

Contents of volumes LXI-LXX

	Volume	Pages
Abramov, Yu. Sh.		
1. On the geometric properties of the joint spectrum of a family of self-adjoint operators	61	55-62
Abramovič, Y. A.		
1. (and B. D. Positselskii and L. P. Yanovskii) On some parameters associated with normed lattices and on series characterisation of M -spaces	63	1-8
de Acosta, A.		
1. (and J. D. Samur) Infinitely divisible probability measures and the converse Kolmogorov inequality in Banach spaces	66	143-160
Aguilera, N.		
1. (and C. Segovia) Weighted norm inequalities relating the g_λ^* and the area functions	61	293-303
Айзенгендлер, П. Г.		
1. (и М. М. Вайнберг) О ветвлении и устойчивости периодических решений дифференциальных уравнений с неаналитической правой частью	63	9-30
Albrecht, E.		
1. On joint spectra	64	263-271
Allinger, D. F.		
1. Characterization of (p, q, r) -absolutely summing operators on Hilbert space	70	177-181
Alonso, J. A.		
1. On the inversion of pseudo-differential operators	64	25-32

Alpseymen, M.		
1. Basic sequences in stable infinite type power series spaces	70	21-26
Alspach, D. E.		
1. $C(K)$ norming subsets of $C[0, 1]$	70	27-61
Andersen, K. F.		
1. (and R. T. John) Weighted inequalities for vector-valued maximal functions and singular integrals	69	19-31
Andrew, A. D.		
1. Perturbations of Schauder bases in the spaces $C(K)$ and L^p , $p > 1$	65	287-298
Ash, J. M.		
1. (and P. F. Ash, C. L. Fefferman and R. L. Jones) Singular integral operators with complex homogeneity	65	31-50
Ash, P. F.		
1. (and J. M. Ash, C. L. Fefferman and R. L. Jones) Singular integral operators with complex homogeneity	65	31-50
Atkin, C. J.		
1. Bounded complete Finsler structures I	62	219-228
Aupetit, B.		
1. Continuité et uniforme continuité du spectre dans les algèbres de Banach	61	99-114
Aytuna, A.		
1. (and T. Terzioğlu) On certain subspaces of a nuclear power series spaces of finite type	69	79-86
Badé, W. G.		
1. (and P. C. Curtis, Jr., and K. B. Laursen) Divisible subspaces and problems of automatic continuity	68	159-186
Baishanski, B. M.		
1. (and R. R. Coifman) Pointwise estimates for commutator singular integrals	62	1-15

Bart, H.		
1. (and D. C. Lay) The stability radius of a bundle of closed linear operators	66	307-320
Beauzamy, B.		
1. Propriété de Banach-Saks	66	227-235
Behrends, E.		
1. J^p -Struktur in Banachräumen II	62	47-63
2. (and U. Schmidt-Bichler) M -structure and the Banach-Stone theorem	69	33-40
3. Operators which respect norm intervals	70	203-220
Bellenot, S. F.		
1. Factorization of compact operators and finite representability of Banach spaces with applications to Schwartz spaces	62	273-286
Billard, P.		
1. Sur la primarité des espaces $C(\alpha)$	62	143-162
Blei, R. C.		
1. Corrigendum and addendum to the paper "A simple diophantine condition in harmonic analysis", <i>Studia Math.</i> 52 (1975), pp. 195-202	68	105-106
Bloom, W. R.		
1. Interpolation of multipliers of L^p_T	66	283-289
Boos, J.		
1. Über die μ -Stetigkeit von Matrizen	70	197-202
Bourgain, J.		
1. Sets with Radon-Nikodým property in conjugate Banach space	66	291-297
2. Dentability and finite-dimensional decompositions	67	135-148
3. A nondentable set without the tree property	68	131-139
Bożejko, M.		
1. A new group algebra and lacunary sets in discrete non-commutative groups	70	165-175

Brown, G.	
1. (and W. Moran) Corrigendum and addendum to the paper "In general, Bernoulli convolutions have independent powers", <i>Studia Math.</i> 47 (1973), pp. 141-152	61 25-28
2. Spectral extension and power independence in measure algebras	70 81-99
Brown, H. I.	
1. (and F. P. Cass and I. J. W. Robinson) On isomorphisms between certain subalgebras of $B(X)$	63 189-197
Bruna, J.	
1. On inverse-closed algebras of infinitely differentiable functions	69 59-68
Buraczewski, A.	
1. (and R. Sikorski) Analytic formulae for determinant systems in Banach spaces	67 85-101
Byczkowski, T.	
1. Norm convergent expansion for L_ϕ -valued Gaussian random elements	64 87-95
2. Zero-one laws for Gaussian measures on metric abelian groups	69 159-189
Calderón, A. P.	
1. (and R. Scott) Sobolev type inequalities for $p > 0$	62 75-92
2. Correction to "On an integral of Marcinkiewicz", <i>Studia Math.</i> 57 (1976), pp. 279-284	62 105
3. (and A. Zygmund) A note on singular integrals	65 77-87
Calderón, C. P.	
1. On a singular integral	65 312-335
Cambern, M.	
1. A Holsztyński theorem for spaces of continuous vector-valued functions	63 213-217
Carl, B.	
1. Inequalities between absolutely (p, q) -summing norms	69 143-148
Cass, F. P.	
1. (and H. I. Brown, and I. J. W. Robinson) On isomorphisms between certain subalgebras of $B(X)$	63 189-197

Ceașescu, Z.	
1. (and F.-H. Vasilescu) Tensor products and Taylor's joint spectrum	62 305-311
Chan, L. Y.	
1. (and Y. M. Chen and M. C. Liu) Some properties of asymptotic functions	67 65-72
Chang, S.-Y. A.	
1. A generalized area integral estimate and applications	69 109-121
Channing, Ch.	
1. Representation of random linear functionals on certain $S\{M_p\}$ spaces	64 195-212
Chao, J.-A.	
1. (and M. H. Taibleson) Generalized conjugate systems on local fields	64 213-225
Chen, J.-D.	
1. (and I. L. Hwang) On the representation of measurable functions by multiple trigonometric series	69 289-302
Chen, Y. M.	
1. (and L. Y. Chan and M. C. Liu) Some properties of asymptotic functions	67 65-72
Chō, M.	
1. (and M. Takaguchi) Identity of Taylor's joint spectrum and Dash's joint spectrum	70 225-229
Chung, K. L.	
1. (and S. R. S. Varadhan) Kac functional and Schrödinger equation	68 249-260
Cohen, J.	
1. Multilinear singular integrals	68 261-280
Coifman, R. R.	
1. (and B. M. Baishanski) Pointwise estimates for commutator singular integrals	62 1-15

- Crenshaw, J. A.**
 1. (and R. B. Kirk) Group valued, α -additive set functions 65 89-101
- Curtis, P. C., Jr.**
 1. (and W. G. Badé and K. B. Laursen) Divisible subspaces and problems of automatic continuity 68 159-186
- Cwikel, M.**
 1. (and C. Fefferman) Maximal seminorms on Weak L^1 69 149-154
- Cygan, J.**
 1. Heat kernels for class 2 nilpotent groups 64 227-238
- Dahlberg, B. E. J.**
 1. On the Poisson integral for Lipschitz and C^1 -domains . . 66 13-24
 2. Weighted norm inequalities for the Lusin area integral and the nontangential maximal functions for functions harmonic in a Lipschitz domain 67 297-314
- Dales, H. G.**
 1. Eventual continuity in Banach algebras of differentiable functions 70 101-109
- Delbaen, F.**
 1. The Pełczyński property for some uniform algebras . 64 117-125
- Djakov, P. B.**
 1. (and B. S. Mitiagin) The structure of polynomial ideals in the algebra of entire functions 68 87-104
- Dobrowolski, T.**
 1. Smooth and R -analytic negligibility of subsets and extension of homeomorphisms in Banach spaces . . 65 115-139
- Drewnowski, L.**
 1. F -spaces with a basis which is shrinking but not hyper-shrinking 64 97-104
- Dubinsky, E.**
 1. (and W. Robinson) Quotient spaces of (s) with basis . . 63 267-281
 2. Basic sequences in a stable finite type power series space 68 117-130
- Ehmke, H.**
 1. Kommutative Banachalgebren und hermitesch-äquivalente Elemente 63 31-36
- Enflo, P.**
 1. (and T. W. Starbird) Subspaces of L^1 containing L^1 65 203-225
- Esterle, J.**
 1. Homomorphismes discontinus des algèbres de Banach commutatives séparables 66 119-141
- Evans, R.**
 1. Resolving Banach spaces 69 91-107
- Fakhoury, H.**
 1. Quelques propriétés de l'espace des opérateurs compacts 64 239-247
- Fava, N. A.**
 1. (and E. A. Gatto and G. Gutiérrez) On the strong maximal function and Zygmund's class $L(\log^+L)^n$ 69 155-158
- Fefferman, C. L.**
 1. (and J. M. Ash, P. F. Ash and R. L. Jones) Singular integral operators with complex homogeneity 65 31-50
 2. (and M. Cwikel) Maximum seminorms on Weak L^1 . 69 149-154
- Figiel, T.**
 1. Uniformly convex norms on Banach lattices. 68 215-247
- Folland, G. B.**
 1. Lipschitz classes and Poisson integrals on stratified groups 66 37-55
- Fong, C.-K.**
 1. On M -hyponormal operators 65 1-5
- Fournier, J. J. F.**
 1. Extensions of a Fourier multiplier theorem of Paley, II 64 33-63
- Gallardo, L.**
 1. (et V. Riesz) La loi des grands nombres pour les marches aléatoires sur le dual de $SU(2)$ 66 93-105
- Garske, G.**
 1. Duality of linear operators in locally convex spaces . 63 37-44

- Gasper, G.**
- (and W. Trebels) A characterization of localized Bessel potential spaces and applications to Jacobi and Henkel multipliers 65 243-278
 - (and W. Trebels) Multiplier criteria of Hörmander type for Jacobi expansions 68 187-197
- Gatto, E. A.**
- (and N. A. Fava and G. Gutiérrez) On the strong maximal function and Zygmund's class $L(\log^+L)^{\lambda}$ 69 155-158
- Gaudry, G. I.**
- (and I. R. Inglis) Weak-strong convolution operators on certain disconnected groups 64 1-12
- Gejler, W.**
- On extending and lifting continuous linear mappings in topological vector spaces 62 295-303
- Gluskin, E. D.**
- (and A. Pietsch and J. Puhl) A generalization of Khintchine's inequality and its application in the theory of operator ideals 67 149-155
- Głowacki, P.**
- On functions with scattered spectra on lca groups 70 147-152
- Goffman, C.**
- (and D. Waterman) The localization principle for double Fourier series 69 41-57
- Górniak, J.**
- (and A. Weron) Aronszajn-Kolmogorov type theorems for positive definite kernels in locally convex spaces 69 235-246
- Gózdź, C.**
- Suites concordantes d'espaces normés et leurs applications I 62 169-192
- Gózdź, S.**
- On an integral representation of antisymmetric operations in Hilbert spaces. I. Bounded operations 62 27-37
- Graham, C. C.**
- (and A. MacLean) A multiplier theorem for continuous measures 66 213-225

- Gutiérrez, G.**
- (and N. A. Fava and E. A. Gatto) On the strong maximal function and Zygmund's class $L(\log^+L)^{\lambda}$ 69 155-158
- Haagerup, U.**
- The best constants in the Khintchine inequality 70 231-283
- Hagler, J.**
- Nonseparable "James tree" analogues of the continuous functions on the Cantor set 61 41-53
- Hahn, S.**
- Ein Homotopieerweiterungssatz für konzentrierende mengenwertige Abbildung in lokalkonvexen topologischen Vektorräumen 66 107-117
- Hamedani, G. G.**
- (and V. Mandrekar) Lévy-Khintchine representation and Banach spaces of type and cotype 66 299-306
- de la Harpe, P.**
- The algebra of compact operators does not have any finite-codimensional ideal 66 33-36
- Hasegava, Y.**
- L^p -integrability ($1 \leq p \leq \infty$) of a class of integral transforms 70 183-195
- Heinig, H. P.**
- The Marcinkiewicz interpolation theorem extends to weighted spaces 62 163-168
- Hoffmann-Jørgensen, J.**
- Integrability of seminorms, the 0-1 law and the affine kernel for product measures 61 137-159
- Hwang, I. L.**
- (and J.-D. Chen) On the representation of measurable functions by multiple trigonometric series 69 289-302
- Inglis, I. R.**
- (and G. I. Gaudry) Weak-strong convolution operators on certain disconnected groups 64 1-12
 - Addendum to the paper "Weak-strong convolution operators on certain disconnected groups" 70 161-163

Iwanik, A.	
1. Extreme operators on AL-spaces	65 103-114
Jajte, R.	
1. Semi-stable probability measures on \mathbf{R}^N	61 29-39
2. (and A. Paszkiewicz) Vector measures on the closed subspaces of a Hilbert space	63 229-251
3. (and R. I. Loebel) Gleason measures and some inner products on the algebra of bounded operators on a Hilbert space	70 139-145
Jawerth, B.	
1. The trace of Sobolev and Besov spaces if $0 < p < 1$	62 65-71
Jewell, N. P.	
1. Fredholm Toeplitz operators on strongly pseudoconvex domains	68 25-34
John, K.	
1. (and H. Toruńczyk and V. Zizler) Uniformly smooth partitions of unity of superreflexive Banach spaces	70 129-137
John, R. T.	
1. (and K. F. Andersen) Weighted inequalities for vector-valued maximal functions and singular integrals	69 19-31
Johnson, J.	
1. (and J. Wolfe) Norm attaining operators	65 7-19
Jones, B. F.	
1. A note on Hölder's inequality	64 273-278
Jones, R. L.	
1. (and J. M. Ash, P. F. Ash and C. L. Fefferman) Singular integral operators with complex homogeneity	65 31-50
2. An analog of the Marcinkiewicz integral in ergodic theory	68 281-289
Jonsson, A.	
1. Hölder continuous functions on compact sets and function spaces	68 35-48

Jurkat, W. B.	
1. (and G. Sampson) The L^p mapping problem for well-behaved convolutions	65 227-238
2. (and J. L. Troutman) A mean value inequality for positive integral transformations with application to a maximal theorem	69 227-233
Kajiser, S.	
1. Some results in the metric theory of tensor products	63 157-170
Kalb, K. G.	
1. Über die spektralen Vielfachheitsfunktionen des Multiplikationsoperators	66 1-12
Kalton, N. J.	
1. Universal spaces and universal bases in metric spaces	61 161-191
2. (and N. T. Peck) Quotients of $L_p(0, 1)$ for $0 \leq p < 1$	64 65-75
3. Convexity, type and three space problem	69 247-287
Kaufman, R.	
1. On the sum of two Brownian paths	65 51-54
Kenig, C. E.	
1. (and P. A. Tomas) Maximal operators defined by Fourier multipliers	68 79-83
Kim, C. R.	
1. Restricted and unrestricted convergence of approximate identities in product spaces	63 219-228
Kirk, R. B.	
1. (and J. A. Crenshaw) Group valued, α -additive set functions	65 89-101
Kirk, W. A.	
1. (and W. O. Ray) Fixed-point theorems for mappings defined on unbounded sets in Banach spaces	64 127-138
Knopf, P. M.	
1. Weak-type multipliers	67 73-84
Kobayashi, Y.	
1. An extension theorem of functionals on commutative semigroups	69 87-90

- Kowalski, S.**
1. (and Z. Słodkowski) A characterization of multiplicative linear functions in Banach algebras 67 215-223
- König, H.**
1. A formula for the eigenvalues of a compact operator 65 141-146
 2. s -numbers, eigenvalues and the trace theorem in Banach spaces 67 157-172
- Kramm, B.**
1. Complex analytic properties of certain uniform Fréchet-Schwartz algebras 66 247-259
- Kuo, H.-H.**
1. The chain rule for differentiable measures 63 145-155
- Kwapień, S.**
1. (and S. J. Szarek) An estimation of the Lebesgue functions of biorthogonal systems with an application to the non-existence of a certain basis in \mathcal{O} and L^1 66 185-200
- Kwiatkowski, J.**
1. Invariant measures of the shift space 69 69-78
- Lass Fernandez, D.**
1. Interpolation of 2^n Banach spaces 65 175-201
- Latter, R. H.**
1. A characterization of $H^p(\mathbf{R}^n)$ in terms of atoms 62 93-101
- Lau, K.-S.**
1. Approximation by continuous vector valued functions 68 291-298
- Laursen, K. B.**
1. (and W. G. Badé and P. O. Curtis, Jr.) Divisible subspaces and problems of automatic continuity 68 159-186
- Lay, D. C.**
1. (and H. Bart) The stability radius of a bundle of closed linear operators 66 307-320
- Lewis, D. R.**
1. Finite dimensional subspaces of L_p 63 207-212

- Leżański, T.**
1. Sur le minimum des fonctionnelles dans espaces de Banach 68 49-66
- Liu, M. C.**
1. (and L. Y. Chan and Y. M. Chen) Some properties of asymptotic functions 67 65-72
- Loebl, R. I.**
1. (and R. Jajte) Gleason measures and some inner products on the algebra of bounded operators on a Hilbert space 70 139-145
- Lubin, A.**
1. Lifting subnormal double commutants 67 315-319
- Lusky, W.**
1. A note on rotations in separable Banach spaces 65 239-242
- Lust-Piquard, F.**
1. Éléments ergodiques et totalement ergodiques dans $L^\infty(I)$ 69 191-225
- Macías, R. A.**
1. (and C. Segovia) Weighted norm inequalities for parabolic fractional integrals 61 279-291
 2. (and C. Segovia) Singular integrals on generalized Lipschitz and Hardy spaces 65 55-75
- MacLean, A.**
1. (and C. C. Graham) A multiplier theorem for continuous measures 66 213-225
- Mandrekar, V.**
1. (and G. G. Hamedani) Lévy-Khintchine representation and Banach spaces of type and cotype 66 299-306
 2. (and J. Zinn) Central limit problem for symmetric case: Convergence to non-Gaussian laws 67 279-296
- Mankiewicz, P.**
1. A remark on Edgar's extremal integral representation theorem 63 259-265
 2. Fat equicontinuous groups of homeomorphisms of linear topological spaces and their application to the problem of isometries in linear metric spaces 64 13-23

Mantero, A. M.		
1. (and A. Tonge) The Schur multiplication in tensor algebras	68	1-24
Marshall, B.		
1. Differentiability of distributions at a single point	67	173-213
2. Tempered nontangential boundedness	67	241-277
Massé, J. C.		
1. Intégration dans les semi-groupes	66	57-80
Maurey, B.		
1. (and H. P. Rosenthal) Normalized weakly null sequence with no unconditional subsequences	61	77-98
McGrath, S. A.		
1. Abelian ergodic theorems for contraction semigroups	61	21-24
2. Some ergodic theorems for commuting L_1 contractions	70	153-160
Meshkov, V. Z.		
1. Smoothness properties in Banach spaces	63	111-123
Misiurewicz, M.		
1. (and W. Szlenk) Entropy of piecewise monotone mappings	67	45-63
Mitiagin, B. S.		
1. (and P. B. Djakov) The structure of polynomial ideals in the algebra of entire functions	68	87-104
Moran, W.		
1. (and G. Brown) Corrigendum and addendum to the paper "In general, Bernoulli convolutions have independent powers", <i>Studia Math.</i> 47 (1973), pp. 141-152	61	25-28
Morrow, J. R.		
1. On basic sequences in non-locally convex spaces	67	119-133
Moszyński, K.		
1. Concerning some version of the Lax-Milgram Lemma in normed spaces	68	67-78
Moynihan, R.		
1. Conjugate transforms and limit theorems for τ_T semi-groups	69	1-18

Muckenhoupt, B.		
1. (and R. L. Wheeden) On the dual of weighted H^1 of the half-space	63	57-79
Musiał, K.		
1. The weak Radon-Nikodym property in Banach spaces	64	151-173
Müller, M. W.		
1. L_p -approximation by the method of integral Meyer-König and Zeller operators	63	81-88
Neri, U.		
1. Some properties of functions with bounded mean oscillation	61	63-75
Nguyen, T. Cao		
1. A characterization of some weak semi-continuity of integral functionals	66	81-92
Nguyen, Thu Van		
1. Multiply self-decomposable probability measures on Banach spaces	66	161-175
2. Multiply self-decomposable measures in generalized convolution algebras	66	177-184
Oberlin, D. M.		
1. An approximation problem in $L^p([0, 2\pi])$, $2 < p < \infty$	70	221-224
Paszkievicz, A.		
1. (and R. Jajte) Vector measures on the closed subspaces of a Hilbert space	63	229-251
Peck, N. T.		
1. (and N. J. Kalton) Quotients of $L_p(0, 1)$ for $0 \leq p < 1$	64	65-75
Pectre, J.		
1. Two observations on a theorem by Coifman	64	191-194
Pflug, P.		
1. Bestimmungsflächen für des Randwachstum holomorpher Funktionen auf analytischen Polyedern	62	39-46
Pietsch, A.		
1. (and E. D. Gluskin and J. Puhl) A generalization of		

Khintchine's inequality and its application in the theory of operator ideals	67	149-155
Pigno, L.		
1. (and S. Sacki) Constructions of singular measures with remarkable convolution properties	69	133-141
Pokrzywa, A.		
1. Method of orthogonal projections and approximation of the spectrum of a bounded operator	65	21-29
2. Method of orthogonal projections and approximation of the spectrum of a bounded operator II	70	1-9
Pol, R.		
1. A function space $C(X)$ which is weakly Lindelöf but not weakly compactly generated	64	279-285
Positselskiĭ, E. D.		
1. (and Y. A. Abramovič and L. P. Yanovskiĭ) On some parameters associated with normed lattices and on series characterisation of M -spaces	63	1-8
Przytycki, F.		
1. Construction of invariant sets for Anosov diffeomorphisms and hyperbolic attractors	68	199-213
Pták, V.		
1. Factorization in Banach algebras	65	279-285
Puhl, J.		
1. (and E. D. Gluskin and A. Pietsch) A generalization of Khintchine's inequality and its application in the theory of operator ideals	67	149-155
Pym, J. S.		
1. (and H. L. Vasudeva) The algebra of finitely additive measures on a partially ordered semigroups	61	7-19
Racher, G.		
1. Über c_0 -Modultensorprodukte	66	201-211
Raeburn, I.		
1. On Toeplitz operators associated with strongly pseudoconvex domains	63	253-258

Ramanujan, M. S.		
1. (and S. Terzioğlu) Subspaces of smooth sequence spaces	65	299-312
Ray, W. O.		
1. (and W. A. Kirk) Fixed-point theorems for mappings defined on unbounded sets in Banach spaces	64	127-138
Reynov, O. I.		
1. On some Banach ideals of operators	69	123-131
Ries, V.		
1. (et L. Gallardo) La loi des grands nombres les marches aléatoires sur le dual de $SU(2)$	66	93-105
Robinson, I. J. W.		
1. (and H. I. Brown and F. P. Cass) On isomorphisms between certain subalgebras of $B(X)$	63	189-197
Robinson, W.		
1. (and E. Dubinsky) Quotient spaces of (s) with basis	63	267-281
Rosenthal, H. P.		
1. (and B. Maurey) Normalized weakly null sequence with no unconditional subsequence	61	77-98
Rubin, R. L.		
1. Harmonic analysis on the group of rigid motions of the Euclidean plane	62	125-141
Ryll, J.		
1. Interpolating bases for spaces of differentiable functions	63	125-144
Sacki, S.		
1. (and L. Pigno) Constructions of singular measures with remarkable convolution properties	69	133-141
Sagher, Y.		
1. On the Fejér-F. Riesz inequality in L^p	61	269-278
Самко, С. Г.		
1. Пространства $L_{p,r}^{\mu}(\mathbb{R}^n)$ и гиперсингулярные интегралы	61	193-230
Sampson, G.		
1. (and W. B. Jurkat) The L^p mapping problem for well-behaved convolutions	65	227-238
2. A note on weak estimates for oscillating kernels	70	111-127

Samur, J. D.

1. (and A. de Acosta) Infinitely divisible probability measures and the converse Kolmogorov inequality in Banach spaces 66 143-160

Sato, R.

1. On local ergodic theorems for positive semigroups 63 45-55
 2. Ratio limit theorems and applications to ergodic theory 66 237-245

Schmidt-Bichler, U.

1. (and E. Behrends) M -structure and the Banach-Stone theorem 69 33-40

Scott, R.

1. (and A. P. Calderón) Sobolev type inequalities for $p > 0$ 62 75-92

Segovia, C.

1. (and N. Aguilera) Weighted norm inequalities relating the g_λ^* and the area functions 61 293-303
 2. (and R. A. Macías) Weighted norm inequalities for parabolic fractional integrals 61 279-291
 3. (and R. A. Macías) Singular integrals on generalized Lipschitz and Hardy spaces 65 55-75

Semenov, Yu. A.

1. On the problem of convergence of a bounded below sequence of symmetric forms for the Schrödinger operator 64 77-85

Sharpley, R.

1. Counterexamples for classical operators on Lorentz-Zygmund spaces 68 141-158

Sikorski, R.

1. (and A. Buraczewski) Analytic formulae for determinant systems in Banach spaces 66 85-101

Ślodkowski, Z.

1. An infinite family of joint spectra 61 239-255
 2. (and S. Kowalski) A characterization of multiplicative linear functions in Banach algebras 67 215-223

Sparr, G.

1. Interpolation of weighted L_p -spaces 62 229-271

Starbird, T. W.

1. (and P. Enflo) Subspaces of L^1 containing L^1 . . . 65 203-225

Stern, J.

1. Le groupe des isométries d'un espace de Banach . . . 64 139-149

Swartz, Ch.

1. Correction to "Unconditionally converging and Dunford-Pettis operators on $C_X(S)$ ", *Studia Math.* 57 (1976), pp. 85-90 62 103

Szarek, S. J.

1. (and S. Kwapien) An estimation of the Lebesgue functions of biorthogonal systems with an application to the non-existence of a certain basis in C and L^1 66 185-200

Szatzschneider, W.

1. A version of the Harris-Spitzer "random constant velocity" model for infinite systems of particles . . . 63 171-187

Szlenk, W.

1. On weakly* conditionally compact dynamical systems 66 25-32
 2. (and M. Misiurewicz) Entropy of piecewise monotone mappings 67 45-63

Taibleson, M. H.

1. (and J.-A. Chao) Generalized conjugate systems on local fields 64 213-225

Takaguchi, M.

1. (and M. Chō) Identity of Taylor's joint spectrum and Dash's joint spectrum 70 225-229

Talagrand, M.

1. Compact de fonctions mesurables et filtres non mesurables 67 13-43

Taylor, G. C.

1. A topological version of some ergodic theorems . . . 63 199-205

Terzioğlu, T.

1. (and M. S. Ramanujan) Subspaces of smooth sequence spaces 65 299-312
 2. (and A. Aytuna) On certain subspaces of a nuclear power series spaces of finite type 69 79-86

Tomas, P. A.		
1. (and C. E. Kenig) Maximal operators defined by Fourier multipliers	68	79-83
Tomczak-Jaegermann, N.		
1. Finite-dimensional subspaces of uniformly convex and uniformly smooth Banach lattices and trace classes S_p	66	261-281
Tonge, A.		
1. Le presque-périodicité et les coalgèbres injectives	67	107-118
2. (and A. M. Mantero) The Schur multiplication in tensor algebras	68	1-24
Torchinsky, A.		
1. The K -functional for rearrangement invariant spaces	64	175-190
Toruńczyk, H.		
1. (and K. John and V. Zizler) Uniformly smooth partitions of unity of superreflexive Banach spaces	70	129-137
Trebels, W.		
1. (and G. Gasper) A characterization of localized Bessel potential spaces and applications to Jacobi and Henkel multipliers	65	243-278
2. (and G. Gasper) Multiplier criteria of Hörmander type for Jacobi expansions	68	187-197
Troutman, J. L.		
1. (and W. B. Jurkat) A mean value inequality for positive integral transformations with applications to a maximal theorem	69	227-233
Tsitsas, L.		
1. On the heredity of weak compactness in biprojective tensor product spaces	61	1-6
Urbanik, K.		
1. Lévy's probability measures on Banach spaces	63	283-308
Urbański, R.		
1. Decomposition of set functions with values in a topological semigroups	61	115-125
Vági, S.		
1. H^2 spaces of generalized half-planes	61	127-136
2. H^2 spaces of generalized half-planes	62	17-26

Varadhan, S. R. S.		
1. (and K. L. Chung) Kac functional and Schrödinger equation	68	249-260
Vašák, L.		
1. On one generalization of weakly compactly generated Banach spaces	70	11-19
Vasilescu, F.-H.		
1. On pairs of commuting operators	62	203-207
2. (and Z. Ceaușescu) Tensor products and Taylor's joint spectrum	62	305-311
Vasudeva, H. L.		
1. (and J. S. Pym) The algebra of finitely additive measures on a partially ordered semigroups	61	7-19
Vogt, D.		
1. (und M. J. Wagner) Charakterisierung der Quotientenräume von s und eine Vermutung von Martineau	67	225-240
2. (und M. J. Wagner) Charakterisierung der Unterräume und Quotientenräume der nuklearen stabilen Potenzreihenräume von unendlichem Typ	70	63-80
Wagner, M. J.		
1. (und D. Vogt) Charakterisierung der Quotientenräume von s und eine Vermutung von Martineau	67	225-240
2. (und D. Vogt) Charakterisierung der Unterräume und Quotientenräume der nuklearen stabilen Potenzreihenräume von unendlichem Typ	70	63-80
Вайнберг, М. М.		
1. (и П. Г. Айзенгелдер) О ветвлении и устойчивости периодических решений дифференциальных уравнений с неаналитической правой частью	69	9-30
Waterman, D.		
1. (and C. Goffman) The localization principle for double Fourier series	69	41-57
Weron, A.		
1. (and J. Górnjak) Aronszajn-Kolmogorov type theorems for positive definite kernels in locally convex spaces	69	235-246

Wheeden, R. L.

1. (and B. Muckenhoupt) On the dual of weighted H^1 of the half-space 63 57-79

Wojtaszczyk, P.

1. On projections and unconditional bases in direct sums of Banach spaces II 62 193-201
 2. On weakly compact operators from some uniform algebras 64 105-116
 3. On projections in spaces of bounded analytic functions with applications 65 147-173

Wolfe, J.

1. (and J. Johnson) Norm attaining operators 65 7-19

Wood, G. R.

1. A note on automorphisms of semigroups and near-rings of mappings 62 209-218

Wu, J.-M. G.

1. Boundary limits of Green's potentials along curves II. Lipschitz domains 62 287-294

Yabuta, K.

1. A remark to the paper of Jones "Toeplitz operators related to certain domains in C^m " 62 73-74

Yanovskii, L. P.

1. (and Y. A. Abramovič and E. D. Positselskiĭ) On some parameters associated with normed lattices and on series characterisation of M -spaces 63 1-8

Yoshimoto, T.

1. On the random ergodic theorem 61 231-237

Zafran, M.

1. A multilinear interpolation theorem 62 107-124

Zemánek, J.

1. Spectral radius characterization of commutativity in Banach algebras 61 257-268
 2. Spectral characterization of two-sided ideals in Banach algebras 67 1-12

Zibman, I. B.

1. Some characterization of the n -dimensional Peano derivative 63 89-110

Zinn, J.

1. (and V. Mandrekar) Central limit problem for symmetric case: Convergence to non-Gaussian laws 67 279-296

Zizler, V.

1. (and K. John and H. Toruńczyk) Uniformly smooth partitions of unity on superreflexive Banach spaces 70 129-137

Zó, F.

1. On functions satisfying a local Lipschitz condition of order α 68 107-116

Zygmund, A.

1. (and A. P. Calderón) A note on singular integrals 65 77-87

Żelazko, W.

1. An axiomatic approach to joint spectra I. 64 249-261
