. The normalization of Schauder bases of locally convex spaces (short summary) 38 451

Kaplansky, I.

1. Composition of binary quadratic forms 31 523–530

Katětov, M.

1. Metrics on an arc 31 547–554

Kato, T.

1. Smooth operators and commutators 31 535–546

Kaufman, R.

1. Perfect sets in some groups 34 17–21
2. On the zeroes of some random functions 34 291–297

Kijowski, J.

1. (and J. Komorowski) A differentiable structure in the set of all bundle-sections over compact subsets 32 191–207
 2. Existence of differentiable structure in the set of submanifolds. An attempt of geometrization of calculus of variations 33 93–108

Klee, V.

1. Two renorming constructions related to a question of Anselone 33 231–242

Kluvánek, I.

1. Fourier transforms of vector-valued functions and measures 37 1–12

Koehler, D.

1. (and P. Rosenthal) On isometries of normed linear spaces 36 213–216

Kokilashvili, W.

1. On analytic functions of Smirnov–Orlicz classes 31 43–59

Komorowski, J.

1. A modern version of the E. Noether's theorems in the calculus of variations, II 32 181–190
 2. (and J. Kijowski) A differentiable structure in the set of all bundle-sections over compact subsets 32 191–207

Kōmura, Y.

1. Die Nuklearität der Lösungsräume der partiellen Differentialgleichungen (short summary) 38 462–463
 2. Duality of linear spaces of functions and nuclearity of solution spaces 38 381–389

Köthe, G.

1. Über nukleare Folgenräume 31 267–271
 2. On the structure of nuclear spaces (short summary) 38 452

Krabbe, G.

1. Linear operators and operational calculus. Part I 40 199–223

Красносельский, М. А.

1. (у. Е. А. Лифшиц) Принцип сходимости последовательностей линейных положительных операторов 31 455–468

Крейн, С. Г.

1. Поведение решений эллиптических задач при вариации области 31 411–424

Крупник, Н. Я.

1. (и И. Ц. Гохберг) О спектре сингулярных интегральных операторов в пространствах L_p 31 347–362

Krzyżewski, K.

1. (and W. Szlenk) On invariant measures for expanding differentiable mappings 33 83–92

Kwapiień, S.

1. An analytic approach to semiclassical potential theory 32 23–39
 2. (and A. Pełczyński) The main triangle projection in matrix spaces and its applications 34 43–67
 3. A remark on p -absolutely summing operators in l_p -spaces 34 109–111
 4. On a theorem of L. Schwartz and its applications to absolutely summing operators 38 193–201
 5. A linear topological characterization of innerproduct spaces 38 277–278

Laursen, K. B.

1. (and E. Briem and N. W. Pedersen) Mergelyan's theorem for vector-valued functions with an application to slice algebras 35 211–226

Lewiatan, D.

1. (and M. S. Ramanujan) A generalization of the mean ergodic theorem 39 113–117

Leżański, T.

1. Sur une définition de la dérivée 31 363–371
 2. Sur l'intégration directe d'équations d'évolution 34 149–163

Лифшиц, Е. А.

1. (и М. А. Красносельский) Принцип сходимости последовательностей линейных положительных операторов 31 455–468

Limaye, B. V.

1. Blaschke products for finite Riemann surfaces 34 169–176

Lindberg, J. A.

1. Extension of algebra norms and applications 40 35–39

- Lohoue, N.**
1. Ensemble de non-synthèse uniforme dans les algèbres $A_p(G)$ 36 125-129
- Lorch, E. R.**
1. On compact metric spaces and the group of Baire equivalences 31 135-144
- Lust, F.**
1. Le problème de la synthèse et de la p -finesse pour certaines orbites de groupes linéaires dans $A_p(R^n)$ 39 17-28
- Luxemburg, W. A. J.**
1. On the spectra of certain Laurent operators on Orlicz spaces l^ϕ 31 273-285
- Lubczonok, G.**
1. (et J. Chabrowski) Sur semi-groupes à n paramètres des opérateurs linéaires 33 13-18
- Mallios, A.**
1. On topological algebra sheaves of a nuclear type 38 215-220
- Mandrekar, V.**
1. (and M. Nadkarni and D. Patil) Singular invariant measures on the line 35 1-13
- Maurin, K.**
1. A remark on Berezanskiĭ version on spectral theorem 34 165-167
- Mažbic-Kulma, B.**
1. On an equation with reflection of order n 35 69-76
 2. Differential equations in a linear ring 39 155-159
- McArthur, C. W.**
1. Convergence of monotone nets in ordered topological spaces 34 1-16
- McCarthy, C.**
1. Optimal conditionig of operators (short summary) 38 442-443
- McClure, J. P.**
1. (and G. R. Allan and H. C. Dales) Pseudo Banach-algebras 40 55-69
- Meyer, Y.**
1. Les nombres de Pisot et l'analyse harmonique 34 127-147

- Meyer-König, W.**
1. (und H. Tietz) Über die Limitierungsumkehrsätze vom Typ σ 31 205-216
- Meyers, W. E.**
1. A uniform algebra with non-global peak points 33 207-211
- Mika, J.**
1. Existence and uniqueness of the solution to the critical problem in neutron transport theory 37 213-225
- Mikusiński, J.**
1. On convergence of sequences of periodic distributions 31 1-14
 2. On functions and distributions with a vanishing derivative 32 9-16
- Митягин, Б. С.**
1. Эквивалентность базисов в гильбертовых шкалах 37 111-137
 2. Fréchet spaces with a unique unconditional basis 38 23-34
- Mlak, W.**
1. A note on Szegö type properties of semi-spectral measures 31 241-251
 2. Decompositions of operator-valued representations of function algebras 36 111-123
 3. Decompositions of operator representations of function algebras (short summary) 38 445-446
- Mouline, M.**
1. (and Bùi-Trong-Liêu) On the asymptotic behaviour of some Markov processes 34 271-290
- Musielak, J.**
1. (and J. Albrycht) Countably modulated spaces 31 331-337
 2. (and A. Waszak) On some countably modulated spaces 38 51-57
- Müller-Pfeiffer, E.**
1. Spektraleigenschaften eindimensionaler Differentialoperatoren höherer Ordnung 34 183-196
- Myers, D. E.**
1. (and C. Swartz) Random functionals on $K\{M_p\}$ spaces 39 233-240
- Nachbin, L.**
1. Concerning holomorphy types for Banach spaces 38 407-412

Nadkarni, M.	
1. (and V. Mandrekar and D. Patil) Singular invariant measures on the line	35 1–13
Наймарк, М. А.	
1. О разложении унитарного представления комплексной полупростой группы Ли на ее неприводимые представления	31 383–398
Nakano, H.	
1. Generalized modular spaces	31 439–449
2. Critical modulars	31 451–453
3. (and B. C. Anderson) Semi-continuous linear lattices	37 191–195
Napiórkowski, K.	
1. Continuous tensor products of Hilbert spaces and product operators	39 307–327
Neubauer, G.	
1. Fredholm links and perturbation theorems (short summary)	38 459
Nielsen, N. J.	
1. Components and open mapping theorems	37 277–287
Nussbaum, A. E.	
1. A note on quasi-analytic vectors	33 305–309
2. (and F. M. Cholewiński and D. T. Haimo) A necessary and sufficient condition for the representation of a function as a Hankel-Stieltjes transform	36 269–274
Okikiolu, G. O.	
1. Extensions of locally bounded convolution operators in L^p -spaces	32 229–245
Patil, D.	
1. (and V. Mandrekar and M. Nadkarni) Singular invariant measures on the line	35 1–13
Peck, N. T.	
1. Some questions concerning support points (short summary)	38 456
Pedersen, N. W.

1. A uniform boundedness theorem and mappings into spaces of operators 31 425–432
- Pytlík, T.**
1. A nuclear space of functions on a locally compact group (short summary) 38 453–454
- Radecki, J.**
1. Orthonormal basis in the space $C_1[0, 1]$ 35 123–163
- Raghunathan, T. T.**
1. On the space of entire functions over certain non-archimedean fields and its dual 33 251–256
- Райков, Д. А.**
1. О B -полных топологических векторных группах 31 303–314
- Ramanujan, M. S.**
1. (and D. Lewiatan) A generalization of the mean ergodic theorem 39 113–117

- Rao, M. M.**
1. Linear operations, tensor products, and contractive projections in function spaces 38 131–186
- Ratti, J.**
1. (and F. Barber, T. Ito and D. Waterman) Reflexivity and summability: the Nakâmo $l(p_i)$ spaces 33 141–146
- Reinermann, J.**
1. Über Toeplitzsche Iterationsverfahren und einige ihrer Anwendungen in der konstruktiven Fixpunkttheorie 32 209–227
 2. Approximation von Fixpunkten 39 1–15
- Retherford, J. R.**
1. (and J. R. Holub) Some curious bases for c_0 and $C[0, 1]$ 34 227–240
- Rickart, C. E.**
1. Boundary properties of sets relative to function algebras 31 253–261
- Rickert, N. W.**
1. A note on positive definite functions 36 223–226
- Rieffel, M. A.**
1. Multipliers and tensor products of L^p -spaces of locally compact groups 33 71–82
- Rolewicz, S.**
1. A generalization of the Mazur–Ulam theorem 31 501–505
 2. On orbits of elements 32 17–22
 3. (and D. Przeworska-Rolewicz) On the control of linear periodic time lag systems 32 149–152
 4. On controllability of systems of strings 36 105–110
 5. An example of a normal space non-isomorphic to its products by the real line 40 71–75
- Rosenberg, R. L.**
1. Orlicz spaces based on families of measures 35 15–49
- Rosenthal, P.**
1. (and D. Koehler) On isometries of normed linear spaces 36 213–216
 2. A characterization of multiplication by the independent variable on \mathcal{L}^p 36 217–221
- Rosenthal, H. P.**
1. On relativity disjoint families of measures, with some applications to Banach spaces theory 37 13–36

2. Correction to the paper "On relatively disjoint families of measures, with some applications to Banach space theory"	37	311-313
Ross, K. A.		
1. (and E. Hewitt) Integrally positive-definite functions on groups	31	145-151
Rothman, N. J.		
1. (and J. G. Bergman) An L^1 algebra for algebraically irreducible semigroups	35	257-272
Roy, A. K.		
1. (and B. A. Barnes) Boundedness in certain topological linear spaces	33	147-156
Ruckle, W. H.		
1. Diagonals of operators	38	43-49
Sagher, Y.		
1. On certain hypersingular integrals	37	289-309
Салехов, Д. В.		
1. (и Е. М. Семенов) О сходимости некоторого семейства функционалов в пространстве Орлича	32	285-293
Salinger, D. L.		
1. Large squares and sets of analyticity in tensor algebras	36	259-267
Samuel, C.		
1. (and M. L. Jonac) Sur les espaces complémentés de $C(S)$ (short summary)	38	461-442
Saphar, P.		
1. Produits tensoriels d'espaces de Banach et classes d'applications linéaires	38	71-100
Schlotterbeck, U.		
1. Elementary characterization of operators with absolutely summing adjoint (short summary)	38	447
Schmets, J.		
1. Modulus of prenuclear maps in ordered spaces (short summary)	38	447-448
Schock, E.		
1. Montel spaces of Hölder continuous functions (short summary)	38	454

2. (and C. Fenske) Nuclearity and local convexity of sequence spaces (short summary)	38	450-451
Schwartz, L.		
1. Applications p -radonifiantes et théorème de dualité	38	203-213
Segovia, C.		
1. On the area function of Lusin	33	311-343
2. (and R. W. Wheeden) On the function g_A^* and the heat equation	37	57-93
Semadeni, Z.		
1. Inverse limits of compact spaces and direct limits of spaces of continuous functions	31	373-382
2. (and A. Wiweger) A theorem of Eilenberg-Watts type for tensor products of Banach spaces	38	235-242
Semenov, E. M.		
1. (и Д. В. Салехов) О сходимости некоторого семейства функционалов в пространстве Орлича	32	285-293
2. Interpolation of linear operators and its applications (short summary)	38	463-464
Shimogaki, T.		
1. An interpolation theorem on Banach function spaces	31	233-240
Shirey, J. E.		
1. (and R. E. Zink) On unconditional bases in certain Banach functions spaces	36	169-175
Siciak, J.		
1. A characterization of analytic functions of n real variables	35	293-297
2. (and J. Bochnak) Polynomials and multilinear mappings in topological vector spaces	39	59-76
3. (and J. Bochnak) Analytic function in topological vector spaces	39	77-112
Silverstein, M. L.		
1. (and R. L. Wheeden) Superharmonic functions on Lipschitz domain	39	191-198
Simons, S.		
1. Minimal sublinear functionals	37	37-56

Singer, I.	
1. On the constants of basic sequences in Banach spaces	31 125–134
2. (and D. W. Dean and L. Sternbach) On shrinking basic sequences in Banach spaces	40 23–33
Skordev, D.	
1. Linear operators with sufficiently many a priori given eigenvectors (short summary)	38 455–456
Snyder, A. K.	
1. Sequence spaces and interpolation problems for analytic functions	39 137–153
Slowikowski, W.	
1. Range of operators and regularity of solutions	40 183–198
Stein, E. M.	
1. Note on the class $L \log L$	32 305–310
2. (and S. Wainger) The estimation of an integral arising in multiplier transformations	35 101–104
Stephani, I.	
1. Injektive Operatorenideale über der Gesamtheit aller Banachräume und ihre topologische Erzeugung	38 105–124
Sternbach, L.	
1. (and D. W. Dean and I. Singer) On shrinking basic sequences in Banach spaces	40 23–33
Stieglitz, M.	
1. Über die Limitierbarkeit unbeschränkter Doppelfolgen	34 177–182
Strelcyn, J.	
1. On topological conjugation in linear groups	35 261–272
