Correction to
"Walsh equiconvergence for best l_2-approximates"

by

A. SHARMA (Edmonton) and Z. ZIEGLER (Haifa and Austin, Tex.)

On p. 524, line 7 from below, it is written that (2.4) is true for $|z| < \varrho^{ls/(s-1)}$. This is not correct and should be replaced by

$$\text{for} \quad |z| < \min \left\{ \varrho^{1 + lrs/(rs - r + 1)}, \; \varrho^{ls/(s-1)} \right\}.$$
