

Contents of volumes XLI-L

Adams, D. R.		
1. A trace inequality for generalized potentials	48	99-105
Ahuja, M.		
1. Formally real rings of distributions	46	21-30
Alò, R. A.		
1. (and A. de Korvin and L. E. Kunes) Topological aspects of q -regular measures	48	49-60
Altman, M.		
1. Inverse differentiability contractors and equations in Banach spaces	46	1-15
2. Directional contractors and equations in Banach spaces	46	101-110
Andrieu, C.		
1. (et Bui Trong Lieu, R. Flavigny et C. Lagrand) Sur le comportement asymptotique de systèmes aléatoires gé- néralisés à liaisons complètes non homogènes	49	51-67
Aron, R. M.		
1. Holomorphy types for open subsets of a Banach space	45	273-289
Ash, J. M.		
1. (and L. Gluck) A divergent multiple Fourier series of power series type	44	477-491
Atzmon, A.		
1. Translation invariant subspaces of $L^p(G)$	48	245-250
Babalola, V. A.		
1. Integration of evolution equations in a locally convex space	50	117-125
Bachman, G.		
1. (and E. Beckenstein and L. Narici) Topological algebras of continuous functions over valued fields	48	119-127

Baernstein II, A.

1. On reflexivity and summability 42 91-94
2. On the Fourier series of functions of bounded Φ -variation 42 243-248

Bandyopadhyay, U. K.

1. Integral representation of additive transformations on L_p spaces 47 25-29

Batt, J.

1. Nonlinear integral operators on $C(S, E)$ 48 145-177

Beckenstein, E.

1. (and G. Bachman and L. Narici) Topological algebras of continuous functions over valued fields 48 119-127

Berkovitz, L. D.

1. Existence theorems in problems of optimal control . . . 44 275-285

Bessaga, C.

1. (and A. Pełczyński) On spaces of measurable functions 44 597-615

Björk, J. E.

1. Uniform algebras satisfying certain extension properties 41 107-115

Boas Jr., R. P.

1. The integrability class of the sine transform of a monotonic function 44 365-369

Boehme, T. K.

1. On power series in the differentiation operator 45 309-317

Bohnke, G.

1. Sur les idéaux primaires fermés stables par automorphismes linéaires 48 233-244

Bollobás, B.

1. Normally subregular systems in normed algebras . . . 49 263-266

Brooks, J. K.

1. (and J. Mikusiński) Weak integrals defined on Euclidean n -space 44 501-505

Brown, G.

1. (and W. Moran) In general, Bernoulli convolutions have independent powers 47 141-152

Bui-Trong-Lieu

1. (et C. Andrieu, R. Flavigny et C. Lagrand) Sur le com-

portement asymptotique de systèmes aléatoires généralisés
à liaisons complètes non homogènes 49 51-67

Burkholder, D. L.

1. (and R. F. Gundy) Distribution function inequalities for
the area integral 44 527-544

Caffarelli, L. A.

1. (and C. P. Calderón) Weak type estimates for the Hardy-
Littlewood maximal functions 49 217-223

Calderón, A. P.

1. Estimates for singular integral operators in terms of
maximal functions 44 563-582
2. (and A. Zygmund) Addendum to the paper "On singular
integrals" 46 297-299
3. Errata to the paper "Addendum to the paper "On
singular integrals"" by A. P. Calderón and A. Zygmund,
Studia Math. 46 (1973), pp. 297-299 47 305

Calderón C. P.

1. Differentiation through starlike sets in \mathbf{R}^n 48 1-13
2. (and L. A. Caffarelli) Weak type estimates for the Hardy-
Littlewood maximal functions 49 217-223

Carleson L.

1. (and P. Sjölin) Oscillatory integrals and a multiplier prob-
lem for the disc 44 287-299

Chao, J.-A.

1. (and M. H. Taibleson) A sub-regularity inequality for
conjugate systems on local fields 46 249-257
2. H^p -spaces of conjugate systems on local fields 49 267-287

Chen, J-D.

1. A theorem of Cesari on multiple Fourier series 49 69-80

Ciesielski, Z.

1. (and J. Domsta) Construction of an orthonormal basis in
 $C^m(I^d)$ and $W_p^m(I^d)$ 41 211-224
2. (and J. Domsta) Estimates for the spline orthonormal
functions and for their derivatives 44 315-320

Cleaver, Ch. E.

1. On the extension of Lipschitz-Hölder maps on Orlicz
spaces 42 195-204

- Coifman, R. R.**
1. (and G. Weiss) Invariant systems of conjugate harmonic functions associated with compact Lie groups 44 301-308
 2. (and G. Weiss) Operators associated with representations of amenable groups singular integrals induced by ergodic flows, the rotation method and multipliers 47 285-303
- Connett, W.**
1. Preservation of Lipschitz class by the iterated conjugate operator 44 507-510
- Crone, L.**
1. (and D. J. Fleming and P. Jessup) Diagonal nuclear operators 43 51-56
- Cwikel, M.**
1. On the conjugates of some function spaces 45 49-55
- Чантурия, З. А.**
1. Устойчивость процесса ортогонализации и её применения 41 273-290
- Dacunha-Castelle, D.**
1. (et J. L. Krivine) Applications des ultraproducts à l'étude des espaces et des algèbres de Banach 41 315-334
- Daniel, J. W.**
1. A generalized contraction mapping theorem in \mathcal{E} -metric spaces 50 245-250
- Dash, A. T.**
1. Joint spectra 45 225-237
- Davis, W. J.**
1. (and W. B. Johnson) On the existence of fundamental and total bounded biorthogonal systems in Banach spaces 45 173-179
- Deutsch, E.**
1. On contractions of normed vector spaces 48 179-180
- Dixon, P. G.**
1. An embedding theorem for commutative B_0 -algebras 41 163-168
- Dolecki, S.**
1. Observability for the one-dimensional heat equation . . 48 291-305

Domsta, J.

1. (and Z. Ciesielski) Construction of an orthonormal basis in $C^m(I^d)$ and $W_p^m(I^d)$ 41 211-224
2. A theorem on B -splines 41 291-314
3. (and Z. Ciesielski) Estimates for the spline orthonormal functions and for their derivatives 44 315-320

Doss, R.

1. Convolution of singular measures 45 111-117

Drewnowski, L.

1. Decompositions of set functions 48 23-48
2. On control submeasures and measures 50 203-224

Dubinsky, E.

1. A new definition of nuclear systems with applications to bases in nuclear spaces 41 149-161
2. Examples of nuclear systems 42 29-42
3. Projective and inductive limits of Banach spaces . . . 42 259-263
4. (and A. Pełczyński and H. P. Rosenthal) On Banach spaces X for which $\Pi_2(\mathcal{L}_\infty, X) = B(\mathcal{L}_\infty, X)$ 44 617-648
5. (and W. B. Robinson) A characterization of ω by block extensions 47 154-159

Dufresnoy, A.

1. Sur les compacts d'interpolation du spectre de $H^\infty(D)$ 43 235-244

Dunkl, Ch. F.

1. (and D. E. Ramirez) Sections induced from weakly sequentially complete spaces 49 95-97

Edwards, R. E.

1. (and E. Hewitt and K. A. Ross) Lacunarity for compact groups, III 44 429-476

Fabes, E.

1. The initial value problem for parabolic equations with data in $L^p(\mathbb{R}^n)$ 44 389-409

Fava, N. A.

1. Weak type inequalities for product operators 42 271-288

Fefferman, Ch.

1. Estimates for double Hilbert transforms 44 1-15

Field, M. J.

1. A finiteness result on the ring of analytic functions defined on a Banach space 46 17-20

Figiel, T.

1. An example of infinite dimensional reflexive Banach space non-isomorphic to its Cartesian square 42 295-306
2. Factorization of compact operators and applications to the approximation problem 45 191-210

Fisher, M. J.

1. Fractional powers of operators and Bessel potentials on Hilbert space 41 191-206
2. Some generalizations of the hypersingular integral operators 47 95-121
3. Recognition and limit theorems for L_p -multipliers 50 31-41

Flavigny, R.

1. (et C. Andrieu, Bui-Trong-Lieu et C. Lagrand) Sur le comportement asymptotique de systèmes aléatoires généralisés à liaisons complètes non homogènes 49 51-67

Fleming, D. J.

1. (and L. Crone and P. Jessup) Diagonal nuclear operators 43 51-56

Flett, T. M.

1. Some applications of Zygmund's lemma to non-linear differential equations in Banach and Hilbert spaces 44 335-344
2. Addendum and corrigendum to the paper "Some applications of Zygmund's lemma to non-linear differential equations in Banach spaces (Studia Math. 44(1972), pp. 335-344) 44 649-650

Freud, G.

1. On weighted \mathcal{L}_1 -approximation by polynomials 46 125-133

Gapaillard, Ch.

1. (et Pham The Lai) Remarques sur les propriétés de dualité et d'interpolation des idéaux de R. Schatten 49 129-138

Gerlach, E.

1. Generalized invariant subspaces for linear operators 42 87-90

Giesy, D. P.

1. (and R. C. James) Uniformly non- $t^{(1)}$ and B -convex Banach spaces 48 61-69

Glicksberg, I.

1. Interpolation by cones 49 235-251

Gluck, L.		
1. (and J. M. Ash) A divergent multiple Fourier series of power series type	44	477-491
Goebel, K.		
1. (and W. A. Kirk) A fixed point theorem for transformations whose iterates have uniform Lipschitz constant	47	135-140
Goffman, C.		
1. (and Fon-Che Liu) On the localization property of square partial sums for multiple Fourier series	44	61-69
Gosselin, R. P.		
1. Singular integrals and cardinal series	44	39-45
Graham, C. C.		
1. Helson sets and simultaneous extensions to Fourier transforms	43	57-60
Gulick, D.		
1. Duality theory for the strict topology	49	195-208
Gundy, R. F.		
1. (and D. L. Burkholder) Distribution function inequalities for the area integral	44	527-544
2. (and R. L. Wheeden) Weighted integral inequalities for the nontangential maximal function, Lusin area integral, and Walsh-Paley series	49	107-124
de Guzmán, M.		
1. On the derivation and covering properties of a differentiation basis	44	359-364
2. An inequality for the Hardy-Littlewood maximal operator with respect to a product of differentiation bases	49	185-194
Hagler, J.		
1. Some more Banach spaces which contain l^1	46	35-42
Hahn, S.		
1. (und K.-F. Pötter) Über Fixpunkte kompakter Abbildungen in topologischen Vektorräumen	50	1-16
Hampson, J. K.		
1. (and A. Wilansky) Sequences in locally convex spaces	45	221-223
Hartman, S.		
1. The method of Grothendieck-Ramirez and weak topologies in $C(T)$	44	181-197

Heckscher, S.	
1. Some metric and topological properties of certain linear spaces of measurable functions	43 157-172
Heideman, N. J. H.	
1. Duality and fractional integration in Lipschitz spaces	50 65-85
Helson, H.	
1. Structure of Blaschke cocycles	44 493-500
Herz, C.	
1. Drury's lemma and Helson sets	42 205-219
2. (and N. Rivière) Estimates for translation-invariant operators on spaces with mixed norms	44 511-515
Hewitt, E.	
1. (and R. E. Edwards and K. A. Ross) Lacunarity for compact groups, III	44 429-476
Hirschman Jr., I. I.	
1. Analytic functions and linearly ordered groups	44 199-202
Holmes, R. D.	
1. (and A. T.-M. Lau) Almost fixed points of semigroups of non-expansive mappings	43 217-218
Holub, J. R.	
1. A characterization of subspaces of $L^p(\mu)$	42 265-270
Hövel, H. W.	
1. (and U. Westphal) Fractional powers of closed operators	42 177-194
Hulanicki, A.	
1. (and T. Pytlik) On commutative approximate identities and cyclic vectors of induced representations	48 189-199
Huneyutt Jr., J. E.	
1. Products and convolutions of vector valued set functions	41 119-129
Hunt, R. A.	
1. An estimate of the conjugate function	44 371-377
Husain, T.	
1. (and P.-K. Wong) On generalized right modular complemented algebras	45 37-42
Jakimovski, A.	
1. (and A. Livne) An extension of Brudno-Mazur-Orlicz theorem	41 257-262

James, R. C.

1. (and D. P. Giesy) Uniformly non- ℓ^1 and B -convex Banach spaces 48 61-69

Janas, J.

1. Semi-spectral integrals and related mappings 46 301-313

Jenkins, J. W.

1. Free semigroups and unitary group representations . . 43 27-39
 2. Nonsymmetric group algebras 45 295-307

Jentsch, W.

1. Über die Struktur der rationalen Operatoren in der zwei-dimensionalen diskreten Operatorenrechnung 42 15-27

Jessup, P.

1. (and L. Crone and D. J. Fleming) Diagonal nuclear operators

Jodeit Jr., M. 43 51-56

1. An inequality for the indefinite integral of a function in L^2 44 545-554

John K.

1. (and V. Zizler) Projections in dual weakly compactly generated Banach spaces 49 41-50

Johnson, B. E.

1. Some examples in harmonic analysis 48 181-188

Johnson, W. B.

1. (and H. P. Rosenthal) On ω^* -basic sequences and their applications to the study of Banach space 43 77-92
 2. (and W. J. Davis) On the existence of fundamental and total founded biorthogonal systems in Banach spaces 45 173-179

Kahane, J.-P.

1. (and Y. Katznelson) Sur les coefficients des séries de Fourier dont les sommes partielles sont positives sur un ensemble 44 555-562

Kalton, N. J.

1. Bases in weakly sequentially complete Banach spaces 42 121-131

Katznelson, Y.

1. (et J.-P. Kahane) Sur les coefficients des séries de Fourier dont les sommes partielles sont positives sur un ensemble 44 555-562

Kirk, W. A.		
1. (and K. Goebel) A fixed point theorem for transformations whose iterates have uniform Lipschitz constant	47	135-140
Kisyński, J.		
1. On operator-valued solutions of d'Alembert's functional equation, II	42	43-66
2. On uniform symmetrization of analytic matrix functions	42	67-86
3. On cosine operator functions and one-parameter groups of operators	44	93-105
Kłosowska, M.		
1. The domain of attraction of a normal distribution in a Hilbert space	43	195-208
Kohn, M. J.		
1. Spherical convergence and integrability of multiple trigonometric series on hypersurfaces	44	345-354
Kojima, M.		
1. (and G.-I. Sunouchi) Characterization of saturation classes in $L(\mathbb{R}^n)$	48	71-81
Korányi, A.		
1. (and E. M. Stein) H^2 spaces of generalized half-planes	44	379-388
2. Correction to the paper " H^2 spaces of generalized half-planes", <i>Studia Math.</i> 44 (1972). pp. 379-388.	48	309
de Korvin, A.		
1. (and R. A. Alò and L. E. Kunes) Topological aspects of q -regular measures	48	49-60
Kraynek, W. T.		
1. Interpolation of sublinear operators on generalized Orlicz and Hardy-Orlicz spaces	43	93-123
Krivine, J. L.		
1. (et D. Dacunha-Castelle) Applications des ultraproducts à l'étude des espaces et des algèbres de Banach	41	315-334
Kuelbs, J.		
1. (and V. Mandrekar) Domains of attraction of stable measures on a Hilbert space	50	149-162
Kumar, A.		
1. (and V. Mandrekar) Stable probability measure on Banach spaces	42	133-144

Kunes, L. E.

1. (and R. A. Alò and L. E. Kunes) Topological aspects of q -regular measures 48 49-60

Kwapień, S.

1. Isomorphic characterizations of inner product spaces by orthogonal series with vector valued coefficients . . . 44 583-595

Lai, P. H.

1. L'analogie dans \mathcal{C}^p des théorèmes de convexité de M. Riesz et G. O. Thorin 46 111-124
2. Sur un théorème de M. Schechter concernant la transposée du produit de deux opérateurs 49 1-5
3. (et Ch. Gapaillard) Remarques sur les propriétés de dualité et d'interpolation des idéaux de R. Schatten 49 129-138

Langemann, B.

1. Über Greensche Funktionen singulärer elliptischer Differentialoperatoren 45 241-255

Langrand, C.

1. (et C. Andrieu, Bui Trong Lieu et R. Flavigny) Sur le comportement asymptotique de systèmes aléatoires généralisés à liaisons complètes non homogènes 49 51-67

Lau, A. T.-M.

1. Action of topological semigroups, invariant means, and fixed points 43 139-156
2. (and R. D. Homes) Almost fixed points of semigroups of non-expansive mappings 43 217-218

Leblanc, N.

1. Sur les isomorphismes d'algèbres de restriction . . . 49 7-34

Leih, T. J.

1. (and S. Simons) Splitting quasinorms and metric approximation properties 47 207-238

Leptin, H.

1. On group algebras of nilpotent Lie groups 47 37-49
2. Harmonische Analyse auf gewissen nilpotenten Lieschen Gruppen 48 201-205

Leśniewicz, R.

1. (and W. Orlicz) On generalized variations, II 45 71-109
2. On linear functionals in Hardy-Orlicz spaces, I . . . 46 53-77

3. On linear functionals in Hardy-Orlicz spaces, II . . .	46	259-295
4. On linear functionals in Hardy-Orlicz spaces, III . . .	47	261-284
Ligaud, J. P.		
1. Sur les rapports de convexité des topologies et bornologies dans les espaces nucléaires	45	181-190
2. Un exemple d'espace nucléaire dont le dual topologique est réduit à zéro	46	149-151
3. Sur les différentes définitions d'un espace nucléaire non localement convexe	48	257-269
Ligočka, E.		
1. A local factorization of analytic functions and its applications	47	239-252
Lindberg, K.		
1. On subspaces of Orlicz sequence spaces	45	119-146
Liu, Fon-Che		
1. (and C. Goffman) On the localization property of square partial sums for multiple Fourier series	44	61-69
Livne, A.		
1. (and A. Jakimovski) An extension of Brudno-Mazur-Orlicz theorem	41	257-262
Lloyd, J.		
1. Differentiable mappings on topological vector spaces	45	147-160
2. Corrigenda to "Differentiable mappings on topological vector spaces", <i>Studia Math.</i> 45 (1972), pp. 147-160. . .	49	99-100

1. Calcul différentiel dans les espaces vectoriels topologiques	47 1-23
Pichorides, S. K.	
1. On the best values of the constants in the theorem of M. Riesz, Zygmund and Kolmogorov	44 165-179
Porta, H.	
1. (and N. T. Peck) Linear topologies which are suprema of dual-less topologies	47 63-73
2. (and L. A. Rubel and A. L. Shields) Separability of orbits of functions on locally compact groups	48 89-94
Przeworska-Rolewicz, D.	
1. A characterization of commutators with Hilbert trans-	

forms	44	27-30
2. Algebraic theory of right invertible operators	48	129-144
Pötter, K.-F.		
1. (and S. Hahn) Über Fixpunkte kompakter Abbildungen in topologischen Vektorräumen	50	1-16
Pytlik, T.		
1. (and A. Hulanicki) On commutative approximate identities and cyclic vectors of induced representations	48	189-199
2. Nuclear spaces on a locally compact group	50	225-243
Ramirez, D. E.		
1. (and Ch. F. Dunkl) Sections induced from weakly sequen- tially complete spaces	49	95-97
Rao, M. M.		
1. Addendum to: "Linear operations, tensor products and contractive projections in function spaces", <i>Studia Math.</i> 38 (1970), pp. 131-186	48	307-308
Rek, A.		
1. (and J. K. Miziolek and T. Müldner) On topologically nilpotent algebras	43	41-50
Retherford, J. R.		
1. (and J. S. Morrel) p -trivial Banach spaces	43	1-25
Rieffel, M. A.		
1. Unitary representations induced from compact subgroups	42	145-175
Riemenschneider, S. D.		
1. Linear operators on $L^{1\alpha}(0, \infty)$ and Lorentz spaces: The Krasnosel'skii-Zabrieiko characteristic sets	49	223-233
Rivière, N.		
1. (and C. Herz) Estimates for translation-invariant oper- ators on spaces with mixed forms	44	511-515
Robinson, W. B.		
1. Extensions of basic sequences in Fréchet spaces	45	1-14
2. (and E. Dubinsky) A characterization of ω by block extensions	47	153-159
Rochberg, R.		
1. Exponential integrability of certain singular integral transforms	50	183-187

Rolewicz, S.

1. On optimal observability of linear systems with infinite-dimensional states 44 411-416
2. On perturbations of deviations of periodic differential-difference equations in Banach spaces 47 31-35

Rosenthal, H. P.

1. (and W. B. Johnson) On ω^* -basic sequences and their applications to the study of Banach spaces 43 77-92
2. (and E. Dubinsky and A. Pełczyński) On Banach spaces X for which $\Pi_2(\mathcal{L}_\infty, X) = B(\mathcal{L}_\infty, X)$ 44 617-648

Ross, K. A.

1. (and R. E. Edwards, E. Hewitt) Lacunarity for compact groups, III 44 429-476

Rubel, L. A.

1. (and H. Porta and A. L. Shields) Separability of orbits of functions on locally compact groups 48 89-94

Rudin, W.

1. Invariant means on L^∞ 44 219-227

Sagher, Y.

1. Interpolation of r -Banach spaces 41 45-70
2. An application of interpolation theory to Fourier series 41 169-181
3. Some remarks on interpolation of operators and Fourier coefficients 44 239-252

Sato, R.

1. On the individual ergodic theorem for subsequences . . 45 31-35
2. A general ratio ergodic theorem for Abel sums 46 223-233

Schäffer, J. J.

1. (and P. Nyikos) Flat spaces of continuous functions . . 42 221-229

Scheinberg, S.

1. Invariant norms for $C(T)$ 42 289-294

Schock, E.

1. Approximation von Elementen eines lokalkonvexen Raumes 41 263-271

Schwabik, Š.

1. A remark on the d -characteristic and d_E -characteristic of linear operators in a Banach space 48 251-255

Seeley, R.		
1. Interpolation in L^p with boundary conditions	44	47-60
Seneta, E.		
1. On strong ergodicity of inhomogeneous products of finite stochastic matrices	46	241-247
Shapiro, H. S.		
1. Boundary values of bounded holomorphic functions	44	355-358
Shapiro, V. L.		
1. Singular integrals and spherical convergence	44	253-262
Shields, A. L.		
1. (and H. Porta and A. L. Rubel) Separability of orbits of functions on locally compact groups	48	89-94
Shreve, D. C.		
1. Approximation of translation invariant operators	41	35-43
Shultz, H. S.		
1. Linear operators and operational calculus, Part II	41	1-25
Simons, S.		
1. (and T. J. Leih) Splitting quasinorms and metric approximation properties	47	207-238
Singer, I.		
1. On a problem of moments of S. Rolewicz	48	95-98
Sjölin, P.		
1. (and L. Carleson) Oscillatory integrals and multiplier problem for the disc	44	287-299
Skórnik, K.		
1. Hereditarily periodic distributions	43	245-272
Ślodkowski, Z.		
1. On ideals consisting of joint topological divisors of zero	48	83-88
2. (and W. Żelazko) On joint spectra of commuting families of operators	50	127-148
Stein, E. M.		
1. (and A. Korányi) H^2 spaces of generalized half-planes	44	379-388
2. Correction to the paper " H^2 spaces of generalized half-planes", <i>Studia Math.</i> 44 (1972), pp. 379-388.	48	309

Stiles, W. J.	
1. Some properties of l_p , $0 < p < 1$	42 109-119
Strasburger, A.	
1. (and A. Wawrzyńczyk) Reciprocity theorems in the theory of representations of groups	42 1-14
Subramanian, P. K.	
1. Two-norm spaces and decompositions of Banach spaces, I	43 179-194
Sundaresan, K.	
1. Spaces of continuous functions into a Banach space . .	48 15-22
Sunouchi, G.-I.	
1. (and M. Kojima) Characterization of saturation classes in $L(\mathbf{R}^n)$	48 71-81
Swartz, Ch.	
1. Convergence of convolution operators	42 249-257
2. (and D. E. Myers) Correction to the paper "Random functionals on $K\{M_p\}$ spaces", <i>Studia Math.</i> 39 (1971), pp. 233-240	43 273
3. Fourier transforms of convolution operators	45 211-219
Szafraniec, F. H.	
1. Decompositions of non-contractive operator-valued representations of Banach algebras	42 97-108
Szmydt, Z.	
1. On regular temperature distributions	44 309-314
Шрагин, И. В.	
1. Оператор суперпозиции в модулярных функциональных пространствах	43 61-75
Szymański, W.	
1. Decompositions of operator-valued functions in Hilbert spaces	50 265-280
Taibleson, M. H.	
1. (and J.-A. Chao) A sub-regularity inequality for conjugate systems on local fields	46 249-257
Takács, L.	
1. On a formula of Pollaczek and Spitzer	41 27-34

Tomczak-Jaegermann, N.

1. The moduli of smoothness and convexity and the Rademacher averages of the trace classes S_p ($1 \leq p < \infty$) 50 163-182

Torchinsky, A.

1. Singular integrals in the spaces $\Lambda(B, X)$ 47 165-190

Toruńczyk, H.

1. Smooth partitions of unity on some non-separable Banach spaces 46 43-51

Triebel, H.

1. Über die Existenz von Schauderbasen in Sobolev-Besov-Räumen. Isomorphiebeziehungen 46 83-100

Троянски, С. Л.

1. Об эквивалентных нормах и минимальных системах в несепарабельных пространствах Банаха 43 125-138

Trudinger, N. S.

1. An imbedding theorem for $H^\circ(G, \Omega)$ -spaces 50 17-30

Turpin, Ph.

1. Un critère de compacité dans les espaces vectoriels topologiques 46 141-148
 2. Opérateurs linéaires entre espaces d'Orlicz non localement convexes 46 153-165
 3. Espaces et intersections d'espaces d'Orlicz non localement convexes 46 167-195

Tzimbalario, J.

1. Some Mazur-Orlicz-Brudno like theorems 48 107-117

Ульянов, П. Л.

1. О приближении функций класса $\varphi(L)$ 44 417-427

Unni, K. R.

1. A note on multipliers on a Segal algebra 49 125-127

Urbanik, K.

1. Lévy's probability measures on Euclidean spaces . . . 44 119-148
 2. Generalized convolutions, II 45 57-70

Valdivia, M.

1. On weak compactness 49 35-40

Varma, A. K.

1. Some remarks on a theorem of S. M. Lozinski concerning linear process of approximation of periodic functions 41 183-190

Vogt, A.		
1. Maps which preserve equality of distance	45	43-48
Waelbroeck, L.		
1. About the space $\cap l_p, p > 0$	42	95-96
Wainger, S.		
1. (and P. Ney) The renewal theorem for random walk in two-dimensional time	44	71-85
Walsh, T.		
1. Correction to the paper "On weighted H^p spaces", <i>Studia Math.</i> 40 (1971), pp. 109-159	41	117-118
2. On the function of Marcinkiewicz	44	203-217
Wang, H. Ch.		
1. Nonfactorization in group algebras	42	231-241
Waszak, A.		
1. Some remarks on strong (\mathfrak{M}, φ) -summability	46	235-239
Watanabe, H.		
1. On the continuity property of Gaussian random fields	49	81-97
Waterman, D.		
1. On convergence of Fourier series of functions of generalized bounded variation	44	107-117
2. Correction to the paper "On convergence of Fourier series of functions of generalized bounded variation" <i>Studia Math.</i> 44 (1972), pp. 107-117	44	651
Wawrzyńczyk, A.		
1. (and A. Strasburger) Reciprocity theorems in the theory of representations of groups	42	1-14
Weiss, G.		
1. (and R. R. Coifman) Invariant systems of conjugate harmonic functions associated with compact Lie groups	44	301-308
2. (and R. R. Coifman) Operators associated with representations of amenable groups singular integrals induced by ergodic flows, the rotation method and multipliers	47	285-303
Welland, G. V.		
1. Riesz-Bochner summability of Fourier integrals and Fourier series	44	229-238

Wells, D. M.

1. Function algebras on the interval and circle 45 291-293
2. Rational approximation on arcs in C^n 49 161-163

Weron, A.

1. On characterizations of interpolable and minimal stationary processes 49 165-183

Westphal, U.

1. (and H. W. Hövel) Fractional powers of closed operators 42 177-194

Wheeden, R. L.

1. A note on a generalized hypersingular integral 44 17-26
2. (and R. F. Gundy) Weighted integral inequalities for the nontangential maximal function, Lusin area integral, and Walsh-Paley series 49 107-124

Wheeler, R. F.

1. The equicontinuous weak* topology and semi-reflexivity 41 243-256

Wilansky, A.

1. (and J. K. Hampson) Sequences in locally convex spaces 45 221-223

de Wilde, M.

1. On weak and Schauder decompositions 41 145-148

Wojtaszczyk, P.

1. Some remarks on the Gurarij space 41 207-210
2. Existence of some special bases in Banach spaces 47 83-93
3. On complemented subspaces and unconditional bases in $l_p + l_q$ 47 197-206

Wong, P.-K.

1. (and T. Husain) On generalized right modular complemented algebras 45 37-42

Woo, J. Y. T.

1. On modular sequence spaces 48 271-289

Woodward, G. S.

1. The generalized almost periodic part of an ergodic function 50 103-116

Ylinen, K.
